

What to Know About Vaccine Recommendations for Children

LIVE WELL
SAN DIEGO

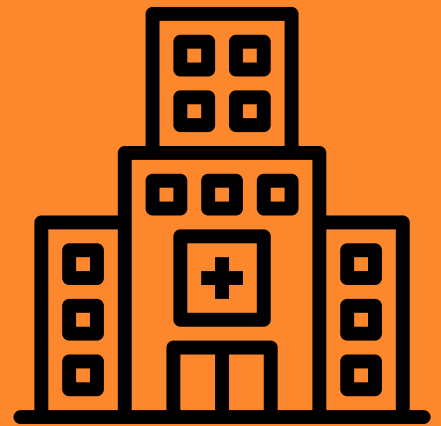

The timing and number of vaccines U.S. children get are based on:

When children are most **vulnerable** to diseases.

Current **access to healthcare.**

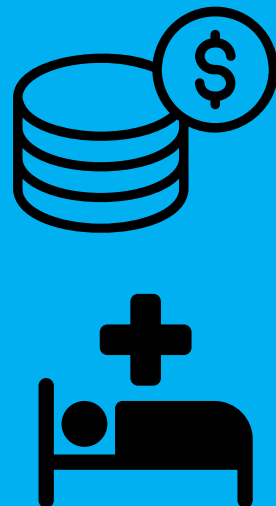

Risk of disease in the U.S.

What works best with children's **immune systems.**

Cost of vaccine compared to cost of medical visits, hospitalizations, and missed work caused by the disease.

U.S. vaccine recommendations have been **well studied and tested** for decades.
