Members of the public who wish to speak to an agenda item may call 858-495-5566 before the meeting and provide the last four digits of their phone number and the agenda item they wish to speak to.

AGENDA

***Attachment**

1. **Call to Order:** Wanda Smith, Chair
 - a. Welcome & Guest/Member Introductions
 - b. Confirmation of quorum (quorum = 3)
2. **Standard Business:**
 - a. Public Comment/Announcements: Members or non-members
 - b. Approval of March 4, 2021 Meeting Minutes (Action)*
3. **Guest Speakers:** None
4. **Subcommittee White Paper- The Power of Walking Discussion** (Action)*
5. **Next Meeting:** May 6, 2021
6. **Adjournment**

This meeting is public, and the location is ADA accessible. If you are planning to attend and need special accommodations, please call (858) 495-5885 at least three days in advance of the meeting.

Supporting documentation and attachments for items listed on this agenda may be viewed at Aging & Independence Services, 5560 Overland Avenue, Suite 310, San Diego, CA 92123, or received by calling (858) 495-5885.

MINUTES

Members		Absent Members	Guests
Attendance:	Wanda Smith Rosemarie Bahmani Susan Mallett LaRue Fields Eugenia Welch (community member)	Khalisa Bolling Lorelei Taylor	Paul Ling
Staff			
Item	Outcome		
1. Call to Order	<p>Wanda Smith, Chair, 10:00 AM</p> <p>a. Welcome & Guest/Member Introductions</p> <p>b. Confirmation of quorum: (3 required for quorum): quorum present</p>		
2. Standard Business	<p>a. Public Comments/Announcements: Members or non-members: (list announcements) Wanda noted Senior Rally Day will be held virtually on May 4th, save the date flyers will be out soon, the Caregivers Coalition also plans a virtual event soon.</p> <p>b. Approval of February 4, 2021 Meeting Minutes (Action) (M/S Fields/Mallett) (passed 4 ayes)</p>		
3. Guest Speakers: Roberto C. Ramirez, MPH, CPH, Health Promotion Manager Nichole Phonharath, MPH, CHES, Community Health Promotion Specialist I	<p>Health Promotion Unit, Aging and Independence Services</p> <p>Mr. Ramirez leads a team of five permanent staff and a paraprofessional to oversee nine individual programs with a mission to improve the health of and wellness of older adults in San Diego County to help maintain their independence. All programs are free to those 60 years and older.</p> <p>The unit, working with the Age Well San Diego theme teams, hopes to hold a virtual Vital Aging Summit later this year.</p> <p>He elaborated on some program features and how community programs and activities have continued virtually such as CalFresh Healthy Living's "Eat Smart, Live Strong" curriculum and "Around the Table" a six-session intergenerational focused program.</p> <p>Additionally, Fall Prevention and Feeling Fit Club (begun in 1999) continue most of their classes virtually. For example, 30 virtual fitness classes are provided and can be viewed twice a day on the County TV station as well as on YouTube. Also, participation has increased with greater retention through the virtual presentation format. Ramirez noted a hybrid model could be a component of programs going forward.</p> <p>A question about Alzheimer families' participation was raised and Ramirez was not aware of caregivers' involvement in the fitness classes but noted all instructors are trained to accommodate physical limitations etc.</p> <p>The unit also includes Healthier Living Workshops for those with chronic conditions such as pain, arthritis and diabetes. They also provide dementia program support through Age Well San Diego.</p> <p>Ms. Phonharath answered questions re: additional tasks that have been taken on through the County's COVID-19 Response projects: Great Plates Delivered and Older Adult Sector Support.</p>		
4. Subcommittee White Paper- Power of Walking	<p>Discussion of incorporating research about the positive effect of at least 20 minutes of walking on those with dementia. Eugenia added while there is no treatment for Alzheimer's, physical activities may slow the progression of the disease. It would help caregivers as well as they have lost resources due to COVID restrictions.</p>		

	All agreed to review the draft paper and send suggestions, if any, to Wanda for incorporation before the next meeting in April. The desire is to present the paper to the Council soon, recommending a Countywide walking program that fits with Age Well San Diego objectives as well as the health objectives of the Master Plan for Aging as well as the federal OAA health promotion.
5. Next Meeting	April 1, 2021 10:00 AM Virtual
6. Adjournment	Meeting adjourned 11:06 AM

Respectfully submitted by Susan Mallett

Position Paper- Power of Walking

In San Diego County, seniors over the age of 65 will make up an estimated 21% of the population by 2030.¹ Identifying ways to help older adults maintain good health and quality of life is a critical step for our county. Older adults are the least active and most sedentary population group in the US. The physical activity guidelines for adults include 150 minutes of moderate to vigorous aerobic activity per week and muscle strengthening exercises two days a week² According to the Centers for Disease Control and Prevention (CDC), 16.3% of adults ages 65 to 75 and 9.9% of adults ages 75 and older met the Physical Activity Guidelines for Americans in 2018.³ Yet, research has shown that an increase in physical activity, even in the most frail, can have immediate and profound effects on cardiovascular health. Physical Activity has also been shown to improve mental health, emotional, psychological, social well-being and cognitive function.

Walking is one of the easiest, accessible and effective forms of physical activity for seniors. It is a great way to be active for all ages and abilities. It helps meet the physical activity guidelines and contributes to overall quality of life. Research has shown that walking may help prevent health problems which leads to greater physical and cognitive independence. **Increasing walking and walkable communities is a health promoting strategy that has been highlighted at the County, State, and National Level.**

- The county's *Age Well plan* sets goals for walking as an alternative form of transportation. The plan also aims to improve social participation of older adults, through implementing and expanding recreational programming that is safe, dementia-friendly, and inclusive of diverse racial and ethnic groups.⁴
- The statewide *California Master Plan for Aging*, outlines Health and Wellbeing as one of its main goals. It envisions a future where, "Californians will live in communities with policies and programs that promote wellbeing throughout our lifespans".⁵
- Nationally, the Surgeon General *has a Call to Action to Promote Walking and Walkable Communities, Step It Up*, which recognizes the importance of physical activity for people of all ages and abilities. It calls on Americans to be more physically active through walking and calls on the nation to better support walking and walkability.⁶
- The Older Americans Act (OAA) funds critical services that keep older adults healthy and independent, prioritizing evidence based health promotion and disease prevention programs.⁷

Researchers at the University of California San Diego tested a peer led multi-level walking intervention (Peer Empowerment Program 4 Physical Activity) in a randomized control trial. The study enrolled a total of 476 older adults (average age 72) attending 12 senior/community centers located across San Diego County. Participants

in the intervention group, wore pedometers, set individual walking goals, received coaching from a peer health coach, attended group walks twice per week, participated in weekly group discussions and took part in a community project focused on advocating for more walkable communities.

This walking program was able to achieve and sustain a statistically significant increase in minutes of moderate to vigorous physical activity (MVPA) in a diverse cohort of older adults across 2 years of follow up. The intervention group also increased perceived quality of life over the course of the intervention. In addition to the health benefits, nearly half of the participants did not previously participate in the senior center activities prior to the introduction of this program.⁸ These results support the importance of programs like these to help older adults meet the physical activity guidelines, gain meaningful health improvements and connect with other seniors and community resources. While the Peer Empowerment Program 4 Physical Activity illustrates the impact of an in-depth program that provides individual, social and environmental support for walking, there are also additional resources available to start basic walking programs like the National Institute of Aging's walking club older adult toolkit.⁹

Although group activities are currently not recommended during the COVID-19 virus outbreak, staying physically active is strongly recommended. Confinement and prolonged periods of inactivity carry various health risks and increase levels of stress, depression, and anxiety.¹⁰ Walking can be done in accordance with state and national guidelines, while maintaining distance from others. Elements of programs like Peer Empowerment 4 Physical Activity can be modified to be responsive to the current limitations due to COVID-19. Older adults can set individual walking goals and walk on their own or with members of their own household. Circulate SD, created a *Pedestrian Rules and Social Distancing Guide*, to provide information on how to safely walk while adhering to the guidelines.¹¹ Participants can receive the support of their peers and health coaches through phone or virtual platforms which are being utilized by many seniors during this time. For those that need technology support, there are volunteer organizations available in the community to help assist with issues that may arise.

Based on the points outlined in this paper, the Aging and Independence Services (AIS) Healthy Aging Committee would like to propose that resources be allocated to implement a county wide multi-level walking program. We believe it would be a great complement to the existing Feeling Fit and Chronic Disease Prevention programs currently being offered to help improve the health and wellbeing of older adults living in San Diego County. It could serve as a self-sustaining program that provides seniors with evidence-based strategies to improve their health and well-being on their own or in groups. There are many partnerships already in place at centers across the county to offer the existing AIS programs that we think could aid in the success of launching this new walking program. There are also community partnerships that could be leveraged to ensure the programs success, including: UCSD's Center for Community Health, the LiveWell Resident Leadership Academies to recruit peer leaders, and the many nursing associations that may be willing to measure participant's health outcomes.
