Figure 1. COVID-19 Confirmed and Probable Cases and 7-Day Rolling Average Case Rate by Episode Date*, San Diego County Residents, N=375,786

Since December 12, 2021:
Confirmed N=348,467
Probable N=27,319

*Episode date is the earliest of the following available dates: symptom onset date, specimen collection date, date of death, date reported.
**Probable cases are antigen positive tests received since August 1, 2020.

Data for this period may be incomplete.
Case rate for not fully vaccinated residents is **2 times higher** than those fully vaccinated + booster.

Starting 3/2/2022, Figure 2 uses data from persons 12 years of age and older instead of all ages.

* Not fully vaccinated includes individuals with one dose of the two-dose series, no doses, or unknown vaccination status. Individuals who are not yet eligible for the vaccine are also included.

† Cases who first tested positive (based on specimen collection date) greater than or equal to 14 days after receiving the final dose of COVID-19 vaccine.

‡ Cases who first tested positive (based on specimen collection date) greater than or equal to 14 days after receiving a booster dose of COVID-19 vaccine at least 2 months after a J&J vaccine or 5 months after a Pfizer or Moderna vaccine series.

§ Episode date is the earliest of the following available dates: symptom onset date, specimen collection date, date of death, date reported.

¶ Percentages are among total cases, hospitalizations, and deaths for the time period. Cases with recent infection or onset dates may not yet be reported and vaccination data for recently reported cases may be incomplete. Hospitalizations and deaths from the last 14 days may not yet be reported. To account for this, data for the most recent two weeks are not included.

San Diego County Population from SANDAG 2019 Population Estimates (Prepared June 2020) = 3,351,784. The fully vaccinated population and the boosted population for each day is the cumulative number of county residents documented to have received the final or booster dose of COVID-19 vaccine at least 14 days prior to that day. The not fully vaccinated population is the estimated total county population minus the fully vaccinated and boosted populations.

</table>

Dates: 2/6/2022-2/19/2022

Not Fully Vaccinated* includes individuals with one dose of the two-dose series, no doses, or unknown vaccination status. Individuals who are not yet eligible for the vaccine are also included.

†Cases who first tested positive (based on specimen collection date) greater than or equal to 14 days after receiving the final dose of COVID-19 vaccine.

‡Cases who first tested positive (based on specimen collection date) greater than or equal to 14 days after receiving a booster dose of COVID-19 vaccine at least 2 months after a J&J vaccine or 5 months after a Pfizer or Moderna vaccine series.

Figure 4. 14-Day Rolling Average COVID-19 Death Rate by Vaccination Status in San Diego County Residents Age 12 Years and Older in the Previous Three Months

Starting 3/2/2022, this chart uses data from persons 12 years of age and older instead of all ages.

San Diego County Population from SANDAG 2019 Population Estimates (Prepared June 2020) = 3,351,784. The fully vaccinated population for each day is the cumulative number of county residents documented to have received the final dose of COVID-19 vaccine at least 14 days prior to that day. The not fully vaccinated population is the estimated total county population minus the fully vaccinated population.
The effective reproduction number (R effective or R-eff) is the average number of people each infected person will pass the virus onto and represents the rate at which a virus is spreading. If R-eff >1, the number of infected persons will increase. If R-eff <1, the number of infected persons will decrease. If R-eff =1, the number of infected persons is constant.

R effective should be interpreted with caution. It is based on a theoretical set of assumptions to derive an average number across San Diego County. It does not take into account factors such as local population density or social behavior.

These R effective estimates come from the California COVID Assessment Tool Nowcasts (https://calcat.covid19.ca.gov/cacovidmodels/). Each estimate on the graph comes from a different group with different modeling methods. The ensemble takes the median of all the nowcasts available on a given date and smooths it with a three-day moving average.

**Figure 5. R-effective Trend in San Diego County Over the Past Three Months**

Latest estimate of R-effective is:

0.73

Spread of COVID-19 is likely decreasing

Source: https://calcat.covid19.ca.gov/cacovidmodels/

Epidemiology and Immunization Services Branch

www.sdepi.org  (619) 692-8499

Page 10
Age-Adjusted COVID-19 Hospitalization Rates by Race/Ethnicity

Figure 14. Age-Adjusted Rates of Hospitalizations by Race/Ethnicity, San Diego County Residents

- Hispanic / Latino: 276
- White: 144
- Black: 280
- Asian: 94
- NHPI: 517
- All County Residents: 175

Figure 15. Age-Adjusted Rates of Hospitalizations by Race/Ethnicity, San Diego County Residents

- Hispanic / Latino: 1,400
- White: 489
- Black: 985
- Asian: 399
- NHPI*: 2,107
- AIAN*: 494
- Multiple Race: 284
- All County Residents: 733

The black lines represent the 95% confidence intervals (error bars).
Rates are not calculated for fewer than 20 events. Hospitalization rates were not calculated for the last three months for Multiple Race and AIAN because these categories have fewer than 20 events.

*NHPI=Native Hawaiian/Pacific Islander, AIAN=American Indian/Alaska Native.
Figure 16. Confirmed Case Rate by Zip Code of Residence, 2/27/2022-3/12/2022, San Diego County (Countywide Rate = 214 per 100,000 Population)

Rates calculated using 2019 population estimates from the San Diego Association of Governments. Rates not calculated for counts under 5 cases or populations less than 10,000. Zip code is zip code of residence, which may not be location of exposure.

Case counts and rates for each zip code are updated routinely on the County of San Diego COVID-19 website. Beginning 3/16/22, the maps use quartiles to categorize the data rather than natural breaks.

Figure 17. Cumulative Confirmed Case Rate by Zip Code of Residence, San Diego County (Countywide Rate = 22,216 per 100,000 Population)

Rates calculated using 2019 population estimates from the San Diego Association of Governments. Rates not calculated for counts under 5 cases or populations less than 10,000. Zip code is zip code of residence, which may not be location of exposure.

Case counts and rates for each zip code are updated routinely on the County of San Diego COVID-19 website. Beginning 3/16/22, the maps use quartiles to categorize the data rather than natural breaks.

Epidemiology and Immunization Services Branch
www.sdepi.org (619) 692-8499

Page 12
The bars show vaccines administered, not individuals vaccinated. The line shows the cumulative number of persons fully vaccinated per the dose and schedule regimen for the vaccine received.

Only includes vaccines that have been recorded in the San Diego Immunization Registry (SDIR). Some healthcare providers, including Veteran’s Affairs, the Department of Defense, some tribal entities, and prisons do not report to SDIR. See this dashboard, updated daily, for more detailed vaccine status information for San Diego County.

COVID-19 Vaccinations by Race/Ethnicity and Health Equity

Figure 20. Vaccination Status by Race/Ethnicity, San Diego County Residents Age Five Years and Older

- AI/AN: 45% (Fully Vaccinated + Booster), 22% (Fully Vaccinated), 6% (Partially Vaccinated), 23% (Not Vaccinated)
- Asian: 48% (Fully Vaccinated), 6% (Partially Vaccinated), 42% (Not Vaccinated)
- Black: 19% (Fully Vaccinated + Booster), 12% (Fully Vaccinated), 28% (Partially Vaccinated), 25% (Not Vaccinated)
- Hispanic or Latino: 99% (Fully Vaccinated + Booster), 99% (Fully Vaccinated), 6% (Partially Vaccinated), 35% (Not Vaccinated)

Figure 21. Vaccination Progress by Healthy Places Index Quartile, San Diego County Residents Age Five Years and Older

- Quartile 1: 762,507 (Number of Individuals), 13.0% (Fully Vaccinated + Booster), 8.7% (Fully Vaccinated), 45.3% (Partially Vaccinated), 32.9% (Not Vaccinated)
- Quartile 2: 783,329, 20.6%, 7.9%, 37.8%
- Quartile 3: 781,888, 21.2%, 8.9%, 33.9%
- Quartile 4: 769,831, 25.0%, 9.1%, 28.2%

*The California Healthy Places Index
^The percentage and rate of the population vaccinated with at least one dose of COVID-19 vaccine may approach, or exceed, 99% or 999 per 1,000 San Diego residents aged five years and older. The most recent race/ethnicity populations are 2019 estimates, which may underestimate the current population. When these demographics are analyzed, the population estimates may not reflect social and environmental changes of a community, possibly leading to an under- or overestimate of a population.
Individuals vaccinated by Veterans Affairs or Department of Defense are not included. COVID-19 vaccine is not approved for those under age five at this time.

*Race/ethnicity are unknown for 251 deaths.
**NHPI=Native Hawaiian/Pacific Islander, AIAN=American Indian/Alaska Native.

Figure 29. Common Underlying Conditions, COVID-19-associated Deaths

- Hypertension: 42%
- Diabetes: 35%
- Cardiac Disease: 26%
- Dementia/Alzheimer's: 17%
- Chronic Kidney Disease: 15%
- COPD/Asthma: 13%
- Obesity: 11%
- Immunocompromised: 7%
- No Underlying Condition: 3%

Persons may have more than one underlying condition. These data are abstracted from death certificates and available medical records and may not reflect a complete list of underlying conditions for each person.
COVID-19 Watch Data Sources

The following sources of data are used to produce this report:

- **COVID-19 case reports**: Medical providers and laboratories report individual cases of PCR-confirmed and antigen-positive probable COVID-19 via fax or electronic laboratory reporting (ELR) to the County of San Diego Epidemiology Unit.
- **COVID-19 deaths**: The County of San Diego requests that all deaths related to COVID-19 be reported for surveillance purposes. Medical facilities may report these deaths directly to the Epidemiology Unit or they may be identified by the Office of Vital Records through death certificate registration. The Epidemiology Unit compiles the data, and only reports deaths that can be verified by a death certificate.
- **Emergency Department Chief Complaint Data**: Electronic emergency department data are reported to the Epidemiology Unit daily. The number of respiratory chief complaints and the number of total emergency department visits are used to calculate percentages for all respiratory-related visits and visits specific to influenza-like illness and COVID-like illness.
- **COVID-19 outbreaks**:
  - Skilled Nursing Facilities: at least one case of laboratory-confirmed COVID-19 in a resident.
  - Non-SNF Institution/Congregate Settings: At least three probable or confirmed COVID-19 cases within a 14-day period in epidemiologically-linked residents and/or staff.
  - Community settings: At least three probable or confirmed COVID-19 cases within a 14-day period in people who are epidemiologically-linked in the setting, are from different households, and are not identified as close contacts of each other in any other case investigation.
- **COVID-19 vaccinations**: Number of vaccinations registered in the San Diego Immunization Registry (SDIR) by participating providers. Some providers, including the VA, DoD, other military, some tribal, and prisons do not report to SDIR.
- **SANDAG population estimates, vintage 2019**: Rates are calculated using 2019 population estimates from the San Diego Association of Governments. Rates are not calculated for counts under five cases.

The purpose of the weekly **COVID-19 Watch** is to summarize current COVID-19 surveillance in San Diego County.

*Data are preliminary and may change due to delayed reporting and additional information obtained during investigations.*

For information on influenza in San Diego County, please see the weekly **Influenza Watch** surveillance report. Additional influenza data and resources and a link to subscribe to the Influenza Watch are available on the Epidemiology Unit [website](https://www.sdepi.org).

Note: Starting 3/9/2022, the figures, Potential Exposure Settings and Community Setting Outbreaks, (formerly Figures 18 and 19 on page 13) are no longer included due to a move from universal case investigation and contact tracing to reprioritization of high-risk individuals and settings. The figures Cases Physically Present at K-12 Schools During Exposure Period and Cases Physically Present at K-12 Schools During Communicable Period (formerly Figures 26 and 27 on page 17) are no longer included due to increased use of home antigen test and changes to school-based case investigations and contact tracing.
