

Avoid Food Poisoning, Don't Eat From Unpermitted Vendors!

Promoting Safe and Thriving Communities

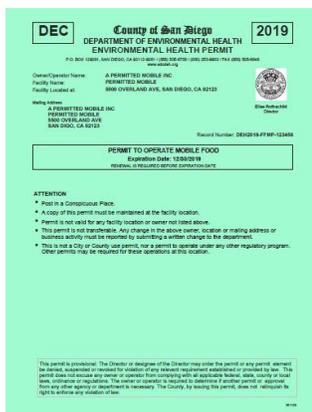

Don't eat food from vendors or facilities that are missing a health permit, food grade card, or cart/vehicle decal.

Be sure to eat from vendors/facilities that have been inspected by the Department of Environmental Health to ensure they have proper food safety training, use approved equipment, and are inspected for safe food handling and proper sanitation.

When deciding what you want to eat, make sure the food vendor or facility is approved by the County Department of Environmental Health by looking for any of the following:

Health Permit

Food Facility Grade Card

Mobile Grade Card

Mobile Cart/Vehicle Decal

Or by visiting www.sdfoodinfo.org. Download the SD Food Info mobile app for your iPhone or Android device to check to see if a mobile vehicle/cart or permanent food facility has a valid health permit and to view their inspection results for the past three years.
