*Confirmed cases are based on whole genome sequencing (WGS) results, which are not available until approximately 2-4 weeks after initial testing. These results do not represent all variant cases in San Diego County. Not all confirmed cases are sequenced and not all sequencing results are immediately available to Public Health Services. Variants of Concern with case counts <10 are not included in this table. Currently, 6 cases of B.1.351/Beta (first detected in South Africa) have been reported.
