

NEW Multidose Vial Expiration (MDV)

- Fluzone vials that have been maintained at the required storage temperature of 2°- 8°C (35°- 46°F) and properly handled can be used until the expiration date stamped on the vial. This includes punctured vials.
- ***Punctured vials** that have not been maintained at 2°- 8°C (35°- 46°F) should be discarded after 30 minutes (total) exposure to room temperature.
- This information pertains to Fluzone MDV only
- [Fluzone Quadrivalent \(Influenza Vaccine\)](#)
