

Palomar Slope Landscaping

Hydroseeding Plan 2021-2024

- Developed specific hydroseed mix for the area
- Supplemented watering with water trucks in between rainfall to support plant establishment
- Landscaped for weed removal

What is Slope Tracking?

- Compact soil by driving heavy equipment up and down the slope
- Goal is to stabilize the slope to ensure integrity and prevent erosion
- Tills the vegetation under, placing the seeds back underground

Slope Integrity Concerns 2024-2025

- Cracking, Ponding, and Settlement Noted on the Slope
- Late 2024 – Partial Slope Tracking and Road Repairs
- Early 2026 – Tracking of Remainder of Slope

Next Steps

- Pending procurement process, plan to reseed ahead of the rainy season
- Tracking and repairs of slope as needed
