

DECEMBER 22, 2020

The County of San Diego's COVID-19 Vaccine Clinical Advisory Group discussed and approved the following recommendations on 12/22/2020:

- Health systems with additional doses or doses allocated by the County will open their vaccine program to healthcare workers using health equity scope.
- Health Systems can be helpful to clinics in Tier 2, especially if they have spillover.
- Hospital systems work with clinics and LTCF in support; any leftover vaccines not needed should move to the next tier.
- The County is encouraged to partnership with hospitals to vaccinate outside of hospital affiliations.
- Allocate vaccines within a tier based on sufficient tier needs, testing positivity rate in that geographic area, as well as case rates.
- Explore matchmaking options and to partner with other smaller facilities to provide equitable distribution resources.
