

Sirta Tallaalka COVID-19 ee Johnson & Johnson

Tallaalka COVID-19 ee Janssen/Johnson & Johnson (J&J) wuxuu isticmaalaa fayruus aan caabuqeyn (viral vector) si loo qaado gabal yar oo DNA si uu jirkaaga uga caawiyo kahortaga COVID-19. Talaalkiiba waxa uu gaarsiiyaa maaddooyin isku jira si uu jirkaagu uga caawiyo inuu dhiso difaac ka dhan ah cudurka.

Uma bedelmayo DNA

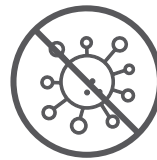

Ugxamo maleh ama badeeco kasta oo xayawaan kale ah

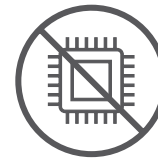

Badeecada dhiiga

Ma jiro cinjir

Ma jir COVID-19 fayruus

Ma jiro gabal yar ah

Ma jiro ilaalinyo

- Kowni ahaan, tallaalka J&J guud ahaan waa **66%** oo dhaqangal ah iyo **86%** waa mid dhaqangal ah oo looga hortagayo xanuunka daran ee COVID-19.
- Mareykanka gudihisa, tallaalka J&J guud ahaan waa **72%** waa mid dhaqangal ah oo looga hortagayo xanuunka COVID-19 oo ku saleysan daraasad weyn oo bukaan-eegto ah.
- Tallaalka J&J keliya waxa uu u baahan yahay **hal** qiyaas. Ilaalinta ugu badan waxay bilaabataa **14 maalmood** kadib qiyaastaada..
- Horumarinta tallaalka loo isticmaalo waxay la mid tahay howlaha lagu hormarinayo tallaalka furuqa, jadeecada (MMR), iyo cagaarshowga A Unugyada shaybaarka lagu koriyey waxay ka yimaadeen dhicis oo la sameeyey toban sano kahor. Wax dhicisobid oo dhowaan la sameeyey ma jiraan oo lagu hormarinayo tallaalkan. Shirkii [Vatican](#) iyo Mareykanka ee [Guddiga Katooliga Bishops](#) waxay kaga hadleen helida tallaalkan wuxuu maskixiyay cudurdaar u yahay iyo qeyb ka mid ah waajibaadka looga hortagayo shaqsiyaad..

waxay kaga hadleen helida tallaalkan wuxuu maskixiyay cudurdaar u yahay iyo qeyb ka mid ah waajibaadka looga hortagayo shaqsiyaad.
