Percent of Eligible Population Vaccinated by Age Group

Data source: California Immunization Registry (CAIR2), SANDAG 2019 Population Estimates (Prepared June 2020).

Individuals vaccinated by Veterans Affairs or Department of Defense are not included. COVID-19 Vaccine is not approved for individuals under the age of 6 months old at this time. Data are preliminary and subject to change.

A drop in the count of vaccinated residents was identified in several age ranges and is currently being investigated. Preliminary research has found that many of these are due to Quality Assurance (QA) processes and patient record merges in the CAIR2 system.

[†]The total estimated eligible Population in San Diego County is 3,351,784 individuals, which is the total estimated San Diego County population as estimates are calculated by years

*Primary vaccine series completion is defined as receipt of 2 vaccine doses for persons over the age of 5 who received Pfizer-BioNTech, Moderna, NovaVax, Astrazeneca, or receipt of 2 doses for persons who received unspecified U.S.-authorized or approved COVID-19 vaccine, or receipt of 1 dose for persons who received Janssen. For those 6 months to 4 years of age, primary vaccine series completion is defined as receipt of 3 vaccine doses for persons who received Pfizer-BioNTech, or those who received a bivalent Pfizer-BioNTech for their third dose in the 3 vaccine dose Pfizer-BioNTech series, or receipt of 2 doses for persons who received Moderna. Immunocompromised status cannot be determined, therefore, the recommended primary vaccine series schedule is not listed for immunocompromised individuals aged 6 months to 4 years.

**Booster eligibility is updated each week as the number of San Diego County residents who have completed their primary vaccine series are eligible to receive a booster dose. Individuals are eligible for a monovalent booster dose if 1) they are 5 years of age and older AND 2) the appropriate time period has passed since completing their primary vaccine series. Additionally, residents may receive a bivalent booster dose if 1) they are 6 months of age and older for a Moderna bivalent booster, 2) they are 5 years of age and older for a Pfizer-BioNTech bivalent booster, AND 3) at least 2 months have passed after completing their primary vaccine series. There may be instances where the booster eligible population exceeds the 2019 population estimates provided by SANDAG.

*** Bivalent booster eligibility is updated each week as the number of San Diego County residents are eligible to receive a bivalent booster dose. Individuals are eligible for a bivalent booster dose if 1) they are 6 months of age and older for a Moderna bivalent booster, 2) they are 5 years of age and older for a Pfizer-BioNTech bivalent booster, AND 3) at least 2 months have passed after completing their primary vaccine series or at least 2 months have passed after their most recent monovalent booster dose. There may be instances where the bivalent booster eligible population exceeds the 2019 population estimates provided by SANDAG.

[^]The percentage and rate of the vaccinated population may approach, or exceed, 99% or 999 per 1,000 for San Diego residents in a particular zip code. The most recent population estimates are 2019 estimates, which may under
