

WHAT TO KNOW ABOUT MUMPS

SYMPTOMS

High fever

Headache, muscle aches

Tiredness

Loss of appetite

IF YOU HAVE SYMPTOMS

- ✓ Stay in your room and away from others.
- ✓ Notify your campus health center.
- ✓ Don't share drinks or other things that might have saliva on them.
- ✓ Cover your coughs and sneezes.
- ✓ Wash your hands often and clean and disinfect surfaces.

Mumps is known for causing **painful, puffy cheeks** and can cause **pain and swelling** of the brain, tissue covering the brain, testicles, or ovaries. Potential lasting side effects can include **encephalitis (infection in and around the brain), meningitis, and infertility in men.**

Talk to your doctor if you think you have signs or symptoms of mumps!
