Some San Diego County cases have been travel-related and did not contract COVID-19 in the County. Some addresses with a postal address indicating a city may be reallocated to the unincorporated area based on their physical location of the address. COVID-19 now has reached community transmission status, which means people may have contracted the illness elsewhere in the County. This may not necessarily be in the city where they live. These data should not be interpreted as an indication of activity in any specific location. Under a community transmission status, the true prevalence of this disease may not be known as most cases are likely not diagnosed or reported.
