

COUNTY OF SAN DIEGO, HEALTH AND HUMAN SERVICES AGENCY, BEHAVIORAL HEALTH SERVICES

MENTAL HEALTH SERVICES ACT (MHSA) COMMUNITY SERVICES AND SUPPORTS PROGRAMS AND SERVICES

The Mental Health Services Act (MHSA) Community Services and Supports (CSS) provide an integrated delivery of systems of care of mental health services to Seriously Emotionally Disturbed (SED) children and youth, and adults and older adults with serious mental illness (SMI). Serious mental illness is a term defined by Federal regulations that generally applies to mental disorders that interfere with some area of social functioning. MHSA funded programs through CSS provide a full array of services to clients and families by embracing a “whatever it takes” approach to help stabilize the client and provide timely access to needed services for unserved and underserved children, youth and adults of all ages.

CSS component contains four service categories:

1. Full Service Partnership (FSP) – provide wraparound services (mental health services and supports a person needs to reach his or her goals).
2. General System Development (SD) – improve mental health services and supports for people who receive mental health services.
3. Outreach and Engagement (OE) – reach out to people who may need services but are not getting them.
4. MHSA Housing Program – finances the capital costs associated with development, acquisition, construction and/or rehabilitation of permanent supportive housing for individuals with mental illness and their families, especially homeless individuals with mental illness and their families.

San Diego County MHSA funded programs directly supports the County’s adopted Live Well San Diego long-term initiative of achieving the vision of healthy, safe and thriving communities, by enabling participants with mental health needs and the general public to access necessary resources and thereby lead healthy and productive lives.

In accordance with the MHSA CSS Vision Statement and Guiding Principles, services are designed to adhere to the following principles:

- Cultural and linguistic competency.
- Promotion of resiliency in children and their families, and recovery/wellness for adults and their families.
- Increased access to services, including timely access and more convenient geographic locations for services.
- Services that is more effective, including evidence-based or best practices.
- Reduced need for out-of-home and institutional care, maintaining clients in their communities.
- Reduced stigma towards mental illness.
- Consumer and Family participation and involvement.
- Increased array and intensity of services.
- Screening and treatment for persons with dual diagnoses.
- Improved collaboration between mental health and other systems (education, law enforcement, child welfare, etc.)
- Services tailored to age-specific needs.
- Address eligibility gaps by serving the uninsured and unserved.

Definitions for terms used in this document:

- Full Service Partnership (FSP): Provide all necessary services and supports to help clients achieve their mental health goals and treatment plan. FSP services comprehensively address client and family needs and “do whatever it takes” to meet those needs, including intensive services and supports and strong connections to community resources with a focus on resilience and recovery.
 - Serious Mental Illness (SMI): A diagnosable mental disorder found in persons aged 18 years and older that is so long lasting and severe that it seriously interferes with a person's ability to take part in major life activities.
 - Seriously Emotionally Disturbed (SED), as defined in the California Welfare & Institutions Code Section 5600.3. A diagnosable mental disorder found in persons from birth to 18 years of age that is so severe and long lasting that it seriously interferes with functioning in family, school, community, or other major life activities.
 - Assertive Community Treatment (ACT) is a team-based approach to the provision of treatment, rehabilitation, and support services. ACT models of treatment are built around a self-contained multidisciplinary team that serves as the fixed point of responsibility for all patient care for a fixed group of patients. The treatment team typically provides all patient services using a highly integrated approach to care.
 - Underinsured: A client is underinsured when they lack mental health coverage or have exhausted mental health insurance coverage, as evidenced by a denial letter.
-

- Assertive outreach: An approach for individuals who cannot or will not engage with traditional mental health services. A professional team works with clients in their own environment, be it a cafe, a park or in the street - wherever it is most needed and most effective. This flexibility allows people to get services who might otherwise not receive them and where they feel most comfortable.
 - Biopsychosocial Rehabilitation (BPSR): Psychosocial rehabilitation is an array of services designed to help an individual to capitalize on personal strengths, to develop coping strategies and skills to deal with deficits, and to develop a supportive environment in which to function as independently as possible.
 - Transition Age Youth (TAY): youth and young adults age 16-24. Note that in San Diego County most of the MHSAs programs serving TAY, serve those that are 18-24.
 - Adults: age 25-59
 - Older Adults: age 60+
 - Co-Occurring Disorders: In this context, refers to a dual diagnosis of mental illness and alcohol or substance abuse
 - SSI: Supplemental Security Income
 - SSA: Social Security Administration
-

FY 16/17 CSS PROGRAM SUMMARY

Work Plan	Program Name	Program Description	Program Goal	Population Focus	Services Offered	Contact Information	Districts
