

LIVE WELL SAN DIEGO AREAS OF INFLUENCE: Q1 FY 2024-25

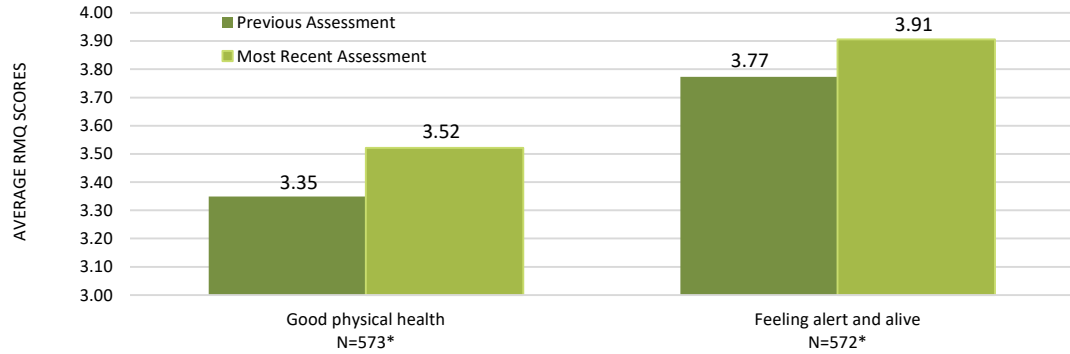

Social determinants of health are conditions within environments where people live, learn, work, and play that affect a range of health outcomes and impact risks. Live Well San Diego (LWSD) is the vision of the County to work towards improving the social determinants of health for San Diego County residents. The 5 Areas of Influence are the ways the County's vision of health, safety, and thriving residents are measured across a person's lifespan.

Progress on the LWSD Areas of Influence was measured for adults who received a follow-up assessment during Q1 and an intake or previous assessment completed within the prior four to eight months. The Recovery Markers Questionnaire (RMQ) assessment was chosen to represent San Diego's Areas of Influence because it measures a client's perspective on their own recovery on a 1-5 score range with 5 representing the highest level of recovery.

HEALTH

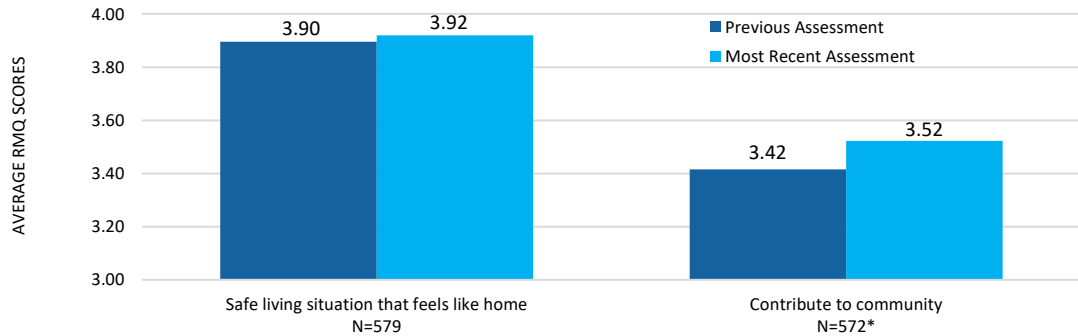

Enjoying good health and expecting to live a full life

COMMUNITY

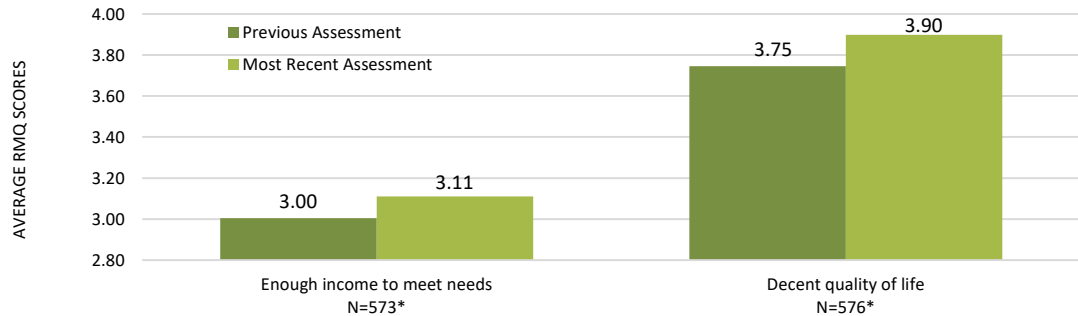

Living in a clean and safe neighborhood

STANDARD OF LIVING

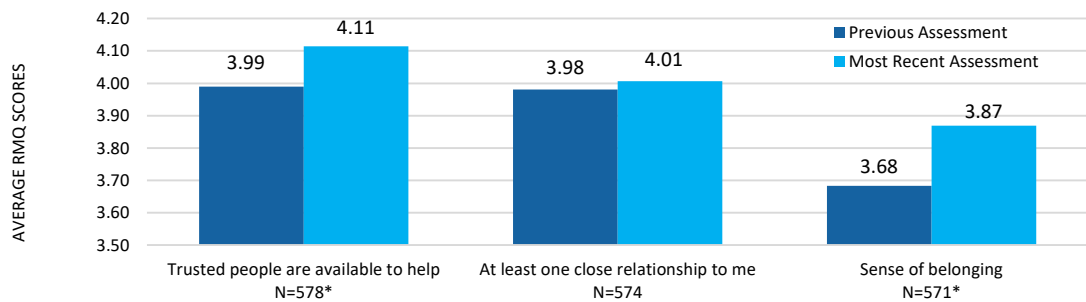

Having enough resources for a quality life

SOCIAL

Helping each other to live well

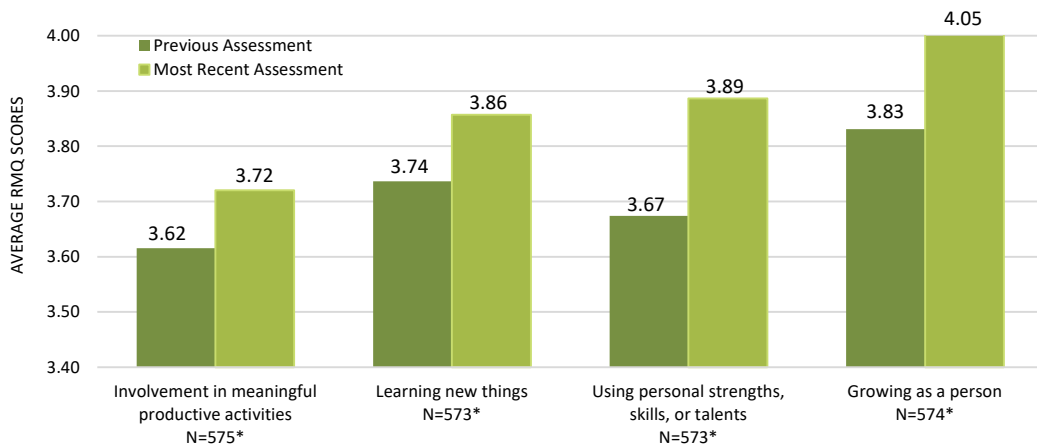

Note: A response of "Decline to state" is not included in calculations so values may be less than n=580.

*Indicates statistical significance (p < .05).

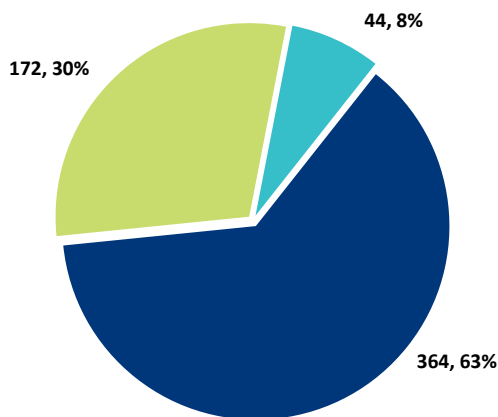

KNOWLEDGE

Learning through the lifespan

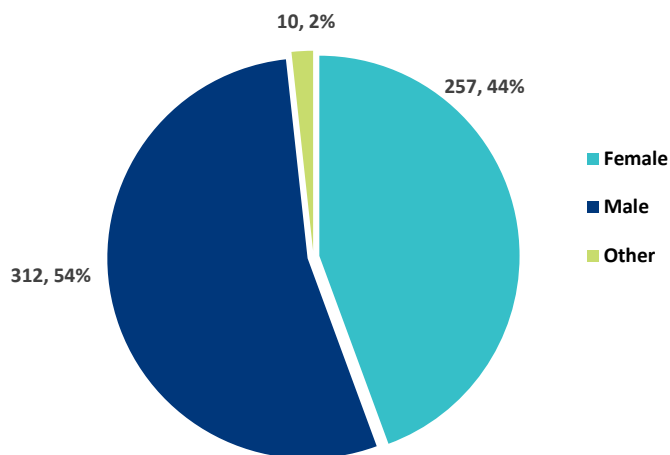

Demographics

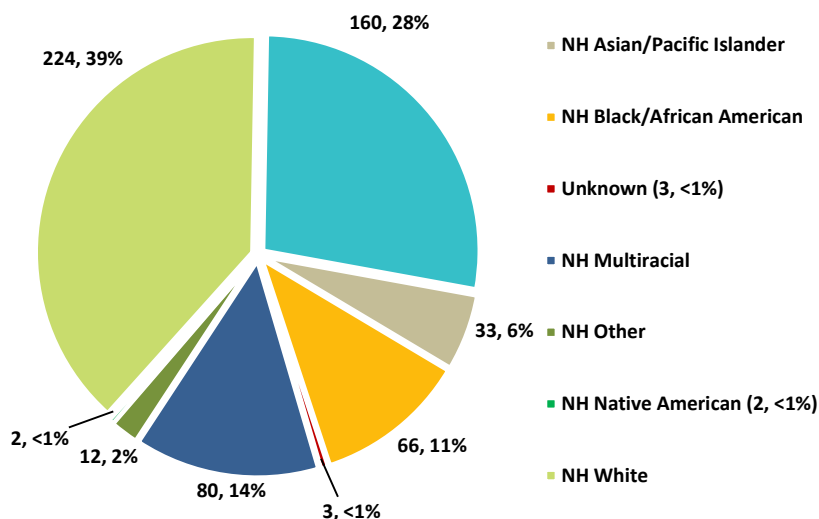

Age (n = 580)

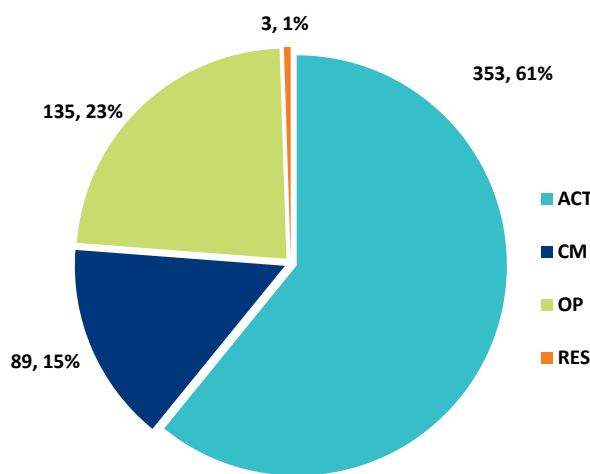

Gender (n = 579)

Race/Ethnicity (n= 580)

Level of Care (n = 580)

Note: 1) Due to rounding, percentages may not equal to 100%.
 2) A response of "Decline to state" is not included in calculations so values may be less than n=580.
 3) Data reflects July and August only due to the transition to SmartCare.

*Indicates statistical significance (p < .05).
