

# JANUARY 19, 2021

## **The County of San Diego's COVID-19 Vaccine Clinical Advisory Group discussed and approved the following recommendations on 01/19/21:**

- Recommend that vaccination sites explore various advanced, open access scheduling, or wait-list management solution to give priority to individuals in higher priority phases or tiers.
- Recognizing that certain priority groups continue to need access we recommend that vaccination sites focus effort on actively pulling IN the highest priority groups (currently Phase 1A) through networking, matchmaking and outreach efforts, and explore various advanced or open access scheduling solutions, to improve access to individuals in higher priority phases or tiers. While documentation of eligibility is important, efforts to validate eligibility should not be so cumbersome as to impair progress in reaching eligible community members or slowing down progress in community vaccination programs (for example, requiring multiple forms of ID or onerous documentation from eligible recipients).
