CYF Special Populations Report | CASRC (AEC, BG, SCV) | Data Sources: CCBH 10/2021, Child Welfare Services 11/2021, Probation 11/2021

*NH refers to Non-Hispanic/Latino.

†Level of Care designations were updated in FY 2020-21 and may not be directly comparable to previous years.

‡Excludes clients for whom history of trauma was unknown.

Please note: Data may be impacted starting March 2020 due to COVID-19. This report is limited to Mental Health Services clients.

Homeless (1% n=74)

- Only 74 homeless youth were served in the CYFBHS system in FY 2020-21, as compared to 170 in FY 2019-20. These data should be interpreted with caution due to the very small number.
- Homeless youth were more likely than the CYFBHS systemwide averages to be over the age of 18, female, and Black/African American.
- Nearly all homeless youth were reported to have a history of trauma.
- Homeless youth were more likely to receive Wraparound services. Over the past three years, outpatient service use has declined for these youth.

LGBTQ+ (11% n=1,346)

- LGBTQ+ youth were more likely to be female than the CYFBHS systemwide average.
- LGBTQ+ youth were more than twice as likely to receive services in both emergency/crisis and inpatient levels of care.
- Fifty-two percent of LGBTQ+ youth were diagnosed with a depressive disorder, as compared to 32% in the CYFBHS systemwide average.
- Endorsement of the sexual orientation response option "questioning" has increased 5 percentage points over past 3 years.

CYF N =
12,132

Probation & CYFBHS (6% n=735)

- Youth open to both the Probation and CYFBHS sectors were more likely to be older, male, and Black/African American.
- These youth were more likely to be diagnosed with an Oppositional/Conduct Disorder than the CYF systemwide average. They were also more likely to have a dual diagnosis.
- Youth open to both the Probation and CYFBHS sectors were more likely to receive Wraparound services than any other CYF Special Population.
- Over the past three years, the percentage of these youth diagnosed with ADHD has decreased, and stressor disorder diagnoses have increased.

Child Welfare Services & CYFBHS (14% n=1,704)

- Youth open to both the Child Welfare and CYFBHS sectors were more likely to be younger and less likely to be Hispanic.
- These youth were more likely to have an adjustment/stressor disorder diagnosis than any other CYF Special Population.
- Youth open to both the Child Welfare and CYFBHS sectors were more likely to receive residential services than the CYF systemwide average.
- These youth were more likely than any other CYF Special Population to have experienced trauma.
