

WHAT TO KNOW ABOUT MUMPS

PREVENTION

Mumps is a contagious disease. **Vaccination is the best way to protect yourself.**

Students should have **2 doses** of the measles, mumps, and rubella (MMR) vaccine. Make sure you're up to date!

If cases are reported at your school, a **3rd dose of the MMR vaccine** may be recommended.

Some vaccinated people may still get mumps, but **symptoms are less severe.**
