

3-4-50: Chronic Disease Deaths in San Diego County Short Brief – South Region, 2000-2020

(Click Here for Detailed Brief)

Figure 1: 3-4-50 Death Percentages

Figure 2: 3-4-50 Death Rates

†3-4-50 deaths include stroke, coronary heart disease (CHD), diabetes, COPD, asthma, and cancer. Beginning with 2017, COPD includes chronic lower respiratory diseases (COPD/chronic lower respiratory diseases).
 *3-4-50 deaths as a percentage of all cause deaths. Rates per 100,000 population. Population estimates for 2020 were derived using the 2010 Census and data should be considered preliminary. 3-4-50 percentages for 2020 should be considered preliminary.
 **The COVID-19 pandemic was associated with increases in all-cause mortality. COVID-19 deaths have affected the patterns of mortality including those of 3-4-50 chronic diseases.

What is 3-4-50?

Three-four-fifty refers to three behaviors that contribute to four chronic diseases and result in 50% or more deaths worldwide.¹ These chronic diseases are potentially preventable through modifying diet, physical activity, and smoking behaviors. In San Diego County, 45% of all deaths are due to these four chronic diseases.
