Attachments: Soitec TDS ROW map.pdf

Hello Ashley, Mindy, and Robert

I am sharing the linked brief Sothebys Realty video of the beautiful 4500 acre Lansing Empire Ranch property (1758 Jewel Valley Road, Boulevard) that will host the major share of the proposed overhead 138kV gen-tie ROW for Soitec's Tierra Del Sol Solar project: <http://www.youtube.com/watch?v=IDFd9INWsTU>

The property is listed for sale at \$17M without disclosure of the Soitec gen-tie ROW:
http://www.sothebysrealty.com/eng/sales/detail/180-1-531-20703561/empire-ranch-boulevard-ca-91905?utm_source=YouTube&utm_medium=Annotation%2bLink&utm_campaign=Property%2bVideo

Please note the mostly undisturbed nature of the rugged terrain and the unauthorized air strip that is the subject of codes enforcement action.

The video also includes Lansing's Domingo Lake property where SDG&E's new ECO Substation Lake Domingo Construction Yard/Fly Yard is in full swing for the new 138kV line that will connect the massive ECO Substation with the expanded Boulevard Substation that are now both under construction using local groundwater.

Please consider allowing me to give you a tour of the Soitec Solar project impact sites. The Tierra Del Sol ROW map is attached.

Regards,
