In several instances, these will occur on existing, graded routes. One new proposal is the switchback at the northeastern area. The feature would not be visible except when actually on the trail due to the height of the Chaparral in this

area. Another trail area is between the guest house lot 2 and lot 3, through the narrow Biological Open Space area. These trails, especially the new one, would have to be carefully designed and constructed since in some areas, the soil is very sandy and erosive. No horse use on the trails is contemplated since this would introduce high-nitrogen weeds into these preserve area.
