\*\*\*

Your community group may have previously provided formal input on these matters and your group's recommendations would be included as part of the Chief Administrative Officer's report to the Board of Supervisors along with TAC recommendations. The Board of Supervisors will make a final decision as to what action will be taken after reviewing TAC recommendations and community group input, when available.

If your community planning/sponsor group representative would like to attend the TAC meeting and participate in the discussion of an item on this agenda, or if you do have any questions or need additional information regarding this procedure, please contact me at (858) 694-3843. TAC staff is available to provide background information on items and to answer questions you may have.

Very truly yours,

Kenton R. Jones, Secretary

San Diego County Traffic Advisory Committee

2-A. Radar Certification Old Highway 80 Mile Post 4.5 to 380' W/o Pine Valley Road (0.50 mi)

COMMITTEE REPORT OF: March 12, 2020 Item 2-A

SUPERVISORIAL DISTRICT: 2

**SUBJECT:** Radar Certification

**LOCATION:** Old Highway 80 from Mile Post 4.5 to 380' west of Pine

Valley Road (a distance of 0.5 miles) PINE VALLEY

05/11

39-48

% in Pace

64.0%

(Thos. Bros. 1237-B5)

INITIATED BY: DPW Traffic Engineering

**REQUEST:** Radar Certification

#### PROBLEM AS STATED BY REQUESTER:

Old Highway 80 from Mile Post 4.5 to 380' west of Pine Valley Road is posted 45 MPH. Preliminary review of prevailing speeds and roadway conditions could support radar certification of the existing 45 MPH speed limit.

#### **Existing Traffic Devices**

Average Daily Traffic Volumes

Old Highway 80 is a striped two-lane through highway with a 36 foot travelled way and road bed. The roadway is classified as a Light Collector on the County General Plan Mobility Element Network. The roadway is posted 45 MPH.

## 2-B. Radar Certification Old Highway 80

380' W/o Pine Valley Road to 800' E/o Oak Lane (0.66 mi)

COMMITTEE REPORT OF: March 12, 2021 Item 2-B

**SUPERVISORIAL DISTRICT**: 2

**SUBJECT:** Radar Certification

**LOCATION:** Old Highway 80 from 380' west of Pine Valley Road to

800' east of Oak Lane (a distance of 0.66 miles) PINE

VALLEY (Thos. Bros. 1237-B7)

INITIATED BY: DPW Traffic Engineering

**REQUEST:** Radar Certification

#### PROBLEM AS STATED BY REQUESTER:

Old Highway 80 from 380' west of Pine Valley Road to 800' east of Oak Lane is posted 35 MPH Radar Enforced. Preliminary review of prevailing speeds and roadway conditions could support radar certification of the existing 35 MPH speed limit.

#### **Existing Traffic Devices**

Old Highway 80 is a striped two-lane through highway with a 36 foot travelled way on a 36 to 48 foot road bed. The roadway is striped with a no passing centerline, two way left turn lane, and bike lane. There are two school crosswalks along this segment at Pine Valley Road and Laguna Trail, respectively. Old Highway 80 is classified as a Light Collector on the County General Plan Mobility Element Network. The roadway is posted 35 MPH/Radar Enforced.

| (2013)                                  | 35.0 MPH          | 24-33        | 65.0%       |

#### **Collision Data**

There have been 6 reported collisions along this segment of roadway, 3 of which involved injury, in a 3 year period (10-01-17 to 09-30-20). These collisions result in a segment accident rate of 2.76 collisions per million vehicle miles. The statewide average is 0.88 collisions per million vehicle miles for similar flat rural conventional 2 lanes or less with speeds less than or equal to 55 MPH.

## 2-C. Mid-Block Crosswalk Alpine Boulevard at a point 660' west the west line of Boulders Road

COMMITTEE REPORT OF: March 12, 2021 Item <u>2-C</u>

**SUPERVISORIAL DISTRICT**: 2

SUBJECT: Mid-block Crosswalk

**LOCATION:** Alpine Boulevard, at a point 660' west of the west line

of Boulders Road ALPINE (Thos. Bros. 1234-A6)

**INITIATED BY:** DPW Traffic Engineering

REQUEST: Relocate Mid-Block Crosswalk

#### PROBLEM AS STATED BY REQUESTER:

The existing crosswalk on Alpine Boulevard, at a point 660' west of the west line of Boulders Road, was installed in 2014 to address pedestrian crossings at the Alpine Elementary School. In 2019, the school closed and was replaced by Alpine Education Complex, an adult education complex/home high school support center. The County's Alpine Library, built in 2016 could better use the crosswalk due to decreased foot traffic in front of the old elementary school. Traffic Engineering proposes relocating the existing crosswalk 580' to the west of it existing location to serve crossings at the County Library.

#### **Existing Traffic Devices**

Alpine Boulevard is a striped two-lane divided roadway with a 42 to 50 foot travelled lane on a 42 to 88 foot road bed. The roadway is striped with a two way left turn lane and bike lane. There is on street parking along the roadway in the form of a parking lane and angle parking stalls. There is a midblock crosswalk located west of Boulders Road with flashing beacons, in pavement flashers, and related school crossing signage. Alpine Boulevard is classified as a Light Collector on the County General Plan Mobility Element Network. The road is currently posted 35 MPH.

JEFF MONEDA DIRECTOR DEPARTMENT OF PUBLIC WORKS 5510 OVERLAND AVENUE, SUITE 410 SAN DIEGO, CA 92123-1237 (858) 694-2212 www.sdcounty.ca.gov/dpw/

#### COUNTY TRAFFIC ENGINEER RECOMMENDATION

Date: March 2, 2021

Item Title: Alpine Branch Library Crosswalk

Location: Alpine Boulevard

CTE Recommendation: Relocate Crosswalk on Alpine Boulevard from Alpine

Elementary School to Alpine Branch Library

#### Conditions:

- Section 21351 of the California Vehicle Code authorizes a local agency to place and maintain such traffic signs, signals and other traffic control devices upon streets and highways as required or as may be necessary to properly indicate and to carry out local traffic ordinances or to warn or guide traffic.
- Section 21106(a) of the California Vehicle Code authorizes local agencies, by ordinance or resolution, to establish crosswalks between intersections.
- Section 3B.18 "Crosswalk Markings" of the California MUTCD, provides that crosswalk markings may be established between intersections (mid-block) in accordance with CVC 21106(a).
- Alpine Boulevard is a two-lane roadway with a two-way left turn lane, bike lanes in both directions, and parking along the north side of the road. Alpine Boulevard measures approximately 64 feet in width for about 860 feet along the segment of interest.
- Currently, Alpine Elementary School has a marked crosswalk and relevant school signage 660 feet west of the west line of Boulders Road, as stated in Ordinance No. 10336 effective 5-3-2014. Alpine Elementary School has been closed since June 2019. Therefore, the crosswalk is no longer needed to facilitate the safe crossing of school kids at this location.

- The Alpine Branch Library, located approximately 580 feet west of the existing crosswalk, currently has a walkway between the library building entrance and the sidewalk on Alpine Blvd and a marked crosswalk on Alpine Blvd at this location is appropriate and desired.
- Pursuant to CVC section 21351 and Section 21106(a) coupled with the guidelines of Section 3B.18 of CA MUTCD, it is my recommendation to remove the existing crosswalk on Alpine Boulevard at 660 feet west of Boulders Road and establish a new crosswalk 710 feet east of Tavern Road to serve the library community walking patronage.

# 5-A. Radar Certification Aliso Canyon Road El Camino del Norte to Avenida del Duque (0.52 mi)

COMMITTEE REPORT OF: March 12, 2021 Item <u>5-A</u>

**SUPERVISORIAL DISTRICT**: 5

**SUBJECT:** Radar Certification

LOCATION: Aliso Canyon Road from El Camino del Norte to

Avenida del Duque (a distance of 0.52 miles) RANCHO

SANTA FE (Thos. Bros. 1148-F6)

INITIATED BY: DPW Traffic Engineering

**REQUEST:** Radar Certification

#### PROBLEM AS STATED BY REQUESTER:

Aliso Canyon Road from El Camino del Norte to Avenida del Duque is posted 45 MPH Radar Enforced. Preliminary review of prevailing speeds and roadway conditions could support radar certification of the existing 45 MPH speed limit.

#### **Existing Traffic Devices**

Aliso Canyon Road is a striped two-lane through highway with a 24 foot travelled way on a 30 to 40 foot road bed. The roadway is striped with a no passing centerline and white edgeline. There is a horse advisory sign along the roadway as there is a trail adjacent to the length of the roadway. Hutchison Street is unclassified on the County General Plan Mobility Element Network. The roadway is posted 45 MPH/Radar Enforced.

#### **Collision Data**

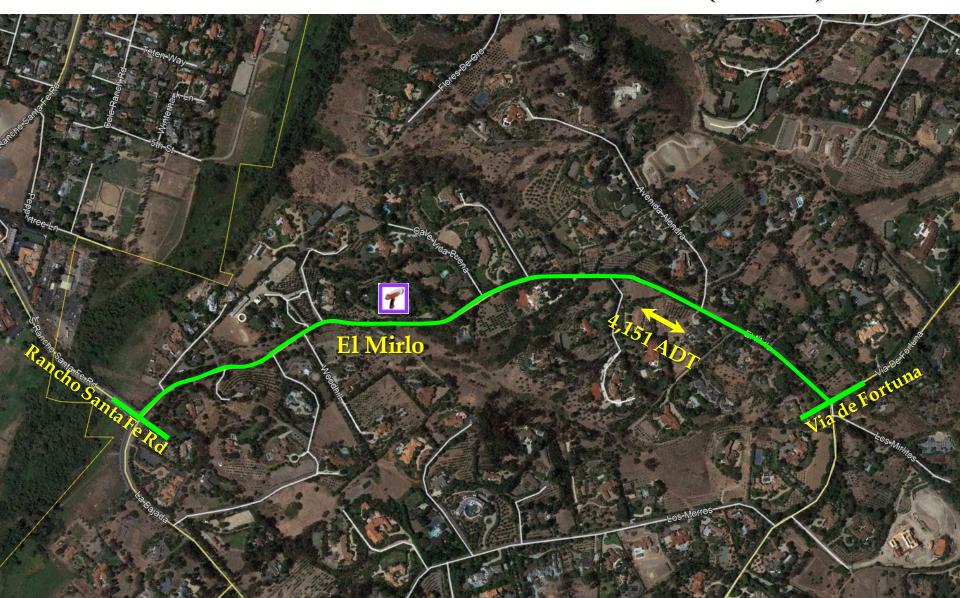

There have been 2 reported collisions along this segment of roadway, none of which involved injury, in a 3 year period (10-01-17 to 09-30-20). These collisions result in a segment accident rate of 0.89 collisions per million vehicle miles. The statewide average is 1.60 collisions per million vehicle miles for similar suburban conventional 2 lanes or less with speeds less than 45 MPH.

5-B. Radar Certification El Mirlo Rancho Santa Fe Road to Via de Fortuna (1.03 mi)

COMMITTEE REPORT OF: March 12, 2021 Item <u>5-B</u>

**SUPERVISORIAL DISTRICT**: 5

**SUBJECT:** Radar Certification

**LOCATION:** El Mirlo from Rancho Santa Fe Road to Via de Fortuna

(a distance of 1.03 miles) RANCHO SANTA FE (Thos.

Bros. 1167-J1)

INITIATED BY: DPW Traffic Engineering

**REQUEST:** Radar Certification

#### PROBLEM AS STATED BY REQUESTER:

El Mirlo from Rancho Santa Fe Road to Via de Fortuna is posted 35 MPH Radar Enforced. Preliminary review of prevailing speeds and roadway conditions could support radar certification of the existing 35 MPH speed limit.

#### **Existing Traffic Devices**

Average Daily Traffic Volumes

El Mirlo is a striped two-lane local roadway with a 24 to 34 foot travelled way on a 25 to 30 foot road bed. The roadway is striped with a no passing centerline and white edgeline. El Mirlo is unclassified on the County General Plan Mobility Element Network. The roadway is posted 35 MPH/Radar Enforced.

5-C. Radar Certification
Kauana Loa Drive
Country Club Drive to Oak View Wy/Escondido C/L (0.23 mi)

COMMITTEE REPORT OF: March 12, 2021 Item <u>5-C</u>

**SUPERVISORIAL DISTRICT**: 5

**SUBJECT:** Radar Recertification

LOCATION: Kauana Loa Drive from Country Club Drive to

Escondido city limit (at Oak View Way) (a distance of 0.23 miles) HARMONY GROVE (Thos. Bros. 1129-D4)

INITIATED BY: DPW Traffic Engineering

**REQUEST:** Radar Recertification

#### PROBLEM AS STATED BY REQUESTER:

Kauana Loa Drive from Country Club Drive to Escondido city limit (at Oak View Way) is posted 40 MPH Radar Enforced. Preliminary review of prevailing speeds and roadway conditions could support radar recertification of the existing 40 MPH speed limit.

#### **Existing Traffic Devices**

Kauana Loa Drive is a striped two-lane local roadway with a 24 to 30 foot travelled way on a 26 to 30 foot road bed. The roadway is striped with a no passing centerline and white edgeline. Kauana Loa Drive is unclassified on the County General Plan Mobility Element Network. The roadway is posted 40 MPH/Radar Enforced.

### 5-D. Radar Certification Hutchison Street 1,000' W/o Harris Drive to East Vista Way (0.68 mi)

COMMITTEE REPORT OF: March 12, 2021 Item <u>5-D</u>

**SUPERVISORIAL DISTRICT**: 5

**SUBJECT:** Radar Recertification

**LOCATION:** Hutchison Street from a point 1,000' west of Harris

Drive to East Vista Way (a distance of 0.68 miles)

VISTA (Thos. Bros. 1067-H7)

INITIATED BY: DPW Traffic Engineering

**REQUEST:** Radar Recertification

#### PROBLEM AS STATED BY REQUESTER:

Hutchison Street from a point 1,000' west of Harris Drive to East Vista Way is posted 40 MPH Radar Enforced. Preliminary review of prevailing speeds and roadway conditions could support radar recertification of the existing 40 MPH speed limit.

#### **Existing Traffic Devices**

Hutchison Street is a striped two-lane through highway with a 24 foot travelled way on a 24 to 36 foot road bed. The roadway is striped with a no passing centerline and white edgeline. There is a horse advisory sign along the roadway. Hutchison Street is unclassified on the County General Plan Mobility Element Network. The roadway is posted 40 MPH/Radar Enforced.

#### **Collision Data**

There have been 6 reported collisions along this segment of roadway, 2 of which involved injury, in a 3 year period (10-01-17 to 09-30-20). These collisions result in a segment accident rate of 3.44 collisions per million vehicle miles. The statewide average is 1.60 collisions per million vehicle miles for similar suburban conventional 2 lanes or less with speeds less than 45 MPH.

## 5-E. Radar Certification Gum Tree Lane Stage Coach Lane to Live Oak Park Road (1.49 mi)

COMMITTEE REPORT OF: March 12, 2021 Item 5-E

**SUPERVISORIAL DISTRICT**: 5

**SUBJECT:** Radar Certification

**LOCATION:** Gum Tree Lane from Stage Coach Lane to Live Oak

Park Road (a distance of 1.49 miles) FALLBROOK

(Thos. Bros. 1027-J1)

INITIATED BY: DPW Traffic Engineering

**REQUEST:** Radar Certification

#### PROBLEM AS STATED BY REQUESTER:

Gum Tree Lane from Stage Coach Lane to Hamilton Lane is posted 35 MPH Radar Enforced. Preliminary review of prevailing speeds and roadway conditions could support radar certification of a 35 MPH speed limit on Gum Tree Lane from Stage Coach Lane to Live Oak Park Road.

#### **Existing Traffic Devices**

Gum Tree Lane is a striped two-lane local roadway with a 24 to 30 foot travelled way on a 26 to 30 foot road bed. The roadway is striped with a no passing centerline. There is a marked school zone with school speed limit signs w/ flashing beacons between Stage Coach Lane and Hamilton Lane. There is a speed advisory turn and reverse turn signage along the roadway. Gum Tree Lane from Stage Coach Lane to Hamilton Lane is classified as a Light Collector on the County General Plan Mobility Element Network. Gum Tree Lane from Hamilton Lane to Live Oak Park Road is unclassified. The roadway is posted 35 MPH/Radar Enforced from Stage Coach Lane to Hamilton Lane.

Speed Zone (2021) 42.4 MPH 32-41 67.0%

#### **Collision Data**

There has been 6 reported collision along this segment of roadway, 2 of which involved injury, in a 3 year period (02-01-18 to 01-31-21). This collision result in a segment accident rate of 0.92 collisions per million vehicle miles. The statewide average is 1.60 collisions per million vehicle miles for similar suburban conventional 2 lanes or less with speeds less than 45 MPH.

JEFF MONEDA DIRECTOR EPARTMENT OF PUBLIC WORK 5510 OVERLAND AVENUE, SUITE 410 SAN DIEGO, CA 92123-1237 (858) 694-2212 www.sdcounty.ca.gov/dpw/

#### COUNTY TRAFFIC ENGINEER RECOMMENDATION

Date: March 2, 2021

Item Title: Speed Limit Recertification and Extension

Location: Gum Tree Lane from Stage Coach Lane to Live Oak Park

Road

CTE Recommendation: Recertify and Extend 35MPH Speed Limit 3,40

#### Conditions:

- Section 22358 of the California Vehicle Code authorizes a local agency to determine upon the basis of an Engineering and Traffic Survey (E&TS) that the speed limit of 65 miles per hour (mph) is more than is reasonable or safe, the agency may declare a prima facie speed limit of 60, 55, 50, 45, 40, 35, 30, or 25 mph, whichever is found most appropriate and is reasonable and safe.
- Section 2B.13 "Speed Limit Sign (R2-1)" of the California MUTCD, provides that an E&TS shall include a) prevailing speeds, b) collision records, and c) highway, traffic and roadside conditions that are not apparent to a driver.
- The California Manual on Uniform Traffic Control Devices stipulates that speed limits are usually set at the 5 mph increment above or below the prevailing (85<sup>th</sup> percentile) speed of motorists.
- Gum Tree Lane between Stage Coach Lane and Hamilton Lane is a two-lane Light Collector roadway with no bike lanes. The south side of Gum Tree Lane is partially improved with curb/gutter/sidewalk for the first half mile east of Stage Coach Lane. The rest of Gum Tree Lane is unimproved with limited shoulder. The last leg of Gum Tree Lane from 2,000' west of Live Oak Park Road is curvilinear and has a steeper grade. Several driveways take direct access to the roadway.
- The partially improved wider western segment is the location of William H.
   Frazier Elementary School which takes direct access from Gum Tree Lane.
   There is a school associated pedestrian presence in the school's vicinity.

- Gum Tree Lane is currently posted with a 35mph radar enforced speed limit between Stage Coach Lane and Hamilton Lane. Preliminary review of prevailing speeds and roadway conditions could support radar certification of a 35mph speed limit on Gum Tree Lane from Stage Coach Lane to Live Oak Park Road.
- Recent speed surveys on Gum Tree Lane taken on February 10, 2021 at 3 locations within the subject segment of Gum Tree Lane resulted in an overall prevailing speed of 42.4 mph, which supports a speed limit of 40 mph using radar for speed enforcement.
- A review of the roadway collision data for the most recent three-year period (Jan 2018 to Jan 2021) shows a total of 6 reported collisions on the subject section of Gum Tree Lane which results in a collision rate of 0.91 collisions per million-vehicle-mile (c/mvm) compared to a state average of 1.60 c/mvm for similar roadway.
- Pursuant to CVC section 22358, limited shoulders, presence of driveways, school and pedestrian, coupled with guidance from the CA MUTCD section 2B.13, a 35-mph radar enforced speed limit on Gum Tree Lane between Stage Coach Lane and Live Oak Park Road is reasonable and safe.

## 5-F. Intersection Control Potter Street & Elder Street

COMMITTEE REPORT OF: March 12, 2021 Item <u>5-F</u>

**SUPERVISORIAL DISTRICT**: 5

SUBJECT: Intersection Control

**LOCATION:** Potter Street & Elder Street, FALLBROOK (Thos. Bros.

1027-G3)

**INITIATED BY:** DPW Traffic Engineering

**REQUEST:** All-Way Stop Control

#### PROBLEM AS STATED BY REQUESTER:

The intersection of Potter Street & Elder Street has been identified by Traffic Engineering as meeting criteria C, regarding lack of sight distance, of the Multi-Way Stop Application optional criteria as described in the California Manual on Uniform Traffic Control Devices (CA MUTCD), Section 2B.07, therefore an all-way stop control should be considered.

#### **Existing Traffic Devices**

Potter Street is a striped two-lane local roadway with no passing centerline. The road runs north/south and has a 32-to-40-foot travelled way on a 40-to-56-foot roadbed. There are intersection advisory signs approaching the intersection at Elder Street in both directions. The roadway is unclassified on the County General Plan Mobility Element Network. Potter Street is a posted 25 MPH Radar Enforced residence district.

Elder Street is a striped two-lane local roadway with no passing centerline. The road runs east/west and has a 28-to-40-foot travelled way and roadbed. There are stop ahead advisory signs approaching the intersection at Potter Street in both directions. The roadway is unclassified on the County General Plan Mobility Element Network. Elder Street is stop controlled at the intersection of Proctor Valley Road in both east and west bound directions.

<sup>\*</sup>Estimate

#### **Collision Data**

There have been 5 reported collision at this intersection, 3 of which involved an injury, within a past 3-year period (05-01-17 to 07-31-20). These collisions produced an intersection accident rate of 0.79 collisions per million vehicles entering. The state-wide average is 0.24 collisions per million vehicles entering for similar four-legged stop sign controlled (excluding 4-way stop controlled) intersections.

JEFF MONEDA DIRECTOR 5510 OVERLAND AVENUE, SUITE 410 SAN DIEGO, CA 92123-1237 (858) 694-2212 www.sdcounty.ca.gov/dpw/

#### COUNTY TRAFFIC ENGINEER RECOMMENDATION

Date: March 2, 2021

Item Title: All-Way Stop Controls

Location: Potter Street and Elder Street Intersection

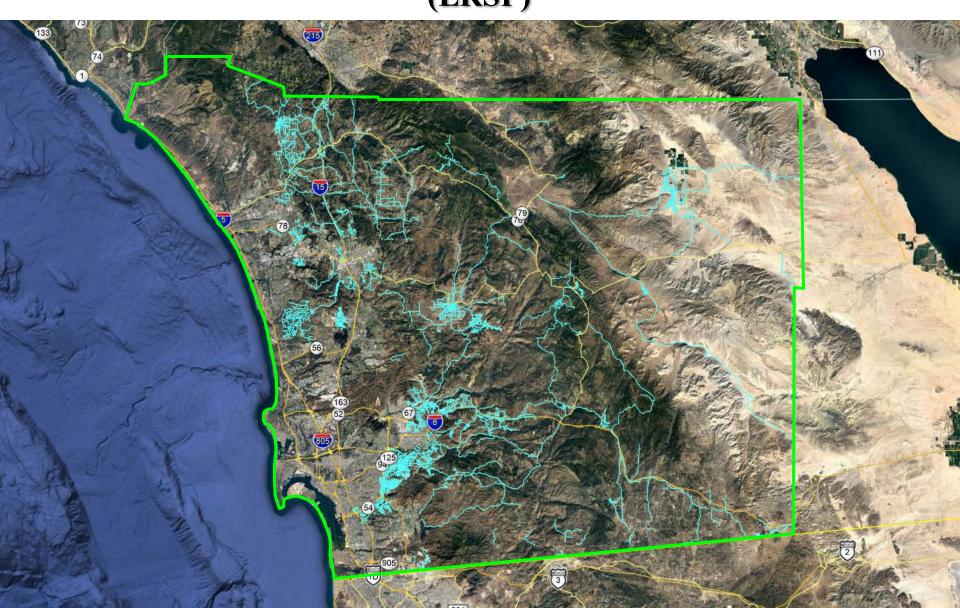

Recommendation: Install All-Way Stop Controls 340

Conditions:

- Section 21354 "Stop Signs on Local Highways" of the California Vehicle Code (CVC) authorizes local agencies to designate any intersection under its exclusive jurisdiction as a stop intersection.
- Section 2B.07 "Multi-Way Stop Applications" of the California MUTCD, provides four optional criteria that may be considered in an engineering study when evaluating an intersection for an all-way stop control.
- Section 2B.07 Option C, lack of sight distance, indicates all-way stop controls can be considered when motorists on the controlled approach are unable to see conflicting traffic to determine when it is safe to enter the intersection.
- Section 2B.07 Option D, Intersection of two Residential Collectors, indicates allway stop controls may be considered at an intersection of two residential collectors of similar design and the all-way stop control would enhance the traffic operations of said intersection. Both Elder Street and Potter Street are considered Residential Collectors with similar traffic operation.
- Elder Street travels from east to west and Potter Street travels from north to south in the Community of Fallbrook. Motorists approaching the intersection from Elder Street in either direction lack required corner sight distance looking north and south on Potter Street to be able to properly judge traffic gap.

- The existing corner sight distance for the Elder Street eastbound intersection approach on Elder Street is 151 feet looking north and 400 feet looking south as measured in the field. The existing corner sight distance for Elder Street westbound intersection approach is 194 feet looking north and 230 feet looking south as measured in the field. Based on field observation the prevailing speed is 35 miles per hour and the required corner sight distance per County Public Road Standards is 350 feet.
- There have been 5 reported collisions in the past three (3) years at this intersection. These collisions would be correctable with an all-way stop control. The collision rate is 0.79 compared to the statewide average of 0.24.
- Pursuant to CVC section 21354 coupled with intersection collision rate and lack of adequate corner sigh distance conditions, it is my recommendation that an All-Way Stop Control is appropriate and desired to improve the intersection safety.

### Informational Item Local Road Safety Plan (LRSP)

### SAN DIEGO COUNTY TRAFFIC ADVISORY COMMITTEE Informational Item 1

**COMMITTEE REPORT OF:** March 12, 2021

SUPERVISORIAL DISTRICT: All

SUBJECT: Local Road Safety Plan (LRSP) - Update

LOCATION: COUNTYWIDE

Project update on the Local Roadway Safety Plan.

The Local Roadway Safety Plan (LRSP) will identify, analyze, and prioritize roadway safety improvements on local County maintained roadway segments and intersections. The LRSP's mission is to prevent death and severe injuries on County roadways and considers the following when prioritizing locations: 1) Community Representation; 2) Collision Rate/Frequency; 3) Health and Equity; and 4) Severity. An LRSP will be advantageous in securing future grant funds, and it is also a future requirement of Highway Safety Improvement Program (HSIP). The systemic identification of crash problems, identified roadway risk factors, and potential countermeasures will be a focus of the LRSP and in the foreseeable future.
