Specialty	Status
CT SCANNER Begin: 12/31/2021 06:25 End:	OPEN
ECPR Begin: 06/30/2023 13:13 End:	OPEN
ED Impact Status Begin: 08/01/2023 10:40 End:	Normal Impact
HELIPAD Begin: 04/30/2023 10:05 End:	OPEN
Internal Capacity Plan Begin: 01/01/2020 14:48 End:	NOT ACTIVATED
L&D/OB Begin: 03/14/2023 00:16 End:	OPEN

There are three categories to choose from:

- **Highly Impacted**
- **Moderately Impacted**
- **Normal Impact**

In the upper right corner, select Agency Summary under your hospital's dropdown menu.

In the specialty availability section, you will find a new category labeled ED Impact Status. This status is updated as you would update any other specialty status.

Please select ED Impact Status from the three options listed.

Note: Please see following page for details on categories.

Emergency Department Impact Status Scorecard

	ED Impact Description	Points	Score
1	Equal to or greater than 50% of ED beds[1] committed to ED Boarders[2]	1	
2	Waiting room number of patients is greater than 50% current active beds[1]	1	
3	Critical patients equal to or greater than 10% of ED beds[1]	1	
4	Declaration of a "Disruption of Services" Event[4]	2	
5	3 or more ambulances[3] have "Delta/Echo"[5] or "Code 10/Code 20"[6] patients awaiting TOC	1	
SCORE	4-6 = RED/Highly Impacted / 2-3 = YELLOW/Moderately Impacted / 0-1 = GREEN/Normal Impact	0-6	

Notes:
1-Number of staffed & immediately available ED beds at time of scoring (incl. patient care spaces/beds/care capacity elements actively engaged in patient care)

2 - ED Boarder = patient awaiting placement elsewhere

3 - At any one facility

4. Disruption of Services caused by one or more of the following:	5. MPDS (911) Dispatch Codes Defined
Electrical Outage	Alpha - EMTs - Cold (No Lights or Siren)
Employee walkout or acute staffing shortages resulting from disaster	Bravo - EMTs - Hot (Red Lights and Siren)
HVAC system failure	Charlie - ALS Responding Alone* - Cold Response
Imaging	Delta - ALS Possibly Life Threatening - Hot w/ 1st responders
Information Services failure	Echo -ALS Life Threat w/ First Responders - Hot
Laboratory	*Response time dependent
Medical gas failure	
Medical vacuum failure	
Natural gas failure	**6. Metro Zone Transport Codes Defined**
Nurse call failure	Code 10 - Life Threatening
Pharmacy	Code 20 - ALS Intervention (IV, Rx, etc.)
Plumbing/sewer failure	Code 30 - ALS Monitoring(ECG, SPO2, Sugar)
Steam failure	Code 40 - BLS Transport Only
Telephone system failure	Code 50 -Alternative Transport was appropriate
Water failure	

Internal Disaster Declaration: A hospital cannot accept any patients through the 9-1-1 system because of a critical disruption of the ability to provide medical services (e.g., due to structural failures, infrastructure disruptions, or health and safety threats). Upon notification of an Internal Disaster, County EMS and HHSA PHPR can begin processes to evacuate the declaring hospital and distribute patients to other facilities. Internal Disaster notifications are immediately distributed to MHOAC, RDMHC, CDPH, Fire OAC, 9-1-1 Communication Centers, Private Ambulance Agencies, and HASD&IC.
