

Project SAVE (Scheduling Assistance for Vaccine Equity)

Project SAVE is an effort to increase vaccine equity for all individuals in San Diego County, in partnership with local government entities and trusted community partners. Community partners working with local Community Health Workers (CHWs) and Promotores are provided with dedicated daily blocks of appointments to help schedule COVID-19 vaccination appointments directly. Resource tabling and outreach efforts in neighborhoods and local resource centers, along with providing no-appointment site events and referrals are part of the collaborative effort to help those needing assistance.

Project SAVE is intended to serve individuals who are unable to schedule appointments due to lack of access to technology, language barriers, or other challenges to receiving a vaccine.

Vaccine Appointment Scheduling

To schedule COVID-19 vaccine appointments, Promotores and CHWs have direct access to designated block of appointments at sites countywide, not available to the public.

Promotores and CHWs schedule appointments for eligible residents of priority, high-risk communities through phone calls, events (e.g. food distributions) and other outreach efforts they are already engaged in.

Communication and Outreach

Outreach and promotion efforts utilizing the County's existing network of CHWs and Promotores is an integral component in providing communication with individuals who may not otherwise receive information. CHWs and Promotores have shared backgrounds, experiences, language and culture to the communities they serve, and are a trusted source for COVID-19 vaccine information and other resources.

Additional outreach efforts include

- Distributing & developing linguistically and culturally appropriate materials
- Addressing COVID-19 questions and concerns, including vaccine hesitancy
- Providing virtual community engagement events and doing in-person outreach at locations frequented by the focus community
- Accompanying individuals to their appointments

Additional Vaccine Options

Those 65 years of age and older without computer access can call 2-1-1 for appointment assistance.
