

JANUARY 12, 2021

The County of San Diego's COVID-19 Vaccine Clinical Advisory Group discussed and approved the following recommendations on 01/12/21:

- County is currently open for phase 1a and that phase takes priority. However, phases are recommended to be allowed to overlap when doing so will maximize efficiency of vaccinators to utilizing their current capacity and operations. Vaccinators will make best efforts to prioritize people in higher tiers, but when unable to identify available persons in that tier, they will fill in available capacity to ensure that vaccinating at full capacity.
- Consistent with CDPH allocating doses of vaccine to Counties based on vaccine given and documented in immunization registries, the County should allocate doses to vaccine providers based on dose used and documented in immunization registries.
