

# Observe PRETEEN VACCINE WEEK

**FEBRUARY 27 – MARCH 4, 2023**

Vaccines are a sure way to protect against certain serious and deadly diseases. Many preteens missed out on important vaccines during the pandemic – make sure your child isn't one of them!

## **PARTICIPATE AND STAY UP-TO-DATE**

Help us to raise awareness and to encourage preteens to get the recommended vaccines. The County of San Diego wants to encourage parents to contact their preteen's healthcare provider and schedule a well-child visit to make sure they are up to date with their immunizations.
