**City Response to  
San Diego County Grand Jury Report Entitled  
SAN DIEGO'S BIKESHARING PROGRAM NEEDS HELP**

Pursuant to California Penal Code section 933(c), the City of San Diego provides the following responses to the findings and recommendations pertaining to the City of San Diego that are included in the above referenced Grand Jury Report:

**FINDINGS 01 THROUGH 02**

Below are the Mayor and City Council's responses to Findings 01 through 02:

**Finding 01:** *The success of the bikesharing program is important to achieving the city's planning and climate goals.*

**Response: The Mayor and City Council partially disagree with the Grand Jury's finding.**

While encouraging and facilitating bicycling is an important component in achieving the City's planning and climate goals, there are many avenues for effectuating the City's goals, including: realizing efficiencies in energy and water usage, enhancing renewable energy generation, increasing the use of zero emissions vehicles, and increasing mass transit usage. Efforts related to bicycling are included in the City's Climate Action Plan Strategy 3, "Bicycling, Walking, Transit & Land Use." Such efforts include street improvements for bicycling, as well as a bikesharing program. A desired outcome of the bikesharing program is to bridge the "one mile" gap between transit stops and destinations.

**Finding 02:** *To be financially successful, DecoBike needs kiosks in tourist areas including beach communities.*

**Response: The Mayor and City Council partially disagree with the Grand Jury's finding.**

Although placement of highly visible bike stations in areas with a high volume of visitors (such as beach communities and downtown) would help create a useful, robust network for users and would offset DecoBike's cost of lower revenue bike stations, community concerns and public safety must also be considered. Community members in certain San Diego areas perceive the bikesharing program or prior efforts at placement of bike stations to be incongruent with community character. In some areas existing bike rental establishments have been concerned about competition from DecoBike. These concerns are taken under consideration when choosing station locations. As part of the overall configuration of bike stations in San Diego, additional locations in high-pedestrian areas combined with additional commuter locations will

help create a financially viable network that will support the goal of connecting community bicycling with existing transit.

**RECOMMENDATIONS 16-01 THROUGH 16-02**

Below are the Mayor and City Council's responses to Recommendations 16-01 and 16-02:

**Recommendation 16-01:** *Assign one prominent official to be the single point of contact on bikesharing and refer communications about the program to that spokesperson.*

**Response: The recommendation has been implemented.**

The City spokesperson will be the Director of Communications. In addition, the Assistant Chief Operating Officer (ACOO) will assist in the coordination to ensure implementation of the program.

**Recommendation 16-02:** *Instruct that prominent official to work with the San Diego City Transportation and Stormwater Department and local planning groups in beach communities to site bikeshare stations where needed for DecoBike to succeed.*

**Response: The recommendation has not yet been implemented, but will be implemented in the future.**

The City's partnership with DecoBike provides for cooperation in the placement of bike stations in compliance with the contract. Based on prior feedback from the community, City staff has been working in partnership with DecoBike to identify 17-24 new sites in the La Jolla, Mission Beach, Mission Bay, and Pacific Beach communities. Once the new sites have been identified and released to the public, City and DecoBike staff will present the proposed sites to the affected Community Planning Groups. The City spokesperson will provide communications support to Transportation and Storm Water staff who will serve as the main community contact in implementation of the new sites. The implementation is expected to be completed within the next six months.
