

3-4-50: Chronic Disease Deaths in San Diego County Short Brief 2000-2023

(Click Here for Detailed Brief)

What is 3-4-50?

Three-four-fifty refers to three behaviors that contribute to four chronic diseases and result in 50% or more deaths worldwide.¹ These chronic diseases are potentially preventable through modifying diet, physical activity, and smoking behaviors. In San Diego County, 46% of all deaths are due to these four chronic diseases.

3-4-50 in San Diego County—San Diego County

- From 2022-2023, the overall percent of deaths due to 3-4-50 chronic diseases increased in all Health and Human Services Agency (HHS) regions, except Central Region (Figure 1).
- Overall, 3-4-50 chronic disease death rates have decreased in all HHS regions from 2000-2023 (Figure 2).
- Among the HHS regions, South Region had the highest percent of deaths due to 3-4-50 chronic diseases in 2023.
- Among the HHS regions, Central Region had the lowest death rates due to 3-4-50 chronic diseases every year from 2000 to 2015, with the exception of 2002, 2010, and 2014. From 2016-2023, North Central Region had the lowest death rates due to 3-4-50 chronic diseases.
- Despite a decrease, 3-4-50 chronic diseases still accounted for 46% of all deaths in San Diego County in 2023.
