Adding a new AED

- Users are presented with a simple question: Are you responsible for this AED?
  - If they answer **YES**, they are presented more device specific questions.
  - If they answer **NO**, they are presented a final summary screen to review and submit.

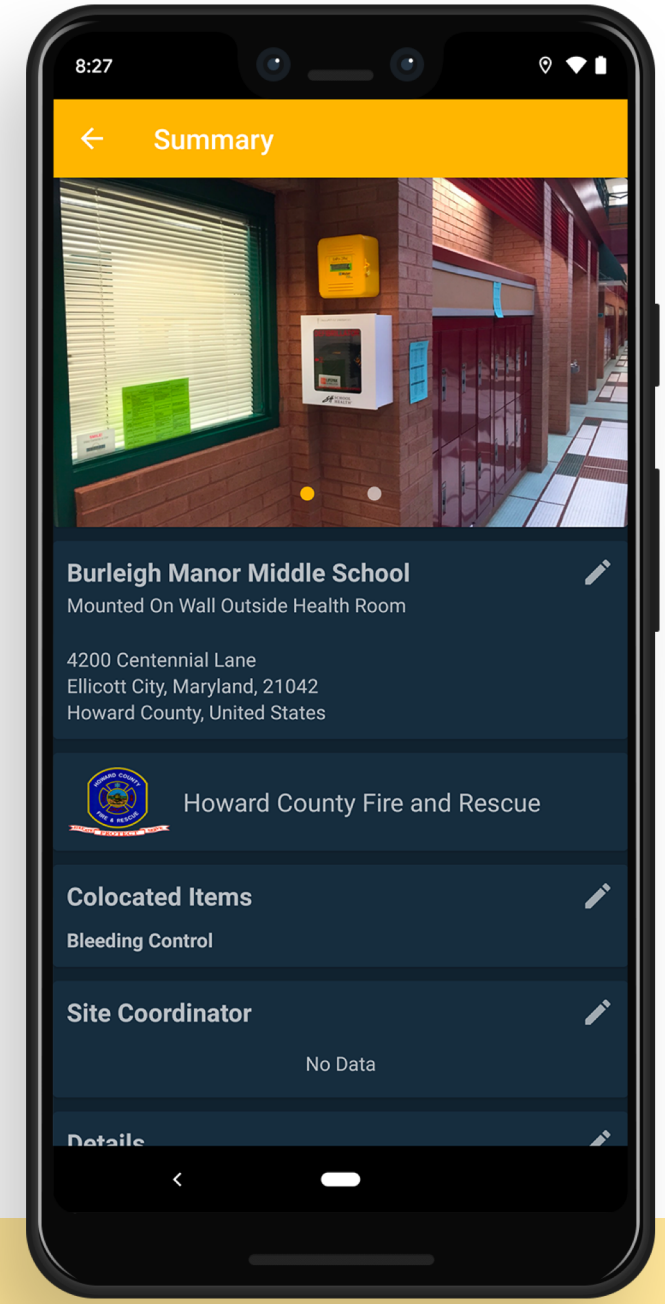
PulsePoint AED – Mobile App

Responsible Party

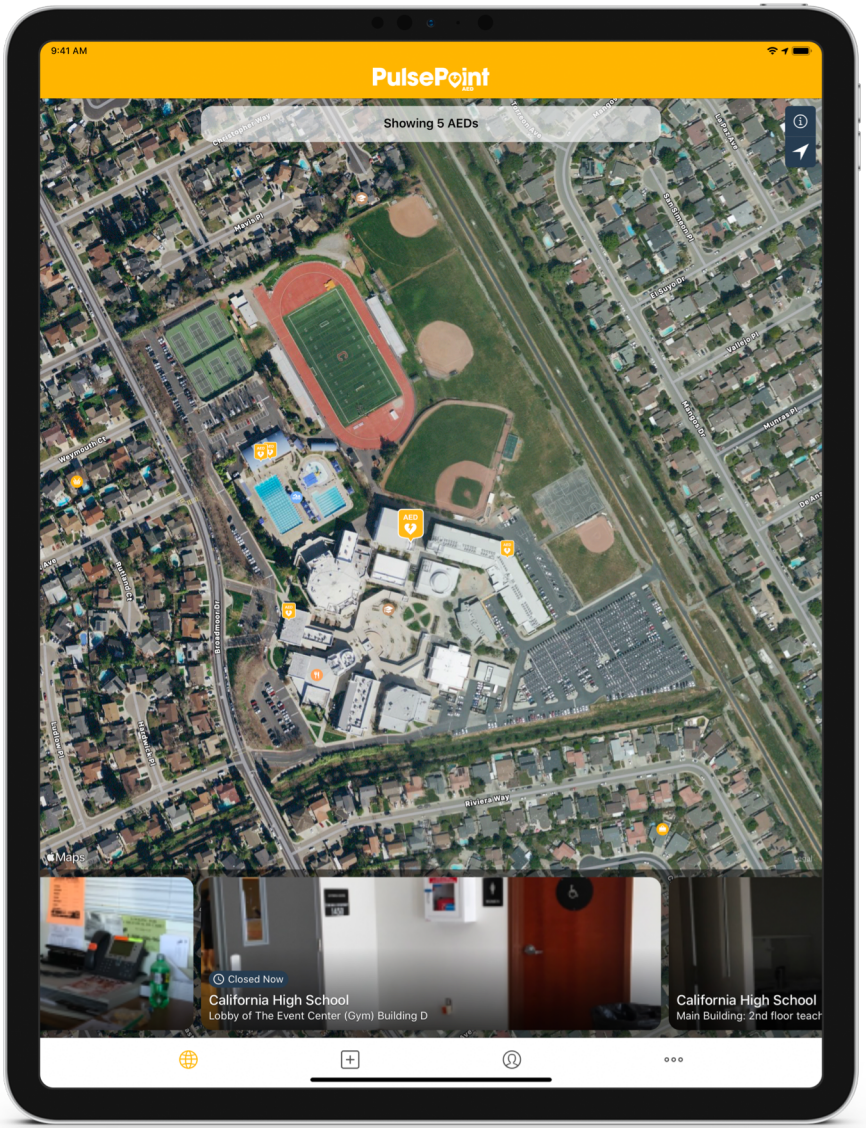
- Complete Device information can be collected.
  - Co-located Items
  - Coordinator information
  - Additional AED details

PulsePoint AED



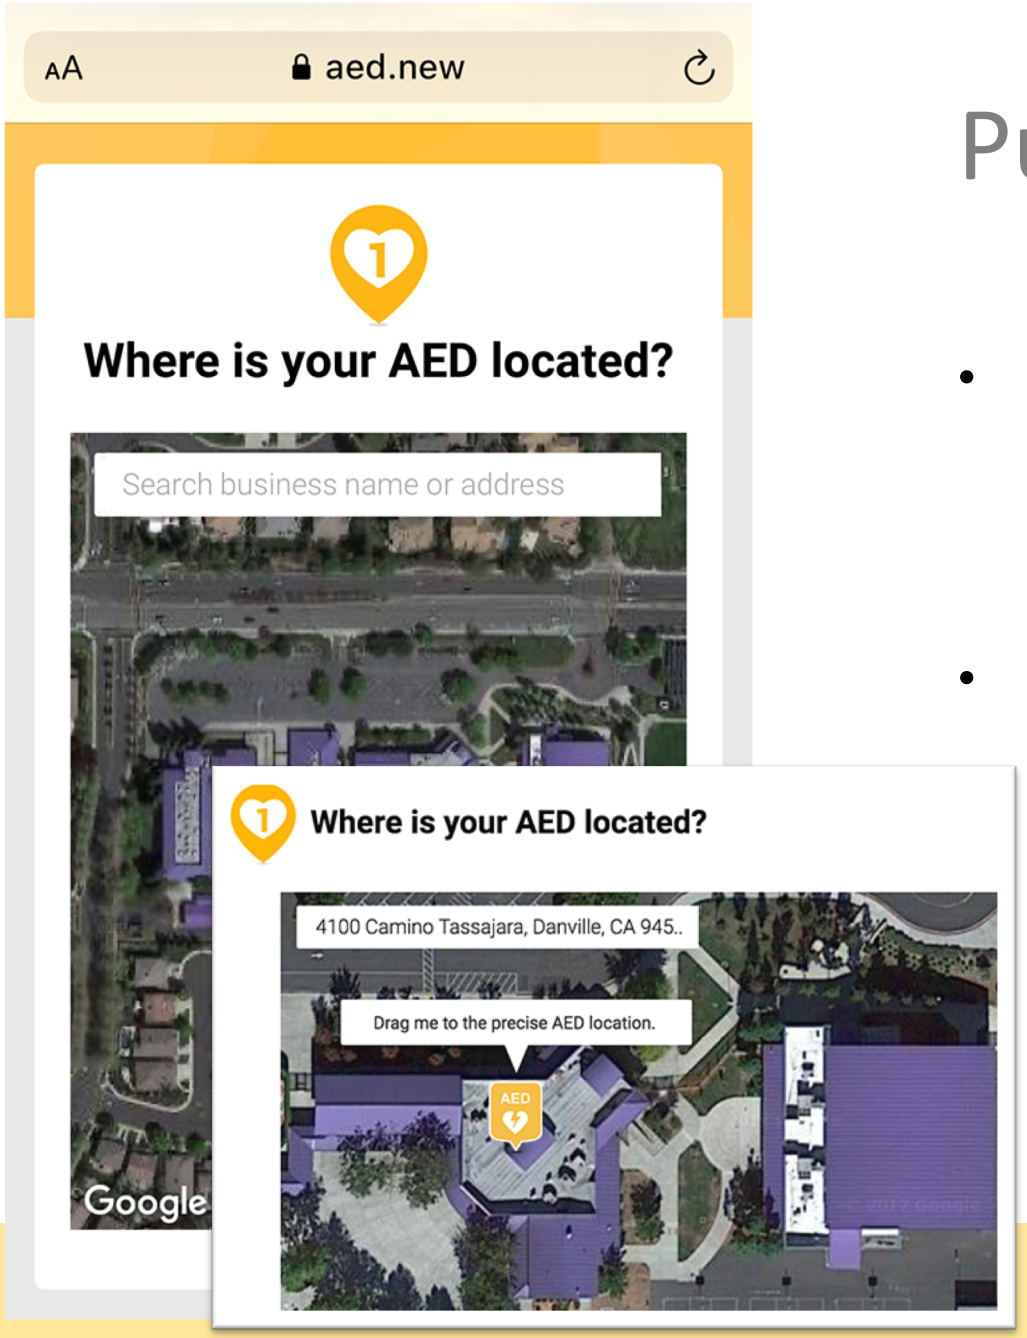
PulsePoint AED – Mobile App

- Review all the information prior to submitting for approval.
- The app will also allow you to edit any information on this final screen prior to submitting.



PulsePoint AED – (iPad)

- PulsePoint AED is now optimized for iPad, allowing adding an AED from the field easier and faster.



PulsePoint AED – Web

- In addition to using the PulsePoint AED app, community members can also add a new AED location on the easy to remember website, [aed.new](aed.new).
- Insert the location in the "Search Business name or address"
  - Select the address from the list and drag the yellow AED pin to the precise AED location
  - Fill out the location name, description of AED placement and other fields prompted.
