

“GETTING THEM VACCINATED AGAINST COVID-19 MEANS LESS WORRY AND MORE PLAY.”

Infants and children ages 6 months and older are eligible to receive Pfizer-BioNTech (Pfizer) or Moderna COVID-19 vaccines.

If infected with COVID-19, children can get really sick, have short- and long-term health problems, and spread COVID-19 to loved ones, people at school, and those in the community. Vaccination can help keep children in school or daycare and safely participating in group activities. Get vaccinated for less worry and more play.
