Introduction

Systemwide Annual Report

This report summarizes cumulative system demographics and clinical outcomes for children and adolescents served by the County of San Diego's, Health and Human Services Agency (HHSA), Behavioral Health Services for Children & Youth (BHS-CY) in Fiscal Year (FY) 2023-24 (July 2023 – June 2024). BHS-CY System of Care serves children and youth up to age 21, as well as a perinatal population. The primary focus of this annual report is BHS-CY mental health services, with limited information also available on prevention, early intervention, and addiction treatment. **It is important to note that the COVID-19 pandemic began March of 2020, which may continue to affect FY 2023-24 data in myriad ways.** BHS-CY and CASRC are working to understand the impact of the pandemic on youth and families in San Diego County.

Children & Youth Behavioral Health System of Care

The County of San Diego Behavioral Health Services operates a Children & Youth Behavioral Health System of Care (CYBHSOC). The CYBHSOC takes a broad approach, having evolved over time through the collaboration of its four strong sector partnerships: families and youth receiving services, public sector agencies, private providers, and the education system, with a recognition of the value of faith-based communities. Comprehensive information about CYBHSOC is available at:

https://www.sandiegocounty.gov/content/sdc/hhsa/programs/bhs/mental_health_services_children.html.

The multi-sector CYBHSOC Council meets on a monthly basis to provide and obtain community input for the System of Care with the goal of advancing the system. The System of Care Council information is located at:

https://www.sandiegocounty.gov/content/sdc/hhsa/programs/bhs/mental_health_services_children/CYFBHSOCCouncil.html.

Live Well San Diego

The County of San Diego Health and Human Services Agency supports the *Live Well San Diego* Vision of Building Better Health, Living Safely, and Thriving. *Live Well San Diego*, developed in 2010 by the County of San Diego, is a comprehensive, innovative regional vision that combines the efforts of partners inside and outside County government to help all residents be healthy, safe, and thriving. All HHSA partners and contractors work collaboratively to advance the Vision. Information about *Live Well San Diego* is available at: <http://www.livewellsd.org/>.

The Importance of Assessment

Assessing the outcomes of behavioral health services in valid and reliable ways is critical to the development, advancement, and maintenance of effective services. A core value and principle of the System of Care is to be accountable through clear outcomes, valid evaluation methods and proficient data management systems.

Introduction

Provider Systems

In FY 2023-24, BHS-CY served children and youth with serious emotional disturbance (SED) through two provider systems distributed throughout San Diego County: **Organizational Providers** and **Fee-for-Service (FFS) Providers**. Organizational providers offer coordinated multidisciplinary services, while the FFS system is comprised of 361 individual practitioners throughout the community with a wide range of specialties; 199 FFS providers are credentialed to provide services for children and youth. In FY 2023-24, 69 FFS providers actually provided services for children and youth (see page 43).

BHS-CY delivered child and adolescent mental health services through a variety of levels of care:

- ❖ Outpatient programs
- ❖ Juvenile Forensic Services
- ❖ Therapeutic Behavioral Services (TBS)
- ❖ Wraparound programs
- ❖ Short-term Residential Therapeutic Programs (STRTP)
- ❖ Shelter and Respite services
- ❖ Crisis Stabilization services
- ❖ Crisis Outpatient programs
- ❖ Emergency services
- ❖ Inpatient care

Substance Use Disorder treatment for teens and the perinatal population is comprised of:

- ❖ Early Intervention (ASAM 0.5)
- ❖ Outpatient Services (OS, ASAM 1.0)
- ❖ Intensive Outpatient Services (IOS, ASAM 2.1)
- ❖ Withdrawal Management—Outpatient (ASAM 1-WM)
- ❖ Narcotic Treatment Programs (NTP)
- ❖ Residential Treatment (ASAM 3.1)
- ❖ Residential Treatment (ASAM 3.5)
- ❖ Withdrawal Management —Residential (ASAM 3.2)
- ❖ Recovery Services
- ❖ Medication for Addiction Treatment (MAT)

Note: Percentages calculated in this report may not add up to 100% due to rounding.

Introduction

San Diego County

The estimated population of San Diego County in 2023 (Source: US Census Bureau estimate, accessed 2/27/2025) was 3,269,973 residents, 675,124 (21%) of whom were under the age of 18. In 2023, the total Medi-Cal population for San Diego County (Source: San Diego County Health Department, retrieved 9/11/2024) was 1,104,409 residents, 348,588 (32%) of whom were ages 0-17 years.

San Diego County Medi-Cal Population

2023 County v. Medi-Cal Population

Youth Population Health Data

California Healthy Kids Survey (CHKS)

The CHKS is a modular, anonymous assessment administered to late elementary, middle school, and high school students in California school districts. It is focused on the five most important areas for guiding school and student improvement:

- Student connectedness, learning engagement/motivation, and attendance
- School climate, culture, and conditions
- School safety, including violence perpetration and victimization/bullying
- Physical and mental well-being and social-emotional learning
- Student supports, including resilience-promoting developmental factors (caring relationships, high expectations, and meaningful participation)

Three CHKS items of interest were analyzed for San Diego County and California: cyberbullying, chronic sadness/hopelessness, and suicidal ideation.

Cyberbullied* (during the 12 months before the survey)

*Bullied online at least once.

†Data from 2021-23 CHKS administration were not available for California.

Data Source: CalSCHLS Secondary Student Public Dashboard, retrieved 3/11/2025.

Youth Population Health Data

California Healthy Kids Survey (CHKS)

Chronic Sadness/Hopelessness* (during the 12 months before the survey)

Seriously Considered Suicide (during the 12 months before the survey)

*Feelings of sadness or hopelessness almost every day for 2 or more weeks in a row so that they stopped doing some usual activities.

†Data from 2021-23 CHKS administration were not available for California.

Data Source: CalSCHLS Secondary Student Public Dashboard, retrieved 3/11/2025.

Youth Population Health Data

Youth Risk Behavior Survey (YRBS)

The national, state, and local Youth Risk Behavior Surveys are administered to 9th through 12th grade students drawn from probability samples of schools and students.

- Anonymous
- Self-administered, computer-scannable questionnaire or answer sheet
- Completed in one class period (45 minutes)
- Conducted biennially usually during the spring

The following YRBS items of interest were analyzed for San Diego Unified School District (SDUSD) and California: electronic bullying, feelings of sadness or hopelessness, suicidal ideation, suicide attempts, alcohol use, marijuana use, and illicit drug use.

Were Electronically Bullied*†

Felt Sad or Hopeless†‡

*Electronic bullying includes being bullied through texting, Instagram, Facebook, or other social media, during the 12 months before the survey.

†Feelings of sadness or hopelessness almost every day for 2 or more weeks in a row so that they stopped doing some usual activities, during the 12 months before the survey.

‡This graph contains weighted results.

§Data from 2021 and 2023 YRBS administrations were not available for California.

Data Source: High School YRBS Data, <https://yrbs-explorer.services.cdc.gov/#/>, retrieved 3/12/2025

Youth Population Health Data

Youth Risk Behavior Survey (YRBS)

The proportion of high school students in San Diego Unified School District who reported attempting suicide increased in 2023.

Seriously Considered Suicide*‡

Attempted Suicide†‡

*Seriously considered attempting suicide during the 12 months before the survey.

†Actually attempted suicide one or more times during the 12 months before the survey.

‡This graph contains weighted results.

§Data from 2021 and 2023 YRBS administrations were not available for California.

Data Source: High School YRBS Data, <https://yrbs-explorer.services.cdc.gov/#/>, retrieved 3/12/2025

Youth Population Health Data

Youth Risk Behavior Survey (YRBS)

According to the most recent administration of the YRBS, there has been an increase in current marijuana use among high school students in San Diego Unified School District compared to the 2021 administration; however, self-reported usage was three percentage points higher in the 2019 administration.

Current Alcohol Use*‡

Current Marijuana Use*‡

*Had at least one drink of alcohol during the 30 days before the survey.

†Used marijuana during the 30 days before the survey.

‡This graph contains weighted results.

§Data from 2021 and 2023 YRBS administrations were not available for California.

Data Source: High School YRBS Data, <https://yrbs-explorer.services.cdc.gov/#/>, retrieved 3/12/2025

Youth Population Health Data

Youth Risk Behavior Survey (YRBS)

Reports of illicit drug use (at least once during the youth's lifetime) increased overall among San Diego County high school students in 2023 compared to prior years. Self-reported use of cocaine decreased.

Other Illicit Drugs - California*†

Other Illicit Drugs - San Diego*†

*Ever used select illicit drugs.

†This graph contains weighted results.

‡Data from 2021 and 2023 YRBS administrations were not available for California.

Data Source: High School YRBS Data, <https://yrbs-explorer.services.cdc.gov/#/>, retrieved 3/12/2025

Youth Population Health Data

Youth Risk Behavior Survey (YRBS)—San Diego Unified School District

YRBS data include endorsement of sexual identity. Lesbian, gay, and bisexual (LGB) students were at greater risk of electronic bullying, feelings of sadness or hopelessness, suicidal ideation, and attempted suicide.

LGB High School Students
San Diego, 2023*†‡§¶

Heterosexual High School Students
San Diego, 2023*†‡§¶

*Electronic bullying includes being bullied through texting, Instagram, Facebook, or other social media, during the 12 months before the survey.

†Feelings of sadness or hopelessness almost every day for 2 or more weeks in a row so that they stopped doing some usual activities, during the 12 months before the survey.

‡Seriously considered attempting suicide during the 12 months before the survey.

§Actually attempted suicide one or more times during the 12 months before the survey.

¶This graph contains weighted results.

Data Source: High School YRBS Data, <https://yrbs-explorer.services.cdc.gov/#/>, retrieved 3/12/2025

Youth Population Health Data

Youth Risk Behavior Survey (YRBS)—San Diego Unified School District

Female students were most likely to report current marijuana use regardless of sexual orientation; however, LGB females were at the greatest risk. LGB males were more likely to report current alcohol or marijuana use, as compared to heterosexual males.

**LGB High School Students
San Diego, 2023†**

**Heterosexual High School Students
San Diego, 2023†**

*Had at least one drink of alcohol during the 30 days before the survey.

†Used marijuana during the 30 days before the survey.

‡This graph contains weighted results.

Youth Population Health Data

Drug Overdose Rates for Youth in San Diego County

Following a 4-year increasing trend, rates of discharge in emergency departments (ED) and hospitals following drug overdose among youth under the age of 18 decreased in 2023.

**Rates of Death, ED Discharge, and Hospital Discharge due to Drug Overdose
Among Youth <18 years old in San Diego County, 2019-2023*†**

*Emergency department discharge and hospitalization rates are not unique values, may include duplicates (readmissions)

†Emergency department and hospitalization data includes San Diego County residents as well as those with missing zip codes treated in a San Diego County facility

Sources: California Department of Public Health, California Department of Health Care Access and Information (HCAI), Patient Discharge Data & Emergency Department Discharge Data, 2019-2023

Prepared by: County of San Diego, Health and Human Services Agency, Behavioral Health Services, Population Health Unit. 5/15/2025

NOTE: Methodology changed in 2025; these data all reflect current methodology

Key Findings

Behavioral Health Services for Children & Youth (BHS-CY)

Specialty Mental Health Services (SMHS)

Fiscal Year 2023-24

1. The COVID-19 pandemic began in March 2020. The federal Public Health Emergency (PHE) declaration ended in May 2023; as of 2024, COVID-19 is widely considered to have transitioned to the endemic phase. The socioemotional impact of COVID-19 is vast, varied, and difficult to fully ascertain. Data presented here may not be directly comparable to previous or future years.
2. 11,726 youth received services through the San Diego County BHS-CY SMHS system, a 2% decrease from 11,919 served in FY 2022-23. Total youth served has decreased 15% over the past five years (from 13,758 in FY 2019-20).
3. As part of the County of San Diego's ongoing efforts to improve cultural awareness and sensitivity, gender reporting was enhanced in FY 2022-23 to reflect and respect gender nonconforming youth. Overall, the gender gap among BHS-CY youth has lessened over time.
4. 65% of clients were Hispanic. As compared to the San Diego County estimated population in 2023, BHS-CY served a larger percentage of Hispanic and Black/African American clients, and a smaller percentage of White and Asian/Pacific Islander clients.
5. 84% of clients served by BHS-CY lived in a family home or apartment at some point during FY 2023-24, a slight decrease from 85% in FY 2022-23.
 - 14% of children ages 0-5 lived in a foster home during FY 2023-24, as compared to 4% systemwide.
 - 18% of TAY clients in BHS-CY lived in a correctional facility during FY 2023-24, as compared to 7% systemwide.
6. 11,089 (95%) clients had health coverage exclusively by Medi-Cal in FY 2023-24; a slight increase from 11,204 (94%) in FY 2022-23.
7. 1,440 (21%) of 6,748 BHS-CY clients ages 12+ identified as LGBTQ+ in FY 2023-24. Gender identity and sexual orientation data were expanded in 2023-24 to include age 12; previous years were comprised of ages 13+ and may not be directly comparable.

SMHS Key Findings, continued

8. The four most common diagnostic categories were Stressor and Adjustment disorders, Depressive disorders, Anxiety disorders, and Attention Deficit Hyperactivity Disorder (ADHD).
 - Systemwide, the rate of Depressive disorder diagnoses has decreased six percentage points over the past five years, from 32% in FY 2019-20 to 26% in FY 2023-24.
 - Autism Spectrum Disorder diagnoses increased dramatically over the past five years (15 youth in FY 2019-20, 509 youth in FY 2023-24); this reflects the inclusion of ASD as a valid diagnosis in the BHS-CY system as of October 2019, as well as a broader awareness and increased identification of youth on the autism spectrum in the United States.^{1,2,3}
9. Co-occurring substance use issues among youth (ages 12+) was defined by multiple diagnostic tiers, involvement with the Substance Use Disorder (SUD) sector, and clinician-endorsed substance abuse questions on the Behavioral Health Assessment form. In FY 2023-24, 1,919 (28%) of 6,748 youth met these criteria for co-occurring substance use issues, as compared to 1,882 (27%) of 7,083 youth in FY 2022-23.
 - Youth with co-occurring substance use issues were more likely to have a Depressive, Bipolar, or Stressor/Adjustment disorder, and less likely to have ADHD or an Anxiety disorder, as compared to systemwide averages.
 - 286 (15%) clients with substance use issues also received treatment from the SUD system during the fiscal year.
 - 164 (57%) of these 286 clients receiving SUD services had a dual diagnosis in the MH system.
10. The proportion of clients receiving Case Management services has increased sixteen percentage points in the past five years, from 53% in FY 2019-20 to 69% in FY 2023-24.
11. On average, youth clients received 18.1 hours of Outpatient Services in FY 2023-24, no change from 18.1 hours in FY 2022-23.
12. The majority (88%) of clients active in FY 2023-24 entered the system via Outpatient services.
13. Compared to systemwide averages, Black/African American and Multiracial youth were more than twice as likely to receive Residential services (STRTP+ and/or Shelter and Respite). White clients were more likely to receive Residential or Emergency/Crisis services. Hispanic clients were less likely to receive Residential or Inpatient services.

SMHS Key Findings, continued

14. 711 (6%) clients used Inpatient (IP) services in FY 2023-24, a slight increase from 609 (5%) clients in FY 2022-23.
 - 188 (26%) of 711 IP clients received multiple IP services within the fiscal year, a slight increase from 151 (25%) of 609 in FY 2022-23.
15. 1,094 (9%) clients (inclusive of direct admits) received services from the Emergency Screening Unit (ESU) in FY 2023-24, a slight decrease from 1,160 (10%) in FY 2022-23.
 - 258 (24%) of 1,094 ESU clients had multiple ESU visits within the fiscal year; a slight increase from 261 (23%) of 1,160 in FY 2022-23.
 - Of 1,693 ESU visits in FY 2023-24, 1,137 (67%) were diverted from an IP admission; a decrease from 73% (1,240 of 1,705) in FY 2022-23.
16. The proportion of youth in the Child and Family Well-Being sector also receiving services from BHS-CY (29%, 1,013 of 3,494) increased from 27% (1,110 of 4,179) in FY 2022-23.
17. The proportion of youth in the Substance Use Disorder sector also receiving services from BHS-CY (17%, 286 of 1,715) increased from 10% (278 of 2,680) in FY 2022-23.
18. The proportion of youth in Probation also receiving services from BHS-CY (51%, 767 of 1,495) decreased slightly from 52% (642 of 1,247) in FY 2022-23.
19. As measured by Pediatric Symptom Checklist (PSC), caregiver report of reliable improvement in behavioral and emotional well-being following receipt of mental health services has declined over the past three years, from 53% in FY 2021-22 to 48% in FY 2023-24. Youth self-report (PSC-Y) remained relatively stable.
20. As measured by Pediatric Symptom Checklist (PSC), caregiver report of clinically significant improvement in behavioral and emotional well-being following receipt of mental health services has declined over the past three years, from 58% in FY 2021-22 to 53% in FY 2023-24. Youth self-report (PSC-Y) remained relatively stable.
21. As measured by the Child and Adolescent Needs and Strengths (CANS) and CANS-Early Childhood (CANS-EC) assessments, the majority of clients experienced a reduction of at least one need from initial assessment to discharge on the Life Functioning, Risk Behaviors, Child Behavioral and Emotional Needs, and/or Challenges domains.

Key Findings

Behavioral Health Services for Children & Youth (BHS-CY)

Substance Use Disorder (SUD)

Fiscal Year 2023-24

1. The COVID-19 pandemic began in March 2020. The federal Public Health Emergency (PHE) declaration ended in May 2023; as of 2024, COVID-19 is widely considered to have transitioned to the endemic phase. The socioemotional impact of COVID-19 is vast, varied, and difficult to fully ascertain. Data presented here may not be directly comparable to previous or future years.
2. 641 youth (under 18 years of age) received services through the San Diego County BHS-CY SUD system, a 2% decrease from 655 served in FY 2022-23, and a 16% increase from 555 served in FY 2021-22.
3. 60% of youth clients were male. The proportion of male to female youth served by SUD has remained relatively consistent across the past three years.
4. 73% of youth clients were Hispanic; no change from FY 2022-23. As compared to the San Diego Medi-Cal estimated population in 2023, SUD served a larger percentage of White, Black/African American and Hispanic clients, and a smaller percentage of Asian/Pacific Islander clients and clients who endorsed more than one race.
5. The majority of SUD youth (84%) identified marijuana as their primary substance used, a decrease from 86% in FY 2022-23.
6. 1,904 clients received Perinatal SUD services in FY 2023-24, a 6% increase from 1,804 in FY 2022-23.
 - Perinatal SUD clients were most likely to be White and between the ages of 26-59.
 - The most common primary substances used among Perinatal SUD clients were methamphetamine (40%) and alcohol (32%).
7. Average length of treatment in Teen Programs was 93 days for Outpatient LOC (increase from 89 days in FY 2022-23) and 26 days for Residential LOC (increase from 19 days in FY 2022-23). Among Perinatal Programs, average length of treatment was 87 days for Outpatient LOC (no change from 87 days in FY 2022-23) and 63 days for Residential LOC (increase from 59 days in FY 2022-23).

The **Mental Health Services** section of this report captures Specialty Mental Health Services (SMHS) data from treatment programs designed to primarily address the mental health needs of children and youth ages 0 to 21.

The **Substance Use Disorder** section of this report captures data from treatment programs designed to primarily address the substance use issues of youth and women, including pregnant/parenting women.

The **MHSA** section of this report captures data from prevention and early intervention programs designed to primarily address the mental health needs of children, youth and families.

BHS-CY Mental Health Services

Who Are We Serving?

AB3632 was replaced by AB114 in FY 2011-12 and beginning July 1, 2012, educationally-related mental health services (ERMHS) transitioned to schools. In 2014, the Affordable Care Act (ACA) expanded the Medi-Cal eligible population primarily impacting adults. Starting January 1, 2015, Managed Care Health Plans began serving clients with mild to moderate level needs. In January 2023 under CalAIM, the medical necessity criteria were expanded.

Number of Clients

In FY 2023-24, BHS-CY delivered mental health treatment services to 11,726 youth. Among those youth, 11,089 were insured exclusively by Medi-Cal.

*Medi-Cal data are reported by calendar year.

Number of Clients Within Medi-Cal Youth Population*

The proportion of Medi-Cal youth served by BHS-CY has declined in the past five years, from 3.9% in FY 2019-20 to 3.2% in FY 2023-24.

Service Provider Type

The majority (88%) of BHS-CY youth were served *only* by Organizational (Org) providers in FY 2023-24, a slight decrease from 89% in FY 2022-23. Six percent received services exclusively from Fee-for-Service (FFS) providers.

Who Are We Serving?

More than half of clients served were between the ages of 12 and 17 years, whereas the County youth population and County Medi-Cal youth population had a more even distribution across age ranges.

Age of Clients

- ❖ Adolescents (12-17 years) comprised 51% of the BHS-CY population.
- ❖ School-age clients (6-11 years) comprised 30% of the BHS-CY population.
- ❖ Children ages 0-5 comprised 13% of the BHS-CY population.

Who Are We Serving?

As part of the County of San Diego's ongoing efforts to improve cultural awareness and sensitivity, gender reporting was enhanced in FY 2022-23 to reflect and respect gender nonconforming youth. Gender reported here reflects youth current identification, not sex assigned at birth.

Client Gender*

❖ 5,681 (48%) clients who received BHS-CY services in FY 2023-24 identified as male.

❖ In FY 2022-23 and FY 2023-24, more male youth were served than female youth. During the first two full years of the COVID-19 pandemic, more females were served. Prior to the COVID-19 pandemic, the proportion of males served had been consistently greater since these data began to be tracked in 1996. The gender gap among BHS-CY youth has lessened over time.

Client Gender Distribution

*Gender methodology was enhanced in FY 2022-23; data may not be directly comparable to previous years.

Who Are We Serving?

Client Race/Ethnicity

- ❖ 7,591 (65%) clients who received BHS-CY services in FY 2023-24 were identified as Hispanic.
- ❖ A larger percentage of Hispanic and Black/African American clients, and a smaller percentage of White and Asian/Pacific Islander clients received services, as compared to their prevalence in the San Diego County youth population.

Client Race/Ethnicity Distribution

NH=Non-Hispanic

*Medi-Cal race/ethnicity data are not categorized by Hispanic/non-Hispanic; proportions may not be directly comparable to BHS-CY/Census data.

Who Are We Serving?

Client Living Situation

Eighty-four percent of youth served by BHS-CY lived in a family home or apartment at some point during FY 2023-24.

*Group Home includes Residential Treatment Centers and Short-Term Residential Therapeutic Programs.

†The majority of Children's Shelter clients are served by Polinsky Children's Center.

Health Care Coverage

11,089 (95%) children and youth who received services from BHS-CY during FY 2023-24 were covered exclusively by Medi-Cal.

NOTE: Clients covered by private/other insurance may have also received Medi-Cal coverage during the fiscal year.

Primary Care Physician (PCP) Status*

Of the 9,894 clients for whom PCP status was known, 9,410 (95%) had a PCP in FY 2023-24; no change from 95% in FY 2022-23.

Who Are We Serving?

Sexual Orientation*

Of 6,748 BHS-CY clients **ages 12 or older**, 3,581 (53%) were reported to be heterosexual (as compared to 54% in FY 2022-23). Sexual orientation was unreported or declined to state for 26% of the 12+ population in FY 2023-24.

*Not Reported category includes Fee-for-Service providers for whom data were not available.

†Gender identity and sexual orientation data were expanded in 2023-24 to include age 12. Previous years were comprised of ages 13+ and may not be directly comparable.

History of Trauma

Previous experience of **traumatic events** was reported by clinicians for 9,576 clients (82% of the BHS-CY population) in FY 2023-24; of these clients, 6,917 (72% of the 9,576 clients for whom this information was known) had a **history of trauma**. By comparison, 72% of clients in FY 2022-23 had a reported history of trauma.

Who Are We Serving?

Interpretation of diagnosis trends in FY 2023-24 is challenging, given the complex effects of the pandemic which began in March 2020. Looking at the 5-year trend, the rate of Oppositional/Conduct disorder diagnoses decreased nearly 4 percentage points, from 8% in FY 2019-20 to 4% in FY 2023-24. The rate of Depressive disorder diagnoses decreased from 32% in FY 2019-20 to 26% in FY 2023-24. The proportion of Other/Excluded diagnoses tripled over the past 5 years, due in large part to a significant increase in Autism Spectrum Disorder diagnoses (15 youth in FY 2019-20, 509 youth in FY 2023-24); this reflects the inclusion of ASD as a valid diagnosis in the BHS-CY system as of October 2019, as well as a broader awareness and increased identification of youth on the autism spectrum in the United States.^{1,2,3}

Primary Diagnosis

The most common primary diagnoses among children and youth served by BHS-CY in FY 2023-24 were: Stressor and Adjustment disorders (n=3,006; 28%), Depressive disorders (n=2,740; 26%), Anxiety disorders (n=1,694; 16%), and ADHD (n=1,235; 11%).

*Primary DSM-5 diagnosis from the last episode of service prior to June 30, 2024; or, the most recent valid diagnosis. Invalid/Missing diagnoses are excluded.

†In alignment with ICD-10 and DSM-5, Adjustment disorders and PTSD/Other acute stress reaction are classified together within the Stressor and Adjustment disorders category.

Who Are We Serving?

Within the Stressor and Adjustment disorder diagnostic category, the proportion of Adjustment disorder diagnoses has declined over the past five years. Twenty-eight percent of BHS-CY youth ages 12+ were identified as having a co-occurring substance use issue; 57% of BHS-CY youth ages 12+ also receiving SUD services also had a dual diagnosis in the MH system.

Stressor and Adjustment Disorders*

As of May 2013, in alignment with ICD-10 and DSM-5, Adjustment disorders and PTSD/Other acute stress reaction are classified together within the Stressor and Adjustment disorders category. The rate of Stressor disorder diagnoses peaked at 16% in FY 2021-22, followed by a slight decrease to 15% in FY 2022-23 and FY 2023-24.

Clients with Stressor and Adjustment Disorders

Co-occurring Substance Use (12+ years)

In the BHS-CY system, co-occurring substance use is operationally defined as a dual diagnosis (concomitant substance use diagnosis) and/or involvement with Substance Use Disorder (SUD) services and/or endorsement of substance abuse-related items on the Behavioral Health Assessment (BHA) form. In FY 2023-24, 28% of BHS-CY youth **ages 12 and up** had a co-occurring substance use issue.

BHS-CY Youth	FY 2022-23 (12+) Percent (n of N)	FY 2023-24 (12+) Percent (n of N)
Had co-occurring substance use issue (dual diagnosis and/or SUD services and/or BHA item endorsement)	27% (1,882 of 7,083)	28% (1,919 of 6,748)
BHS-CY Youth with Co-occurring Substance Use Issue	FY 2022-23 (12+) Percent (n of N)	FY 2023-24 (12+) Percent (n of N)
Had dual diagnosis through mental health program†	45% (854 of 1,882)	46% (890 of 1,919)
Received services from SUD program	15% (276 of 1,882)	15% (286 of 1,919)
BHS-CY youth who received services from SUD program who also had dual diagnosis	56% (154 of 276)	57% (164 of 286)

*Primary DSM-5 diagnosis from the last episode of service prior to June 30, 2024; or, the most recent valid diagnosis. Invalid/Missing diagnoses are excluded.

†These youth may have received substance use counseling as part of their EPSDT mental health services.

Who Are We Serving?

1,238 of 1,919 (65%) clients with a co-occurring substance use problem were Hispanic in FY 2023-24. This aligns with the race/ethnicity distribution of youth ages 12 and older in the BHS-CY system.

Co-occurring Substance Use—Age

More than half of BHS-CY youth ages 18 and older, and 26% of BHS-CY youth ages 12-17, were identified as having a co-occurring substance use issue (dual diagnosis, enrollment in an SUD program, and/or endorsement of substance abuse-related BHA questions).

Co-occurring Substance Use—Race/Ethnicity

NH Black/African American youth ages 12+ served by BHS-CY had the highest proportion of co-occurring substance use (208 of 539 clients), while Asian/Pacific Islanders had the lowest proportion (26 of 193 clients).

*Clients with unknown race/ethnicity were excluded from this analysis.

Who Are We Serving?

Co-occurring Substance Use and Primary Diagnosis

Youth (ages 12+) with co-occurring substance use problems who received a valid diagnosis were most likely (35%) to be diagnosed with a Stressor/Adjustment disorder. These youth were more likely to have a diagnosis of Depressive or Bipolar disorder than youth in BHS-CY overall. Some research suggests that youth self-medicate for their mental health issues, leading to problematic substance use.¹

Primary Diagnosis*

*Primary DSM-5 diagnosis from the last episode of service prior to June 30, 2024; or, the most recent valid diagnosis. Invalid/Missing diagnoses are excluded.

†In alignment with ICD-10 and DSM-5, Adjustment disorders and PTSD/Other acute stress reaction are classified together within the Stressor and Adjustment disorders category.

¹Broman, C. L., Wright, M. K., Broman, M. J., & Bista, S. (2019). Self-medication and substance use: A test of the hypothesis. *Journal of Child & Adolescent Substance Abuse*, 28(6), 494-504.

Who Are We Serving? Fee-for-Service Youth

BHS-CY utilizes two provider systems: Organizational Providers and Fee-for-Service (FFS) Providers. This section focuses on clients who received any services from Fee-for-Service (FFS) providers during the fiscal year, even if they also received services from Organizational Provider programs.

FFS Youth Clients

1,382 youth clients were served by an FFS provider at some point in FY 2023-24.

❖ The proportion of clients served by FFS providers increased slightly as compared to the previous fiscal year.

Number of FFS Clients Served

Age of FFS Youth Clients*

1,026 (74%) youth clients served by FFS providers in FY 2023-24 were ages 12-17.

FFS Age Distribution

*As of FY 2021-22, Outpatient FFS clients ages 18+ are captured in the Adult/Older Adult system and are no longer reported in the FFS Youth section of this report; age distributions are not directly comparable to previous years.

Who Are We Serving?

Fee-for-Service Youth

As part of the County of San Diego's ongoing efforts to improve cultural awareness and sensitivity, gender reporting was enhanced in FY 2022-23 to reflect and respect gender nonconforming youth. Gender reported here reflects youth current identification, not sex assigned at birth.

FFS Youth Client Gender*

737 (53%) youth clients served by FFS providers in FY 2023-24 were female; more females than males have been served by FFS providers over the past five years as compared to systemwide distributions.

*Gender methodology was enhanced in FY 2022-23; data may not be directly comparable to previous years.

Who Are We Serving? Fee-for-Service Youth

FFS Youth Client Race/Ethnicity

- ❖ Race/ethnicity data were not reported for 12% of youth clients who were served by FFS providers in FY 2023-24.
- ❖ 688 (50%) youth clients who were served by BHS-CY FFS providers in FY 2023-24 were identified as Hispanic.
- ❖ Proportionally, more White youth and fewer Hispanic youth were served by FFS providers compared to systemwide averages.

FFS Race/Ethnicity Distribution

Who Are We Serving? Fee-for-Service Youth

FFS Youth Client Living Situation

Living Situation was not reported for 10% of youth clients who were served by FFS providers in FY 2023-24. 1,111 (80%) clients who were served by BHS-CY FFS providers lived in a family home or apartment at some point during FY 2023-24; 46 (3%) lived in a Foster Home.

*Group Home includes Residential Treatment Centers and Short-Term Residential Therapeutic Programs.

†The majority of Children's Shelter clients are served by Polinsky Children's Center.

FFS Youth Client Health Care Coverage

1,351 (98%) youth clients who were served by FFS providers in FY 2023-24 were covered exclusively by Medi-Cal. By comparison, 95% of BHS-CY clients systemwide were covered exclusively by Medi-Cal in FY 2023-24.

NOTE: Clients covered by private/other insurance may have also received Medi-Cal coverage during the fiscal year.

FFS Youth Client Primary Care Physician (PCP) Status

Of the 825 FFS clients for whom PCP status was known, 782 (95%) had a PCP in FY 2023-24; unchanged from the previous fiscal year (95%) and is comparable to the 95% of BHS-CY clients systemwide in FY 2023-24. PCP status was not reported for 40% of FFS clients in FY 2023-24.

Who Are We Serving? Fee-for-Service Youth

FFS Youth Client History of Trauma

Previous experience of **traumatic events** was reported by clinicians for 706 youth clients (51% of the FFS youth population) in FY 2023-24; of these 706 clients, 577 (82%) had a **history of trauma**. By comparison, 72% of BHS-CY clients systemwide for whom this information was known had a **history of trauma** in FY 2023-24. History of trauma was not reported for 49% of FFS youth clients in FY 2023-24.

*Active FFS Providers in FY 2023-24

FFS Youth Service Provider Type (N=69)*

Of 199 FFS Providers credentialed to provide services for youth, 69 (35%) actually provided services in FY 2023-24. 48% of active FFS providers for youth were Group Practice providers. 68% of youth clients served by FFS providers in FY 2023-24 were seen at Group Practice providers. These clients may have been seen by more than one provider during the fiscal year.

FFS Provider Type	Active Providers	Clients Served (duplicated)
Group Practice	33	68% (936 of 1,382)
LMFT	16	8% (110 of 1,382)
LCSW	9	6% (87 of 1,382)
Psychologist	7	1% (18 of 1,382)
Psychiatrist	4	3% (45 of 1,382)

Who Are We Serving? Fee-for-Service Youth

FFS Youth Client Primary Diagnosis*

The most common primary diagnoses among children and youth served by FFS providers in FY 2023-24 were: Depressive disorders (n=485; 36%), Stressor and Adjustment disorders (n=362; 27%), ADHD (n=147; 11%), and Anxiety disorders (n=136; 10%).

*Primary DSM-5 diagnosis from the last episode of service prior to June 30, 2024; or, the most recent valid diagnosis. Invalid/Missing diagnoses are excluded.

†In alignment with ICD-10 and DSM-5, Adjustment disorders and PTSD/Other acute stress reaction are classified together within the Stressor and Adjustment disorders category.

Who Are We Serving? Fee-for-Service Youth

FFS Stressor and Adjustment Disorders*

As of May 2013, in alignment with ICD-10 and DSM-5, Adjustment disorders and PTSD/Other acute stress reaction are classified together within the Stressor and Adjustment disorders category. The rate of Stressor disorder diagnosis among FFS clients has increased steadily over the past five years, from 10% in FY 2019-20 to 15% in FY 2023-24. This is consistent with systemwide trending.

FFS Clients with Stressor and Adjustment Disorders

FFS Youth Client Co-occurring Substance Use (12+ years)

In the BHS-CY system, co-occurring substance use is operationally defined as a dual diagnosis (concomitant substance use diagnosis) and/or involvement with Substance Use Disorder (SUD) services and/or endorsement of substance abuse-related items on the Behavioral Health Assessment (BHA) form. In FY 2023-24, 23% of FFS youth clients **ages 12 and up** had a co-occurring substance use issue.

FY 2023-24 BHS-CY Youth	FFS (12+) Percent (n of N)	Systemwide (12+) Percent (n of N)
Had co-occurring substance use issue (dual diagnosis and/or SUD services and/or BHA item endorsement)	23% (234 of 1,040)	28% (1,919 of 6,748)
BHS-CY Youth with Co-occurring Substance Use Issue	FFS (12+) Percent (n of N)	Systemwide (12+) Percent (n of N)
Had dual diagnosis through mental health program†	58% (136 of 234)	46% (890 of 1,919)
Received services from SUD program	24% (57 of 234)	15% (286 of 1,919)
BHS-CY youth who received services from SUD program who also had dual diagnosis	61% (35 of 57)	57% (164 of 286)

*Primary DSM-5 diagnosis from the last episode of service prior to June 30, 2024; or, the most recent valid diagnosis. Invalid/Missing diagnoses are excluded.

†These youth may have received substance use counseling as part of their EPSDT mental health services.

Who Are We Serving?

Fee-for-Service *TERM* Youth

Treatment and Evaluation Resource Management (TERM)

TERM is a mental health program under the direction of the County of San Diego Board of Supervisors and is operated by Optum Public Sector San Diego through a contract with County of San Diego HHSA Behavioral Health Services serving Child and Family Well-Being (CFWB) or Probation clients and youth involved in the juvenile justice system with a commitment to improving outcomes for these clients.

The purpose of the program is to provide independent oversight of mental health services for children in the dependency and delinquency systems; with the mission of providing flexible services that are designed to meet and build upon the unique needs, strengths and potential of each youth and family.

Children as well as parents and guardians receiving services through TERM are provided with Behavioral Health Assessments, Individual Therapy, Group Therapy, Family Therapy, and Psychological/Psychiatric Evaluations as deemed appropriate to address their individual needs, to facilitate a whole family approach to health and wellness.

Optum is responsible for developing, maintaining and contracting a network of TERM providers. Providers offer an array of services in each region and strengthen family and youth connections to neighborhood and local community resources.

How Many TERM Providers are on the Network?

As of June 30, 2024, there were 96 total unique contracted providers. 76 of the 96 providers had an active TERM client in FY 2023-24.

- ❖ 73 Treatment Providers (Therapy Services)
- ❖ 22 Evaluators (Evaluation Services)
- ❖ 1 Psychiatric Evaluator (Psych Eval Services)

Note: There is overlap between Treatment Providers and Evaluators

TERM Evaluations

One of the services TERM providers deliver is psychological or psychiatric evaluation. Optum oversight is utilized to ensure that the rendering provider meets identified specialty criteria and that evaluations meet clinical standards. These data represent evaluations managed by the Optum TERM team.

- ❖ 18 providers administered 86 Child and Family Well-Being (CFWB) TERM evaluations for children and caregivers. The majority (50) of CFWB TERM evaluations were for parents. Three off-panel evaluations were administered.
- ❖ 15 providers administered 324 Probation TERM evaluations for youth.

Data Source: TERM Statistics FY 2023-24 (Optum)

Who Are We Serving? Age 0 – 5 Youth

Age 0-5 Clients

1,481 youth (13%) served by BHS-CY in FY 2023-24 were 0 to 5 years old, as compared to 12% in FY 2022-23.

❖ The majority (98%) of 0-5 clients were served *only* by Org providers in FY 2023-24, as compared to 98% in FY 2022-23.

Age Distribution of 0-5 Clients

Of 1,481 youth ages 0-5 youth served by BHS-CY, 448 (30%) were age 5.

0-5 Age Distribution

Who Are We Serving?

Age 0 – 5 Youth

As part of the County of San Diego's ongoing efforts to improve cultural awareness and sensitivity, gender reporting was enhanced in FY 2022-23 to reflect and respect gender nonconforming youth. Gender reported here reflects youth current identification, not sex assigned at birth.

Age 0-5 Client Gender*

867 (59%) age 0-5 clients who received BHS-CY services in FY 2023-24 were male. The gender gap of the 0-5 population has increased over the past year and remains wider than the BHS-CY system as a whole.

Age 0-5 Gender Distribution

*Gender methodology was enhanced in FY 2022-23; data may not be directly comparable to previous years.

Who Are We Serving? Age 0 – 5 Youth

Age 0-5 Client Race/Ethnicity

- ❖ 996 (67%) age 0-5 clients who received BHS-CY services in FY 2023-24 were identified as Hispanic.
- ❖ As compared to the BHS-CY system as a whole, a slightly greater proportion of Hispanic children ages 0-5 and a smaller proportion of Asian/Pacific Islander children ages 0-5 received services.

Age 0-5 Race/Ethnicity Distribution

Who Are We Serving?

Age 0 – 5 Youth

1,459 (99%) age 0-5 clients who received services from BHS-CY during FY 2023-24 were covered exclusively by Medi-Cal. By comparison, 98% of BHS-CY clients systemwide were covered exclusively by Medi-Cal in FY 2022-23.

Age 0-5 Health Care Coverage

NOTE: Clients covered by private/other insurance may have also received Medi-Cal coverage during the fiscal year.

Age 0-5 Primary Care Physician (PCP) Status

Of the 731 age 0-5 clients for whom PCP status was known, 716 (98%) had a PCP in FY 2023-24; no change from 98% of age 0-5 clients in FY 2022-23. By comparison, 95% of BHS-CY clients systemwide had a PCP in FY 2023-24.

Age 0-5 History of Trauma

Previous experience of **traumatic events** was reported by clinicians for 693 clients (47% of the age 0-5 population) in FY 2023-24; of these 693 clients, 481 (69%) had a **history of trauma**. By comparison, 72% of BHS-CY clients systemwide for whom this information was known had a **history of trauma** in FY 2022-23.

Who Are We Serving?

Age 0 – 5 Youth

Age 0-5 Primary Diagnosis*

The most common primary diagnoses among age 0-5 clients served by BHS-CY in FY 2023-24 were: Other/Excluded disorders (n=541; 48%), Stressor and Adjustment disorders (n=354; 31%), ADHD (n=110; 10%), and Anxiety disorders (n=65; 6%).

Age 0-5 Client Primary Diagnosis

*Primary DSM-5 diagnosis from the last episode of service prior to June 30, 2024; or, the most recent valid diagnosis. Invalid/Missing diagnoses are excluded.

†In alignment with ICD-10 and DSM-5, Adjustment disorders and PTSD/Other acute stress reaction are classified together within the Stressor and Adjustment disorders category.

Who Are We Serving? Age 0 – 5 Youth

Age 0-5 Stressor and Adjustment Disorders*

As of May 2013, in alignment with ICD-10 and DSM-5, Adjustment disorders and PTSD/Other acute stress reaction are classified together within the Stressor and Adjustment disorders category. The rate of Stressor disorder diagnosis among clients ages 0-5 continued to decrease in the past two years, following three years of steady increase.

0-5 Clients with Stressor and Adjustment Disorders

Age 0-5 Client Living Situation

1,249 (84%) age 0-5 clients served by BHS-CY lived in a family home or apartment at some point during FY 2023-24. 210 (14%) age 0-5 clients lived in a Foster Home; as compared to 4% systemwide.

*Primary DSM-5 diagnosis from the last episode of service prior to June 30, 2024; or, the most recent valid diagnosis. Invalid/Missing diagnoses are excluded.

†Group Home includes Residential Treatment Centers and Short-Term Residential Therapeutic Programs.

‡The majority of Children's Shelter clients are served by Polinsky Children's Center.

Who Are We Serving? Transition Age Youth

Transition Age Youth Clients

2,989 Transition Age Youth (TAY) clients, defined in the BHS-CY system as youth ages 16 to 25, were served in FY 2023-24, representing 26% of the total BHS-CY population. Similarly, TAY youth represented 26% of the BHS-CY population in FY 2022-23.

❖ The majority (86%) of TAY clients were served *only* by Org providers in FY 2023-24, unchanged from 86% in FY 2022-23.

Age of TAY Clients

2,237 (75%) TAY clients served by BHS-CY were ages 16-17, as compared to 76% in FY 2022-23.

❖ The proportion of TAY clients ages 18-25 (25%) served by BHS-CY increased from 24% in FY 2022-23.

TAY Age Distribution

*On average, less than 1% of the TAY population in BHS-CY was over the age of 21.

Who Are We Serving?

Transition Age Youth

As part of the County of San Diego's ongoing efforts to improve cultural awareness and sensitivity, gender reporting was enhanced in FY 2022-23 to reflect and respect gender nonconforming youth. Gender reported here reflects youth current identification, not sex assigned at birth.

TAY Client Gender*

1,486 (50%) TAY clients who received BHS-CY services in FY 2023-24 were female. Trending over the past five years, the TAY population has been comprised of more females than males.

*Gender methodology was enhanced in FY 2022-23; data may not be directly comparable to previous years.

Who Are We Serving? Transition Age Youth

TAY Client Race/Ethnicity

- ❖ 1,889 (63%) TAY clients who received BHS-CY services in FY 2023-24 were identified as Hispanic.
- ❖ The distribution of race/ethnicity among TAY clients in the BHS-CY system is similar to the distribution throughout the system as a whole.

TAY Race/Ethnicity Distribution

Who Are We Serving? Transition Age Youth

TAY Client Living Situation

2,140 (72%) TAY clients served by BHS-CY lived in a family home or apartment at some point during FY 2023-24. 545 (18%) TAY clients lived in a Correctional Facility in FY 2023-24.

TAY Health Care Coverage

2,698 (90%) TAY clients who received services from BHS-CY during FY 2023-24 were covered exclusively by Medi-Cal. By comparison, 95% of BHS-CY clients systemwide were covered exclusively by Medi-Cal in FY 2023-24.

NOTE: Clients covered by private/other insurance may have also received Medi-Cal coverage during the fiscal year.

TAY Primary Care Physician (PCP) Status†

Of the 2,643 TAY clients for whom PCP status was known, 2,429 (92%) had a PCP in FY 2023-24, unchanged from 92% of TAY clients in FY 2022-23. By comparison, 95% of BHS-CY clients systemwide had a PCP in FY 2023-24.

*Group Home includes Residential Treatment Centers and Short-Term Residential Therapeutic Programs.

†The majority of Children's Shelter clients are served by Polinsky Children's Center.

Who Are We Serving? Transition Age Youth

TAY Sexual Orientation*†

1,632 (55%) TAY clients served by BHS-CY identified as heterosexual during FY 2023-24 (as compared to 56% in FY 2022-23). Sexual orientation was unreported or declined to state for 21% of the TAY population in FY 2023-24, as compared to 18% in FY 2022-23.

*Not Reported category includes Fee-for-Service providers for whom data were not available.

†Asexual was added as a response option in FY 2021-22. Transgender is now classified with gender identity and has been excluded from historical data.

TAY History of Trauma

Previous experience of **traumatic events** was reported by clinicians for 2,564 clients (86% of the TAY population) in FY 2023-24; of these 2,564 clients, 2,048 (80%) had a **history of trauma**. By comparison, 72% of BHS-CY clients systemwide for whom this information was known had a **history of trauma** in FY 2023-24.

Who Are We Serving? Transition Age Youth

TAY Primary Diagnosis*

The most common primary diagnoses among age TAY clients served by BHS-CY in FY 2023-24 were: Depressive disorders (n=1,063, 37%), Stressor and Adjustment disorders (n=829; 28%), and Anxiety disorders (n=485; 17%).

*Primary DSM-5 diagnosis from the last episode of service prior to June 30, 2024; or, the most recent valid diagnosis. Invalid/Missing diagnoses are excluded.

†In alignment with ICD-10 and DSM-5, Adjustment disorders and PTSD/Other acute stress reaction are classified together within the Stressor and Adjustment disorders category.

Who Are We Serving? Transition Age Youth

TAY Stressor and Adjustment Disorders*

As of May 2013, in alignment with ICD-10 and DSM-5, Adjustment disorders and PTSD/Other acute stress reaction are classified together within the Stressor and Adjustment disorders category. The rate of Stressor disorder diagnosis among TAY clients has increased steadily over the past five years, from 12% in FY 2019-20 to 18% in FY 2023-24.

TAY Clients with Stressor and Adjustment Disorders

TAY Co-occurring Substance Use

In the BHS-CY system, co-occurring substance use is operationally defined as a dual diagnosis (concomitant substance use diagnosis) and/or involvement with Substance Use Disorder (SUD) services and/or endorsement of substance abuse-related items on the Behavioral Health Assessment (BHA) form. In FY 2023-24, 40% of TAY youth had a co-occurring substance use issue.

FY 2023-24 BHS-CY Youth	TAY Percent (n of N)	Systemwide (12+) Percent (n of N)
Had co-occurring substance use issue (dual diagnosis and/or SUD services and/or BHA item endorsement)	40% (1,201 of 2,989)	28% (1,919 of 6,748)
BHS-CY Youth with Co-occurring Substance Use Issue	TAY Percent (n of N)	Systemwide (12+) Percent (n of N)
Had dual diagnosis through mental health program†	51% (616 of 1,201)	46% (890 of 1,919)
Received services from SUD program	13% (154 of 1,201)	15% (286 of 1,919)
BHS-CY youth who received services from SUD program who also had dual diagnosis	65% (100 of 154)	57% (164 of 286)

*Primary DSM-5 diagnosis from the last episode of service prior to June 30, 2024; or, the most recent valid diagnosis. Invalid/Missing diagnoses are excluded.

†These youth may have received substance use counseling as part of their EPSDT mental health services.

Who Are We Serving? Transition Age Youth

416 of 1,201 TAY clients (35%) with a co-occurring substance use problem were age 16. 741 of 1,201 (62%) TAY clients with a co-occurring substance use problem identified as Hispanic.

TAY Co-occurring Substance Use—Age

Approximately 36% of 16-year-olds and 37% of 17-year-olds who received services from the BHS-CY system were identified as having a substance use issue.

TAY Co-occurring Substance Use—Race/Ethnicity

Among TAY clients for whom race/ethnicity was reported, Black/African American TAY served by BHS-CY had the highest proportion of co-occurring substance use (156 of 289 clients, 54%). Asian/Pacific Islander TAY had the lowest proportion (18 of 82 clients, 22%).

*Clients with unknown race/ethnicity were excluded from this analysis. Only two TAY clients were identified as Native American and are not included in these results.

Who Are We Serving? Transition Age Youth

TAY Co-occurring Substance Use and Primary Diagnosis

As compared to TAY clients overall, TAY clients with co-occurring substance use problems were less likely to have a Depressive or Anxiety disorder, and more likely to have an Oppositional/Conduct or Stressor/Adjustment disorder.

*Primary DSM-5 diagnosis from the last episode of service prior to June 30, 2024; or, the most recent valid diagnosis. Invalid/Missing diagnoses are excluded.

†In alignment with ICD-10 and DSM-5, Adjustment disorders and PTSD/Other acute stress reaction are classified together within the Stressor and Adjustment disorders category.

Who Are We Serving? LGBTQ+ Youth

LGBTQ+ Clients (12+ years)

Gender identity and sexual orientation data were expanded in 2023-24 to include age 12. Previous years were comprised of ages 13+ and may not be directly comparable.

1,440 LGBTQ+ youth (who identified as non-heterosexual or non-cisgender) ages 12 and up were served in FY 2023-24, representing 21% of 6,748 youth ages 12 and up in the BHS-CY population.

Number of LGBTQ+ Clients Served

Fiscal Year (CYFBHS Clients)

LGBTQ+ Client Service Provider Type

The majority (87%) of LGBTQ+ clients were served *only* by Org providers in FY 2023-24.

Who Are We Serving?

LGBTQ+ Youth

As part of the County of San Diego's ongoing efforts to improve cultural awareness and sensitivity, gender reporting was enhanced in FY 2022-23 to reflect and respect gender nonconforming youth. Gender reported here reflects youth's current identification, not sex assigned at birth.

LGBTQ+ Client Gender*

828 (58%) LGBTQ+ clients who received BHS-CY services in FY 2023-24 identified as female; 208 (14%) identified as nonbinary or genderqueer.

*Gender methodology was enhanced in FY 2022-23; data may not be directly comparable to previous years.

†Gender identity and sexual orientation data were expanded in 2023-24 to include age 12. Previous years were comprised of ages 13+ and may not be directly comparable.

Who Are We Serving?

LGBTQ+ Youth

Gender reporting was expanded in FY 2022-23 to include self-reported gender identity.

LGBTQ+ Client Gender Identity

- ❖ 1,409 (98%) LGBTQ+ clients who received BHS-CY services endorsed a gender identity in FY 2023-24.
- ❖ Of these 1,409 clients, 934 (66%) identified as cisgender and 198 (14%) identified as transgender.

LGBTQ+ Gender Identity Distribution

*Gender identity and sexual orientation data were expanded in 2023-24 to include age 12. Previous years were comprised of ages 13+ and may not be directly comparable.

Who Are We Serving? LGBTQ+ Youth

LGBTQ+ Client Race/Ethnicity

- ❖ 837 (58%) LGBTQ+ clients who received BHS-CY services in FY 2023-24 were identified as Hispanic.
- ❖ More White, Asian, and Multiracial clients, and less Hispanic clients, identified as LGBTQ+ as compared to the BHS-CY systemwide averages.

LGBTQ+ Race/Ethnicity Distribution

*Gender identity and sexual orientation data were expanded in 2023-24 to include age 12. Previous years were comprised of ages 13+ and may not be directly comparable.

Who Are We Serving? LGBTQ+ Youth

LGBTQ+ Client Living Situation

1,255 (87%) LGBTQ+ clients served by BHS-CY lived in a family home or apartment at some point during FY 2023-24. 72 (5%) LGBTQ+ clients lived in a Group Home in FY 2023-24, more than twice the proportion of the BHS-CY systemwide average.

LGBTQ+ Health Care Coverage

1,340 (93%) LGBTQ+ clients who received services from BHS-CY during FY 2023-24 were covered exclusively by Medi-Cal. By comparison, 95% of BHS-CY clients systemwide that were covered exclusively by Medi-Cal in FY 2023-24.

NOTE: Clients covered by private/other insurance may have also received Medi-Cal coverage during the fiscal year.

LGBTQ+ Primary Care Physician (PCP) Status†

Of the 1,410 LGBTQ+ clients for whom PCP status was known, 1,317 (93%) had a PCP in FY 2023-24. By comparison, 95% of BHS-CY clients systemwide had a PCP in FY 2023-24.

*Group Home includes Residential Treatment Centers and Short-Term Residential Therapeutic Programs.

†The majority of Children's Shelter clients are served by Polinsky Children's Center.

‡Gender identity and sexual orientation data were expanded in 2023-24 to include age 12. Previous years were comprised of ages 13+ and may not be directly comparable.

Who Are We Serving? LGBTQ+ Youth

LGBTQ+ Sexual Orientation

781 (54%) LGBTQ+ clients served by BHS-CY identified as bisexual during FY 2023-24.

*Transgender is now classified with gender identity and has been excluded from historical data; some transgender clients identify as heterosexual.

†Gender identity and sexual orientation data were expanded in 2023-24 to include age 12. Previous years were comprised of ages 13+ and may not be directly comparable.

LGBTQ+ History of Trauma

Previous experience of **traumatic events** was reported by clinicians for 1,400 clients (97% of the LGBTQ+ population) in FY 2023-24; of these 1,400 clients, 1,158 (83%) had a **history of trauma**. By comparison, 72% of BHS-CY clients systemwide for whom this information was known had a **history of trauma** in FY 2023-24.

Who Are We Serving? LGBTQ+ Youth

LGBTQ+ Primary Diagnosis*

The most common primary diagnoses among LGBTQ+ clients served by BHS-CY in FY 2023-24 were: Depressive disorders (n=665, 47%), Stressor and Adjustment disorders (n=290; 20%), and Anxiety disorders (n=238; 17%). Rates of Depressive disorder diagnoses were far greater than the BHS-CY systemwide average.

*Primary DSM-5 diagnosis from the last episode of service prior to June 30, 2024; or, the most recent valid diagnosis. Invalid/Missing diagnoses are excluded.

†In alignment with ICD-10 and DSM-5, Adjustment disorders and PTSD/Other acute stress reaction are classified together within the Stressor and Adjustment disorders category.

‡Gender identity and sexual orientation data were expanded in 2023-24 to include age 12. Previous years were comprised of ages 13+ and may not be directly comparable.

Who Are We Serving? LGBTQ+ Youth

LGBTQ+ Stressor and Adjustment Disorders*

As of May 2013, in alignment with ICD-10 and DSM-5, Adjustment disorders and PTSD/Other acute stress reaction are classified together within the Stressor and Adjustment disorders category. The proportion of Stressor disorder diagnoses within the Stressor and Adjustment category has fluctuated over the past five years.

LGBTQ+ Co-occurring Substance Use (12+ years)

In the BHS-CY system, co-occurring substance use is operationally defined as a dual diagnosis (concomitant substance use diagnosis) and/or involvement with Substance Use Disorder (SUD) services and/or endorsement of substance abuse-related items on the Behavioral Health Assessment (BHA) form for clients ages 12+. In FY 2023-24, 33% of LGBTQ+ youth had a co-occurring substance use issue.

FY 2023-24 BHS-CY Youth	LGBTQ+ Percent (n of N)	Systemwide (12+) Percent (n of N)
Had co-occurring substance use issue (dual diagnosis and/or SUD services and/or BHA item endorsement)	33% (470 of 1,440)	28% (1,919 of 6,748)
BHS-CY Youth with Co-occurring Substance Use Issue	LGBTQ+ Percent (n of N)	Systemwide (12+) Percent (n of N)
Had dual diagnosis through mental health program†	43% (201 of 470)	46% (890 of 1,919)
Received services from SUD program	8% (39 of 470)	15% (286 of 1,919)
BHS-CY youth who received services from SUD program who also had dual diagnosis	69% (27 of 39)	57% (164 of 286)

*Primary DSM-5 diagnosis from the last episode of service prior to June 30, 2024; or, the most recent valid diagnosis. Invalid/Missing diagnoses are excluded.

†These youth may have received substance use counseling as part of their EPSDT mental health services.

‡Gender identity and sexual orientation data were expanded in 2023-24 to include age 12. Previous years were comprised of ages 13+ and may not be directly comparable.

How Are We Serving?

Mode of Service Delivery

Mental health services are primarily delivered in person, on the phone, or via videoconference. Prior to the COVID-19 pandemic in March 2020, services were overwhelmingly delivered in person (88%) and less than one percent took place online. During the first full year of the pandemic in FY 2020-21, only 37% of services were in person, while 63% of interactions took place via call or video. In FY 2023-24, while services have largely returned to face-to-face, 24% continue to be delivered by phone or online.

Services refer to outpatient billable contacts (e.g., therapy, case management, medication check, etc.) where the client and family or the client and family/legal guardian were contacted.

*Telehealth can include both video and telephone services.

†Other includes NULL, Correspondence, No Contact, and TTY

Where Are We Serving?

Where Are We Serving?

SchoolLink Services

BHS-CY has partnered with school districts since the late 1990s to offer outpatient specialty mental health and substance use disorder (SUD) treatment on school campuses that serve Medi-Cal and unfunded students. In FY 2019-20, SchoolLink to Behavioral Health Services (SchoolLink) was launched to implement standardized practices and increase collaboration between schools and providers for both mental health and SUD treatment programs. SchoolLink providers deploy clinicians to designated schools who work closely with school personnel to engage and support youth and families, as well as provide outreach. There are 35 Specialty Mental Health Services SchoolLink contracts that deploy clinicians to school campuses. Additionally, 8 SUD contractors provide SchoolLink services.

Clients Receiving SchoolLink Mental Health Services.*†

3,084 (28%) of 11,013 BHS-CY clients served during FY 2023-24 received at least one school site service, as compared to 3,211 (28%) of 11,279 in FY 2022-23.

Of these 3,084 clients, 28 (<1%) received non-treatment services only, there was no change from FY 2022-23.‡

Mental Health Treatment Services Provided in Schools.‡

387 of 783* schools (49%) in the County of San Diego had at least one school site treatment service during FY 2023-24, as compared to 394 (47%) of 840 in FY 2022-23.

Non-treatment services were provided at 7 additional schools.‡

SchoolLink On-Campus Client and Service Thresholds*

To ensure resources are optimally deployed, SchoolLink minimum thresholds were established in FY 2019-20 based on FY 2018-19 data. SchoolLink sites and providers have committed to these goals: a minimum of 10 on-campus services per client, and a minimum of 10 clients served on each designated SchoolLink campus. 57% of SchoolLink clients received at least 10 services on the school campus in FY 2023-24. 35% of school sites served 10 clients or more in FY 2023-24.

What Kind of Services Are Being Used?

Types of Services Used

Children and youth may receive multiple services in the course of a year, and the amount and type of each service received can vary widely by client. In FY 2023-24, Therapy, Assessment, and Case Management services were the highest utilized. **Trending across the past five years**, the percentage of clients receiving Assessment, TBS, and Day Services has declined, and the percentage of clients receiving Therapy, Case Management, and Inpatient has increased by at least one percentage point.

Intensive Home Based Service (IHBS) is no longer captured as a service code as of FY 2023-24. **In FY 2023-24, 520 unduplicated clients had prior authorization to receive IHBS.**

Percentage of Clients Receiving Each Type of Service*

*These data reflect the service type received by the client rather than the modality of the service provider and may not be directly comparable to provider-level data.

†In FY 2023-24, IOP (Intensive Outpatient Programs) and PHP (Partial Hospitalization Programs) were bundled with Day Services.

What Kind of Services Are Being Used?

Outpatient Service Treatment Hours

On average, clients received **18.1 hours of Outpatient Services** in FY 2023-24, no change from 18.1 hours in FY 2022-23. As compared to the previous fiscal year, ICC service treatment hours decreased. All other outpatient service treatment hours increased.

*Total average treatment hours per client provided at any level of OP service, excluding TBS services which are reported separately.

What Kind of Services Are Being Used?

Service Treatment Days

The average number of treatment days in **Day Services (41.3 days)** decreased 62%; likely due to the inclusion of shorter-term day treatment programs (Intensive Outpatient and Partial Hospitalization) at this service level. **Inpatient** treatment days (11.3 days) increased 13% from 10.0 days in FY 2022-23.

Treatment days are calculated at the client level; since clients may have had more than one service episode during the fiscal year, the average may be higher than treatment days calculated at the episode level.

Average Number of Treatment Days Per Client

*In FY 2024-25, IOP (Intensive Outpatient Programs) and PHP (Partial Hospitalization Programs) were bundled with Day Services.

†Inpatient service providers include Rady CAPS, Aurora, Sharp Mesa Vista, and any out-of-County hospitals utilized.

‡Crisis Stabilization days may be artificially inflated due to emergency service discharge protocols.

What Kind of Services Are Being Used?

Level of Care (LOC)

There are several levels of treatment for youth receiving mental health services, based on need and severity. Children and youth may receive services across multiple LOCs in the course of a year.

Percentage of Clients Receiving Service in each Level of Care*

*Clients may have received services in more than one level of care.

‡Urgent Outpatient services are limited to Emergency Medication Management Services as of FY 2021-22.

What Kind of Services Are Being Used?

First Service Ever Used by BHS-CY Clients*

Individual levels of care are rolled up into four service categories: Outpatient, Residential Services, Inpatient, and Emergency-Crisis. First service ever received in BHS-CY (from FY 2008-09) was calculated for unduplicated clients active in a given fiscal year.

Trending data are complicated to interpret. Some of these clients received their first service more than 10 years ago; many clinical and administrative changes have taken place in that period of time. Several system shifts may have contributed to the increase in Emergency-Crisis as a first service over the past five years: increase in PERT services and staffing beginning in FY 2016-17, introduction of MCRT services in January 2021, ESU bed expansion in 2018. The proportion of Outpatient as first service is comparable to pre-COVID-19 rates for BHS-CY clients.

First BHS-CY Service Category Used*

*Specific service types vary across fiscal years.

†In FY 2023-24, Outpatient Services included: Outpatient Contracted, Outpatient Fee-for-Service, Wraparound programs, Juvenile Forensic Service programs, and Therapeutic Behavioral Services programs.

‡In FY 2023-24, Residential Services included: Day Treatment, STRTP+ (Short-term Residential Treatment Programs, Psychiatric Health Facilities, Closed Treatment Facilities, San Pasqual Academy) and Shelter & Respite.

§In FY 2023-24, Inpatient Services included: Inpatient Contracted programs and Inpatient Fee-for-Service programs.

¶In FY 2023-24, Emergency-Crisis services included: Crisis Stabilization, PERT, MCRT, and Urgent Outpatient services.

What Kind of Services Are Being Used?

First Service Ever Used by BHS-CY Clients Active in FY 2023-24—Intensive Services

First service ever received in BHS-CY (from FY 2008-09) was identified for 11,678 youth in FY 2023-24; 1,387 (12%) entered the BHS-CY system by way of an intensive service; unchanged from 1,381 (12%) of 11,898 in FY 2022-23.

1,051 (76%) of these 1,387 youth entered the system via Emergency-Crisis Services. More than half of the 1,051 youth whose first BHS-CY service was Emergency-Crisis were served by a Crisis Services program. More than one-third of these 1,051 youth entered BHS-CY via a PERT program.

First BHS-CY Service Category Used - Intensive Service Breakdown

Fiscal Year 2023-24 (N=1,387)

*STRTP+ includes: Short-term Residential Treatment Programs, Psychiatric Health Facilities, Closed Treatment Facilities, and San Pasqual Academy.

†Urgent Outpatient services are limited to Emergency Medication Management Services.

What Kind of Services Are Being Used?

Average Length of Service (ALOS) by Level of Care

ALOS for Outpatient, Residential, and Emergency/Crisis service categories was calculated as average days from first service to last service for MH clients who completed a service episode during the fiscal year. Outpatient and Outpatient Fee for Service levels of care were limited to clients who had more than one service contact. ALOS for Inpatient service categories was calculated as average days from open to close for MH clients who completed a service episode.

Clients may have had multiple discharges across levels of care in the fiscal year.

Average Length of Service by Level of Care						
	Clients (duplicated)			ALOS (days)		
Outpatient Services	FY 2022-23	FY 2023-24	CHANGE (n)	FY 2022-23	FY 2023-24	CHANGE (days)
Outpatient	6,157	5,883	-274	205.3	213.9	8.6
Outpatient - Fee for Service	405	344	-61	171.9	194.3	22.4
Juvenile Forensic Services	643	798	155	78.8	64.8	-14
Wraparound	172	253	81	207.4	234.5	27.1
Therapeutic Behavioral Services (TBS)	275	218	-57	121.0	111.9	-9.1
Intensive Outpatient Services	FY 2022-23	FY 2023-24	CHANGE (n)	FY 2022-23	FY 2023-24	CHANGE (days)
Intensive Outpatient Programs	n/a	6	n/a	n/a	29.2	n/a
Partial Hospitalization Programs	n/a	15	n/a	n/a	16.9	n/a
Residential Services	FY 2022-23	FY 2023-24	CHANGE (n)	FY 2022-23	FY 2023-24	CHANGE (days)
Short Term Residential Therapeutic Programs+	231	208	-23	251.4	129.3	-122.1
Shelter & Respite	197	194	-3	41.6	37.1	-4.5
Inpatient Services	FY 2022-23	FY 2023-24	CHANGE (n)	FY 2022-23	FY 2023-24	CHANGE (days)
Inpatient - CAPS	446	410	-36	6.4	6.8	0.4
Inpatient - FFS	206	378	172	8.6	8.3	-0.3
Emergency/Crisis Services	FY 2022-23	FY 2023-24	CHANGE (n)	FY 2022-23	FY 2023-24	CHANGE (days)
Crisis Stabilization*	1,158	1,091	-67	1.8	1.7	-0.1
Urgent Outpatient†	10	5	-5	1.0	1.0	0.0

*Crisis Stabilization ALOS may be artificially inflated due to episodes remaining open until client is connected with an OP provider.

†Urgent Outpatient services are limited to Emergency Medication Management Services as of FY 2021-22.

What Kind of Services Are Being Used?

Level of Care (LOC) Grouping by Client Race/Ethnicity*

Compared to systemwide averages in FY 2023-24, Black/African American and Multiracial youth were more than twice as likely to receive Residential services. White clients were more likely to receive Residential or Emergency/Crisis services. Hispanic clients were less likely to receive Residential or Inpatient services. The proportional distribution of race/ethnicity in the Outpatient level of care was similar to the system as a whole.

NH=Non-Hispanic

*Clients may have received services in more than one level of care. Intensive Outpatient level of care grouping excluded due to very low client count (N=25).

†In FY 2023-24, Outpatient Services included: Outpatient Contracted, Outpatient Fee-for-Service, Wraparound programs, Juvenile Forensic Service programs, and Therapeutic Behavioral Services programs.

‡In FY 2023-24, Residential Services included: Day Treatment, STRTP+ (Short-term Residential Treatment Programs, Psychiatric Health Facilities, Closed Treatment Facilities, San Pasqual Academy) and Shelter & Respite.

§In FY 2023-24, Inpatient Services included: Inpatient Contracted programs and Inpatient Fee-for-Service programs.

¶In FY 2023-24, Emergency-Crisis services included: Crisis Stabilization, PERT, MCRT, and Urgent Outpatient services.

What Kind of Services Are Being Used?

Therapeutic Behavioral Services (TBS)

TBS services are ancillary intensive coaching services designed to help stabilize environments or avoid the need for a more restrictive level of care. TBS services were initiated in BHS-CY in 2001 for Medi-Cal beneficiaries upon the establishment of the service in California following a class action settlement agreement.

TBS Clients within Systemwide BHS-CY Clients

Medi-Cal Only TBS Clients within Medi-Cal Only BHS-CY Clients

What Kind of Services Are Being Used?

Therapeutic Behavioral Services (TBS)

Clients receiving TBS services were younger and less likely to be female than the systemwide averages.

Service Provider Type

TBS requires a Specialty Mental Health Provider (SMHP). The majority (81%) of BHS-CY TBS clients were served *only* by Org providers in FY 2023-24. No TBS clients were served exclusively by FFS providers in the fiscal year; this was also true in FY 2022-23.

TBS Client Age (N=317)

TBS Client Gender (N=317)

What Kind of Services Are Being Used?

Therapeutic Behavioral Services (TBS)

TBS Client Race/Ethnicity (N=317)

TBS Client Living Situation (N=317)*

*Unknown category includes Fee-for-Service providers for whom data were not available.

†Most recent living situation recorded in the fiscal year; TBS service may have preceded placement.

‡Group Home includes Residential Treatment Centers and Short-Term Residential Therapeutic Programs.

§The majority of Children's Shelter clients are served by Polinsky Children's Center.

TBS Client Health Care Coverage (N=317)

307 (97%) clients who received TBS from BHS-CY during FY 2023-24 were covered exclusively by Medi-Cal, unchanged from 97% in FY 2022-23. By comparison, 95% of BHS-CY clients systemwide were covered exclusively by Medi-Cal in FY 2023-24.

TBS Client Primary Care Physician (PCP) Status*

Of the 300 TBS clients for whom PCP status was known, 294 (98%) had a PCP in FY 2023-24, an increase from 96% in FY 2022-23. By comparison, 95% of BHS-CY clients systemwide had a PCP in FY 2023-24.

TBS Client History of Trauma*

Previous experience of **traumatic events** was reported by clinicians for 303 clients (96% of the TBS population) in FY 2023-24; of these 303 clients, 236 (78%) had a **history of trauma**. By comparison, 72% of BHS-CY clients systemwide for whom this information was known had a **history of trauma** in FY 2023-24.

What Kind of Services Are Being Used?

Therapeutic Behavioral Services (TBS)

TBS Clients Primary Diagnosis*

The most common diagnosis for TBS clients in FY 2023-24 was ADHD (27%). TBS clients were more than twice as likely to have an ADHD diagnosis, and nearly half as likely to have an Anxiety disorder. TBS clients were less likely than the systemwide average to have a Stressor/Adjustment disorder, and more likely to have a Depressive disorder.

TBS Clients Primary Diagnosis*

*Primary DSM-5 diagnosis from the last episode of service prior to June 30, 2024; or, the most recent valid diagnosis. Invalid/Missing diagnoses are excluded.

†In alignment with ICD-10 and DSM-5, Adjustment disorders and PTSD/Other acute stress reaction are classified together within the Stressor and Adjustment disorders category.

What Kind of Services Are Being Used?

Therapeutic Behavioral Services (TBS)

TBS Client Stressor and Adjustment Disorders*

As of May 2013, in alignment with ICD-10 and DSM-5, Adjustment disorders and PTSD/Other acute stress reaction are classified together within the Stressor and Adjustment disorders category. The rate of Adjustment disorder diagnosis was proportionally less among TBS clients in FY 2023-24, as compared to BHS-CY overall.

TBS Clients with Stressor and Adjustment Disorders

Coaching Hours for TBS Clients†

201 (63%) of 317 TBS clients received coaching as part of their services. The average number of coaching hours (33.4) per TBS client in FY 2023-24 decreased by more than 6 hours from FY 2019-20.

The ALOS for a TBS client discharging in FY 2023-24 was 112 days; by comparison, the ALOS for a TBS client discharging in FY 2022-23 was 121 days (see page 83).

*Primary DSM-5 diagnosis from the last episode of service prior to June 30, 2024; or, the most recent valid diagnosis. Invalid/Missing diagnoses are excluded.

†Coaching hours are identified by service code 47: "TBS Intervention"

What Kind of Services Are Being Used?

Wraparound Programs

Wraparound is a comprehensive and research-based treatment modality which partners mental health professionals with families for youth needing intensive supports in their home community. The majority (82%) of BHS-CY Wraparound clients were served *only* by Org providers in FY 2023-24. No Wraparound clients were served exclusively by FFS providers in the fiscal year; this was also true in FY 2022-23 and FY 2021-22. Wraparound clients were older than the systemwide averages.

Wraparound Connection for Clients in STRTP+ Programs

On 10/1/2021 the Qualified Individual Assessment for STRTP placements was launched with the minimum 6 month after care with high fidelity wraparound for youth transitioning out of STRTPs.

In FY 2023-24, 18 (6%) of STRTP+ clients also received Wraparound services at some point during the fiscal year, a decrease from 7% in FY 2022-23.

*Primary DSM-5 diagnosis from the last episode of service prior to June 30, 2024; or, the most recent valid diagnosis. Invalid/Missing diagnoses are excluded.

†Wraparound service may have been prior, concurrent, or subsequent to STRTP+ episode.

What Kind of Services Are Being Used?

The Integrated Core Practice Model

The Core Practice Model (CPM) was issued in March 2013, by the state of California, in response to the Katie A class action lawsuit filed in 2002, which sought to improve the provision of specialty mental health services for foster youth. The CPM was revised and renamed the Integrated Core Practice Manual (ICPM) by the state in May 2018. The ICPM provides practical guidance and direction to support County child welfare, juvenile probation, behavioral health agencies, and their partners in the delivery of timely, effective, and collaborative services. The ICPM is intended to facilitate a common strategic and practical framework that integrates service planning, delivery, coordination, and management involved in multiple service systems. The model describes the philosophical shift in practice through increased collaboration between systems and families. The overarching philosophy emphasizes the importance of teamwork and mutually shared goals that promote safety, permanency and well-being. Within San Diego County, the lawsuit settlement was the catalyst to further advance the collaboration between Child and Family Well-Being, Probation, and Behavioral Health Services, creating stronger system partnerships and pathways to ensure access to appropriate mental health services for foster youth.

Continuum of Care Reform

Continuum of Care Reform (CCR)/AB 403, initiated across California on January 1, 2017, rolled out in phases and fundamentally changed the delivery of services for system-involved youth. The principles of CCR are built around the right of all children to permanency in a family environment, access to a Child and Family Team (CFT) that includes collaborative service providers and natural supports with the youth's voice at the center, availability to trauma-informed, culturally relevant, and individualized mental health services regardless of placement, and an increase in support and training for resource families and caregivers. The fundamental principles of CCR mirror the values and principles outlined in the ICPM.

Assembly Bill 2083

The state's Integrated Core Practice Model for Children, Youth, and Families (ICPM) is supported by the 2018 AB2083 which requires each county to develop and implement a Memorandum of Understanding (MOU) in 2020 outlining the roles and responsibilities of the various local entities that serve children and youth in foster care who have experienced severe trauma. The legislation is focused on the child welfare system but is poised to be expanded to look at the needs of children and youth served by various systems. Local partners at a minimum include child welfare, regional centers, county offices of education, probation and county behavioral health. The mission of AB2083 is to promote collaboration and communication across systems to meet the needs of children, youth and families as well as supporting timely access to trauma-informed services for children and youth. AB2083 promotes movement from system collaboration to system integration.

Family First Prevention Services Act

The federal FFPSA was enacted under Public Law 115-123 in 2018. The intent of this legislation is to enhance support services for families to help children remain at home and reduce the use of unnecessary congregate care placements by increasing options for prevention services, increased oversight and requirements for placements, and enhancing the requirements for congregate care placement settings.

What Kind of Services Are Being Used?

Pathways to Well-Being

Pathways to Well-Being is the County of San Diego's joint partnership between Behavioral Health Services (BHS) and Child and Family Well-Being (CFWB), dedicated to collaboration in order to ensure safety, the promotion of a permanent living situation known as permanency, and well-being for youth in, or at imminent risk of placement in, foster care. Under this initiative, all youth entering the CFWB System are screened for mental health needs to receive appropriate services and support. Aligning with the Integrated Core Practice Model, the purpose of Pathways to Well-Being is to enhance the delivery of children's services through a collaborative team of mental health providers, CFWB social workers, Probation, parent and youth partners, other system partners, and the youth and family. The Child and Family Team identifies the strengths and needs of the family and support system in order to develop service plans that are tailored to the unique needs of the child and family. BHS, CFWB, Probation, and family and youth partners work together to support a shared vision of the Pathways to Well-Being. **Pathways Eligible** clients include youth with an open child welfare case who meet medical necessity criteria. **Enhanced Services** clients include youth with an open child welfare case who meet medical necessity criteria AND have full scope Medi-Cal AND meet at least one of the following criteria: two or more placement changes within the last 24 months due to behavioral health needs AND/OR are currently being considered for, receiving, or are recently discharged from more intensive behavioral health services.

¶Eligible for Enhanced Services was previously Katie A Subclass

[#]Due to methodology change in FY 2020-21, data from FY 2019-20 may not be directly comparable

**IHBS services not tracked in FY 2023-24

Every youth identified with mental health needs under Pathways to Well-Being participates in CFT meetings. The basic components implemented by programs are:

- CFT Meetings, which always include the youth & family, the Behavioral Health therapist, and the Child and Family Well-Being worker.
- Intensive Care Coordination (ICC): facilitating assessment, care planning, and coordination of services.
- Intensive Home Based Services (IHBS): Rehab-like service with a focus on building functional skills.

Locally, ICC and IHBS were launched in August 2013. As of 7/1/2016, the state expanded ICC and IHBS services to be available through the EPSDT benefit to all children and youth under the age of 21 who are eligible for full scope Medi-Cal services and who meet medical necessity for these services.

What Kind of Services Are Being Used?

Medication Services*

BHS-CY provides medication services along with other services or as an independent service through the Fee-for-Service (FFS) network. The majority (83%) of these clients were served *only* by Org providers in FY 2023-24. In FY 2023-24, <1% of these clients received medication services with no other concurrent services. This section summarizes demographics and client data for all children and youth who received any medication services during the fiscal year.

Clients Receiving Medication Services from BHS-CY

Medication Services Clients Age (N=3,241)

Medication Services Clients Race/Ethnicity (N=3,241)

Medication Services Clients Health Care Coverage (N=3,241)

3,057 (94%) clients who received medication services in BHS-CY during FY 2023-24 were covered exclusively by Medi-Cal, unchanged from 94% in FY 2022-23. By comparison, 95% of BHS-CY clients systemwide were covered exclusively by Medi-Cal in FY 2023-24.

Medication Services Clients Primary Care Physician (PCP) Status†

Of the 3,056 clients who received medication services for whom PCP status was known, 2,924 (96%) had a PCP in FY 2023-24, a slight increase from 95% in FY 2022-23. By comparison, 95% of BHS-CY clients systemwide had a PCP in FY 2023-24.

Medication Services Clients History of Trauma†

Previous experience of **traumatic events** was reported by clinicians for 2,992 clients (92% of the medication services population) in FY 2023-24; of these 2,992 clients, 2,334 (78%) had a **history of trauma**. By comparison, 72% of BHS-CY clients systemwide for whom this information was known had a **history of trauma** in FY 2023-24.

*Some clients may receive medication services outside of the BHS-CY system.

†Unknown category includes Fee-for-Service providers for whom data were not available.

What Kind of Services Are Being Used?

Medication Services*

Medication Services Clients Primary Diagnosis†

The most common diagnoses for clients receiving Medication Services in FY 2023-24 were Depressive disorders (29%). These clients were more likely than BHS-CY clients overall to have ADHD, Depressive, Bipolar, or Schizophrenia Spectrum disorders. They were less likely to be diagnosed with Stressor/Adjustment or Anxiety disorders.

Medication Services Client Primary Diagnosis

*Some clients may receive medication services outside of the BHS-CY system.

†Primary DSM-5 diagnosis from the last episode of service prior to June 30, 2024; or, the most recent valid diagnosis. Invalid/Missing diagnoses are excluded.

‡In alignment with ICD-10 and DSM-5, Adjustment disorders and PTSD/Other acute stress reaction are classified together within the Stressor and Adjustment disorders category.

What Kind of Services Are Being Used?

Medication Services*

Medication Services Clients with Stressor and Adjustment Disorders†

As of May 2013, in alignment with ICD-10 and DSM-5, Adjustment disorders and PTSD/Other acute stress reaction are classified together within the Stressor and Adjustment disorders category. The rate of Adjustment disorder diagnosis was proportionally less among clients receiving Medication Services in FY 2023-24, as compared to BHS-CY overall.

†Primary DSM-5 diagnosis from the last episode of service prior to June 30, 2024; or, the most recent valid diagnosis. Invalid/Missing diagnoses are excluded.

‡Group Home includes Residential Treatment Centers and Short-Term Residential Therapeutic Programs.

§The majority of Children's Shelter clients are served by Polinsky Children's Center.

What Kind of Services Are Being Used?

Medication Services*

Level of Care (LOC)

There are several levels of treatment for youth receiving mental health services, based on need and severity. Children and youth may receive services across multiple LOCs in the course of a year. Clients receiving Medication Services were at least twice as likely to receive care in JFS, TBS, STRTP+, and Shelter & Respite LOCs as compared to systemwide averages.

Percentage of Medication Services Clients in each Level of Care†

*Some clients may receive medication services outside of the BHS-CY system.

†Clients may have received services in more than one level of care.

‡Urgent Outpatient services are limited to Emergency Medication Management Services as of FY 2021-22.

What Kind of Services Are Being Used?

Inpatient (IP) Services

BHS-CY provides inpatient services to children and adolescents under age 18. The proportion of clients receiving IP services slightly increased from 5.1% (609) in FY 2022-23 to 6.1% (711) in FY 2023-24. The proportion of females receiving IP services is greater than the BHS-CY systemwide average. Inpatient service providers include Rady CAPS, Aurora, Sharp Mesa Vista, and any Out-of-County hospitals utilized.

What Kind of Services Are Being Used?

Urgent Outpatient (UO) Services

Urgent Outpatient services are provided for children and youth in San Diego County by New Alternatives Inc. Emergency Medication Management program.

- ❖ 6 (<1%) of 11,726 unduplicated clients received Urgent Outpatient services in FY 2023-24.
 - No change from 12 (<1%) of 11,919 in FY 2022-23.
 - As of FY 2021-22, UO is comprised of the Emergency Medication Management program only. Crisis, Intervention & Response (CIR) team programs are no longer included in the UO level of care.

Psychiatric Emergency Response Team (PERT)*

The Psychiatric Emergency Response Team (PERT) provides emergency assessment and referral for individuals with mental illness who come to the attention of law enforcement through phone calls from community members or in-field law enforcement request for emergency assistance.

- ❖ 1,125 youth under the age of 18 received PERT services in FY 2023-24, as compared to 1,180 in FY 2022-23.

Mobile Crisis Response Teams (MCRT)*

In January 2021, the County of San Diego activated Mobile Crisis Response Teams (MCRT) as a service option for individuals experiencing a mental health or substance use crisis that does not include a threat of violence or a medical emergency.

- ❖ 496 youth under the age of 18 received MCRT services in FY 2023-24, as compared to 336 youth in FY 2022-23.

**These youth may have been served by Adult/Older Adult Behavioral Health Services providers*

What Kind of Services Are Being Used?

Emergency Screening Unit (ESU)

The Emergency Screening Unit (ESU) provides crisis stabilization to children and adolescents under age 18. BHS-CY expanded ESU capacity from 4 to 12 beds in January 2018. The proportion of clients receiving ESU services slightly decreased from 9.7% (1,160) in FY 2022-23 to 9.3% (1,094) in FY 2023-24. The proportion of females receiving ESU services is greater than the BHS-CY systemwide average.

Clients Receiving Services from ESU*

❖ 5% of ESU clients also received services from the SUD sector during the fiscal year, as compared to 5% in FY 2022-23.

**Data demonstrate overlap in services between BHS and other entities; no relationship between these entities is represented.*

How Quickly Can Clients Access Services?

Access Time*

Access times vary greatly by program, with a few sites having a long wait to receive specialty outpatient mental health services and others being able to offer immediate access. Families are informed of the access point options available to them.

In FY 2023-24, children waited an average of **18.9 business days** to access an outpatient appointment. Average psychiatric assessment appointment access time was **9.5 business days** in FY 2023-24. By way of context, DHCS access time standards are 10 business days for routine outpatient assessment and 15 business days for psychiatric assessment.

*Due to enhancements in access time data collection and reporting across fiscal years, trending may not reflect actual change.

Are Clients Getting Better?

Client outcomes are evaluated by measuring change on a standardized mental health assessment measure, communimetric tool, and reviewing rates of high-level service use. New measures were implemented in FY 2018-19 to align with California mandates.

Outcome Measures

- ❖ The Pediatric Symptom Checklist (PSC), a measure of youth emotional and behavioral problems completed by youth ages 11 to 18, and/or caregivers of youth ages 3 to 18.
- ❖ The Child and Adolescent Needs and Strengths (CANS), a structured assessment to identify youth and family strengths and needs completed by clinicians for clients ages 6 through 21.
- ❖ The Early Childhood Child and Adolescent Needs and Strengths (CANS-EC), a structured assessment to identify youth and family strengths and needs completed by clinicians for clients ages 0 through 5.
- ❖ Inpatient and Emergency Screening Unit Readmission Rates
- ❖ Goals Met at Discharge

Are Clients Getting Better?

Pediatric Symptom Checklist (PSC) Results

The PSC measures a child's behavioral and emotional problems. In FY 2023-24, the PSC was typically administered at intake, every 6 months, and at discharge to parents/caregivers of youth ages 3 to 18, and to youth ages 11 to 18. The PSC was not administered in any inpatient setting.

PSC scores were evaluated for youth discharged from services in FY 2023-24 who were in services at least 60 days and who had both initial assessment and discharge scores completed. Improvement on the PSC is evaluated three ways:

❖ *Amount of Improvement*

Percentage of all clients who reported an increase in impairment (1+ point increase), no improvement (0-1 point reduction), small improvement (2-4 point reduction), medium improvement (5-8 point reduction), and a large improvement (9+ point reduction). This reflects the amount of change youth and their caregivers report from intake to discharge on the symptoms evaluated by the PSC/PSC-Y. Amount of improvement was calculated using Cohen's d effect size.

❖ *Reliable Improvement*

Percentage of all clients who had at least a 6-point reduction on the PSC/PSC-Y total scale score. Reliable improvement was defined by the developers and means that the clients improved by a statistically reliable amount.

❖ *Clinically Significant Improvement*

Percentage of clients who started above the clinical cutoff on at least one of the three subscales or total scale score at intake and ended below the cutoff at discharge. Additionally, these clients must have had at least a 6-point reduction on the PSC/PSC-Y total scale score. Clinically significant improvement was defined by the measures' developers and means that treatment had a noticeable genuine effect on clients' daily life and that clients are now functioning like non-impaired youth.

Are Clients Getting Better?

Pediatric Symptom Checklist (PSC) – Amount of Improvement

Amount of improvement on the PSC was evaluated for eligible youth discharged from services in FY 2023-24 who were in services at least 60 days and who had both initial assessment and discharge scores completed. Amount of Improvement is operationally defined as increase in impairment (1+ point increase), no improvement (0-1 point reduction), small improvement (2-4 point reduction), medium improvement (5-8 point reduction), and a large improvement (9+ point reduction).

Are Clients Getting Better?

Pediatric Symptom Checklist, Youth (PSC-Y) – Amount of Improvement

Amount of improvement on the PSC-Y was evaluated for eligible youth discharged from services in FY 2023-24 who were in services at least 60 days and who had both initial assessment and discharge scores completed. Amount of Improvement is operationally defined as increase in impairment (1+ point increase), no improvement (0-1 point reduction), small improvement (2-4 point reduction), medium improvement (5-8 point reduction), and a large improvement (9+ point reduction).

Are Clients Getting Better?

Pediatric Symptom Checklist (PSC) – Reliable Improvement

Reliable improvement as measured by the PSC (6+ point improvement on the total scale score) was evaluated for eligible youth discharged from services in FY 2023-24 who were in services at least 60 days and who had both initial assessment and discharge scores completed. Caregiver report of reliable improvement decreased over the past three years, while youth report remained relatively stable.

❖ By way of context, 33% of clients at Mass General reliably improved after 3 months of treatment.³

⁵Murphy, J. M., Blais, M., Baer, L., McCarthy, A., Kamin, H., Masek, B., & Jellinek, M. (2015). Measuring outcomes in outpatient child psychiatry: Reliable improvement, deterioration, and clinically significant improvement. *Clinical Child Psychology and Psychiatry*, 20(1), 39-52.

Are Clients Getting Better?

Pediatric Symptom Checklist (PSC) – Clinically Significant Improvement

Clinically significant improvement as measured by the PSC (6+ point improvement on at least one of the three subscales or the total scale score *and* crossing the clinical cutoff threshold) was evaluated for eligible youth discharged from services in FY 2023-24 who were **above the clinical cutoff** at initial assessment, in services at least 60 days, and who had both initial assessment and discharge scores completed. Caregiver report of clinically significant improvement decreased over the past three years, while youth report remained relatively stable.

❖ By way of context, 23% of parents surveyed at Mass General reported clinically significant improvement at 3 months.³

⁵Murphy, J. M., Blais, M., Baer, L., McCarthy, A., Kamin, H., Masek, B., & Jellinek, M. (2015). *Measuring outcomes in outpatient child psychiatry: Reliable improvement, deterioration, and clinically significant improvement. Clinical Child Psychology and Psychiatry*, 20(1), 39-52.

Are Clients Getting Better?

Child and Adolescent Needs and Strengths (CANS) – Progress at Discharge

The CANS is a structured assessment to identify youth and family strengths and needs completed by clinicians for clients ages 6 through 21. CANS progress at discharge was evaluated for eligible youth discharged from services in FY 2023-24 who had at least one need at initial assessment, in services at least 60 days, and who had both initial assessment and discharge scores completed.

Progress on the CANS is defined as a reduction of at least one need from initial assessment to discharge on the CANS domains: Life Functioning, Risk Behaviors, and/or Child Behavioral and Emotional needs (i.e., moving from a '2' or '3' at initial assessment to a '0' or '1' on the same item at the discharge assessment).

*Progress is measured for each domain independently, based on the number of youth for whom a need was identified within the domain.

Are Clients Getting Better?

Early Childhood Child and Adolescent Needs and Strengths (CANS-EC) – Progress at Discharge

The CANS-EC is a structured assessment to identify youth and family strengths and needs completed by clinicians for clients ages 0 through 5. CANS-EC progress at discharge was evaluated for eligible youth discharged from services in FY 2023-24 who had at least one need at initial assessment, in services at least 60 days, and who had both initial assessment and discharge scores completed.

Progress on the CANS-EC is defined as a reduction of at least one need from initial assessment to discharge on the CANS-EC domains: Life Functioning, Risk Behaviors, and/or Challenges (i.e., moving from a '2' or '3' at initial assessment to a '0' or '1' on the same item at the discharge assessment).

CANS-EC Progress from Intake to Discharge*

*Progress is measured for each domain independently, based on the number of youth for whom a need was identified within the domain.

Are Clients Getting Better?

Readmission to High-Level Services

The goal of high-level services, such as inpatient hospitalizations and emergency screening, is to stabilize clients and move them to the lowest appropriate level of care. Repeat use of these services within a short period of time may indicate that a client did not receive appropriate aftercare services.

Inpatient (IP) Services*

- ❖ 188 (26%) of the 711 clients who received IP care had more than one IP episode (ranging from 1 to 12) in FY 2023-24—a slight **increase** from 25% (151 of 609) in FY 2022-23.
 - Of the 188 clients with more than one IP episode, 109 (58%) were re-admitted for IP services within 30 days of the previous IP discharge—an **increase** from 51% (77 of 151) in FY 2022-23.

Emergency Screening Unit (ESU) Services

- ❖ 258 (24%) of the 1,094 clients who received care from the ESU had more than one ESU episode (ranging from 2 to 11) in FY 2023-24—a slight **increase** from 261 (23%) of 1,160 in FY 2022-23.
 - Of the 258 clients with more than one ESU episode, 127 (49%) were re-admitted to the ESU within 30 days of the previous ESU discharge—no change from 49% (127 of 261) in FY 2022-23.

Diversion†

- ❖ Of 1,693 ESU visits‡ in FY 2023-24, 1,137 (67%) were diverted from an IP admission—a **decrease** from 73% (1,240 of 1,705) in FY 2022-23.

Goals Met at Discharge

Clients discharging from BHS-CY are evaluated in the context of goals established by their provider during services. Clients are identified as having met goals, partially met goals, or not met goals.

- ❖ Of 6,498 client discharges in FY 2023-24, 3,100 (48%) met goals, 2,086 (32%) partially met goals, and 1,312 (20%) did not meet goals within the service period.

*Inpatient service providers include Rady CAPS, Aurora, Sharp Mesa Vista, and any out-of-County hospitals utilized.

†Data Source: OPTUM: CO 26-C ESU Emergency Screening Report (8/5/2024)

‡ESU visits include duplicated clients

Are Clients Satisfied With Services?

The Youth Services Survey (YSS)—Satisfaction By Domain

The Youth Services Survey (YSS) is a state-mandated survey administered to mental health clients ages 13 and older, as well as the parents/caregivers of youth receiving services regardless of age. Youth and their caregivers report their degree of satisfaction with mental health services received. In FY 2023-24 the YSS was administered to clients during one 1-week period in May 2024; data from 1,482 completed surveys were analyzed.

YSS Satisfaction questions were grouped into seven domains:

1. General Satisfaction
 2. Perception of Access
 3. Perception of Cultural Sensitivity
 4. Perception of Participation in Treatment Planning
 5. Perception of Outcomes of Services
 6. Perception of Functioning
 7. Perception of Social Connectedness
- ❖ Parents and youth were most satisfied with the *Cultural Sensitivity* domain.
 - ❖ Parents and youth were least satisfied with the *Outcomes of Services* domain.
 - ❖ Youth were less satisfied than parents on every domain.
 - ❖ The greatest disparity between youth and parents was found in the *Participation in Treatment Planning* domain.

May 2024 YSS Results

NOTE: Not every youth/caregiver completed responses for every domain.

Full YSS Reports are available in the BHS Technical Resource Library: http://www.sandiegocounty.gov/hhsa/programs/bhs/technical_resource_library.html (Section 6), or by request.

BHS-CY Substance Use Disorder

Substance Use Disorder (SUD)

BHS contracts with local agencies to provide Substance Use Disorder (SUD) programs through an integrated system of community-based alcohol and other drug prevention, treatment, and recovery services throughout San Diego County. BHS-CY SUD programs serve adolescents and women, including pregnant/parenting women, who are using substances or have co-occurring mental health disorders. Services include Outpatient and Residential Treatment, Withdrawal Management, Case Management, programs for Justice-Involved individuals, Specialized Services including Medication-Assisted Treatment (MAT), and Ancillary Services (i.e., HIV/Hepatitis C counseling and testing, TB testing). These strength-based, trauma-informed, culturally competent SUD treatment services involve the family unit in the recovery processes within a safe and sober environment.

The Drug Medi-Cal Organized Delivery System (DMC-ODS)

San Diego County implemented DMC-ODS on July 1, 2018. The DMC-ODS provides California counties the opportunity to expand access to high-quality care for Medi-Cal enrollees with substance use disorders (SUD). Counties participating in the DMC-ODS are required to provide access to a continuum of SUD benefits modeled after the American Society of Addiction Medicine (ASAM) Criteria. Through the DMC-ODS, eligible enrollees have timely access to the care and services they need for a sustainable and successful recovery.

ASAM Criteria

The ASAM Criteria is a proven model in the SUD field, and is the most widely used and comprehensive set of guidelines for assessing patient needs and optimizing placement into SUD treatment. The ASAM Criteria provides a consensus-based model of placement criteria and matches an individual's severity of substance use and related conditions with the most beneficial level of treatment. Counties implementing the DMC-ODS are required to use the ASAM Criteria to ensure that eligible beneficiaries have access to the SUD services that best align with their treatment needs.

Substance Use Disorder (SUD) – Youth

Substance Use Disorder (SUD) programs provided services to 641 unduplicated youth under the age of 18 in FY 2023-24. This represents a 2% decrease in services provided from FY 2022-23.

Number of SUD Youth Clients Served (N=641)*

SUD Youth Client Age (N=641)*

† Data range for FY 2021-22 is limited to ages 12-15.

SUD Youth Client Race and Ethnicity (N=641)*

*Data Source: SanWITS

Substance Use Disorder (SUD) – Youth

SUD Youth Client Gender (N=641)*

SUD Youth Client Living Situation (N=641)*

While the proportion of youth living as dependents with family is largely stable, there was an increase in clients living independently for youth in FY 2023-24.

SUD Youth Client Primary Substance Used (N=641)*

*Data Source: SanWITS.

Substance Use Disorder (SUD) – Youth

SUD Youth Client Type of Discharge (N=815)*†‡

The most common SUD youth discharge type in FY 2023-24 was Completed Treatment-Referred.

*Client duplication due to multiple admissions during the fiscal year. Data include clients admitted and discharged in the fiscal year.

†Data Source: SanWITS

‡Discharge status definitions are available in the CalOMS Tx Data Collection Guide:

https://www.dhcs.ca.gov/provgovpart/Documents/CalOMS_Tx_Data_Collection_Guide_JAN%202014.pdf

Substance Use Disorder (SUD) – Youth

Other SUD Services for Teens

Behavioral Health Services provides Teen Recovery Center (TRC) services to youth ages 12 through 17. TRC services are age-appropriate substance use treatment services for adolescents and their families in outpatient treatment settings that include school sites. There are 7 TRC regional sites with 2 or more school sites per region, offering group and individual therapy, co-occurring disorder services, life skills and introduction to prosocial activities, tobacco cessation, and trauma-informed care to help adolescents recover in a safe and supportive, alcohol and other drug-free environment. The System of Care also offers residential SUD treatment services as well as Medication Assisted Treatment (MAT) services.

What Kind of Services Are Being Used?

Youth Receiving SUD Services and Services From Other Sectors*

❖ 37% of SUD youth clients also received services from BHS-CY Mental Health in FY 2023-24, as compared to 36% in FY 2022-23.

❖ 19% of SUD youth clients also received services from the Probation sector, as compared to 15% in FY 2022-23.

❖ 2% of SUD youth clients also received services from the CFWB sector, as compared to 4% in FY 2022-23.

**Data demonstrate overlap in services between SUD and other entities; no relationship between these entities is represented.*

†SUD Youth in this section are limited to 0-17 years of age, thus client counts will be discrepant with the MH sections of this report.

‡Age is captured differently for cross-sector matching purposes, thus the number of unique clients may not match the BHS-CY SUD section total.

What Kind of Services Are Being Used?

SUD and Other Sectors - Teen Recovery Center (TRC)*

❖ 37% of SUD TRC clients also received services from BHS-CY Mental Health in FY 2023-24, as compared to 31% in FY 2022-23.

❖ 19% of SUD TRC clients also received services from the Probation sector, as compared to 13% in FY 2022-23.

❖ 2% of SUD TRC clients also received services from the CFWB sector, as compared to 3% in FY 2022-23.

What Kind of Services Are Being Used?

SUD and Other Sectors - SUD Adolescent Residential*

❖ 22% of SUD Adolescent Residential clients also received services from BHS-CY Mental Health in FY 2023-24, as compared to 62% in FY 2022-23.

❖ 14% of SUD Adolescent Residential clients also received services from the Probation sector, as compared to 40% in FY 2022-23.

❖ 2% of SUD Adolescent Residential clients also received services from the CFWB sector, as compared to 15% in FY 2022-23.

Due to the very small number of clients, these data are difficult to reliably interpret.

**Data demonstrate overlap in services between SUD and other entities; no relationship between these entities is represented.*

Substance Use Disorder (SUD)

Perinatal Services

The County of San Diego has a Perinatal System of Care that provides a wide array of gender-responsive, trauma-informed SUD treatment services to meet the needs of women and teens, including those who are pregnant and/or parenting. Perinatal SUD treatment is available throughout the county and includes: residential treatment for women and their children, perinatal withdrawal management, outpatient services for women and teens, and intensive field-based perinatal case management services to high risk pregnant women or teens.

The Perinatal SUD treatment programs support the additional needs of mothers through parenting classes, behavioral health screening and intervention for children, life skills, healthy relationships, recovery groups, education, transportation, care coordination, linkage and coordination with physical healthcare providers, peer support, and onsite childcare. Perinatal women have priority admission into any county funded SUD program.

Perinatal SUD programs provided services to 1,904 unduplicated perinatal women and teens in FY 2023-24.

Number of Perinatal SUD Clients Served (N=1,904)*

Perinatal SUD Client Age (N=1,904)*

*Data Source: SanWITS

Substance Use Disorder (SUD) Perinatal Services

Perinatal SUD Client Race/Ethnicity (N=1,904)*

Perinatal SUD Client Living Situation (N=1,904)*

52% of Perinatal SUD clients were experiencing homelessness during FY 2023-24.

*Data Source: SanWITS

Perinatal SUD Client Primary Substance Used (N=1,904)*

Substance Use Disorder (SUD)

Perinatal Services

Perinatal SUD Client Type of Discharge (N=3,302)*†‡

The most common Perinatal SUD discharge type in FY 2023-24 was discharge before treatment completion with unsatisfactory progress (administrative).

*Data Source: SanWITS

†Client duplication due to multiple admissions during the fiscal year. Data include clients admitted and discharged in the fiscal year.

‡Discharge status definitions are available in the CalOMS Tx Data Collection Guide:

https://www.dhcs.ca.gov/provgovpart/Documents/CalOMS_Tx_Data_Collection_Guide_JAN%202014.pdf

Are Clients Satisfied With Services?

The Youth Treatment Perception Survey (TPS)—Satisfaction By Domain

The Youth Treatment Perception Survey (TPS) is an annual state-mandated survey administered to any client 18 years old or younger served by a Substance Use Disorder (SUD) Teen Recovery Center (TRC) program. Youth clients report their degree of satisfaction with SUD services received. In FY 2023-24 the TPS was administered in October 2023. Data from 91 completed surveys were analyzed.

Individual items on the Youth TPS were grouped into six domains:

1. General Satisfaction
2. Perception of Access
3. Perception of Quality
4. Perception of Therapeutic Alliance
5. Perception of Care Coordination
6. Perception of Outcome

- ❖ Youth clients were most satisfied with the *Therapeutic Alliance* domain.
- ❖ Youth clients were least satisfied on the *Outcome* domain.

Fall 2023 TPS Results (N=91)

NOTE: Not every youth completed responses for every domain.

Are Clients Satisfied With Services?

The Treatment Perception Survey (TPS)—Satisfaction By Domain

The Adult Treatment Perception Survey (TPS) is an annual state-mandated survey administered to any client served by a Substance Use Disorder (SUD) Perinatal or Adult program. Clients report their degree of satisfaction with SUD services received. In FY 2023-24 the TPS was administered in October 2023. Data from 306 completed surveys collected at Perinatal SUD programs were analyzed.

Individual items on the TPS were grouped into five domains:

1. General Satisfaction
2. Perception of Access
3. Perception of Quality
4. Perception of Care Coordination
5. Perception of Outcome

- ❖ Perinatal clients were most satisfied with the *Quality* domain.
- ❖ Perinatal clients were least satisfied on the *Care Coordination* domain.

Perinatal SUD Programs: Fall 2023 TPS Results (N=306)

NOTE: Not every client completed responses for every domain.

How Quickly Can SUD Clients Access Services?

Access Time

Access time for SUD services is calculated from Initial Request to First Offered Intake/Screening Appointment. DMC-ODS access time standards are 10 business days for outpatient services and 24 hours for residential authorization only.

In FY 2023-24, youth in SUD **Teen** programs waited an average of **1.7 business days** for outpatient services, no change from 1.7 business days in FY 2022-23. Average wait times for residential services was **1.4 business days**, a decrease from 4.2 business days in FY 2022-23.

In FY 2023-24, clients in SUD **Perinatal** programs waited an average of **2.1 business days**, a decrease from 2.9 business days in FY 2022-23. Average wait times for residential services was **0.7 business days**, a slight increase from 0.6 business days in FY 2022-23.

Substance Use Disorder (SUD)

Level of Care (LOC) and Modalities

There are two levels of care for SUD, *Outpatient* and *Residential*, with service modalities at different levels of intensity within these levels of care based on the American Society of Addiction Medicine (ASAM). The Outpatient level of care has two modalities: *Outpatient Services* (OS – ASAM Level 1) and *Intensive Outpatient Services* (IOS – ASAM Level 2.1). The Residential level of care has three service modalities: *Residential 3.1* (ASAM Level 3.1) *Residential 3.5* (ASAM Level 3.5), and *Withdrawal Management 3.2* (ASAM 3.2).

Average Length of Treatment*

*Clients may be served in multiple levels of care or modalities.

†Due to the restructuring of BHS the CY-Other Program Category was added to account for programs that were unable to be assigned a SUD category.

Substance Use Disorder (SUD)

Level of Care (LOC) and Modalities

There are two levels of care for SUD, *Outpatient* and *Residential*, with service modalities at different levels of intensity within these levels of care based on the American Society of Addiction Medicine (ASAM). The Outpatient level of care has two modalities: *Outpatient Services* (OS – ASAM Level 1) and *Intensive Outpatient Services* (IOS – ASAM Level 2.1). The Residential level of care has three service modalities: *Residential 3.1* (ASAM Level 3.1) *Residential 3.5* (ASAM Level 3.5), and *Withdrawal Management* 3.2 (ASAM 3.2).

Average Length of Treatment Continued*

*Clients may be served in multiple levels of care or modalities.

†Due to the restructuring of BHS the CY-Other Program Category was added to account for programs that were unable to be assigned a SUD category.

Substance Use Disorder (SUD) Level of Care (LOC) and Modalities

Perinatal Services: Clients with Children in FY 2023-24*

LOC	Modality	Number of Clients w/ Children	
		0 to 18	5 and under†

**Totals include clients who received services in more than one level of care and/or modality during the fiscal year.*

BHS-CY MHSA

Mental Health Service Act (MHSA) Components

Community Services and Supports

Community Services and Supports (CSS) provides an integrated delivery of systems of care of mental health services to seriously emotionally disturbed (SED) children and youth, and adults and older adults with serious mental illness (SMI). CSS contains four service categories:

- ❖ Full Service Partnership (FSP) – provides wraparound services (mental health services and supports a person's needs to reach his or her goals). **FSP programs are reported separately as a group and by provider.**
- ❖ General System Development (SD) – improve mental health services and supports for people who receive mental health services.
- ❖ Outreach and Engagement (OE) – reach out to people who may need services but are not getting them.
- ❖ Housing Program – finances the capital costs associated with development, acquisition, construction and/or rehabilitation of permanent supportive housing for individuals with mental illness and their families, especially individuals with mental illness who are experiencing homelessness and their families.

Innovations

The goal of INN programs is to develop and implement promising and proven practices to increase access to mental healthcare. INN programs are defined as novel, creative and/or ingenious mental health practices/approaches that are expected to contribute to learning rather than a primary focus on providing a service. INN programs are developed within communities through a process that is inclusive and representative, especially of unserved and underserved individuals. INN promotes recovery and resilience, reduces disparities in mental health services and outcomes and leads to learning that advances mental health in California in the directions articulated by the MHSA.

The INN component allows counties the opportunity to “try out” new approaches that can inform current and future mental health practices. **Innovations are reported separately.**

MHSA Components, continued

Workforce Education and Training (WET)

The WET component addresses the shortage of qualified, culturally diverse individuals providing services in the County's Public Behavioral Health System. The system includes community-based organizations and individuals in small group practices who provide publicly funded behavioral health services, along with County Behavioral Health Services (BHS) operated programs. All education, training and workforce development programs and activities contribute to developing and maintaining a culturally and linguistically competent workforce, including individuals with lived experience, who are capable of providing client- and family-driven services that promote wellness, recovery, and resiliency, leading to measurable, values-driven outcomes.

WET has five categories:

- ❖ Workforce Staffing Support
- ❖ Training and Technical Assistance
- ❖ Mental Health Career Pathway Programs
- ❖ Residency and Internship Programs
- ❖ Financial Incentive Programs

Capital Facilities and Technological Needs (CFTN)

The CF component works towards the creation of facilities that is used for the delivery of MHSA services to mental health clients and their families or for administrative offices. The TN objective is to improve the infrastructure of California's mental health system. TN projects demonstrate the ability to serve and support the MHSA objectives through cost effective and efficient improvements to data processing and communication.

TN has two primary goals: 1) Increase client and family empowerment and engagement by providing the tools for secure client and family access to health information that is culturally and linguistically competent within a wide variety of public and private settings, and 2) Modernize and transform clinical and administrative information systems to ensure quality of care, parity, operational efficiency and cost effectiveness.

To learn more about the MHSA, visit https://www.sandiegocounty.gov/content/sdc/hhsa/programs/bhs/mental_health_services_act/mhsa.html

MHSA Components, continued

Prevention and Early Intervention (PEI) Programs

PEI supports the design of programs to prevent mental illness from becoming severe and disabling, with an emphasis on improving timely access to services to underserved populations. PEI services promote wellness and healthy living choices that foster resiliency for the broader community. PEI targets children and families at risk of developing issues and those that do not meet threshold criteria for receiving mental health services.

In FY 2023-24, San Diego County funded 15 programs to provide PEI services for youth and their families. The focus of these programs varies widely, from teaching caregivers how to cope with behavior problems in young children to preventing youth suicide. **PEI youth and family participants comprise a different population than youth and family served by BHS-CY treatment providers**; a demographic summary is reported here, detailed findings are reported separately.

(http://www.sandiegocounty.gov/hhsa/programs/bhs/technical_resource_library.html; Section 6: Quality Improvement Reports)

School Based Suicide Prevention and Early Intervention- HERE Now Program

MHSA Components, continued

More than 25,000 youth and family PEI participants were served in FY 2023-24. PEI participant count can vary widely from year to year. This is due in part to structural and contracting changes within the PEI providers; as the programs evolve, some components are modified, affecting the number of participants served. PEI data collection and reporting may have been impacted starting March 2020 due to COVID-19.

CYF PEI Number of Participants Served

MHSA Components, continued

BHS-CY PEI Participant Satisfaction Survey Results

Glossary of Terms

- **Assessment** includes intake diagnostic assessments and psychological testing.
- **Case management services** can be provided in conjunction with other services or they can be a stand-alone service that “connects” children, youth and families to the services they need, monitors their care, and oversees the components of care provided to the child and family.
- **Co-occurring Substance Use** is operationally defined as a dual diagnosis and/or involvement with SUD and/or endorsement of any of the following substance abuse-related items on a BHS Behavioral Health Assessment (BHA) form: “Does client have a co-occurring condition;” “Recommendation for further substance use treatment;” “Stages of Change: Substance Use Recovery” (Active or Maintenance response).
- **Collateral services** include case consultations, teacher or other professional consultations, attendance at Individualized Education Program (IEP) meetings or any other conversations related to the client and treatment plan.
- **Crisis stabilization services** are short term and are provided by the Emergency Screening Unit (ESU) for children and adolescents throughout San Diego County. Services are available 24 hours / 7 days a week.
- **Day Services** are designed to provide alternatives to 24-hour care and supplement other modes of treatment and residential services. These service functions are the following: (a) Day Care Intensive Services, (b) Day Care Habilitative Services, (c) Vocational Services, (d) Socialization Services

NOTE: Authority cited: Section 5705.1, Welfare and Institutions Code. Reference: Section 5600, Welfare and Institutions Code.

- **Diversion** occurs when successful crisis stabilization precludes acute psychiatric hospitalization. The design of ESU crisis stabilization services is to divert the need for hospitalization as well as, facilitate admission to inpatient psychiatric care as needed or provide appropriate referrals and linkage to community resources.
- **Dual diagnosis** occurs when an individual has both a valid mental health disorder diagnosis and an active substance abuse/dependency diagnosis.
- **Fee-for-Service providers** are primarily licensed **clinicians in private practice** who provide services to clients on a fee-for-service basis or through Medi-Cal coverage. These providers are spread out over the county and represent a diversity of disciplines, cultural-linguistic groups and genders in order to provide choice for eligible clients. There are also two fee-for-service inpatient hospitals that provide services for children and adolescents in San Diego County (Aurora Hospital and Sharp Mesa Vista Hospital).

Glossary of Terms

- **Full-service partnership (FSP)** programs are comprehensive programs funded by MHSA-CSS which provide all necessary services and supports, including intensive services, to clients with a high level of need to enable them to live in their community.
- **Inpatient (IP) services** are delivered in psychiatric hospitals.
- **Intensive Care Coordination (ICC) Services** facilitate assessment, care planning, and coordination of services.
- **Intensive Home Based Services (IHBS)** are rehab-like services with a focus on building functional skills.
- **Intensive Outpatient Programs (IOP)** are outpatient programs that offer specialty mental health services to youth who would benefit from time-limited intensive programming. Typically offered for roughly six weeks, the program serves a cohort of youth with similar clinical needs. IOP is a part-time program which youth attend a few times a week after school hours.
- **Juvenile Forensic Services** are provided primarily in Probation institutions within San Diego County. Juvenile Forensic Services include assessment, individual therapy, crisis intervention, consultation, and treatment services to children and adolescents who are involved with the Juvenile Court (both dependents and delinquents). Services are provided throughout the County at sites including Juvenile Hall (Kearny Mesa and East Mesa) and Girls' Rehabilitation Facility, and Urban Camp.
- **Medication services** include medication evaluations and follow-up services.
- **Mobile Crisis Response Teams (MCRT)** are a service option for individuals experiencing a mental health or substance use crisis. MCRTs are comprised of licensed mental health clinicians, case managers, and peer support specialists who can respond to behavioral health crisis calls that do not involve known threats of violence or medical emergencies.
- **Organizational providers** are community-based agencies and county-operated sites that are either part of the Health & Human Services Agency (HHSA) or have contracts with HHSA to provide mental health treatment services to specified target populations. These clinics can provide services to the general population, a specialized population or a population in a specific setting (e.g., school, home).
- **Outpatient services** are typically delivered in clinics, institutions, schools and homes.

Glossary of Terms

- **Partial Hospitalization Programs (PHP)** are outpatient programs that offer specialty mental health services to youth who would benefit from time-limited intensive programming. Typically offered for roughly two weeks, the program serves a cohort of youth with similar clinical needs. PHP is a full-day program, Monday through Friday.
- **Primary Diagnosis:** Primary Diagnosis was determined by identifying the last Priority 1 diagnosis assigned prior to the end of the current reporting period. **Excluded** diagnoses are those categorized as “excluded” by Title 9 (e.g., psychiatric disorders due to general medical conditions, substance use disorders, learning disabilities). The **Other** category includes diagnoses such as Pervasive Developmental Disorder (PDD), Reactive Attachment Disorder, elimination disorders, and eating disorders. Excluded and Other diagnoses were combined for reporting purposes. **Invalid** diagnoses were either missing or not a valid psychiatric diagnosis. Diagnoses were then grouped into meaningful diagnostic categories according to Title 9 Medical Necessity Criteria of the California Code of Regulations list of included diagnoses, the most recent DSM, and/or the most recent ICD. One primary diagnosis was indicated per client for these analyses.
- **The Psychiatric Emergency Response Team (PERT)** provides emergency assessment and referral for individuals with mental illness who come to the attention of law enforcement through phone calls from community members or in-field law enforcement request for emergency assistance. PERT pairs licensed mental health clinicians with uniformed law enforcement officers/deputies. PERT evaluates the situation, assesses the individual's mental health condition and needs, and, if appropriate, transports individual to a hospital or other treatment center, or refers them to a community-based resource or treatment facility.
- **Short-Term Residential Therapeutic Programs (STRTP)** are residential settings where youth receive short-term intensive services in order to stabilize and return to a home-based family setting.
- **Therapeutic Behavioral Services (TBS)** include services conducted by paraprofessionals to assist youth in obtaining functional skills in the community, and are provided by programs with a TBS contract.
- **Therapy** includes individual, family, and group therapy.
- **Youth** refers to all children and adolescents (ages 0-17) and young adults (ages 18+) who received mental health services through BHS-CY providers.

Report Date: 2/25/2025

CASRC (AEC, CB)
Data Source: CCBH, CFWB, Probation 10/2024

County of San Diego Behavioral Health Services

Key Findings

Unhoused (1% n=122)

- Only 122 youth experiencing homelessness were served in the BHS-CY system in FY 2023-24. These data should be interpreted with caution due to the very small number.
- Youth experiencing homelessness were more likely than the BHS-CY systemwide averages to be over the age of 18, and have a stressor/adjustment disorder diagnosis.
- Ninety-one percent of youth experiencing homelessness were reported to have a history of trauma, as compared to 72% systemwide.
- Youth experiencing homelessness were more likely to receive Wraparound services.
- Half of youth experiencing homelessness were reported to be "couch surfing."

LGBTQ+ (12% n=1,440)

- Sexual orientation and gender identity are currently evaluated only for youth ages 12 and up.
- LGBTQ+ youth were more likely to identify as female (fifty-eight percent) and other gender (twenty-two percent) than the BHS-CY systemwide average.
- LGBTQ+ youth were more likely to receive services in both emergency/crisis and inpatient levels of care.
- Forty-seven percent of LGBTQ+ youth were diagnosed with a depressive disorder, as compared to 24% in the BHS-CY systemwide average.
- Thirty-three percent of LGBTQ+ youth ages 13+ were identified as having a co-occurring substance use issue, as compared to 28% systemwide.

CYFBHS
N = 11,726

Probation & BHS-CY (7% n=767)

- Youth open to both the Probation and BHS-CY sectors were more likely than the BHS-CY systemwide averages to be older, male, and Black/African American.
- These youth were three times as likely to be diagnosed with an oppositional/conduct disorder, and close to twice as likely to receive a stressor/adjustment disorder diagnosis, as compared to the BHS-CY systemwide averages.
- Youth open to both the Probation and BHS-CY sectors were the primary utilizers of outpatient Juvenile Forensic Services.
- Seventy-eight percent of youth ages 12+ open to both the Probation and BHS-CY sectors were identified as having a co-occurring substance use issue, as compared to 28% systemwide.

Child and Family Well-Being & BHS-CY (9% n=1,013)

- Youth open to both the Child Welfare and BHS-CY sectors were more likely to be younger and less likely to be Hispanic, as compared to BHS-CY systemwide averages.
- These youth were most likely to have a diagnosis of stressor/adjustment disorder.
- Youth open to both the Child Welfare and BHS-CY sectors were more likely to receive residential services than any other CYF Special Population.
- These youth were more likely than any other CYF Special Population to have experienced trauma.
- Forty-nine percent of youth ages 12+ open to both the Child Welfare and BHS-CY sectors were identified as having a co-occurring substance use issue, as compared to 28% systemwide.

BHS-CY Areas of Influence Report

COUNTY OF SAN DIEGO CHILDREN, YOUTH & FAMILIES BEHAVIORAL HEALTH SERVICES

LIVE WELL SAN DIEGO AREAS OF INFLUENCE: Q1-4 FY 2023-24

Progress on the LWSD Areas of Influence was measured for youth who discharged from services between July 2023 and June 2024. The Child and Adolescent Needs and Strengths (CANS) assessment was chosen to represent San Diego's Areas of Influence because it broadly measures a child's functioning.
