MOBILE FOOD FACILITY COMMISSARIES

All mobile food facilities (MFFs) and mobile support units must be serviced at an approved commissary daily and stored there when not in use. This requirement is documented through a Commissary Agreement Letter which can be found on our website at [Department of Environmental Health and Quality - Mobile Food Program](#).

The following facilities are approved commissaries within the County of San Diego. A restaurant or other retail food facility, with a valid Department of Environmental Health and Quality (DEHQ) Permit, may also serve as a commissary if it can provide the necessary support functions to the mobile food facility. The site must be inspected and evaluated by an Environmental Health Specialist to ensure it meets these requirements. Commissaries located outside of San Diego County may be accepted under certain circumstances but must be approved by this Department.

The commissary you select will need to have all the required amenities to support your MFF operation and should be located in an area that makes sense for your mobile to be serviced and stored there daily. Please contact the commissary to determine if space is available and if their amenities suit your required needs prior to submitting your mobile food facility application to DEHQ.

The following lists include all approved mobile food commissaries that are active at the time of publication. The lists are provided solely for informational purposes, in response to a public request, and do not constitute or imply endorsements or recommendations by DEHQ or San Diego County.

UNPACKAGED MFF COMMISSARIES

Unpackaged MFF Commissaries are permitted food facilities that have amenities to support open food preparation by providing any of the following. These facilities may also support Prepackaged vehicles/carts:
