*Confirmed cases are based on whole genome sequencing (WGS) results, which are not available until approximately 2-4 weeks after initial testing. These results do not represent all variant cases in San Diego County. Not all confirmed cases are sequenced and not all sequencing results are immediately available to Public Health Services. Variants of Concern with case counts <10 are not included in this table. Currently, 5 cases of B.1.351/Beta (first detected in South Africa) have been reported. Source: San Diego County Communicable Disease Registry.

For more information, see the [Summary of Variant Cases](#) report.

Prepared by County of San Diego, Emergency Operation Center, 9/15/2021
COVID-19 Cases Among San Diego County Residents

New Cases by Date Reported*, Last 30 Days
(8/16–9/14)

Data are preliminary and subject to change

* Starting 7/1/2021, this is the actual number of new cases received the previous day. Some reported cases may later be removed from the total number of cumulative cases through routine quality assurance processes. The actual number of new cases reported and the change from the previous report may not be the same.

Prepared by County of San Diego, Emergency Operations Center, 9/15/2021
## Metrics Beyond the Blueprint

Data are preliminary and subject to change.

*Previously referred to as the unadjusted case rate under the Blueprint for a Safer Economy Tier Framework.

**On 8/11/2021 this was incorrectly reported as 10.0% and was corrected to 9.6% on 8/18/2021.

All metrics calculated using local data using a 7-day daily average with a 7-day lag; case rate uses illness onset date and testing metrics use specimen collection date. California Department of Finance 2020 Projection Population Estimate for San Diego County is 3,370,418.
