Total San Diego County Residents 742,724 100.0% 22,159.1

1Percentages may add up to greater than 100% due to rounding. Cases with unknown city of residence are excluded from percentage calculations.
2Overall total rates and incorporated city rates are calculated using 2019 population estimates from the San Diego Association of Governments. Unincorporated community rates are calculated using 2019 ACS 5-year estimates. Rates based on small case counts may vary considerably and should be interpreted with caution.
3United States Census Designated Places are used to define unincorporated communities. These are the statistical counterparts of incorporated cities.
4Ten or less cases.

COVID-19 is widespread in the community. People may have contracted the illness anywhere in the county, not necessarily in their city of residence. These data should not be interpreted as an indication of activity in any specific location. Under a community transmission status, the true prevalence of this disease may not be known as most cases are likely not diagnosed or reported.

Some addresses with a postal address indicating a city may be reallocated to the unincorporated area based on the physical location of the address.

Data are preliminary and subject to change.
