Data are preliminary and subject to change.
 COVID-19 vaccines are not approved for those under age 6 months at this time.
 Zip code is zip code of residence, which may not be location of vaccination. Most individuals vaccinated by Veterans Affairs or Department of Defense are not included (some may be based on dose transcription and/or bulk loads to the CDC Immunization (IZ) Gateway).
 *Primary vaccine series completion is defined as receipt of 2 vaccine doses for persons over the age of 5 who received Pfizer-BioNTech, Moderna, NovaVax, Astrazeneca, or receipt of 2 doses for persons who received unspecified U.S.-authorized or approved COVID-19 vaccine, or receipt of 1 dose for persons who received Janssen. For those 6 months to 4 years of age, primary vaccine series completion is defined as receipt of 3 vaccine doses for persons who received Pfizer-BioNTech, or receipt of 2 doses for persons who received Moderna. Immunocompromised status cannot be determined, therefore, the recommended primary vaccine series schedule is not listed for immunocompromised individuals ages 6 months to 4 years.
 **Booster eligibility is updated each week as the number of San Diego County residents who have completed their primary vaccine series are eligible to receive a booster dose. Individuals are eligible for a monovalent booster dose if 1) they are 5 years of age and older AND 2) the appropriate time period has passed since completing their primary vaccine series. Additionally, residents may receive a bivalent booster dose if 1) they are 5 years of age and older AND 2) at least 2 months have passed after completing their primary vaccine series.
 ***Rates are calculated using 2019 population estimates from the San Diego Association of Governments.
 ****Booster rates are calculated based on the booster eligible population, which is updated weekly based on most recent data available.
 ^The percentage and rate of the vaccinated population may approach, or exceed, 99% or 999 per 1,000 for San Diego residents in a particular zip code. The most recent population estimates are 2019 estimates, which may under estimate the current population. The population estimates may not reflect social and environmental changes of a community, possibly leading to an under- or overestimate of a population.
 ^^Rates are not calculated for zip codes or booster eligible populations with a population estimate under 1,000.
 Rates based on small vaccination counts may vary considerably and should be interpreted with caution.
 Data source: California Immunization Registry (CAIR2), SANDAG 2019 Population Estimates (Prepared June 2020). Total population estimate = 3,351,784.
 Prepared by the County of San Diego, Health and Human Services Agency, Public Health Services, Epidemiology and Immunization Services Branch.
