Data Measures

Numbers tell you how many

Example: 25 children under age 15 in San Diego died of cancer in 2012.

Percentages tell you a proportion of the whole

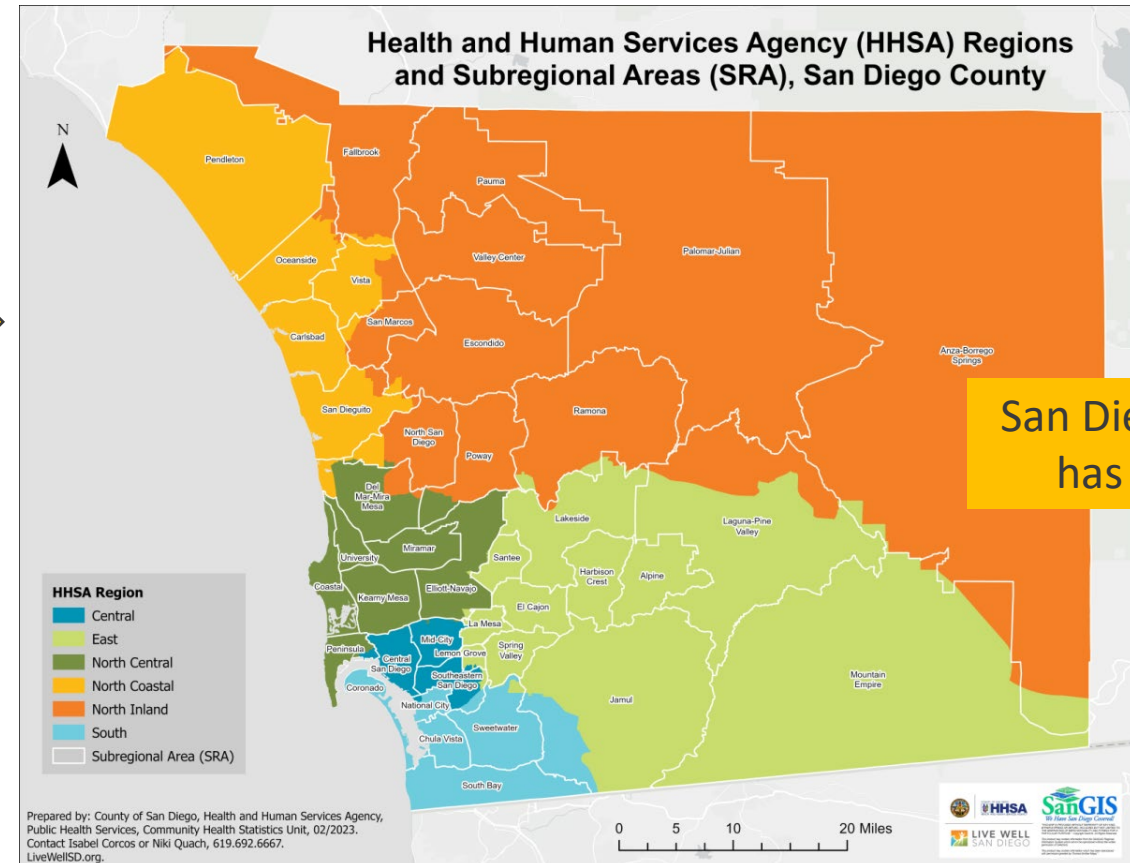

Example: 90% of attendees who ate potato salad at a picnic experienced symptoms of food poisoning.

Rates tell you how many per a given population and allow you to compare year to year or group to group.

Example: The rate of children injured due to motor vehicle crashes dropped from 321.9 per 100,000 to 295.2 per 100,000 after the implementation of the booster seat program

What are subregional areas (SRAs)?

Subregional areas, SRAs, are aggregations of census tracts defined by SANDAG.¹

San Diego County has 41 SRAs

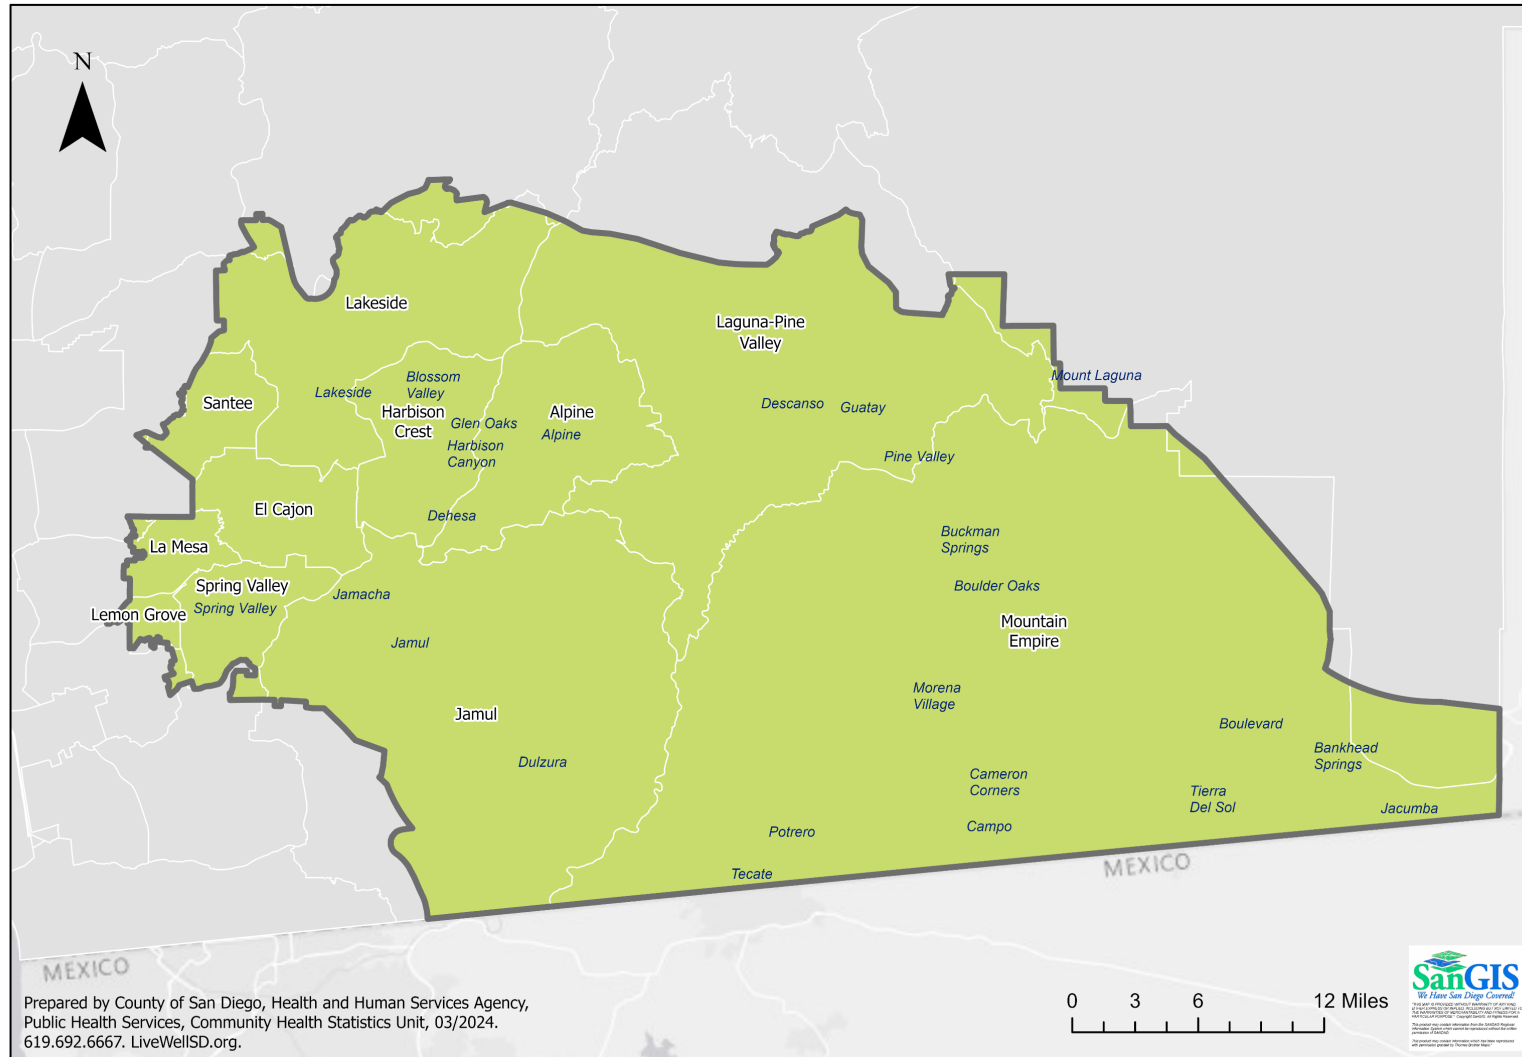

While the boundaries of many geographical areas, such as cities, change over time, SRA boundaries have remained essentially the same since their formation which allows for meaningful comparisons of time series information because identical areas are being compared.

¹ SANDAG info. Demystifying Geographies: Peeling Back the Layers. May 2014. http://www.sandag.org/uploads/publicationid/publicationid_1853_17597.pdf (Accessed November 16, 2020).

GEOGRAPHY

San Diego County Health and Human Services Agency East Region and Its Neighborhoods

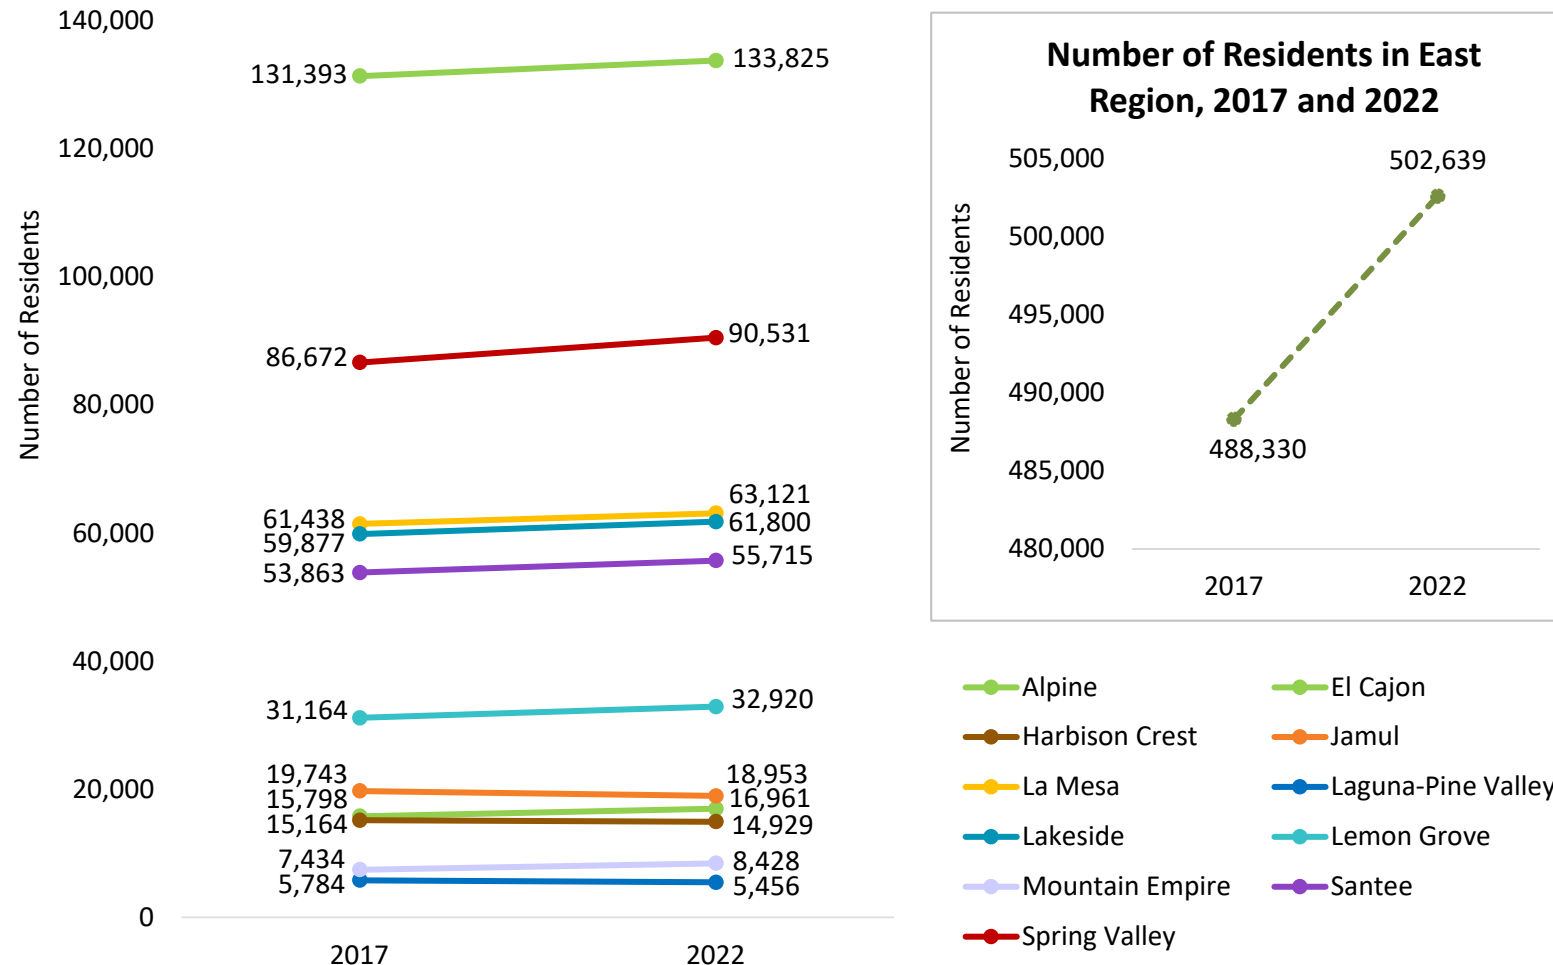

Subregional Areas (SRAs) in East Region:

- Alpine
- El Cajon
- Harbison Crest
- Jamul
- La Mesa
- Laguna-Pine Valley
- Lakeside
- Lemon Grove
- Mountain Empire
- Santee
- Spring Valley

POPULATION

**Number of Residents in East Region and its Subregional Areas (SRAs),
2017 and 2022**

In 2022, East Region was home to 502,639 residents or 15.3% of San Diego County's population.

- Overall, the number of residents in East Region increased 2.9% between 2017 and 2022.
- All SRAs in East Region, except Harbison Crest, Jamul, and Laguna-Pine Valley, experienced a population increase between 2017 and 2022, with Mountain Empire SRA experiencing the highest increase (13.4%).
- Laguna-Pine Valley SRA experienced a 5.7% population decrease between 2017 and 2022.

POPULATION BY AGE

Percent of Residents by Age Group in East Region and its Subregional Areas (SRAs), 2017 and 2022

0-4 5-14 15-24 25-44 45-64 65+

In 2022, nearly one-third (31.6%) of East Region residents were 0-24 years old.

- Between 2017 and 2022, East Region and most of its communities had increases in the number of residents aged 25-44 years and 65 years and older.
- Among East Region SRAs, Alpine had the highest increase in the percent of 25-44 year olds from 2017 to 2022.
- Laguna-Pine Valley SRA had the highest percent increase in the older adult population aged 65 years and older between 2017-2022.

Source: U.S. Census Bureau; 2013-2017 American Community Survey 5-Year Estimates, Table B01001; 2018-2022 American Community Survey 5-Year Estimates, Table B01001.

Prepared by County of San Diego, Health and Human Services Agency, Public Health Services, Community Health Statistics Unit, 2024.

POPULATION BY RACE/ETHNICITY

Percent of Residents by Race/Ethnicity in East Region and its Subregional Areas (SRAs), 2017 and 2022

In 2022, Hispanic (28.8%) and non-Hispanic White (54.9%) residents made up nearly 84% of East Region's population.

- Compared to other regions in 2022, East Region had the highest proportion of NH White residents at 54.9%.
- Between 2017 and 2022, the percentage of Hispanic, NH API and NH Other residents increased in East Region.
- NH Other residents had the greatest increase in the percent of residents in East Region between 2017 and 2022.

NH indicates non-Hispanic.

*Asian Pacific/Islander. Other includes American Indian/Alaska Native (AIAN), two or more races, and/or other races.

EDUCATIONAL ATTAINMENT

Percent of Adults 25 Years and Older by Educational Attainment in East Region and Subregional Areas (SRAs),

2017 and 2022

In 2022, compared to other regions in the county, East Region had the highest percent of adults 25 years and older who completed some college or received their AA/AS degree.

- Overall, the percent of adults 25 years and older with a bachelor's degree or higher increased in East Region and its SRAs from 2017 to 2022, except in Laguna-Pine Valley and Mountain Empire. The percentage of adults 25 years and older with a bachelor's degree or higher remained relatively the same in Jamul SRA.
- Among East Region communities, the proportion of adults 25 years and older with a bachelor's degree or higher was highest in La Mesa SRA (38.7%) in 2022.

LABOR FORCE BY OCCUPATIONS

2017						
Geography	Civilian employed population 16 years and over	Management, business, science, and arts occupations	Service occupations	Sales and office occupations	Natural resources, construction, and maintenance occupations	Production, transportation, and material moving occupations

LABOR FORCE BY INDUSTRY

Top 5 Industry Types, 2017

Rank	Industry	East Region %
1	Educational services, and health care and social assistance	21.1%
2	Retail trade	12.9%
3	Professional, scientific, and management, and administrative and waste management services	12.2%
4	Arts, entertainment, and recreation, and accommodation and food services	11.3%
5	Construction	8.0%

Top 5 Industry Types, 2022

Rank	Industry	East Region %
1	Educational services, and health care and social assistance	21.7%
2	Professional, scientific, and management, and administrative and waste management services	12.7%
3	Retail trade	11.8%
4	Arts, entertainment, and recreation, and accommodation and food services	10.3%
5	Construction	8.7%

- The percent of workers in the *retail trade* industry decreased in East Region between 2017 and 2022, from 12.9% in 2017 to 11.8% in 2022.
- The top 5 industry types in East Region did not change from 2017 to 2022.

UNEMPLOYMENT

5-Year Average Percent of Unemployment*, 2013-2017 and 2018-2022

In East Region, the 5-year average percent of unemployed residents 16 years and older decreased from 8.2% in 2017 to 7.0% in 2022.

- East Region had a higher 5-year average percent of unemployment than the county overall in 2017 and 2022.
- From 2017 to 2022, East Region and its SRAs, except Alpine, Harbison Crest, and Laguna-Pine Valley, had a decrease in the 5-year average percent of unemployment.
- Between 2017 and 2022, Mountain Empire had the highest decrease in the 5-year average percent of unemployment.

*Percent unemployed was derived from the number of unemployed persons out of the 16 year and older eligible labor force. Eligible labor force includes employed civilians, unemployed, and persons in the armed forces.

POVERTY

Percent of the Population Living Under 200% Federal Poverty Level in East Region and Subregional Areas (SRAs), 2017 and 2022

Between 2017 and 2022, the proportion of population living below 200% FPL in East Region decreased from 31.5% to 27.0%.

- The proportion of population living below 200% FPL decreased in East Region and its SRAs, except in Alpine and Lakeside.
- Compared to other SRAs in East Region, Mountain Empire and El Cajon had the highest proportion of population living below 200% FPL in 2022.
- Jamul SRA has the lowest proportion of population living below 200% FPL in 2022.

FOOD INSECURITY

Food Insecurity Among Adults with Income Less than 200% Federal Poverty Level (FPL), 2018-2022[^]

Percentage of Adults Food Insecure (Not Able to Afford Enough Food), East Region, 2018-2022[^]

Year	Percent [^]
2018	42.2%
2019	39.6%
2020	58.1%
2021	*
2022	30.7%

- Nearly 40% of adults with income less than 200% FPL reported having an inability to afford enough food in East Region between 2018-2022.
- East Region had the highest proportion of adults with income less than 200% FPL reporting food insecurity compared to all other HHSA Regions in San Diego County between 2018-2022.

* = statistically unstable

[^]Asked of adults whose income is less than 200% of the Federal Poverty Level

INCOME

**Median Household Income in East Region and Subregional Areas (SRAs),
2017 and 2022**

The median household income in East Region increased from \$71,075 in 2017 to \$92,827 in 2022.

- The median household income increased in East Region and its SRAs from 2017 to 2022.
- In 2022, Jamul SRA had the highest median household income in East Region, followed by Alpine SRA.

HOUSING OCCUPANCY

Housing Occupancy Distribution, East Region and Subregional Areas (SRAs), 2017 and 2022

From 2017 to 2022, the proportion of owner-occupied housing units increased in East Region and its SRAs, except in Alpine.

- The proportion of rent-occupied housing decreased in East Region and its SRAs, except in Alpine, Laguna-Pine Valley, and Lemon Grove, from 2017 to 2022.
- The proportion of unoccupied housing decreased in East Region and its SRAs, except in Alpine and El Cajon, from 2017 to 2022.

MEDIAN GROSS RENT & MEDIAN HOUSE VALUE

Geography	Median Gross Rent (2017)	Median Gross Rent (2022)
East Region	\$ 1,499	\$ 1,996

San Diego County	\$ 484,900	\$ 725,200

Housing Affordability

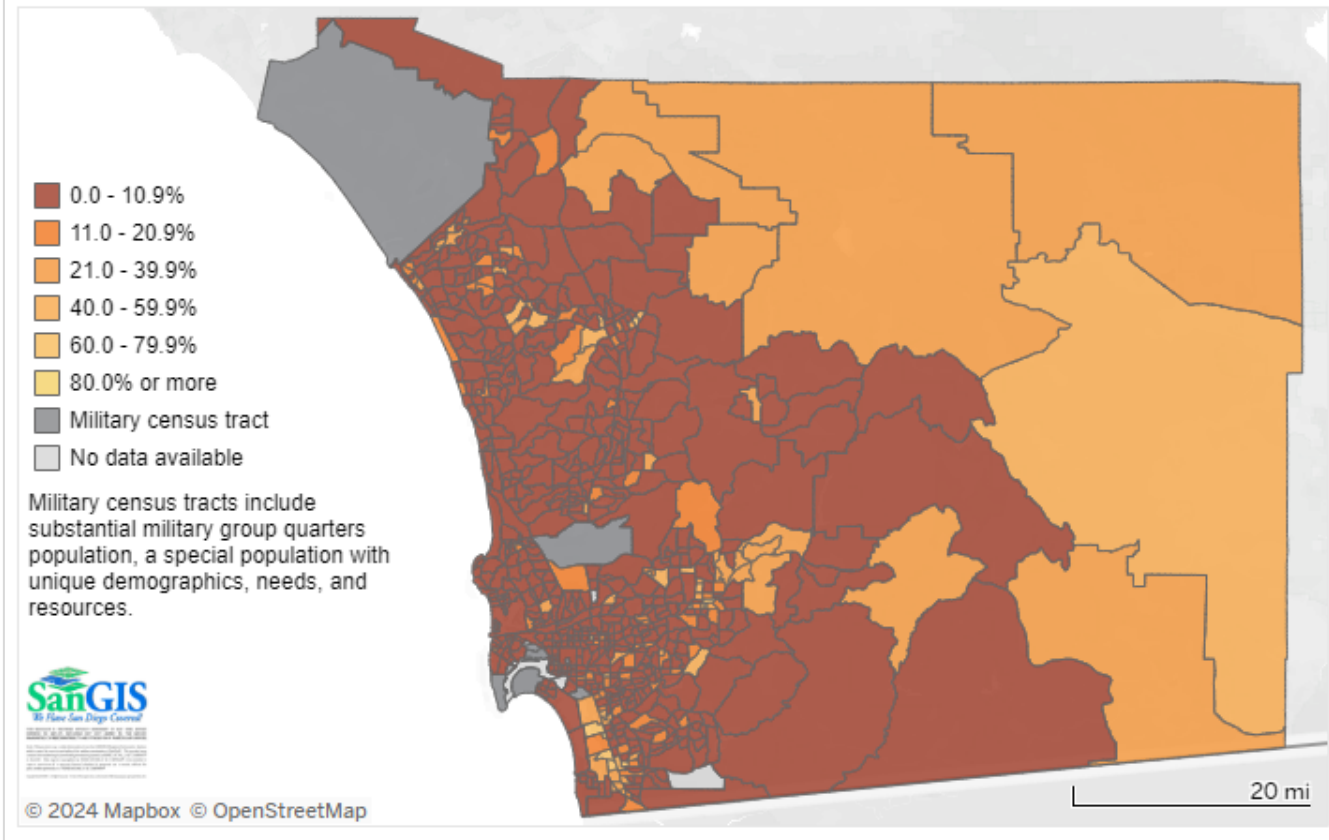

Area Median Income (AMI) is defined as the midpoint of a specific area's income distribution and is calculated on an annual basis by the Department of Housing and Urban Development (HUD).

Home Ownership Affordability estimates assume that a family can afford to purchase a home valued at three times their annual salary.

- In 2021, less than 11% of homes were affordable for families that were low income (at or below 80% of AMI) in nearly 68% of census tracts in East Region.
- Similarly, for those with very low income (at or below 50% of AMI), less than 11% of homes were affordable in 69% of census tracts in East Region.

Homeownership Affordability in East Region

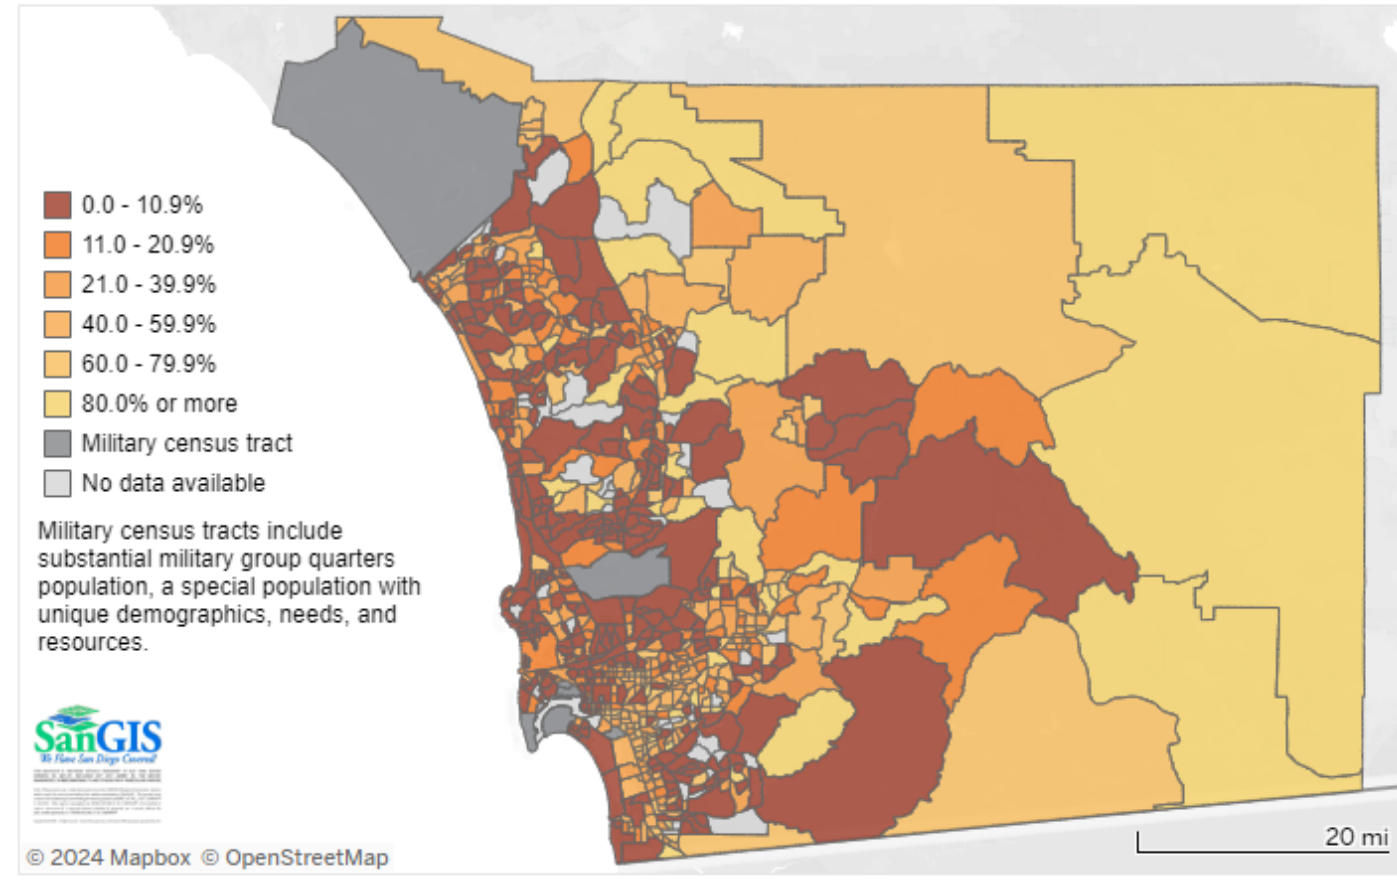

Percent of All Homes Affordable for 80% AMI Family by Census Tract,
San Diego County, 2021

Housing Affordability

Rental Unit Affordability in East Region

Percent of 2 Bedroom Rental Units Affordable for 4-Person Family 80% AMI by Census Tract, San Diego County, 2021

Rental Affordability calculations assume that a family can afford to spend 30% or less of their income on rent, which corresponds to the threshold for housing cost burden as defined by the Census Bureau.

- In 2021, less than 11% of 2-bedroom rental units were affordable for low-income 4-person families (at or below 80% of AMI) in 19% of census tracts in East Region.
- The 2-bedroom rental unit affordability was the same for both very low income (50% of AMI) families in East Region.

2022 Total Death
Count among San
Diego County
Residents: Ages 10-19

79

In 2022, the leading causes of death among residents aged 10-19 years in San Diego County were:

- Accidents/Unintentional Injury
- Assault (Homicide)
- Malignant Neoplasms (Cancer)

Rank is based on total number of deaths in each of the National Center for Health Statistics (NCHS) "rankable" categories. The top 15 leading causes of death presented here are based on the San Diego County residents for their respective years.

Cause of death is based on the underlying cause of death reported on death certificates as classified by ICD-10 codes.

Deaths for specific demographics or geographic area may not equal the total deaths for San Diego County due to missing data.

§ Not shown for fewer than 11 deaths for years 2020-2022.

The COVID-19 pandemic was associated with increases in all-cause mortality. COVID-19 deaths have affected the patterns of mortality including Leading Causes of Death.

Non-Communicable (Chronic) Diseases

Leading Causes of Death

- Overall Cancer
- Overall Heart Disease

In 2022, the age-adjusted death rate due to **overall cancer** in East Region was higher compared to the county overall.

- Among East Region SRAs, **Lemon Grove** had the highest age-adjusted death rate due to **overall cancer** in 2022.

In 2022, the age-adjusted death rate due to **overall heart disease** in East Region was higher than the county overall.

- Among East Region SRAs, **Lemon Grove** had the highest age-adjusted death rate due to **overall heart disease** in 2022.

Age-Adjusted Death Rates for Leading Non-Communicable (Chronic) Diseases in East Region and Subregional Areas (SRAs), San Diego County, 2022

*Starting with data year 2022, geographies with less than 20,000 population contain no age-adjusted rates and all rates based on events <20 are suppressed due to statistical instability.

Data Sources: California Department of Public Health, Center for Health Statistics, Office of Health Information and Research, Vital Records Business Intelligence System (VRBIS), 2022. SANDAG Population Estimates, 2022 (vintage: 11/2023). The COVID-19 pandemic was associated with increases in all-cause mortality. COVID-19 deaths have affected the patterns of mortality.

Prepared by County of San Diego, Health and Human Services Agency, Public Health Services, Community Health Statistics Unit, 2024.

Non-Communicable (Chronic) Diseases

Leading Causes of Hospitalization

- Overall Heart Disease
- Overall Hypertensive Diseases

In 2022, the age-adjusted hospitalization rate due to **overall heart disease** in East Region was higher compared to the county overall.

- Among East Region SRAs, **Lemon Grove** had the highest age-adjusted hospitalization rate due to **overall heart disease** in 2022.

In 2022, the age-adjusted hospitalization rate due to **overall hypertensive diseases** in East Region was higher than the county overall.

- Among East Region SRAs, **Lemon Grove** had the highest age-adjusted hospitalization rate due to **overall hypertensive diseases** in 2022.

Age-Adjusted Hospitalization Rates for Leading Non-Communicable (Chronic) Diseases in East Region and Subregional Areas (SRAs), San Diego County, 2022

*Starting with data year 2022, geographies with less than 20,000 population contain no age-adjusted rates and all rates based on events <20 are suppressed due to statistical instability.

Data Sources: California Department of Healthcare Access and Information (HCAI), Patient Discharge Database, 2022. SANDAG Population Estimates, 2022 (vintage: 11/2023). 2022 estimates were derived from the 2020 decennial census.

Prepared by County of San Diego, Health and Human Services Agency, Public Health Services, Community Health Statistics Unit, 2024.

Non-Communicable (Chronic) Diseases

Leading Causes of ED Discharge

- Overall Heart Disease
- Overall Hypertensive Diseases
- Asthma

In 2022, the age-adjusted ED discharge rates due to **overall heart disease, overall hypertensive diseases, and asthma** in East Region were higher compared to the county overall.

Among East Region SRAs, **Lemon Grove** had the highest age-adjusted ED discharge rates due to overall heart diseases, overall hypertensive diseases, and asthma in 2022.

Age-Adjusted Emergency Department (ED) Discharge Rates for Leading Non-Communicable (Chronic) Diseases in East Region and Subregional Areas (SRAs), San Diego County, 2022

*Starting with data year 2022, geographies with less than 20,000 population contain no age-adjusted rates and all rates based on events <20 are suppressed due to statistical instability.

Data Sources: California Department of Healthcare Access and Information (HCAI), Emergency Department Discharge Database, 2022. SANDAG Population Estimates, 2022 (vintage: 11/2023). 2022 estimates were derived from the 2020 decennial census.

Prepared by County of San Diego, Health and Human Services Agency, Public Health Services, Community Health Statistics Unit, 2024.

Non-Communicable (Chronic) Diseases

ED Discharge Rates, 2018-2022

The age-adjusted ED discharge rates due to asthma were **higher** in East Region than in the county overall every year from 2018-2022.

Overall, the age-adjusted ED discharge rates due to **asthma decreased** in **East Region and its SRAs**, except El Cajon and Lakeside, from 2018-2022.

Among East Region, **Lemon Grove SRA** had the highest ED discharge rates due to asthma every year from 2018-2022, with rates higher than East Region and the county overall.

Age-Adjusted Emergency Department (ED) Discharge Rates due to Asthma in East Region by Subregional Area (SRA), San Diego County, 2018-2022

*Rates not calculated for fewer than 11 events prior to 2022. Starting with data year 2022, geographies with less than 20,000 population contain no age-adjusted rates and all rates based on events <20 are suppressed due to statistical instability.
Data Sources: California Department of Healthcare Access and Information (HCAI), Emergency Department Discharge Database, 2018-2022. COVID-19

SAN DIEGO COUNTY CUMULATIVE COVID-19 RATE* PER 100,000 RESIDENTS BY EAST REGION SUB-REGIONAL AREAS^ (DATA THROUGH JANUARY 1, 2023 - DECEMBER 31, 2023)

COVID-19 RATE BY SEX, EAST REGION SUB-REGIONAL AREAS

SAN DIEGO COUNTY COVID-19 RATE BY EAST REGION SUB-REGIONAL AREAS (MEDIAN HOUSEHOLD INCOME IN DOLLARS)

Median household income source: ESRI Community Analyst, 2022. *A rate is the number of cases divided by the population, usually multiplied by a constant (100,000 in the following example). For example 987 cases, divided by population of 654,321, would be a rate of 150.8 per 100,000 population. This means for every 100,000 people, 150- 151 cases would be expected.

Health equity is achieved when “every person has the opportunity to ‘attain his or her full health potential’ and no one is disadvantaged from achieving this potential because of social position or other socially determined circumstances.” -Centers for Disease Control and Prevention

COVID-19 MORTALITY RATES BY EAST REGION SUB-REGIONAL AREAS

Key Takeaways

In East Region...

Higher educational attainment (bachelors degree and higher) among East Region residents ages 25+ has **increased** from 2017 to 2022.

The percent of East Region residents who were living **below 200% FPL decreased** from 31.5% in 2017 to 27.0% in 2022.

The 5-year average percent of **unemployment** in East Region **decreased** from 8.2% in 2017 to 7.0% in 2022.

In 2021, less than **11%** of **homes were affordable** for low-income families in **nearly 68% of census tracts** in East Region.

In East Region, **City of El Cajon** had the **highest** count of **unsheltered persons experiencing homelessness** in 2024 and **El Cajon SRA** had the **highest** count of **homeless students** in the 2022-2023 school year.

Key Takeaways

In East Region...

Life expectancy decreased in East Region from 2018 to 2022.

In 2022, **cancer** was the number one **leading cause of death** in East Region.

Lemon Grove SRA faced **disproportionate mortality and morbidity age-adjusted rates** of **chronic diseases** compared to other East Region SRAs from 2018 to 2022.

East Region had **higher age-adjusted hospitalization and ED discharge rates** due to **suicide attempt/ideation/intentional self-harm** than the county overall every year from 2018-2022.

El Cajon and Lemon Grove SRAs had the **highest increases** in **hospitalization and ED discharge rates** of **mental and behavioral health conditions** compared to other East Region SRAs from 2018 to 2022.

Demographic Profiles

Demographic Profiles

San Diego County: 2018-2022 Region/Subregional Area (SRA) Demographic Profiles - Navigation Page

The *Regional/Subregional Area (SRA) Demographic Profiles* are a compilation of information relating to demographic characteristics of specific populations in San Diego County. Each profile contains demographic data by HHS Region and subregional area including age, sex, race/ethnicity distributions, school enrollment, educational attainment, income, occupation, housing, and other social/economic data. Many of these factors have been implicated at the roots of health disparities.

The purpose of the *Regional/Subregional Area (SRA) Demographic Profiles* is to provide detailed information about the characteristics of the people living in San Diego County. It is designed to help HHS staff in each of the Health and Human Services Agency Regions and other local organizations, including *Live Well San Diego* recognized partners, identify and prioritize needs within their communities. These profiles are made available to the public health community and public policymakers to better understand and manage the health and well-being of the residents of our County.
