*Asian/Pacific Islander population estimates includes those having origins of the Far East, Southeast Asia, the Indian subcontinent, or Pacific Islands. This table is provided to give more detail on these estimates by origin. Estimated number based off 2013 ACS percentages and 2013 SANDAG Population Estimates.

Health Disparities and Inequities in San Diego County

Health equity is a key component of the *Live Well San Diego* vision in San Diego County. Health disparities are important indicators of community health. Addressing health disparities is essential in increasing and ultimately achieving health equity. Locally, health disparities exist among San Diego County residents. This summary aims to identify the key health disparities and inequities that exist in San Diego County through the lenses of age, gender, geography, race/ethnicity, and socioeconomic status.

In 2011, for San Diego County:

- Non-communicable (chronic) disease was higher among black and white residents, those aged 65 years and older, residents in very urban and rural communities of the county, and slightly higher among females.¹
- Communicable disease was higher among females, black residents, those aged 15-24 years, and residents in very urban communities of the county.¹
- Poor maternal and child health outcomes were higher among black and Hispanic residents, and residents in rural and very urban communities of the county.¹
- Injury, overall, was higher among males, white and black residents, those aged 0-14 and 65 years and older, as well as residents in rural and very urban communities of the county.¹
- Poor behavioral health outcomes were higher among black and white residents, those aged 45-64 years, and residents living in very urban communities of the county.¹

Risk of Health Outcomes Compared to San Diego County by Age, 2011

Health Disparities Among San Diego County Residents by Age

- Poor maternal and child-related outcomes were significantly higher among 0-14 year olds perhaps due to the low percentage of mothers receiving early prenatal care among this age group.
- 15-24 year olds had higher rates of communicable diseases; particularly chlamydia and gonorrhea.
- Those over 65 years of age had higher rates of chronic diseases such as coronary heart disease (CHD), stroke, diabetes, chronic obstructive pulmonary disease (COPD), and cancer.

Gender Health Disparities Among San Diego County Residents:

- Non-communicable (chronic) disease rates were 9% higher among females compared to males.
- Communicable disease rates were 19% higher among females compared to males.
- Poor behavioral health outcomes rates were 4% higher among males compared to females.
- Injury rates were 12% higher among males compared to females.

Risk of Health Outcomes Compared to San Diego County by Gender, 2011

Risk of Health Outcomes Compared to San Diego County by Geography, 2011

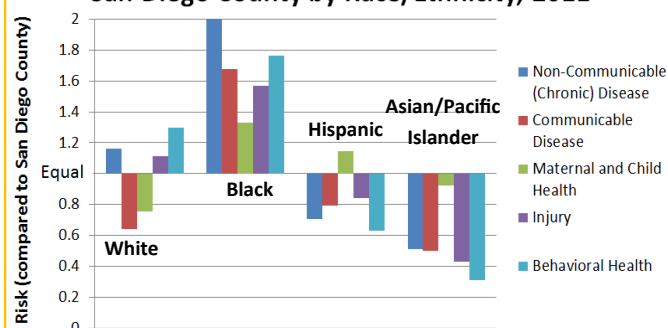

Geographic Health Disparities Among San Diego County Residents:

- Poor maternal and child health outcomes were 11% and 23% higher among very urban and rural community residents, respectively, compared to the county overall.
- Compared to the county overall, residents of very urban communities had 35% higher rates of non-communicable (chronic) disease, 36% higher rates of communicable disease, 11% higher poor maternal and child health outcomes, 25% higher injury rates, and 37% poor behavioral health outcomes rates.
- Injury rates were 10% higher among rural community residents, respectively, compared to the county overall.

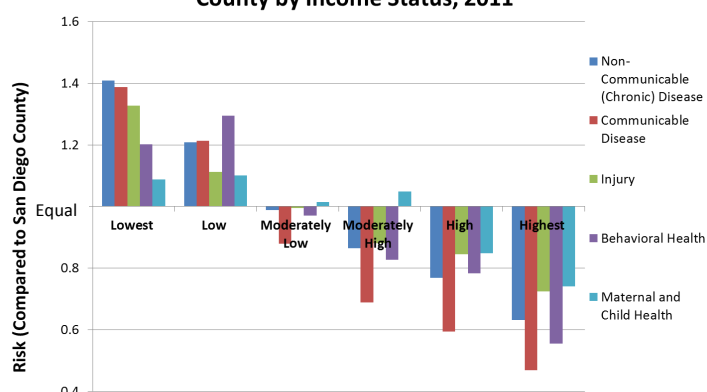

Race/Ethnicity Health Disparities Among San Diego County Residents:

- In 2011, blacks had the highest rates of poor health outcomes compared to any other race/ethnicity in San Diego County, whereas Asian/Pacific Islanders had the lowest.
- Poor behavioral health rates were 76% and 30% higher among black and white residents, respectively, compared to the county overall.
- Non-communicable (chronic) disease rates were 109% and 16% higher among blacks and whites, respectively, compared to overall.
- Poor maternal and child health outcomes were 33% and 15% higher among black and Hispanic residents, respectively, compared to the county overall.

Risk of Health Outcomes Compared to San Diego County by Race/Ethnicity, 2011

Risk of Health Outcomes Compared to San Diego County by Income Status, 2011

Socioeconomic Status Health Disparities Among San Diego County Residents:

- Non-communicable (chronic) disease rates were 41% and 20% higher among residents in lowest and low income groups, respectively, compared to the county overall.
- Communicable disease rates were 39% and 21% higher among residents in lowest and low income groups, respectively, compared overall.
- Poor maternal and child health outcomes were 8% and 10% higher among the lowest and low income residents, respectively, compared to the county overall.
- Injury rates were 32% and 11% higher among lowest and low income group residents respectively, compared to overall.
- Poor behavioral health rates were 20% and 29% higher among lowest and low income group residents, respectively, compared to overall.

3-4-50: Chronic Disease Deaths in San Diego County—South Region, 2000-2013

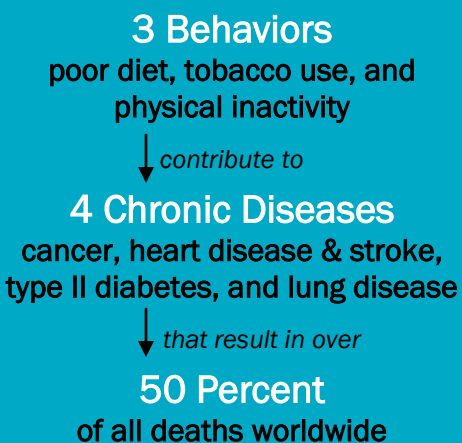

Figure 1: 3-4-50 Death Percentages

What is 3-4-50?

Chronic diseases are among the leading causes of death and disability worldwide. This reflects an improvement in the prevention and treatment of infectious diseases and significant changes in dietary habits, physical activity levels, and tobacco use in the population. The influence of these three behaviors may be seen in San Diego County as these four chronic diseases are the most common causes of death and disability in our region.

3-4-50 in San Diego County—South Region

- From 2000 to 2013, the overall percent of all deaths due to chronic disease has decreased in the South Region and its Subregional Areas (SRAs), while the number of deaths have remained relatively stable.
- Overall, chronic disease death rates have decreased in the South Region and its SRAs from 2000 to 2013.
- Among the South Region SRAs, South Bay had the highest percentage of deaths due to chronic disease in 2013.
- Among the South Region SRAs, Chula Vista had the highest chronic disease death rate in 2013.
- Despite a decrease, chronic diseases still account for more than 50% of all deaths in the South Region.

Figure 2: 3-4-50 Death Rates

†3-4-50 deaths include stroke, coronary heart disease (CHD), diabetes, COPD, asthma, and cancer.
*3-4-50 deaths as a percentage of all cause deaths. Rates per 100,000 population.

What does 3-4-50 look like in South Region?

**In South Region,
3-4-50 is actually 3-4-59**

**In San Diego County,
3-4-50 is actually 3-4-55**

3 BEHAVIORS

TOBACCO USE*

- In 2013, 1 out of every 9 South Region teens and adults were current smokers.

LACK OF PHYSICAL ACTIVITY*

- In 2013, 40.3% of South Region children engaged in physical activity for at least 1 hour daily.

POOR NUTRITION

- In 2013, over 1 out of 5 South Region residents ate fast food three or more times in the past week.

TOBACCO USE

- In 2013, 1 out of every 8 San Diego County teens and adults were current smokers.

LACK OF PHYSICAL ACTIVITY

- In 2013, 28.2% of San Diego County children engaged in physical activity for at least 1 hour daily.

POOR NUTRITION

- In 2013, over 1 out of 5 San Diego County residents ate fast food three or more times in the past week.

4 CHRONIC DISEASES

CANCER

- In 2013, cancer was the leading cause of death in South Region.

HEART DISEASE & STROKE*

- In 2013, 11.3% of South Region adults had ever been diagnosed with heart disease.

DIABETES

- In 2013, 1 out of 7 South Region adults had ever been diagnosed with diabetes.

LUNG DISEASE

- In 2013, nearly 1 out of 5 South Region residents had ever been diagnosed with asthma.

CANCER

- In 2013, cancer was the leading cause of death in San Diego County.

HEART DISEASE & STROKE

- In 2013, 6.0% of San Diego County adults had ever been diagnosed with heart disease.

DIABETES

- In 2013, 1 out of 12 San Diego County adults had ever been diagnosed with diabetes.

LUNG DISEASE

- In 2013, 1 out of every 8 San Diego County residents had ever been diagnosed with asthma.

CAUSE OVER 50% OF DEATHS

In 2013, cancer, heart disease and stroke, diabetes, and lung disease caused 59% of all deaths in the South Region.

In 2013, cancer, heart disease and stroke, diabetes, and lung disease caused 55% of all deaths in San Diego County.

Alzheimer's Disease and Other Dementias in South Region

- In 2013, 62,000 San Diegans age 55 years and older were living with ADOD.
- Compared to all other subregional areas of San Diego County in 2013, Chula Vista had the second largest number of residents age 55 years and older discharged from the ED or hospital with any mention of ADOD.
- Approximately 16% of the county's age 55 years and older who were discharged from the ED or hospital with any mention of ADOD in 2013 were South Region residents.
- Compared to the county, four of the five South Region communities had higher rates of discharges with any mention of ADOD among its 55 years and older residents.

San Diego County Health Briefs South Region, 2013

- By 2030, there will be nearly 14,000 South Region residents 55 and older, living with ADOD, a 58.5% increase from 2013 to 2030.
- Chula Vista and South Bay are expected to account for 60% of the number of 55 years and older residents living with ADOD in South Region by 2030.
- In 2013, Sweetwater had the second lowest proportion of residents 55 years and older living with ADOD. However, it is expected to increase by 107.2% by 2030, which is the greatest percentage increase among all South Region communities.

SOUTH REGION

COMMUNITY HEALTH IMPROVEMENT PLAN

Priority Area 1: Physical Activity and Healthy Eating
Goal 1: Increase physical activity for South Region residents.
Goal 2: Increase healthy eating for South Region residents.
Live Well San Diego Strategy: Supporting Positive Choices

Strategies

1.1 Partner with schools to implement policies and procedures to encourage physical activity and healthy eating.

Objective(s)	Performance Measures	Source	Baseline 2011-2012	2013	2014
1.1.1 Increase the number of schools that take BMI measurements by 10% (from 45 to 50), by December 2018.	Number of schools using BMI tool kit	South Region	45	-	-
1.1.2 Increase the proportion of schools that adopt the 5-2-1-0 Campaign by 40, by December 2018.	Number of schools that are using 5-2-1-0	South Region	1	-	-
1.1.3 Increase the percent of children who are engaged in physical activity for at least one hour daily from 19.3% by 5% for children aged 5-11 and from 19.2%* by 5% for teens aged 12-17, by December 2018.	Percentage of children aged 5-11 who engaged in physical activity for at least one hour daily	California Health Interview Survey	19.3%	40.3%* *statistically unstable	18.7%* *statistically unstable
	Percentage of teens aged 12-17 who engaged in physical activity for at least one hour daily	California Health Interview Survey	19.2%* *statistically unstable	40.7%* *statistically unstable	22.4%* *statistically unstable

Objective(s)	Performance Measures	Source	Baseline 2011-2012	2013	2014
1.1.4 Increase the percent of children and teens who are eating healthy from 49.5% by 5%, by December 2018.	Percent of children aged 5-11 eating 5 or more fruits and veggies per day	California Health Interview Survey	49.5%	N/A	N/A
	<i>Percent of children aged 5-11 eating 2 or more fruits per day</i>	California Health Interview Survey	65.8%	63.8%* *statistically unstable	54.8%* *statistically unstable
	<i>Percent of children aged 5-11 eating 2 or more veggies yesterday</i>	California Health Interview Survey	N/A	39.5%	43.3%
	Percent of teens aged 12-17 eating 5 or more fruits and veggies per day	California Health Interview Survey	32.8%	N/A	N/A
	<i>Percent of teens aged 12-17 eating 2 or more fruits yesterday</i>	California Health Interview Survey	51.0%	25.4%* *statistically unstable	44.3%
	<i>Percent of teens aged 12-17 eating 2 or more veggies yesterday</i>	California Health Interview Survey	N/A	35.0%	42.0%
	Percent of children and teens who drink two or more glasses or cans of soda or other sweetened beverages	California Health Interview Survey	14.9%* *statistically unstable	N/A	N/A

Linkage to Live Well San Diego Indicators

Life Expectancy (South Region) – increased from 81.4 years to 82.1

Quality of Life (County) - increased from 94.62% to 95%

Since schools are a place that kids spend a large part of their time, implementing changes in schools will go a long way towards encouraging healthy behaviors in children. Healthy behaviors mean improved **quality of life and life expectancy**.

Priority Area 2: Safety

Goal: Improve security and decrease violence.

Live Well San Diego Strategy: Pursuing Policy and Environmental Changes

Strategies

2.1 Increase safety in the community by securing partners and identifying possible funding to fix Otay Mesa Road, between CA-905 and Beyer Boulevard, by adding sidewalks.

2.2 Implement responsible property management practices in targeted apartment communities.

2.3 Partner with residents to advocate for policies around responsible consumption of alcohol.

Objective(s)	Performance Measures	Source	Baseline 2011-2012	2013	2014
2.1.1 Increase walkability in South Region for a minimum of two schools ,by December 31, 2018.	Number of people using the sidewalk	Conduct a survey at the schools	*Data collected from a survey taken at the high school	-	-
	Percentage of adults who walked as a means of transportation to work	American Community Survey	2.65%	2.11%	Not available
2.2.1 Increase the number of crime free multi-unit housing by 10, by December 31, 2018.	Percentage of crime free multi-unit housing	IPS	TBA	-	-
	Number of calls for service to multi-housing units	FBI Crime Statistics	*Need new measure as FBI does not collect at this level and ARJIS uses other boundaries	-	-
2.3.1 Reduce teen access to alcohol by 5%, by 2018.	Percentage of teens who have ever tried alcohol	California Health Interview Survey	27.8%	44.2%* *statistically unstable	4.0%* *statistically unstable

Linkage to Live Well San Diego Indicators

Overall Crime Rate: increased from 2,430.3 crimes (all crimes, including violent and property) per 100,000 people to 2,540.5 per 100,000 population in San Diego County.

Life Expectancy (South Region) – increased from 81.4 years to 82.1

Increasing the safety and walkability of a road will encourage people to walk more. This will lead to increased **quality of life** and **life expectancy**. By improving the safety of multi-housing units, this will improve the **security** of people. Lastly, implementing policies to try to reduce teenage access to alcohol will also help people live well and increase their **quality of life** and the safety of the community.

Priority Area 3: Health Care Access

Goal: Improve access to medical health home for vulnerable populations.

Live Well San Diego Strategy: Building a Better System

Strategies

3.1 Link vulnerable populations to needed resources, including mental health and health care services.

Objective(s)	Performance Measures	Source	Baseline 2011- 2012	2013	2014
3.1.1 Increase access to resources for Grandparents Raising Grandchildren/Relative Caregivers, by December 2018.	Of those who needed resources, how many accessed services.	GRG 2012 event evaluations	TBA	-	-
3.1.2 Increase the percentage of residents who needed a mental health service who sought out a service to 75%, by December 2018.	Of those who needed a mental health service, how many sought and received care	California Health Interview Survey	54.4%	78.6%* *statistically unstable	40.6%* *statistically unstable
3.1.3 Increase referrals to services for pregnant women and young children, by December 2018.	Of those who needed resources, how many accessed services.	Number of calls for services (MCFHS)	TBA	-	-

Linkage to *Live Well San Diego* Indicators

Lack of Health Insurance (South Region) – increased from 25% to 29.2%

By linking **vulnerable populations** (such as grandparent caregivers and pregnant women and young children) to resources they may not have known otherwise, this encourages people to get care when they need it. Receiving care early will help prevent many health issues, which will improve the quality of life for the populations involved. Also, since mental health is linked to physical health, improved care for mental health will lead to better quality of life for many people.
