Introduction to the Demographic Profiles

History

The Community Health Statistics Unit (CHSU), under the Health and Human Services Agency (HHS) Public Health Services Department, was formed in 2005 to provide a single point of contact for public health data and support to the HHS Regions and their communities. CHSU generates publications including: the Community Health Profiles, topic specific reports (e.g., older adult falls, economic burden of disease, health disparities, and health status), health briefs, fact sheets, atlases, and the demographic profiles, all of which are available at www.sdhealthstatistics.com.

The *City Demographic Profiles* are a compilation of information relating to demographic characteristics of specific populations in San Diego County. Each profile contains demographic data for municipalities (incorporated cities) including age, sex, race/ethnicity distributions, school enrollment, educational attainment, income, occupation, housing, and other social/economic data. Many of these factors have been implicated at the roots of health disparities.

The purpose of the *City Demographic Profiles* is to provide detailed information about the characteristics of the people living in San Diego County. It is designed to help HHS staff in each of the Health and Human Services Regions (Regions) and other local organizations, including *Live Well San Diego* recognized partners, to identify and prioritize needs within their communities. These profiles are made available to the public health community and public policymakers to better understand and manage the health and well-being of the residents of our County.

Source of Data

The Census is conducted every 10 years to provide an official count of the entire population in the United States to Congress. The American Community Survey (ACS), on the other hand, is conducted every year by the U.S. Census Bureau to provide more current estimates of the population. The ACS collects sociodemographic and economic data annually; topics include educational attainment, income, poverty, disability, health insurance, workforce and more to describe the population living in the United States. Per Title 13, U.S. Code, completing either or both the Census and the ACS is required by law if your household is selected. Personal identification is protected, but data in aggregate form is released to provide information needed for planning purposes and programs.

If you are looking for official population totals, the U.S. Census Bureau recommends using the 2010 or 2020 Census. However, the ACS provides a more current picture of the population and population characteristics. While ACS estimates are derived from a much smaller sample, data are collected from a representative sample of the population in the nation. Because ACS variables may change over time, some areas and subjects must be compared with caution, or not compared at all.

The Census Bureau recommends that you^{1,2}:

- DO compare similar period lengths, for example, 5-year to 5-year.
- DON'T compare estimates from different period lengths, for example, 1-year to 5-year.
- DO compare estimates from non-overlapping periods, for example, compare a 2014-2018 ACS 5-year estimate to a 2019-2023 ACS 5-year estimate.
- DON'T compare overlapping periods, for example, the 2018-2022 ACS 5-year estimates to the 2019-2023 ACS 5-year estimates.

Why use 5-year estimates?^{1,2}

- Cover 60 months of collected data; for example, from January 1, 2019 to December 31, 2023.
- Data is collected for all areas (including census blocks and tracts), which makes this the largest sample size
- Most reliable, but least current
- Released every year since 2009

More American Community Survey (ACS) data available online at <https://data.census.gov/>.

For more information regarding the methodology of the ACS Survey, please go to <https://www.census.gov/programs-surveys/acs/methodology.html>.

Methodology

Data is downloaded for each of the 18 incorporated cities in San Diego County, California, and the United States. Wherever possible, the data for the Unincorporated Area of San Diego, which is managed by San Diego County, is derived from the data available.

Please note that the indicators in the demographic profiles are reviewed every year. Indicators will be added per number of requests showing the need for these to be included and/or modified as needed.

For the 2019-2023 version, no indicators were modified or added.

For researchers: The U.S. Census Bureau publishes a margin of error (MOE) for each ACS estimate. For the purposes of these profiles, the MOEs are not considered as these are the best estimates for our geographies.

2019-2023 CITY DEMOGRAPHIC PROFILES

BASIC POPULATION CHARACTERISTICS

Geography	Total Population
City of Carlsbad	114,500
City of Chula Vista	275,030
City of Coronado	18,558
City of Del Mar	3,921
City of El Cajon	104,909
City of Encinitas	61,585
City of Escondido	149,913
City of Imperial Beach	25,897
City of La Mesa	60,835
City of Lemon Grove	27,489
City of National City	55,960
City of Oceanside	172,542
City of Poway	48,515
City of San Diego	1,385,061
City of San Marcos	94,078
City of Santee	59,485
City of Solana Beach	12,841
City of Vista	98,646
Unincorporated	513,017
San Diego County	3,282,782
California	39,242,785
United States	332,387,540

This indicator shows the number of persons living at each geography.

How to interpret these data: In 2023, San Diego County had a population of nearly 3.3 million.

How to interpret these data: In 2023, the most populous municipality in San Diego County was the City of San Diego, with a population of 1,385,061. The City of San Diego comprised 42% of the county's population.

This indicator shows the number and percent of the population by age group in each geography.

How to interpret these data: In 2023, 15.0% (493,837) of San Diego County's population was 65 years and over.

Percent of Population by Age Group and Municipality, 2023

Source: U.S. Census Bureau; 2019-2023 American Community Survey 5-Year Estimates, Table B01001. Prepared by: County of San Diego, Health and Human Services Agency, Public Health Services, Community Health Statistics Unit, 2025.

Older Adult Population by Age Group

Source: U.S. Census Bureau; 2019-2023 American Community Survey 5-Year Estimates, Table B01001.

This indicator shows the older adult population by age group. Number (#) represents the number of older adults in that age group. Percentage (%) represents the percentage the age group makes up out of the total population in the geography.

How to interpret these data: In 2023, 8.9% of San Diego County's population were between the ages of 65-74, 4.4% were between 75-84, and 1.8% were 85 years and older.

Geography	Total Population	65-74		75-84		85+

Percent of Population by Race/Ethnicity and Municipality, 2023

This indicator shows total population broken down by race/ethnicity. Ethnicity can be Hispanic or Not Hispanic or Latino (NH). People of Hispanic ethnicity may be of any race.

Note: In previous iterations of the Demographic Profiles, American Indian/Alaska Native (AIAN) and Two or More Races had been part of the 'Other' category.

Beginning in 2017, 'AIAN' became a unique category. In previous iterations of the Demographic Profiles, Native Hawaiian or Pacific Islander (NHPI) was included in the Asian/Pacific Islander (API) category.

Beginning in 2018, NHPI and Two or More Races became unique categories. *NHPI refers to Native Hawaiian or Pacific Islander; AIAN refers to American Indian/Alaska Native.

How to interpret these data: In 2023, San Diego County's population was 34.3% Hispanic. Among the non-Hispanic population, 43.2% were White, 4.4% Black, 11.9% Asian, 0.4% Native Hawaiian or Pacific Islander (NHPI), 0.3% American Indian/Alaska Native (AIAN), 5.0% two or more races, and 0.5% other.

*NH refers to Non-Hispanic or Latino; NHPI refers to Native Hawaiian or Pacific Islander; AIAN refers to American Indian/ Alaska Native.

Source: U.S. Census Bureau; 2019-2023 American Community Survey 5-Year Estimates, Table B03002. Prepared by: County of San Diego, Health and Human Services Agency, Public Health Services, Community Health Statistics Unit, 2025.

Asian/Pacific Islander (API) Population: Number

Source: U.S. Census Bureau; 2019-2023 American Community Survey 5-Year Estimates, Table B02015, B02016.

This indicator shows the number of persons in each of the API races.
 *Note: These numbers may include Hispanic and Non-Hispanic Asian/Pacific Islanders.

How to interpret these data: Among the Asian/Pacific Islander (API) population in San Diego County in 2023, Filipino, Chinese (except Taiwanese), and Vietnamese were the most populous races with 150,981; 60,983; and 49,774 people, respectively.

Asian/Pacific Islander (API) Distribution: Percent of Total Population by Municipality, 2023

Source: U.S. Census Bureau, 2019-2023 American Community Survey 5-Year Estimates, Table B01001, B02015, B02016. Prepared by: County of San Diego, Health and Human Services Agency, Public Health Services, Community Health Statistics Unit, 2025.

Language Spoken at Home for the Population 5+ Years and Ability to Speak English

Source: U.S. Census Bureau; 2019-2023 American Community Survey 5-Year Estimates, Table DP02.

*Asian/Pacific Islander

Language questions were only asked of persons 5 years and older. The language question is about current use of a non-English language at home, not about ability to speak another language or the use of such a language in the past. People who speak a language other than English outside of the home are not reported as speaking a language other than English. Similarly, people whose mother tongue is a non-English language but who do not currently use the language at home do not report the language.

The language currently used by respondents at home, either "English only" or a non-English language which is used in addition to English or in place of English.

How to interpret these data: Overall, the majority (63.3%) of the population ages 5 years and older in San Diego County spoke only English at home in 2023.

Geography	Population Age 5+	Speak English Only %	Speak a Non-English Language at Home and Speak English "Very Well" %	Speak Spanish and English less than "very well" %	Speak API* Language and English less than "very well" %	Speak Other Language and English less than "very well" %

Language Spoken at Home Among Population 5 Years and Older by Municipality, 2023

*API refers to Asian/Pacific Islander.
 Source: U.S. Census Bureau, 2019-2023 American Community Survey 5-Year Estimates, Table DP02.
 Prepared by: County of San Diego, Health and Human Services Agency, Public Health Services, Community Health Statistics Unit, 2025.

Language Spoken at Home for the Population 5+ Years and Ability to Speak English (Detailed)

Source: U.S. Census Bureau; 2019-2023 American Community Survey 5-Year Estimates, Table C16001.

Language questions were only asked of persons 5 years and older. The language question is about current use of a non-English language at home, not about ability to speak another language or the use of such a language in the past or elsewhere. People who speak a language other than English outside of the home are not reported as speaking a language other than English. Respondents that spoke a language other than English at home, where also asked whether they could speak English "very well" or less than "very well". See how the Census Bureau measures **Language Use** for more information.

How to interpret these data: Among the San Diego County population 5 years and older in 2023, 15.5% spoke Spanish at home and could speak English very well, compared to 8.2% who spoke Spanish at home but didn't speak English very well, for a total of 23.7% of residents who spoke Spanish at home.

Geography	Population Age 5+	English Only	Spanish	Speak English "very well"	Speak English less than "very well"	French, Haitian, or Cajun	Speak English "very well"	Speak English less than "very well"	German or Other West Germanic Languages	Speak English "very well"	Speak English less than "very well"	Russian, Polish, or other Slavic Languages	Speak English "very well"	Speak English less than "very well"	Other Indo-European Languages	Speak English "very well"	Speak English less than "very well"	Korean	Speak English "very well"	Speak English less than "very well"	Chinese (inc. School Enrollment by Grade Level

Source: U.S. Census Bureau; 2019-2023 American Community Survey 5-Year Estimates, Table S1401.

This indicator provides the number of students enrolled in any level of school ages 3 years and older and the proportion of enrolled students by their grade level. In other words, of the population 3 years and over who are enrolled in school, the percent of students enrolled by grade level.

How to interpret these data: In 2023, one third (33.3%) of the San Diego County population ages 3 years and older who were enrolled in school were college students (undergraduate, graduate, or professional school).

Geography	Population 3+ Enrolled in School	Nursery School or Preschool	Kindergarten	Grade 1 to 4	Grade 5 to 8	Grade 9 to 12	College, Undergraduate	Graduate, Professional School

School Enrollment by Grade Level, by Municipality, 2023

Source: U.S. Census Bureau, 2019-2023 American Community Survey 5-Year Estimates, Table S1401. Prepared by: County of San Diego, Health and Human Services Agency, Public Health Services, Community Health Statistics Unit, 2025.

School Enrollment by Type of School

Source: U.S. Census Bureau; 2019-2023 American Community Survey 5-Year Estimates, Table S1401.

This indicator breaks down school enrollment in each grade level by type of school, private or public, for the population 3 years and over enrolled in school. Percentage refers to the proportion of those 3+ enrolled in school in either private or public school in the given grade level. Therefore, the sum of private and public percentages for each grade level will add to 100%.

How to interpret these data: Of students enrolled in nursery school or preschool in 2023, 49.3% of San Diego County students were enrolled in a private nursery school or preschool and the remaining 50.7% were in a public nursery school or preschool.

Geography	Nursery School or Preschool		Kindergarten		Grade 1 to 4		Grade 5 to 8		Grade 9 to 12		College, Undergraduate		Graduate, Professional School

School Enrollment by Age Group

Source: U.S. Census Bureau; 2019-2023 American Community Survey 5-Year Estimates, Table S1401.

This indicator provides the percentage of students in each age group that were enrolled in school (any level of school). Enrollment questions are asked for persons 3 years and older and percentage is for each specific age group.

How to interpret these data: In 2023, 46.9% of 3-4 years olds were enrolled in school in San Diego County.

Geography	Population Age 3-4	Population Age 5-9	Population Age 10-14	Population Age 15-17	Population Age 18-19	Population Age 20-24	Population Age 25-34	Population Age 35+

Educational Attainment Among Population 25 Years and Older

Source: U.S. Census Bureau; 2019-2023 American Community Survey 5-Year Estimates, Table DP02.

This indicator refers to the highest level of education completed in terms of the highest degree or the highest level of schooling completed for the population 25 years and older. This is different from the level of schooling that an individual is attending (enrolled in).

How to interpret these data: In 2023, nearly 9 out of 10 adults (89.0%) had at least a high school diploma or GED, while over 2 out of 5 adults (42.1%) held a bachelor's or higher degree in San Diego County.

Geography	Population Age 25+	Not a High School Graduate	High School Graduate	Some College or AA/AS	Bachelor's Degree	Graduate Degree

Marital Status Among Population 15 Years and Older by Municipality, 2023

Source: U.S. Census Bureau, 2019-2023 American Community Survey 5-Year Estimates, Table DP02.
 Prepared by: County of San Diego, Health and Human Services Agency, Public Health Services, Community Health Statistics Unit, 2025.

Single Parent Households

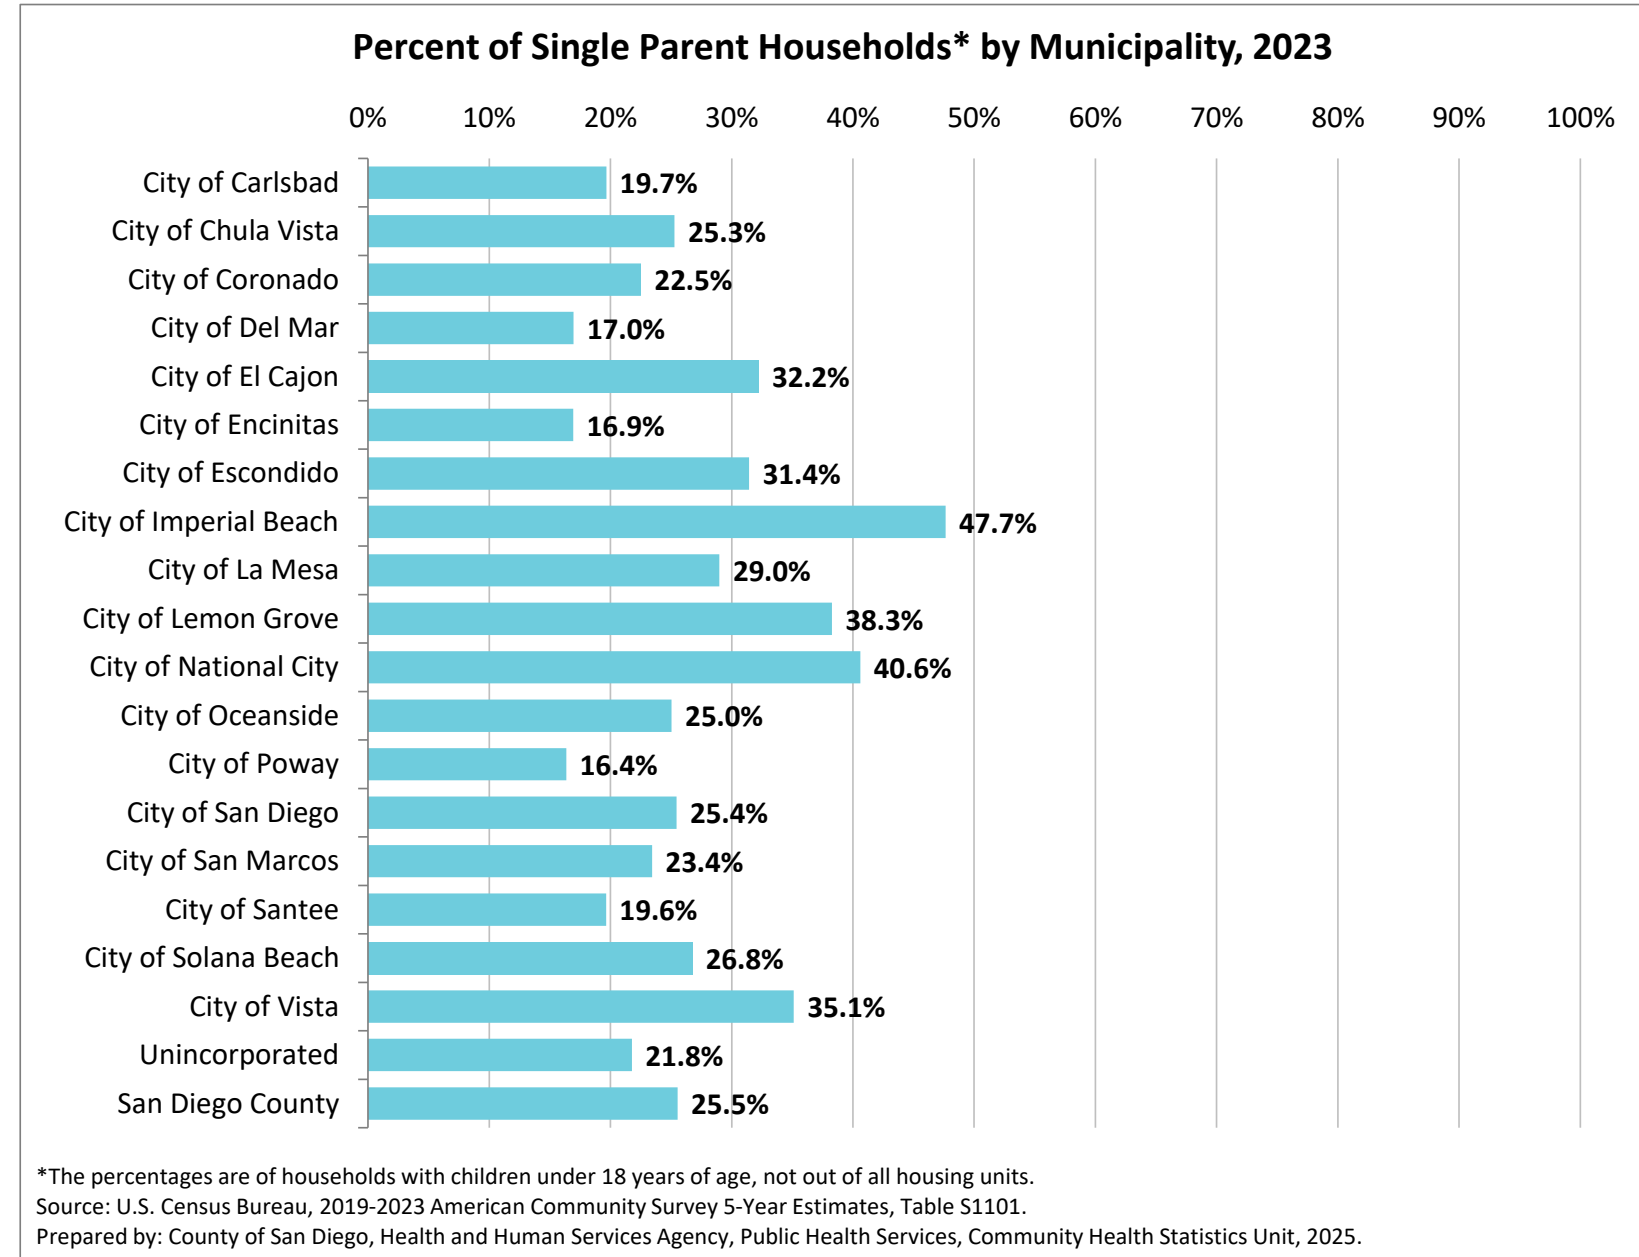

Source: U.S. Census Bureau; 2019-2023 American Community Survey 5-Year Estimates, Table S1101.

Note: Own children are never-married sons and daughters under the age of 18, including stepchildren and adopted children, of the householder or married couple.

This indicator provides the number of households with own children under the age of 18 along with the percentage of these that are single parent households. The percentages are of households with children under 18 years of age, not out of all housing units. Further, it specifies the percentages of households with children under 18 years of age that are single parent father or single parent mother households. Therefore, sum of single father household and single mother households will add to percent of single parent household with own children under 18.

How to interpret these data: In 2023, there were 322,119 households with own children under the age of 18 in San Diego County; of these, 7.3% were single father households and 18.2% were single mother households, for a total of 25.5% single parent households out of households with children under the age of 18.

Vehicles in Housing Unit

Source: U.S. Census Bureau; 2019-2023 American Community Survey 5-Year Estimates, Table DP04.

This indicator provides the percentage of occupied housing units by the number of vehicles available. There are four vehicle availability categories: no vehicles, one vehicle, two vehicles, and three or more vehicles.

How to interpret these data: Of the 1,159,822 occupied housing units in San Diego County in 2023, nearly one-quarter (24.8%) had 3 or more vehicles.

For this indicator, labor force consists of persons 16 years and older classified in the civilian labor force, plus members of the U.S. Armed Forces (people on active duty with the United States Army, Air Force, Navy, Marine Corps, or Coast Guard).

*Eligible labor force includes employed civilians, unemployed, and persons in the armed forces.

All civilians 16 years old and over were classified as unemployed if at the time of the survey they did no work as paid employees during the past week, were not actively looking for work during the past month but were available to accept a job. Also included as unemployed are civilians who did not work at all during the reference week, were waiting to be called back to a job from which they had been laid off and were available for work except for temporary illness.

‡Percent unemployed was derived from the number of unemployed persons out of the 16 year and older *eligible labor force**.

Note: This unemployment rate is based on a 5-year average (2019-2023) and may not be comparable to unemployment rates from other sources with different methodology and/or unemployment definitions, including the unemployment *Live Well San Diego* Indicator. Unemployment may be influenced by seasonal variability.

How to interpret these data: Between 2019-2023, the 5-year average unemployment rate in San Diego County was 5.9%.

Average Percentage of Unemployment by Municipality, 2019-2023

Source: U.S. Census Bureau, 2019-2023 American Community Survey 5-Year Estimates, Table DP03.

Labor Force by Occupation

Source: U.S. Census Bureau; 2019-2023 American Community Survey 5-Year Estimates, Table DP03.

This indicator presents the occupational groups for the civilian employed persons over the age of 15. Occupation refers to the *type of employment* that a person does or had to earn a living during the previous week, or where the person worked the greatest number of hours for those that had at least 2 jobs. For people who reported having a job within the last 5 years, data reflects occupation at their last job.

For more information and/or a complete list of descriptions and more information on this topic, please visit <https://www.census.gov/topics/employment/industry-occupation/about/occupation.html> or <https://www.census.gov/topics/employment/industry-occupation/about.html>

How to interpret these data: While it may vary by municipality, 65.9% of jobs in San Diego County overall were in the management, business, science, and arts (46.9%) and sales and office (19.0%) occupations in 2023.

Labor Force by Occupation by Municipality, 2023

- Production, transportation, and material moving occupations
- Sales and office occupations
- Management, business, science, and arts occupations
- Natural resources, construction, and maintenance occupations

Occupation by Industry

Source: U.S. Census Bureau; 2019-2023 American Community Survey 5-Year Estimates, Table DP03.

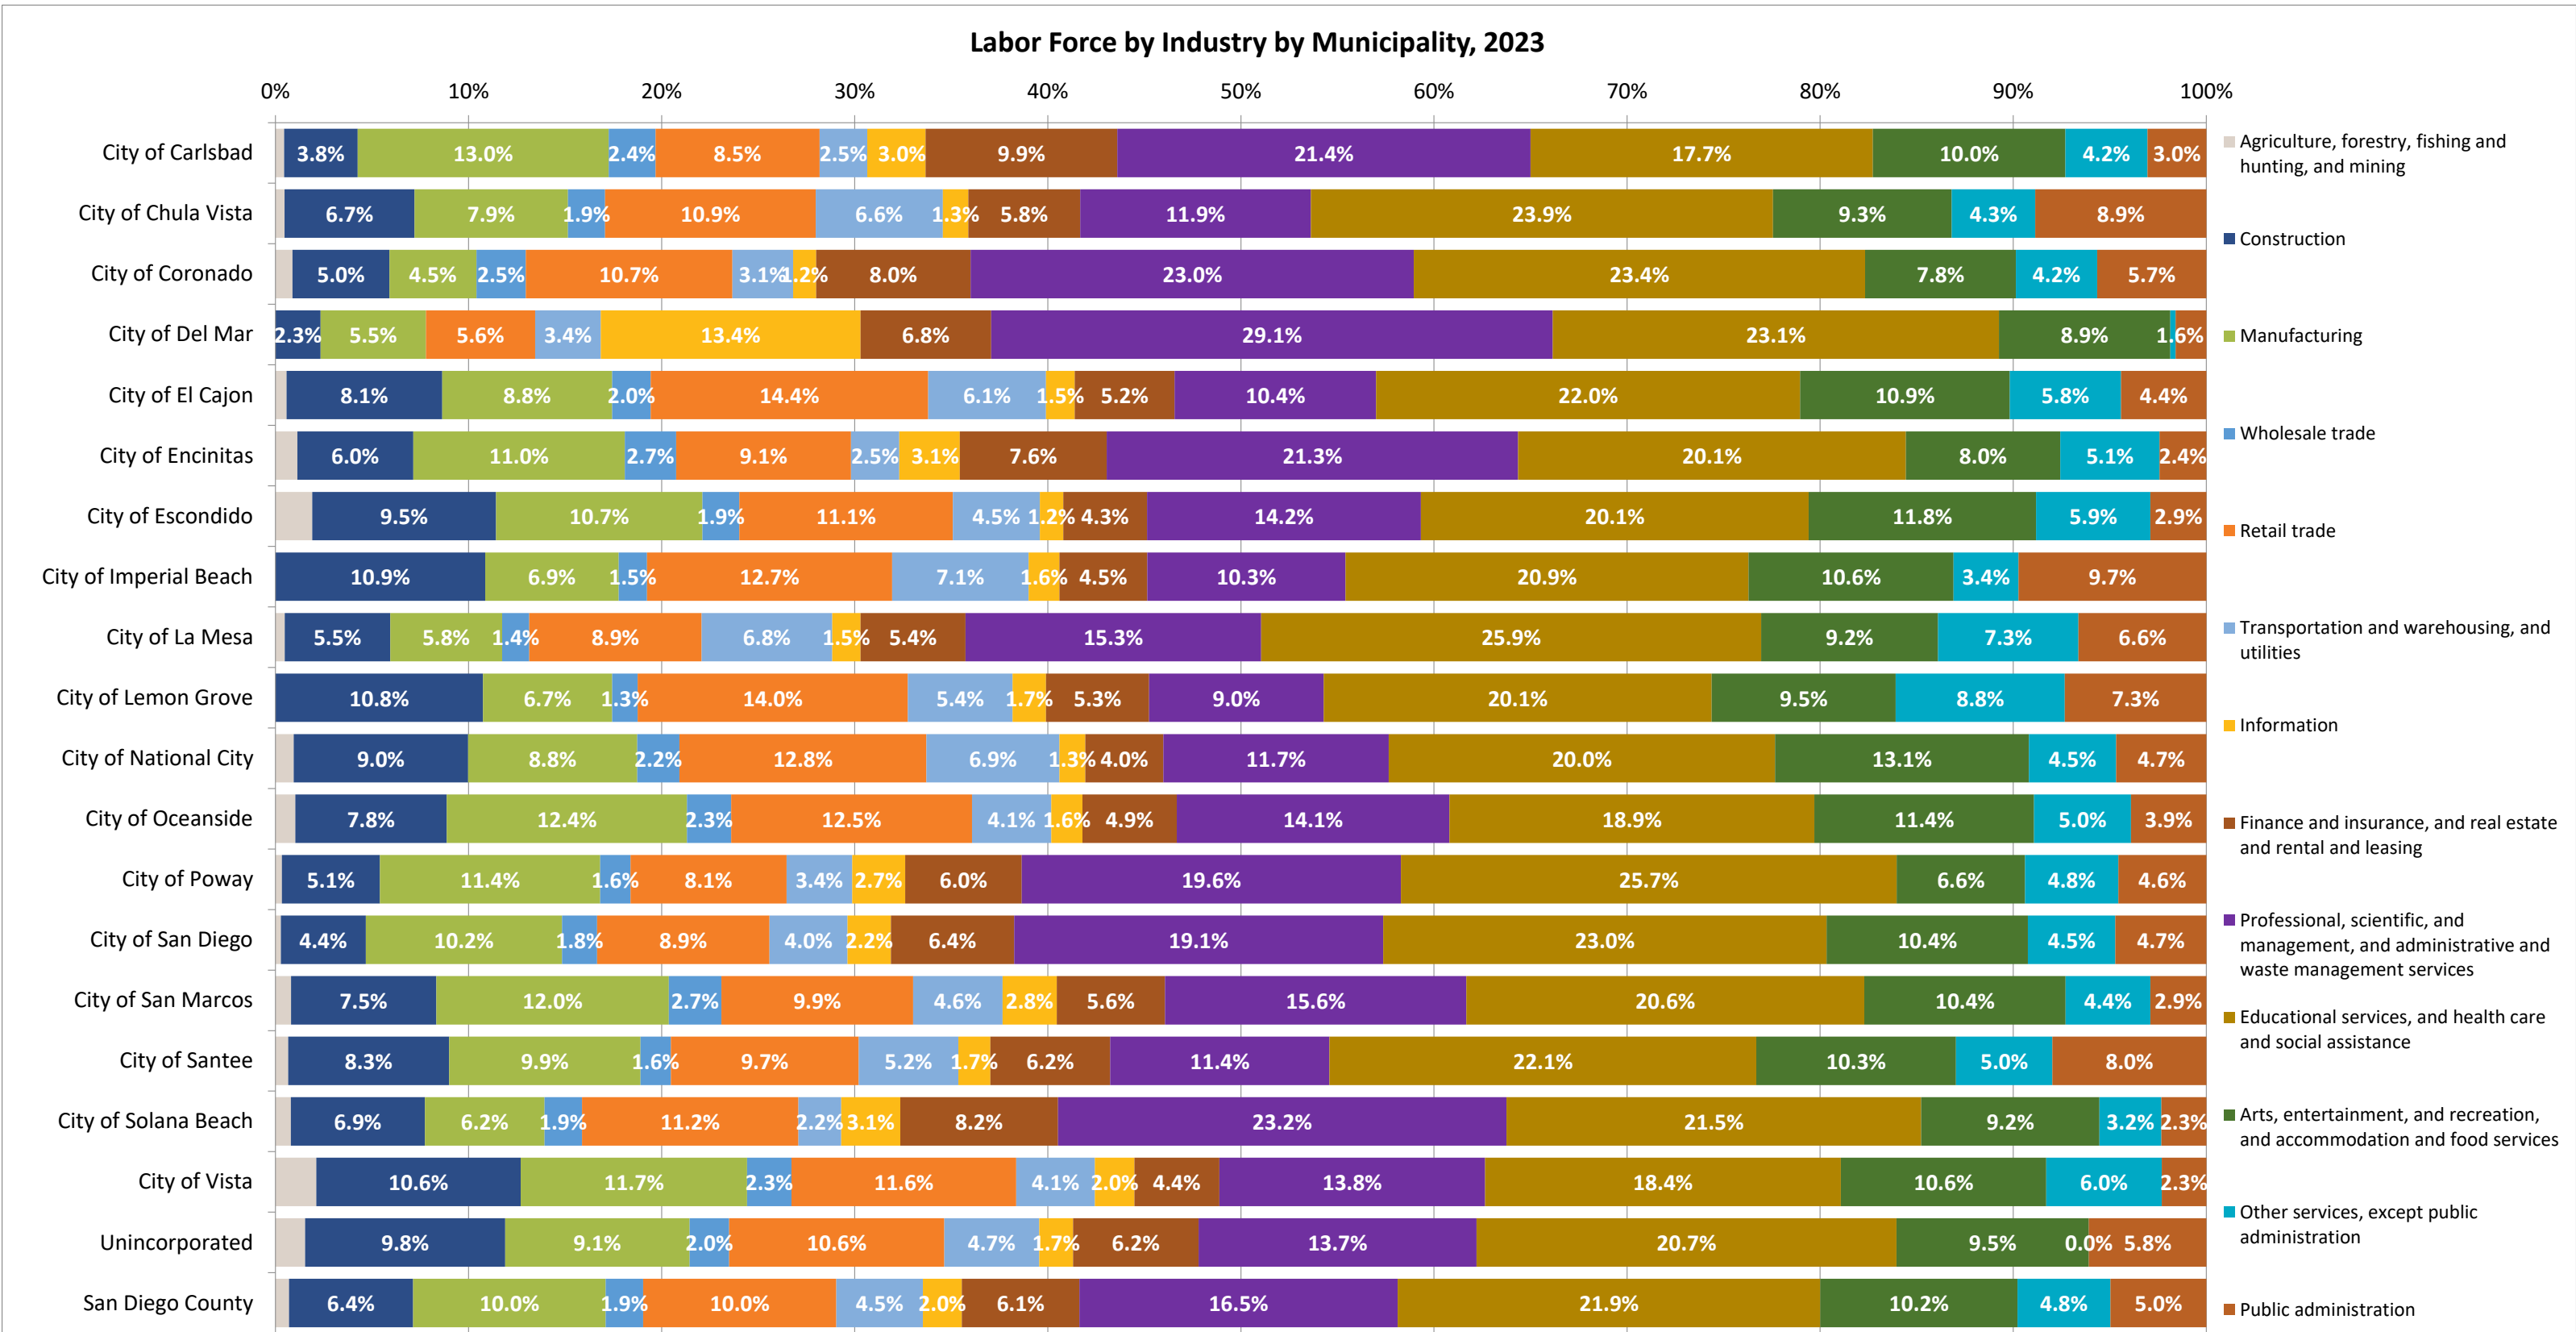

This indicator breaks down occupation of workers, ages 16 and over, by type of industry. Industry refers to the *type of activity* at a person's place of work during the previous week, or where the person worked the greatest number of hours for those that had at least 2 jobs. For people who reported having a job within the last 5 years, data reflects industry of their last job. Occupation by Industry

Source: U.S. Census Bureau; 2019-2023 American Community Survey 5-Year Estimates, Table DP03.

Source: U.S. Census Bureau, 2019-2023 American Community Survey 5-Year Estimates, Table DP03.
 Prepared by: County of San Diego, Health and Human Services Agency, Public Health Services, Community Health Statistics Unit, 2025.

This indicator provides the principal mode of travel or type of transportation the worker usually used to get from home to work. For those who used more than one type of transportation to get to work, it is the one they used most often (greatest number of days). For those that used more than one type of transportation to get to work every day, it is the type of transportation used for the longest distance during the work trip.

How to interpret these data: In 2023, an estimated 67.6% of San Diego County workers drove to work alone and 8.2% carpoled.

Geography	Workers Age 16+	Drove Alone	Carpooled	Public Transportation	Walked	Other	Worked at Home

Percentage of Means of Commuting to Work by Municipality, 2023

Source: U.S. Census Bureau, 2019-2023 American Community Survey 5-Year Estimates, Table DP03.
Prepared by: County of San Diego, Health and Human Services Agency, Public Health Services, Community Health Statistics Unit, 2025.

Number of Households by Household Income

Source: U.S. Census Bureau; 2019-2023 American Community Survey 5-Year Estimates, Table DP03.

This indicator provides information on the number and percentage of households by total income of a household over the past 12 months. Household income includes the income of householder and all other individuals 15 years and older in the household, whether they are related to the householder or not. It excludes income of individuals who did not live in the household at the time of the survey response.

How to interpret these data: About 1 in 6 (16.0%) households in San Diego County had a household annual income under \$35,000 in 2023.

Geography	Under \$35,000		\$35,000 - under \$50,000		\$50,000 - under \$75,000		\$75,000 - under \$100,000		\$100,000 - under \$150,000		\$150,000 and Higher

Source: U.S. Census Bureau; 2019-2023 American Community Survey 5-Year Estimates, Table DP03, DP04.
Prepared by: County of San Diego, Health and Human Services Agency, Public Health Services, Community Health Statistics Unit, 2025.

Median Household Income divides the income distribution so that half of the population live above the median income and the other half below that.

Income Per Persons in Household was derived from dividing the median household income in the geography by the person per household (PPH) average. Persons per household may include children and other non-income earners.

How to interpret these data: In 2023, the average household size of occupied houses in San Diego County was 2.74 and had a median household income of \$102,285.

This indicator provides the ratio of selected monthly housing costs for owners and renters to monthly household income expressed as a percentage. The information offers an excellent measure of housing affordability and excessive shelter costs. The data also serve to aid in the development of housing programs to meet the needs of people at different economic levels.

Housing units that are renter occupied without payment of rent are shown separately as "No cash rent." The unit may be owned by friends or relatives who live elsewhere and who allow occupancy without charge in exchange for services (ex. caretakers, ministers, tenant farmers, sharecroppers, resident managers, or others). Households paying no cash rent are assumed to be without burdens.

Housing units that reported no income or a net loss comprise the "zero or negative income" category.

How to interpret these data: Households that pay 30% or more of their income on housing costs are considered cost-burdened, regardless of whether they are renters or home owners. Using this definition, in 2023, 42.4% of households in San Diego County were cost-burdened households.

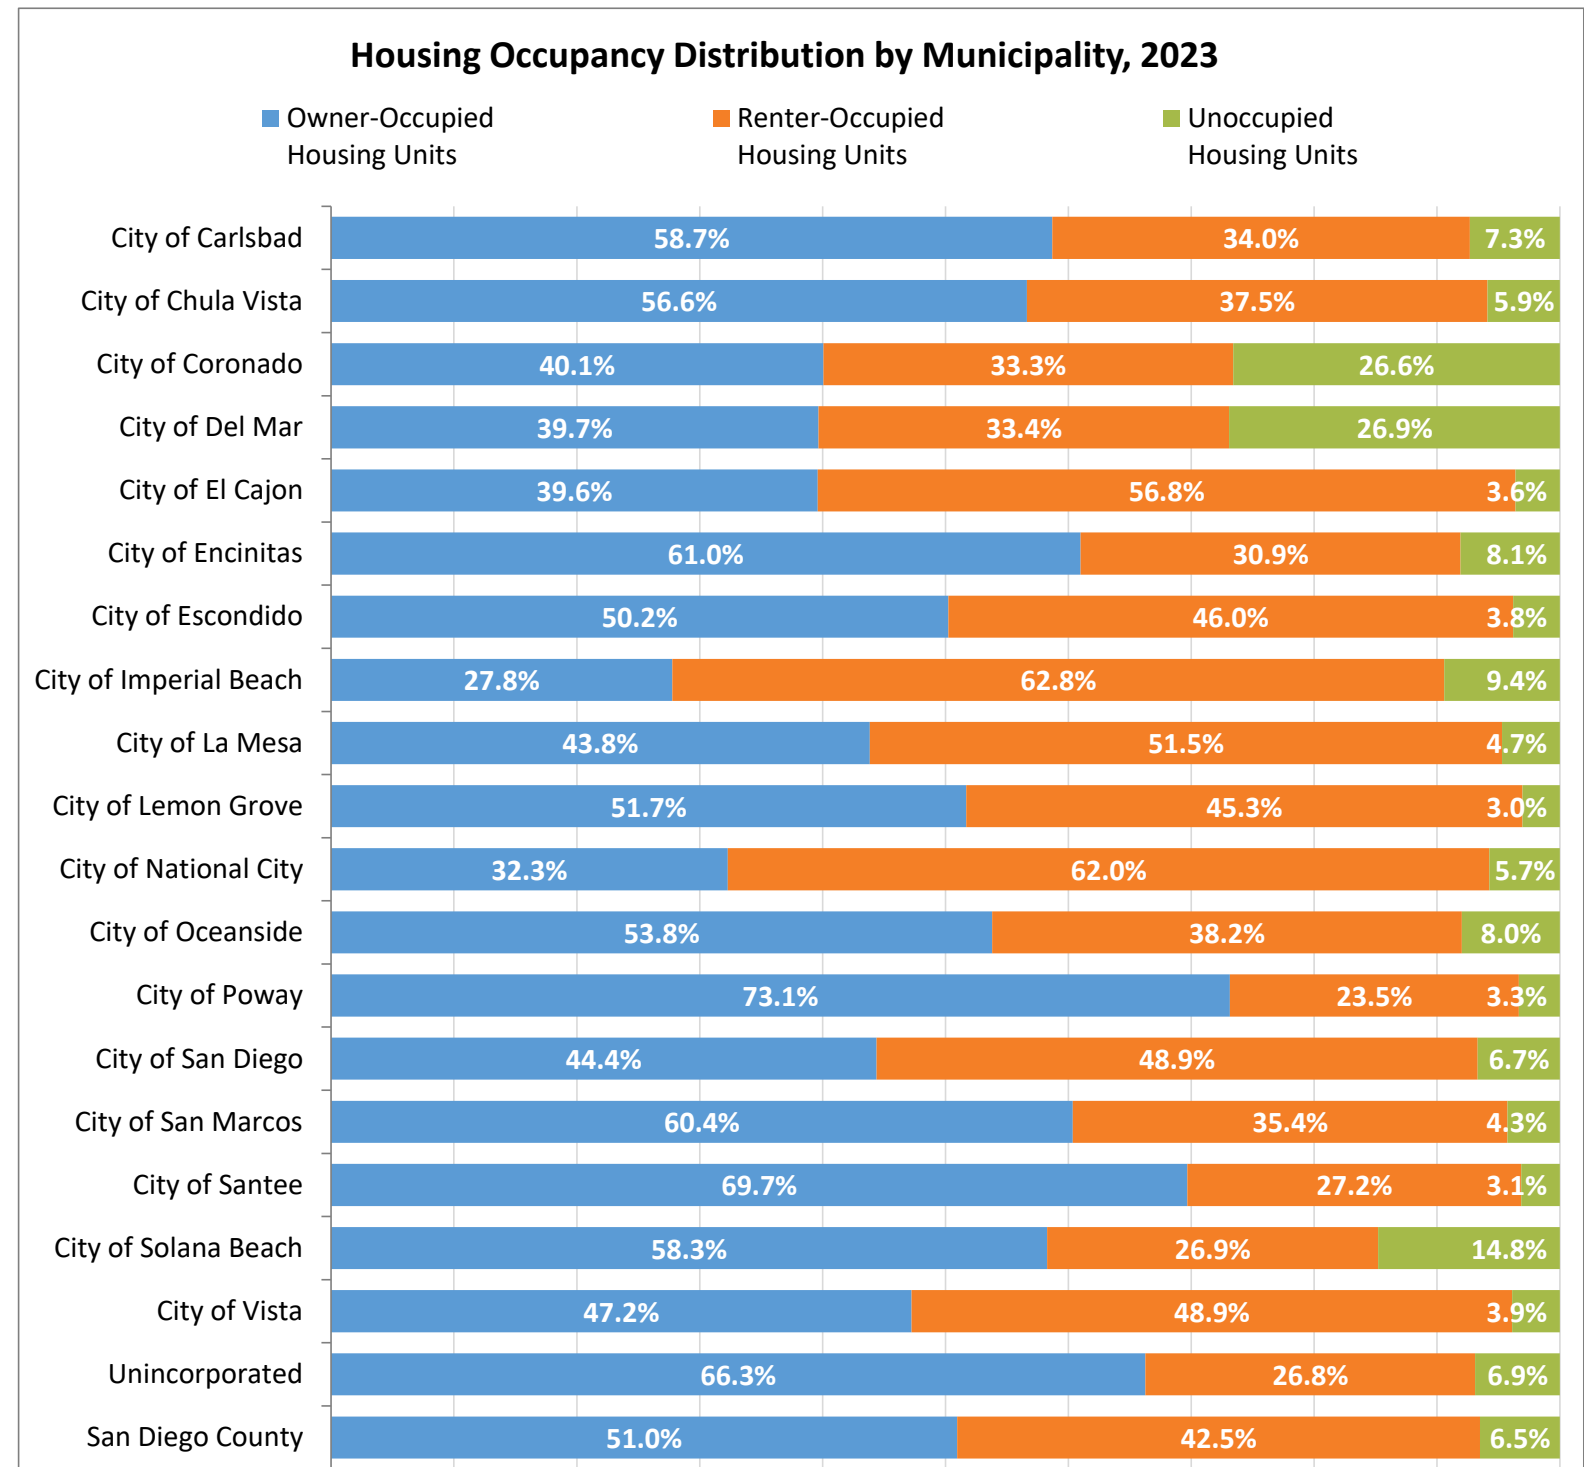

Owner vs. Renter Occupied Housing

This indicator breaks out housing units by tenure (owned or rented housing units) and vacancy.

How to interpret these data: In 2023, San Diego County had a total of 1.2 million housing units. Of these, San Diego County had nearly 1.15 million housing units that were occupied, while the remaining 80,785 were vacant. Of the total housing units, the percentage of these houses occupied by owners was 51.0%, the percentage of these houses occupied by renters was 42.5%, and the remaining 6.5% were unoccupied housing units.

City of Solana Beach	\$ 3,022	\$ 1,934,700
City of Vista	\$ 2,148	\$ 674,400
Unincorporated	N/A	N/A
San Diego County	\$ 2,154	\$ 791,600
California	\$ 1,956	\$ 695,400
United States	\$ 1,348	\$ 303,400

This indicator provides median gross rent and median house value. Note: The question of *house value* was asked at housing units that were owned, being bought, vacant for sale, or sold not occupied at the time of the survey.

Median gross rent divides the gross rent distribution into two equal parts: one-half of the cases falling below the median gross rent and one-half above the median. The U.S. Census Bureau does not specify median gross rent values over \$3,500 and are denoted as "\$3,500+". Note: *Gross rent* is the total contract rent plus the estimated average monthly cost of utilities (electricity, gas, and water and sewer) and fuels (oil, coal, kerosene, wood, etc.) if these are paid by the renter (or paid for the renter by someone else).

Median house value divides the value distribution into two equal parts: one-half of the cases falling below the median value of the property (house and lot, mobile home and lot (if lot owned), or condominium unit) and one-half above the median. The U.S. Census Bureau does not specify median house values over \$2,000,000 and are denoted as "\$2,000,000+".

How to interpret these data: In San Diego County, the median gross rent was \$2,154 (including utilities) and the median house value was \$791,600 in 2023.

Source: U.S. Census Bureau, 2019-2023 American Community Survey 5-Year Estimates, Table B17024.
 Prepared by: County of San Diego, Health and Human Services Agency, Public Health Services, Community Health Statistics Unit, 2025.

For this indicator, data shown is the percentage of the population for whom poverty was determined at specified poverty levels. Poverty status was only determined for people not institutionalized, living in military group quarters, in college dormitories, and/or people ages 0-14 living alone or with unrelated roommates (not family).

Poverty status is determined by matching people’s annual income before tax to sets of dollar amounts (also known as poverty thresholds) which will vary depending on the number of people in the family, number of children under the age of 18, and the age of householder (i.e., under age 65 or over age 65). If the annual income before tax is under the dollar amount for their threshold, the family and everyone in it living in the same household are determined to be in poverty. The income of anyone else living in the house not related, or in the family, is not considered for this threshold. In fact, these individuals would be compared to their own poverty threshold. In order to account for changes in cost of living year to year, poverty thresholds are updated every year per the Consumer Price Index (CPI-U). Poverty thresholds are the same for all geographies in the United States. While cost of living may different geographically, these thresholds do not.

How to interpret these data: In 2023, 10.4% of the San Diego County population lived below 100% federal poverty level (FPL). Specifically, 5.1% lived under 50% FPL, 2.4% between 50-74% FPL, and 2.9% between 75-99% FPL.

Population, by Age Group, Living Below 100% Federal Poverty Level (FPL)*

Population poverty status was only determined for people not institutionalized, living in military group quarters, in college dormitories, and/or people ages 0-14 living alone or with unrelated roommates (not family).

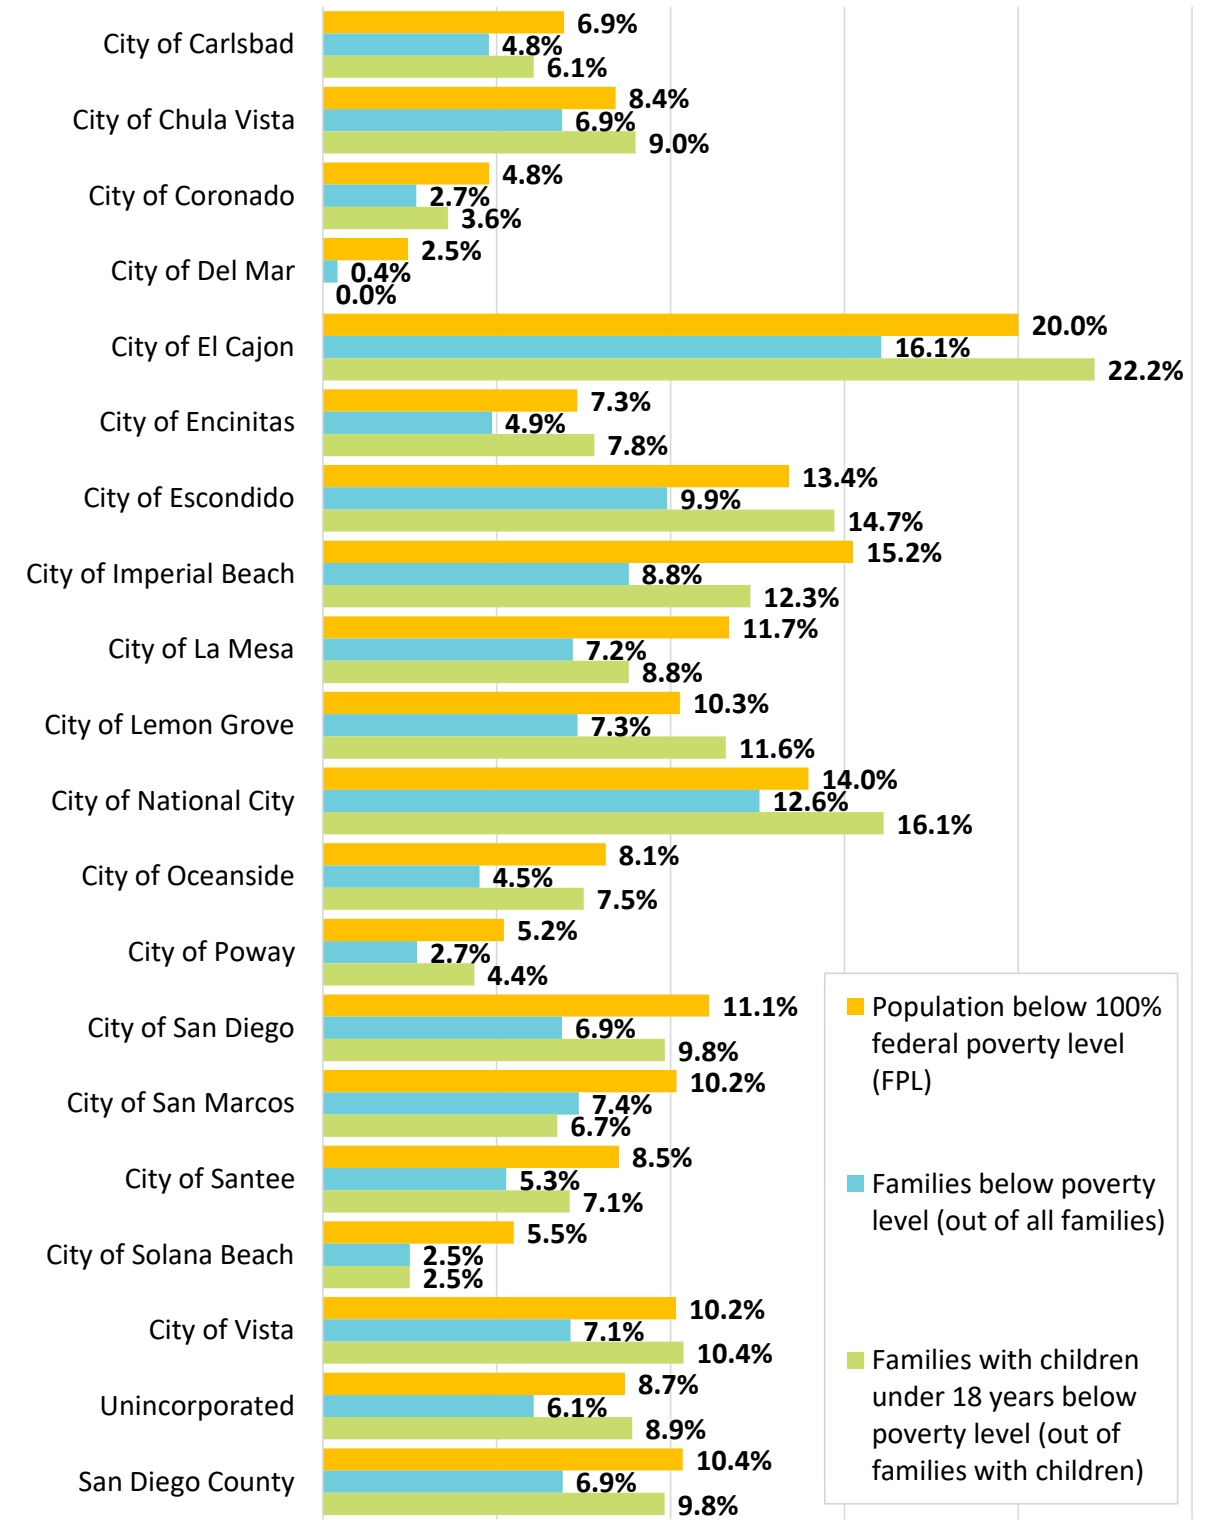

Family poverty status is determined by aggregating income from two or more people who are related through birth, marriage, or adoption, including income for persons over the age of 14 living in the house and related to the householder. Families may or may not include children under the age of 18.

Families with children under 18 poverty status- Out of families with children under the age of 18, not out of all family households, the percentage that were determined to be living below the federal poverty level (FPL).

Poverty status is determined by matching people's annual income before tax to sets of dollar amounts (also known as poverty thresholds) which will vary depending on the number of people in the family, number of children under the age of 18, and the age of householder (i.e., under age 65 or over age 65). If the annual income before tax is under the dollar amount for their threshold, the family and everyone in it living in the same household are determined to be in poverty. The income of anyone else living in the house not related, or in the family, is not considered for this threshold. In fact, these individuals would be compared to their own poverty threshold. In order to account for changes in cost of living year to year, poverty thresholds are updated every year by the Census Bureau per the Consumer Price Index (CPI-U). Poverty thresholds are the same for all geographies in the United States. While cost of living may differ geographically, these thresholds do not.

How to interpret these data: In 2023, 10.4% of people, 6.9% of families, and 9.8% of families that had children under the age of 18 in San Diego County were living in poverty.

This indicator explores the type of household that older adults, ages 65+, lived in. Types of households are classified by presence of relatives. Please note that estimates from other American Community Survey (ACS) tables may differ depending on the categories included in that table; this is because the percentage of older adults by household type data presented here includes the older adult population living in group quarters (college residence halls, residential treatment centers, skilled nursing facilities, group homes, military barracks, correctional facilities, workers' dormitories, and facilities for people experiencing homelessness).

How to interpret these data: Of older adults ages 65+ in San Diego County in 2023, 70.4% lived in a family household. However, over one-fifth (21.8%) of the older adult population was living alone (14.4% female and 7.4% male).

San Diego County	19.8%	9.4%	23.3%
California	19.6%	11.3%	27.1%
United States	19.0%	10.4%	27.4%

This indicator explores income and poverty in the older adult population (residents age 65 years and over). The labor force is the percentage who remain in the labor force* and the second is the percentage who live in poverty using two federal poverty levels (FPLs), below 100% and 200% FPL.

*In labor force refer to persons who were working or actively looking for work. It excludes active-duty military personnel and the institutionalized population, such as prison inmates.

How to interpret these data: In 2023 in San Diego County, 19.8% of older adults, ages 65+, remained in the labor force.

Poverty status was determined for all people except institutionalized people, people in military group quarters, people in college dormitories, and unrelated individuals under 15 years old. These groups were excluded from the numerator and denominator for calculations.

*Federal Poverty levels (FPL) refer to a measure of income used to assess how low or high income individuals have. FPL is used to determine eligibility for certain government programs and/or benefits that are income-based.

Please note that those with income below 100%FPL are included in the living below 200% FPL category and have much lower income.

How to interpret these data: In 2023 in San Diego County, an estimated 9.4% of people age 65 years and over had incomes below the 100% Federal Poverty Level.

Percentage of Population With A Disability by Municipality, 2023

Source: U.S. Census Bureau, 2019-2023 American Community Survey 5-Year Estimates, Table S1810. Prepared by: County of San Diego, Health and Human Services Agency, Public Health Services, Community Health Statistics Unit, 2025.

This indicator provides number and percentage of persons with a disability (one or more). Disability is a dynamic concept that changes over time as one's health improves or declines, as technology advances, and as social structures adapt.

Measuring this complex concept of disability with a short set of six questions is difficult. Overall, the American Community Survey (ACS) attempts to capture six aspects of disability, which can be used together to create an overall disability measure, or independently to identify populations with specific disability types.

*Note: numbers are NOT mutually exclusive. Persons can have more than one type of disability. This is why percentages will NOT add to 100%.

Hearing difficulty: Deaf or serious difficulty hearing among people of any age.

Vision difficulty: Blind or serious difficulty seeing even when wearing glasses among people of any age.

Cognitive difficulty: Serious difficulty concentrating, remembering, or making decisions due to a physical, mental, or emotional condition among the population 5 years and older.

Ambulatory difficulty: Serious difficulty walking or climbing stairs among the population 5 years and older.

Self-care difficulty: Difficulty dressing or bathing among the population 5 years and older.

Independent living difficulty: Difficulty running errands alone due to a physical, mental, or emotional condition among adults 18 years or older (for example, going alone to an appointment at their doctor's office or shopping). This is an indicator to a person's ability to live independently.

Limitation: Data is specific to the civilian noninstitutionalized population. Disability distributions in some types of group quarter (GQ) populations may differ from that in the household population; therefore, the inclusion of the noninstitutionalized GQ population could have a noticeable effect in the disability distribution, particularly in areas with large noninstitutionalized GQ population.

How to interpret these data: In San Diego County, 10.7% of the civilian noninstitutionalized population reported having a disability in 2023.

Population with a Disability by Age Group*

This indicator provides number and percentage of persons with a disability (one or more) within each age group. Disability status is determined for the civilian noninstitutionalized population who responded to questions regarding six types of difficulty.

**Refers to the percent of those with a disability within the specific age group.*

Limitation: Data is specific to the civilian noninstitutionalized population. Disability distributions in some types of group quarter (GQ) populations may differ from that in the household population; therefore, the inclusion of the noninstitutionalized GQ population could have a noticeable effect in the disability distribution, particularly in areas with large noninstitutionalized GQ population.

How to interpret these data: The likelihood of having a disability increased as age increased - less than 1% of people under age 5 had a disability, compared to nearly half (46.9%) of the population 75+ that had a disability in San Diego County in 2023.

Foreign-Born in the Population

United States	46,108,901	13.9%	24,133,728	7.3%	21,975,173	6.6%

This indicator is specific to the foreign-born population. Moreover, it breaks down the foreign population into naturalized citizens or not naturalized residents.

Information presented for this indicator:
 - The estimated number and percent of foreign-born out of the population.
 - The estimated number and percent of foreign-born naturalized citizens in the population.
 - The estimated number and percent of foreign-born persons not naturalized in the entire population.
**Please note that because it is out of the entire population, the percentages of naturalized and not naturalized will not add up to 100%. Instead, they will add to the percentage of foreign-born.*

Who is considered foreign-born according the U.S. Census Bureau? The U.S. Census Bureau uses the term foreign-born to refer to anyone who is not a U.S. citizen at birth. This includes naturalized U.S. citizens, lawful permanent residents (immigrants), temporary migrants (such as foreign students), humanitarian migrants (such as refugees and asylees), and unauthorized migrants. In other words, the foreign-born population includes anyone who was not a U.S. citizen or a U.S. national at birth. This includes respondents who indicated they were a U.S. citizen by naturalization or not a U.S. citizen.

Everyone else constitutes the native-born population, composed of anyone who is a U.S. citizen at birth, including people born in the United States, in Puerto Rico, in a U.S. Island Area (American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the U.S. Virgin Islands), or abroad to a U.S. citizen parent or parents.

How to interpret these data: In 2023, an estimated 22.5% (738,271 people) of the people living in San Diego County were foreign-born. Of these, 59.4% of foreign-born were naturalized U.S. citizens. In other words, 13.4% of the San Diego County population were foreign-born naturalized U.S. citizens.

Grandparents Living with Grandchildren Under 18 Years by Responsibility for Grandchildren

Source: U.S. Census Bureau; 2019-2023 American Community Survey 5-Year Estimates, Table B10051.

Please note that there was a change in methodology to estimate the percentage of grandparents living and/or responsible for own grandchildren under 18 years. Therefore, this data cannot be compared to past years of demographic profiles. This indicator was modified from previous years to increase clarity and ease of use. If you need previous years, please contact Community Health Statistics Unit or the author directly.

Grandparent Living with a Grandchild in the Household – People 15 years and over were asked if they had "any of his/her own grandchildren under the age of 18 living in this house or apartment." Due to low numbers of persons under 30 years old living with their grandchildren, data is only for people 30 and over.
Responsibility for Basic Needs – This question determines if the grandparent is financially responsible for food, shelter, clothing, day care, etc., for any or all grandchildren living in the household. Responsibility was further classified by presence of grandchild(s) parents.

This table shows the number of grandparents 30 years or older living with own grandchildren under 18 years in households by responsibility for grandchildren with or without a parent present. Additionally, it breaks down grandparents living with and those responsible for their grandchildren without a parent present by age group.

How to interpret these data: In San Diego County in 2023, 72,837 grandparents lived with their grandchild or grandchildren under 18 years old. Of those grandparents, 22.7% were responsible for the basic needs of their grandchildren (includes those with parent of child present).

How to interpret these data: Of the 72,837 grandparents who lived with their grandchild or grandchildren under 18 years old in San Diego County in 2023, 4.8% were responsible for grandchildren without a parent present. Of these, 64.1% were grandparents 60 years and over and 35.9% were 30 to 59 years old.

Geography	Number of Grandparents Living with Grandchildren*	Grandparent Responsible for Grandchild	Percent Grandparent Responsible for Grandchild	Grandparent Responsible for Grandchild Without a Parent Present	Of Grandparents Living with Grandchildren, Percent Responsible for Grandchild Without a Parent Present	Living with Grandchild, by Age		Responsible Without Parent Present

Health Insurance Status by Municipality, 2023

Source: U.S. Census Bureau, 2019-2023 American Community Survey 5-Year Estimates, Table B27001.
 Prepared by: County of San Diego, Health and Human Services Agency, Public Health Services, Community Health Statistics Unit, 2025.

Please note that beginning in 2017, age groups changed so the 2017 and 2018 data will not be comparable to previous years.

This indicator provides the percent of the civilian noninstitutionalized population with and without health insurance. It additionally provides the percentage of civilian noninstitutionalized population with health insurance in specific age groups.

How to interpret these data: In 2023, 93.2% of the civilian noninstitutionalized population in San Diego County had health insurance coverage and 6.8% did not. The percentage of children under the age of 19 without health insurance coverage was 3.8% (96.2% did have health insurance coverage).

Income and Benefits

Source: U.S. Census Bureau; 2019-2023 American Community Survey 5-Year Estimates, Table DP03.

This purpose of this indicator is to provide information on income and benefits in households. Specifically, the percentage of households that receive earnings, social security income, supplemental security income (SSI), cash public assistance income, retirement income, and SNAP/food stamps. These income sources are not mutually exclusive; that is, some households may have received income from more than one source. The total number of households for reference.

How to interpret these data: An estimated 26.6% of households received Social Security and an estimated 23.3% of households received retirement income other than Social Security in San Diego County in 2023.

Supplemental Nutrition Assistance Program (SNAP), formerly known as the Food Stamp Program, is a federally-funded program aimed to increase the potential of a nutritious diet in low-income households.

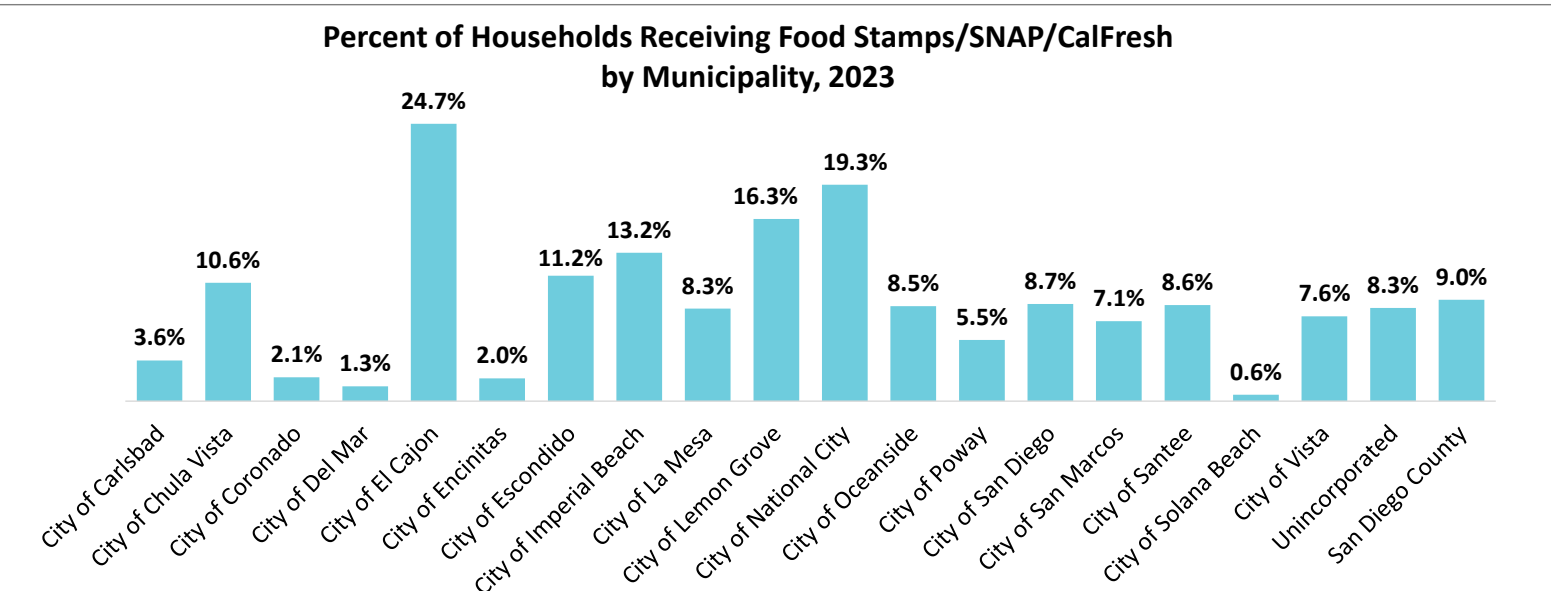

The purpose of this indicator is to provide estimates of the percent of households, households with children under 18 years of age, and of families that were receiving food stamps/SNAP/CalFresh. The number of households, households with children under 18 years of age, and of families are provided as reference.

Notes:

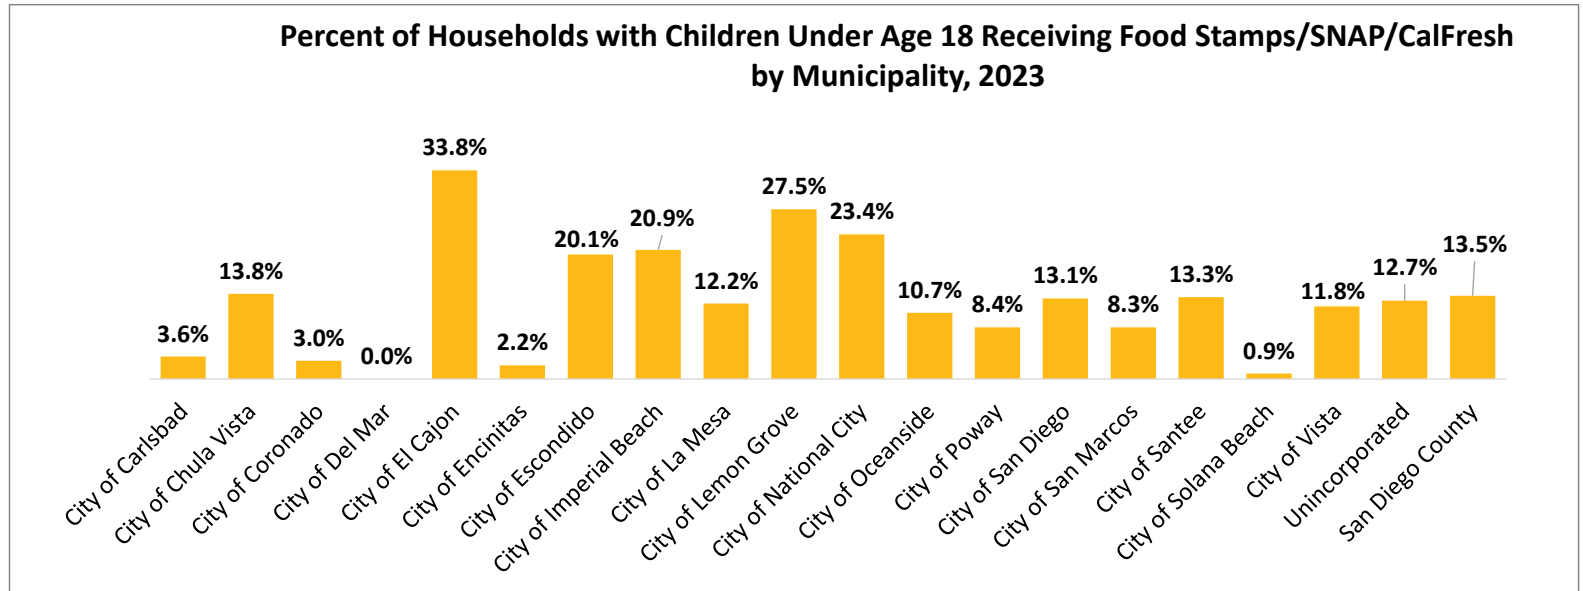

- Not all households contain families since a household may be comprised of a group of unrelated people or of one person living alone.
- Households with children under 18 refers to households with one or more children in this age group, regardless of relationship to householder.
- Families may or may not include children. A family consists of a householder and one or more other people living in the same household who are related to the householder by birth, marriage, or adoption.

Please be advised that actual eligibility requirements may be different than those presented here or may change, so it is not advised to use this for trending purposes.

How to interpret these data: In San Diego County in 2023, 9.0% of all households reported receipt of SNAP (the Supplemental Nutrition Assistance Program). Of households with children under 18 years of age living with them, 13.5% reported receipt of SNAP.

Source: U.S. Census Bureau, 2019-2023 American Community Survey 5-Year Estimates, Table B22002.
Prepared by: County of San Diego, Health and Human Services Agency, Public Health Services, Community Health Statistics Unit, 2025.

*Percentage is out of all households with children under 18, not out of all households.

United States	16,569,149	6.4%	90.0%	10.0%

This indicator provides the number and percentage of veterans in the population. The percentage of veterans by sex out of the veteran population is also shown.

Veterans are civilians who have served (even for a short time) officially or non-officially domestically or at war, but are not currently serving, on active duty in the U.S. Army, Navy, Air Force, Marine Corps, or the Coast Guard, or who served in the U.S. Merchant Marine during World War II.

People who served in the National Guard or Reserves are classified as veterans only if they were ever called or ordered to active duty, not counting the 4-6 months for initial training or yearly summer camps. All other civilians are classified as nonveterans.

How to interpret these data: In 2023, there were 189,272 veterans in San Diego County, accounting for 7.6% of the population. Of these veterans, 89.0% were male and 11.0% were female.

Veterans: Period of Service (Detailed)

Source: U.S. Census Bureau; 2019-2023 American Community Survey 5-Year Estimates, Table B21002.

People who indicate that they had ever served on active duty, were currently on active duty, were asked to indicate the period or periods in which they served. Currently, there are 9 periods of service on the ACS questionnaire. Respondents are instructed to mark a box for each period in which they served, even if just for part of the period. The periods were determined by the Department of Veterans Affairs (VA) and generally alternate between peacetime and wartime.

How to interpret these data: As of 2023, 1 in 4 veterans (25.02%) in San Diego County served during the Vietnam Era without serving in the Korean War or World War II.

Geography	Veteran Period of Service														
	Pre World War II Only	Between Korean War and WW2 Only	Between Vietnam Era and Korean War Only	Between Gulf War and Vietnam Era Only	WW2, no Korean War or Vietnam Era	Korean War and WW2, no Vietnam Era	Korean War, No Vietnam Era, no WW2	Vietnam Era, Korean War, and WW2	Vietnam Era and Korean War, no WW2	Vietnam Era, no Korean War, no WW2	Gulf War (8/1990 to 8/2001) and Vietnam Era	Gulf War (8/1990 to 8/2001), no Vietnam Era	Gulf War (9/2001 or later), and Gulf War (8/1990 to 8/2001), and Vietnam Era	Gulf War (9/2001 or later) and Gulf War (8/1990 to 8/2001), no Vietnam Era	Gulf War (9/2001 or later), no Gulf War (8/1990 to 8/2001), no Vietnam Era

LIFE EXPECTANCY IN SAN DIEGO COUNTY, 2023

Areas of Influence	Definition	Top 10 Indicators
HEALTH	Enjoying good health and expecting to live a full life	Life Expectancy Quality of Life
KNOWLEDGE	Learning throughout the lifespan	Knowledge
STANDARD OF LIVING	Having enough resources for a quality life	Unemployment Rate Income
COMMUNITY	Living in a clean and safe neighborhood	Security Physical Environment Built Environment
SOCIAL	Helping each other to live well	Vulnerable Population Community Involvement

Figure 1: Live Well San Diego Areas of Influence and Top 10 Indicators

Life expectancy is one of the Top 10 Indicators measured for the County of San Diego’s *Live Well San Diego* vision for healthier, safer, and thriving communities. Life expectancy is a widely used indicator in evaluations to measure the capability to live a long and healthy life and reflects the overall mortality of a population. Evaluations, such as Blue Zones, Healthy People 2030, and County Health Rankings all measure life expectancy as an indicator for success.

This document is meant to provide data regarding life expectancy in San Diego County. This measure is presented here as the average number of years a person born a certain year is expected to live, given the current age-specific mortality rates applied to each

age group of the current population.

Over time, the trends in life expectancy have experienced positive increases in the US and in San Diego County. In 1960, the US life expectancy at birth was 69.7 years.¹ The US life expectancy at birth has risen to 78.4 years in 2023 in part, due to improvements in public hygiene, childhood immunizations, and the increase in awareness in positive health behaviors.^{2,3} The same can be said in San Diego County. A baby born in 1990 in San Diego County was expected to live 77 years. The life expectancy has since risen to 81.0 years in 2023 in San Diego County.

While life expectancy is increasing across the board, there is variation in estimates by communities within the San Diego County region. People are less likely to live longer if they are economically disadvantaged, get little exercise and lack access to health care, but according to many studies, even accounting for these factors, geography matters.^{4,5} A baby born in San Diego County in 2023, has a life expectancy of 81.0 years, but within the county, there is currently a 8.5 year gap in life expectancy between some communities.

Although the overall U.S. average life expectancy at birth has been steadily increasing, with exception to recent years, there are differences in life expectancy between racial and ethnic groups. In addition, great variations in life expectancy exist worldwide. These variations are mostly caused by differences in public health infrastructure, distribution of wealth, medical care, and diet.⁵

The following page lists life expectancy by gender, race/ethnicity, geography, and overall for San Diego County.

Methodology

Life expectancies are constructed by taking death rates from the population in question, and calculating abridged life tables. The probability of surviving to certain ages can be calculated from the life table. Life expectancy estimates in this document may differ from state and federal life expectancy estimates. Additionally, starting in data year 2023, population estimates utilized to estimate life expectancy, changed from San Diego Association of Governments (SANDAG) to California Department of Finance and Esri population estimates. 2023 life expectancy should not be trended back to previous years.

For more detailed information on how we calculate life expectancy, please contact the Community Health Statistics Unit at www.sdhealthstatistics.com.

Leading Causes of Death^{1,2} Among San Diego County Residents by Municipal Area, 2023

RANK	All			City of Escondido		
	Underlying Cause of Death	n	%	Underlying Cause of Death	n	%
1	Malignant Neoplasms	5,098	21.8%	Diseases Of The Heart	315	20.8%
2	Diseases Of The Heart	4,785	20.4%	Malignant Neoplasms	284	18.7%

4	Cerebrovascular Diseases	1,552	6.6%	Alzheimer's Disease	102	6.7%
5	Alzheimer's Disease	1,177	5.0%	Cerebrovascular Diseases	101	6.7%
6	Chronic Lower Respiratory Diseases	923	3.9%	Chronic Lower Respiratory Diseases	60	4.0%
7	Diabetes Mellitus	911	3.9%	Diabetes Mellitus	51	3.4%
8	Essential Hypertension And Hypertensive Renal Disease	538	2.3%	Essential Hypertension And Hypertensive Renal Disease	35	2.3%
9	Chronic Liver Disease And Cirrhosis	452	1.9%	Chronic Liver Disease And Cirrhosis	31	2.0%
10	Parkinson's Disease	401	1.7%	Influenza And Pneumonia	31	2.0%
11	COVID-19	376	1.6%	COVID-19	25	1.7%
12	Intentional Self-Harm (Suicide)	363	1.6%	Pneumonitis Due To Solids And Liquids	25	1.7%
13	Pneumonitis Due To Solids And Liquids	212	0.9%	Parkinson's Disease	18	1.2%
14	Influenza And Pneumonia	212	0.9%	Intentional Self-Harm (Suicide)	18	1.2%
15	Nutritional Deficiencies	133	0.6%	Septicemia	12	0.8%
16	All other causes (not rankable)	4,520	19.3%	All other causes (not rankable)	293	19.3%
Total Deaths³		23,409	100.0%		1,515	100.0%

¹ Rank is based on total number of deaths in each of the National Center for Health Statistics (NCHS) "rankable" categories. The top 15 leading causes of death presented here are for San Diego County residents for 2023.

² Cause of death is based on the underlying cause of death reported on death certificates as classified by ICD-10 codes.

³ Deaths for specific demographics or geographic area may not equal the total deaths for San Diego County due to missing data.

⁵ Not shown for fewer than 11 deaths.

Starting in data year 2023, San Diego County resident deaths that occurred out of state are now included.

Total		86,827			3,821

¹ Hospitalization refers to discharge from a general acute care facility in San Diego County.

² Total discharges reported do not equal the total of all facility discharges. Counts do not represent individual cases; a person may be discharged multiple times or from multiple facilities.

³ Rank reflects the number of discharges for selected indicators based on ICD-10-CM coded diagnosis or external cause of morbidity.

⁴ For Alzheimer's Disease and non-Alzheimer's Dementia, ICD-10-CM coding is based on any mention of the diagnosis anywhere in the patient medical record.

2023 Community Morbidity and Mortality Profiles by Municipality

The 2023 Community Morbidity and Mortality Profiles by Municipality are available online as dynamic Tableau dashboards at the County of San Diego's Community Health Statistics Unit website – www.sdhealthstatistics.com. These dashboards help to visualize the health data by the lenses of health equity: age, sex, geography, socioeconomic status, and race/ethnicity. There are over 70 conditions with four outcomes available (death, hospitalization, emergency department discharge, and in-patient treatment discharge) for the 18 cities and the unincorporated area of San Diego County overall, as well as San Diego County overall. Selected tabs can be downloaded as images and the entire profile can be downloaded as a PDF or PowerPoint slides.
