CENTERS FOR DISEASE CONTROL AND PREVENTION’S WINNABLE BATTLES

2010-2014 Data for San Diego County
BACKGROUND

To address the emerging public health concerns and leading causes of disability and death, the Centers for Disease Control and Prevention (CDC) has identified six areas for improving the health of the nation.

Each area is among the leading causes of illness, disability, or death and costs the U.S. hundreds of millions of dollars annually.

Source: Centers for Disease Control and Prevention, Winnable Battles, 2015.
KEY WINNABLE BATTLES IN PUBLIC HEALTH

- Healthcare-Associated Infections
- Nutrition, Physical Activity, Obesity and Food Safety
- HIV
- Teen Pregnancy
- Motor Vehicle Injuries
- Tobacco
Healthcare- Associated Infections
WINNABLE BATTLES: HEALTHCARE-ASSOCIATED INFECTIONS

More than 1 million infections occur across health care every year.

Cost an estimated $30 billion per year.

1 in 25

About 1 in 25 patients gets an infection each year while receiving medical care in U.S. hospitals.

1 in 2

CRE germs kill up to half of patients who get bloodstream infections from them.

Human Immunodeficiency Virus (HIV)
WINNABLE BATTLES: HUMAN IMMUNODEFICIENCY VIRUS (HIV)

- About 1.2 million people in the United States were living with HIV at the end of 2012
- Serious health disparities among populations and risk groups
  - 44% of all new HIV infections were among blacks, 31% were white, and 21% were Hispanic

HIV IN SAN DIEGO COUNTY

Total Number of New HIV Diagnoses in San Diego County by HHSA Region, 2009-2013

*Censored if under 20 cases.
HIV IN SAN DIEGO COUNTY

Total Rate of New HIV Diagnoses in San Diego County by Region

*Healthy People 2020 Target, New HIV infections: 3.5 per 100 persons living with HIV

* Censored if under 20 cases.

HIV IN SAN DIEGO COUNTY

HIV Care Continuum
San Diego, California and US

San Diego
San Diego Recently Diagnosed/Recently In Care
CA
US

 Persons living with diagnosed HIV\(^a\)
 Retention in care\(^b\)
 Viral suppression\(^c\)

\(^a\)San Diego: Persons living with HIV, diagnosed as a resident of San Diego or known to have moved to San Diego, diagnosed through 12/31/2013 and living through 12/31/2014, regardless of stage of disease. \(^b\)San Diego Recently Diagnosed/Recently in Care: Persons diagnosed with HIV 2009-2013 or diagnosed prior to 2009 and having at least one CD4 or viral load between 2010 and 2014, living through 12/31/2014, regardless of stage of disease. California: diagnosed and living through year-end 2013. US: cases aged >=13 diagnosed through 2011 and living through year-end 2012.

\(^c\)San Diego and San Diego Recently Diagnosed/Recently in Care: Of those diagnosed with HIV disease, persons with virologic suppression (<=200 copies/mL) at most recent test during CY 2014. California: diagnosed through 2011 and living through year-end 2012. US: cases aged >=13 diagnosed through 2011 and living through year-end 2012 (NHSS data).
HIV IN SAN DIEGO COUNTY

Linkage to Care
San Diego County, California and US

Diagnoses of HIV infection\textsuperscript{a}

- San Diego: 100%
- CA: 100%
- US: 100%

Linked to care\textsuperscript{b}

- San Diego: 85%
- CA: 79%
- US: 82%

\textsuperscript{a}San Diego data source: All residents with an HIV diagnosis between January 1, 2014 and December 31, 2014, reported through September 30, 2015. CA data: HIV diagnosis between January 1, 2013 and December 31, 2013. US data: diagnosed between January 1, 2013 and December 31, 2013 for all cases \textgeq 13 years of age.

\textsuperscript{b}Data source: Of those diagnosed with HIV disease in the year of interest, persons linked to care (having \textgeq 1 CD4 or viral load test) within 3 months of the HIV diagnosis for San Diego, California and US.
SAN DIEGO COUNTY CAN WIN THIS BATTLE BY:

- Increasing HIV testing to reach all residents
- Advocating for comprehensive sex education
- Improving linkage to care
- Early detection and treatment of STD’s
- Advocating for drug abuse treatment to stop needle sharing and risky sexual behaviors
Nutrition, Physical Activity, Obesity and Food Safety
From 1980-2000, the obesity rates among adults doubled and tripled among children in the U.S.

Nationally, 1 out of 3 adults and just over 1 out of 6 children and teens are obese.

Being physically active can reduce the risk of several chronic diseases; including diabetes, stroke, and certain types of cancer.

Each year 1 out of 6 Americans get sick from foodborne diseases by consuming contaminated foods or beverages.

Source: Centers for Disease Control and Prevention, *Overweight and Obesity; Foodborne Germs and Illnesses*, 2015.

SAN DIEGO COUNTY CAN WIN THIS BATTLE BY:

- Encouraging healthy eating and physical activity
- Creating environments that promote physical activity
- Educating residents on food safety measures
- Supporting the growth and consumption of local agriculture
Motor Vehicle Injuries
Injuries due to motor vehicle crashes cause over 32,000 deaths and 2.3 million emergency department visits each year in the U.S.\(^1\)

Nationally, motor vehicle crashes are the leading cause of death among 5-24 year olds.\(^1\)

In 2010, the cost of medical care and productivity losses associated with injuries from motor vehicle crashes exceeded $80 billion in the U.S.\(^2\)

WINNABLE BATTLES: MOTOR VEHICLE INJURIES

SAN DIEGO COUNTY CAN WIN THIS BATTLE BY:

- Using seat belts and enforcing seat belt laws
- Avoiding drinking and driving and enforcing current laws
- Encouraging distraction free driving – no talking or texting on cell phones, eating, or playing with the radio
- Supporting and enforcing Graduated Drivers License laws
CDC WINNABLE BATTLES

Teen Pregnancy
WINNABLE BATTLES: TEEN PREGNANCY

- Nationally, over 360,000 births were to mothers ages 15-19 years in 2010.
- Every two out of three pregnancies to girls under age 18 are unintended.
- Teen pregnancy costs the U.S. nearly $11 billion per year direct medical costs and indirect societal costs.
- Teen pregnancy increases the risk of infant mortality, low birth weight, and preterm births.

TEEN PREGNANCY IN SAN DIEGO COUNTY

*HP2020 Target, Pregnancy Rate (15-17 years): 36.2 pregnancies per 1,000

WINNABLE BATTLE: TEEN PREGNANCY

SAN DIEGO COUNTY CAN WIN THIS BATTLE BY:

- Working to change health professional and community norms
- Reducing cost barriers to family planning services and contraceptives
- Increase access to reproductive health services, especially long-acting reversible contraceptives
Tobacco
Nationally, tobacco use is the leading cause of preventable death and has a major public health impact

- Each year, 443,000 die from tobacco-related illness in the U.S.
- Two out of every five adults and more than half of children (ages 3-11 years) are exposed to secondhand smoke in the U.S.
- Direct medical expense and lost productivity due to tobacco-related illnesses cost the nation $193 billion annually
