OPPORTUNITIES FOR PREVENTION

Characteristics of Residents, San Diego County, 2021
Selected Elements from Motor Vehicle Collisions Pathway^{19,20}

[^]The most up-to-date non-provisional data from TIMS is 2020. Rates were calculated using 2020 TIMS data. The data reported are for injury collisions occurring on public roads in San Diego County. Rates include anyone traveling on San Diego County roads. Rates are not calculated for fewer than 5 events. The location of collisions is based on reports filed by law enforcement report and may not contain specific geographic coordinates. Locational data may be different when data are finalized by TIMS. Rates displayed are "crude" rates not adjusted for age and calculated per 100,000 resident population.
