*Includes all individuals with a reported address within San Diego County. Individuals vaccinated by Veterans Affairs or Department of Defense are not included.

**Persons of Hispanic/Latino ethnicity may belong to any race group. All categories except Hispanic/Latino include persons for whom race is known but ethnicity is non-Hispanic or unknown.

^The percentage of the population vaccinated with at least one dose of COVID-19 vaccine may approach, or exceed, 99%. The most recent age, gender, region, and race/ethnicity population are 2019 estimates, which may underestimate the current population. When these demographics are analyzed, the population estimates may not reflect social and environmental changes of a community, possibly leading to an under- or overestimate of a population. For example, household dynamics may have changed as a result of COVID-19, where family members previously living apart may now be living together, therefore shifting the population of an area or demographic which may not be reflected in the 2019 population estimates.
