Introduction

The *Community Features Atlas Series* is a comprehensive collection of maps displaying key information about San Diego County. It is designed to be used by local communities, organizations, and individuals seeking place-based information specific to geographic areas within the County. The atlas series provides a look into the various resources, services, and demographics of the County. Importantly, the information presented in these atlases can be used in the assessment of factors involved in community health, as well as the planning of resource allocations.

Data from various sources were complied and are presented in this atlas, including the American Community Survey (ACS), San Diego Association of Governments (SANDAG), San Diego Geographic Information Source (SanGIS), California State Departments, and the County of San Diego's Community Health Statistics Unit. Together, the data provides a detailed look into various assets and liabilities of a community. More information on the data sources used in these maps can be found in the *Data Guide*, located at the end of this document.

Together, the Community Features Atlas Series is composed of a *Community Resources Atlas*, *FITNESSGRAM® Physical Fitness Test Atlas*, a *Health Resource Atlas, Food Retailer Atlas, Retail Food Environment Index (RFEI) Atlas,* a *Youth Attractors Atlas*, and a *Community Demographics Atlas*.

Data are displayed using geographic areas such as street-level, census area, sub-regional area, or region. Additionally, included in each atlas is a brief summary, as well as an outline of the spatial data presented.

For additional local health and demographic data, please visit www.SDHealthStatistics.com.

FITNESSGRAM® Physical Fitness Test Atlas, School Year 2009/10
Grade 9, Aerobic Capacity

This atlas is one of a series of 6 which present data on the physical fitness of students in the public school system in San Diego County. By law, all public school districts in California are required to administer the Physical Fitness Test (PFT) annually to all students in the 5th, 7th and 9th grades. These atlases show data for two fitness areas: aerobic capacity and body composition. There are separate atlases for each test standard, and for each grade tested.

The desired outcome for each test is that the student achieves the "Healthy Fitness Zone" (HFZ). Those students whose performance exceeds the goals (or fall below the HFZ for scores such as Body Composition) are also classed in the HFZ. A student who does not achieve the HFZ is "Not in the HFZ".

Results for the 2009/10 school year are presented by the percentage of students not within the HFZ for each performance standard by school. At the sub-regional (SRA) level, data are presented as the average percent of students not within the HFZ within each SRA. Data are not shown for schools with fewer than 5 students participating in the FITNESSGRAM®. For more information see the California Department of Education at http://www.cde.ca.gov/ta/tg/pf/.

For reference, median income by census tract data (2010 estimates) is included. **See the Data Guide at the end of the atlas for more information.**

FITNESSGRAM® Physical Fitness Test Atlas, School Year 2009/10
Grade 9, Aerobic Capacity

This map series uses an index map and detailed maps.

The Index Map, based on the Thomas Bros. Guide, is used to find an area of interest in which to view detailed "street view" maps. Each grid on the Index Map is labeled with a number which corresponds to the page number on each detailed map.

Directions:

Begin on the Index Map (Fig.A), to identify an area of interest, and note the grid number/s. Page through the atlas to the map with the corresponding grid numbers. Each detailed map has the grid page on the map image, as well as at the top right corner of each atlas page (Fig. B).

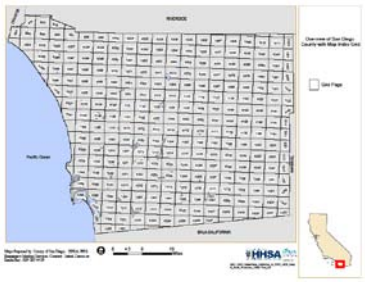

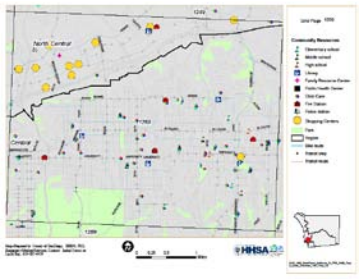

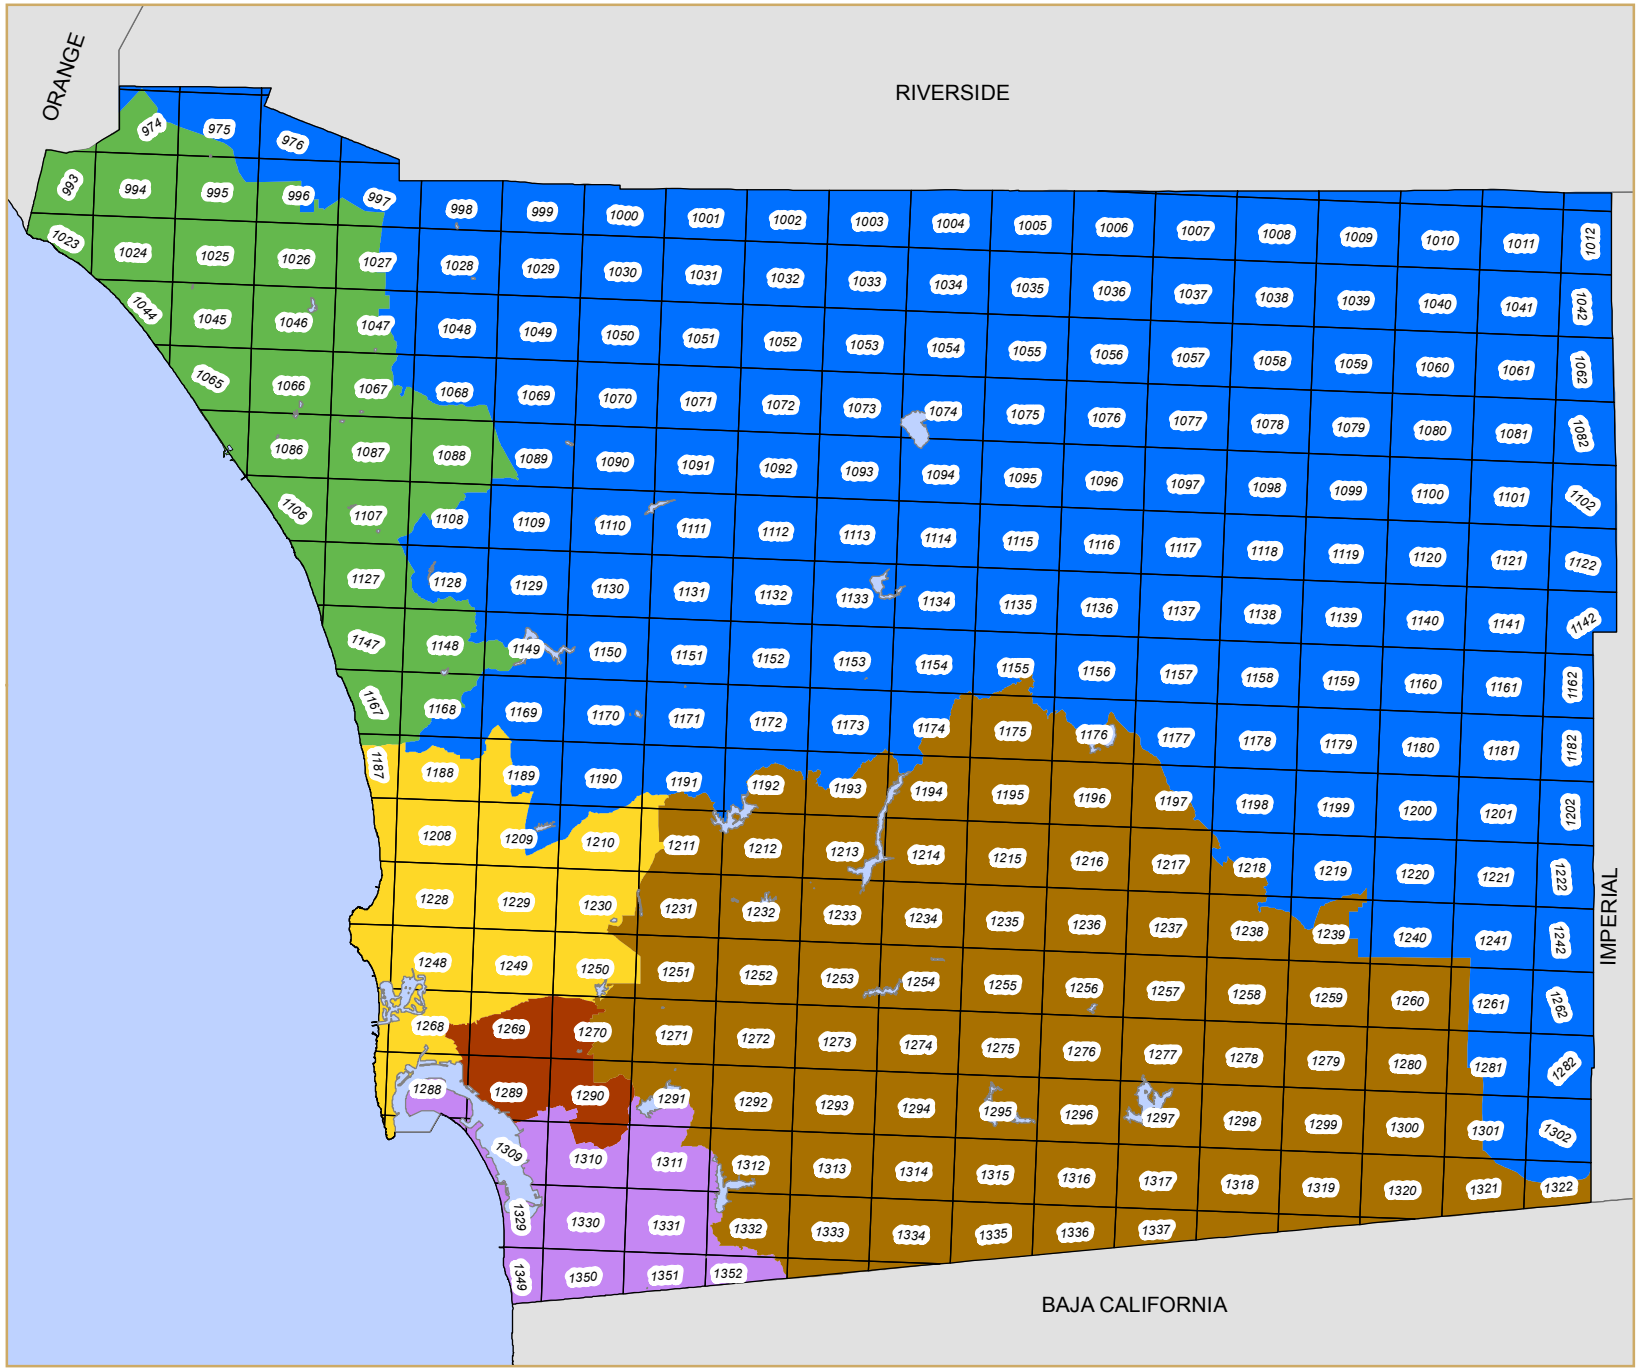

Fig A. 

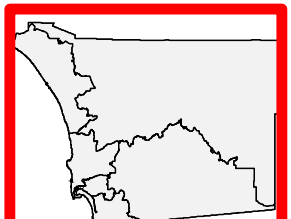

Fig.B 

You may adjust your page view, or use the map interactively to adjust layers or maps elements displayed (interactive use allows user to turn layers on/off, for example to see overlapping information more clearly or reduce the information shown).

*The *FITNESSGRAM* Physical Fitness Test (PFT) is given annually to all public school students in grades five, seven, and nine. The maps show results for 2 PFT standards administered during the 2009/10 school year: aerobic capacity and body composition. Data are shown by school, % of students not within the Healthy Fitness Zone (HFZ) and by SRA (average % of students not within the HFZ). *Note: students whose performance exceeds the standard, including those of lower than standard body composition, are considered to be within the HFZ.* Data are not shown for schools with fewer than 5 students. *The *FITNESSGRAM* Physical Fitness Test (PFT) is given annually to all public school students in grades five, seven, and nine. The maps show results for 2 PFT standards administered during the 2009/10 school year: aerobic capacity and body composition. Data are shown by school, % of students not within the Healthy Fitness Zone (HFZ) and by SRA (average % of students not within the HFZ). *Note: students whose performance exceeds the standard, including those of lower than standard body composition, are considered to be within the HFZ.* Data are not shown for schools with fewer than 5 students. *The *FITNESSGRAM* Physical Fitness Test (PFT) is given annually to all public school students in grades five, seven, and nine. The maps show results for 2 PFT standards administered during the 2009/10 school year: aerobic capacity and body composition. Data are shown by school, % of students not within the Healthy Fitness Zone (HFZ) and by SRA (average % of students not within the HFZ). *Note: students whose performance exceeds the standard, including those of lower than standard body composition, are considered to be within the HFZ.* Data are not shown for schools with fewer than 5 students. From: California Department of Education, http://www.cde.ca.gov/ta/tg/pf/.

*The *FITNESSGRAM* Physical Fitness Test (PFT) is given annually to all public school students in grades five, seven, and nine. The maps show results for 2 PFT standards administered during the 2009/10 school year: aerobic capacity and body composition. Data are shown by school, % of students not within the Healthy Fitness Zone (HFZ) and by SRA (average % of students not within the HFZ). *Note: students whose performance exceeds the standard, including those of lower than standard body composition, are considered to be within the HFZ.* Data are not shown for schools with fewer than 5 students. *The *FITNESSGRAM* Physical Fitness Test (PFT) is given annually to all public school students in grades five, seven, and nine. The maps show results for 2 PFT standards administered during the 2009/10 school year: aerobic capacity and body composition. Data are shown by school, % of students not within the Healthy Fitness Zone (HFZ) and by SRA (average % of students not within the HFZ). *Note: students whose performance exceeds the standard, including those of lower than standard body composition, are considered to be within the HFZ.* Data are not shown for schools with fewer than 5 students. From: California Department of Education, http://www.cde.ca.gov/ta/tg/pf/.

*The *FITNESSGRAM* Physical Fitness Test (PFT) is given annually to all public school students in grades five, seven, and nine. The maps show results for 2 PFT standards administered during the 2009/10 school year: aerobic capacity and body composition. Data are shown by school, % of students not within the Healthy Fitness Zone (HFZ) and by SRA (average % of students not within the HFZ). *Note: students whose performance exceeds the standard, including those of lower than standard body composition, are considered to be within the HFZ.* Data are not shown for schools with fewer than 5 students. From: California Department of Education, http://www.cde.ca.gov/ta/tg/pf/.

*The *FITNESSGRAM* Physical Fitness Test (PFT) is given annually to all public school students in grades five, seven, and nine. The maps show results for 2 PFT standards administered during the 2009/10 school year: aerobic capacity and body composition. Data are shown by school, % of students not within the Healthy Fitness Zone (HFZ) and by SRA (average % of students not within the HFZ). *Note: students whose performance exceeds the standard, including those of lower than standard body composition, are considered to be within the HFZ.* Data are not shown for schools with fewer than 5 students. From: California Department of Education, http://www.cde.ca.gov/ta/tg/pf/.

*The *FITNESSGRAM* Physical Fitness Test (PFT) is given annually to all public school students in grades five, seven, and nine. The maps show results for 2 PFT standards administered during the 2009/10 school year: aerobic capacity and body composition. Data are shown by school, % of students not within the Healthy Fitness Zone (HFZ) and by SRA (average % of students not within the HFZ). *Note: students whose performance exceeds the standard, including those of lower than standard body composition, are considered to be within the HFZ.* Data are not shown for schools with fewer than 5 students. From: California Department of Education, http://www.cde.ca.gov/ta/tg/pf/.

In 2009/10, for San Diego County an Average of 40.2% of 9th Grade Students Were Not in the HFZ for Aerobic Capacity

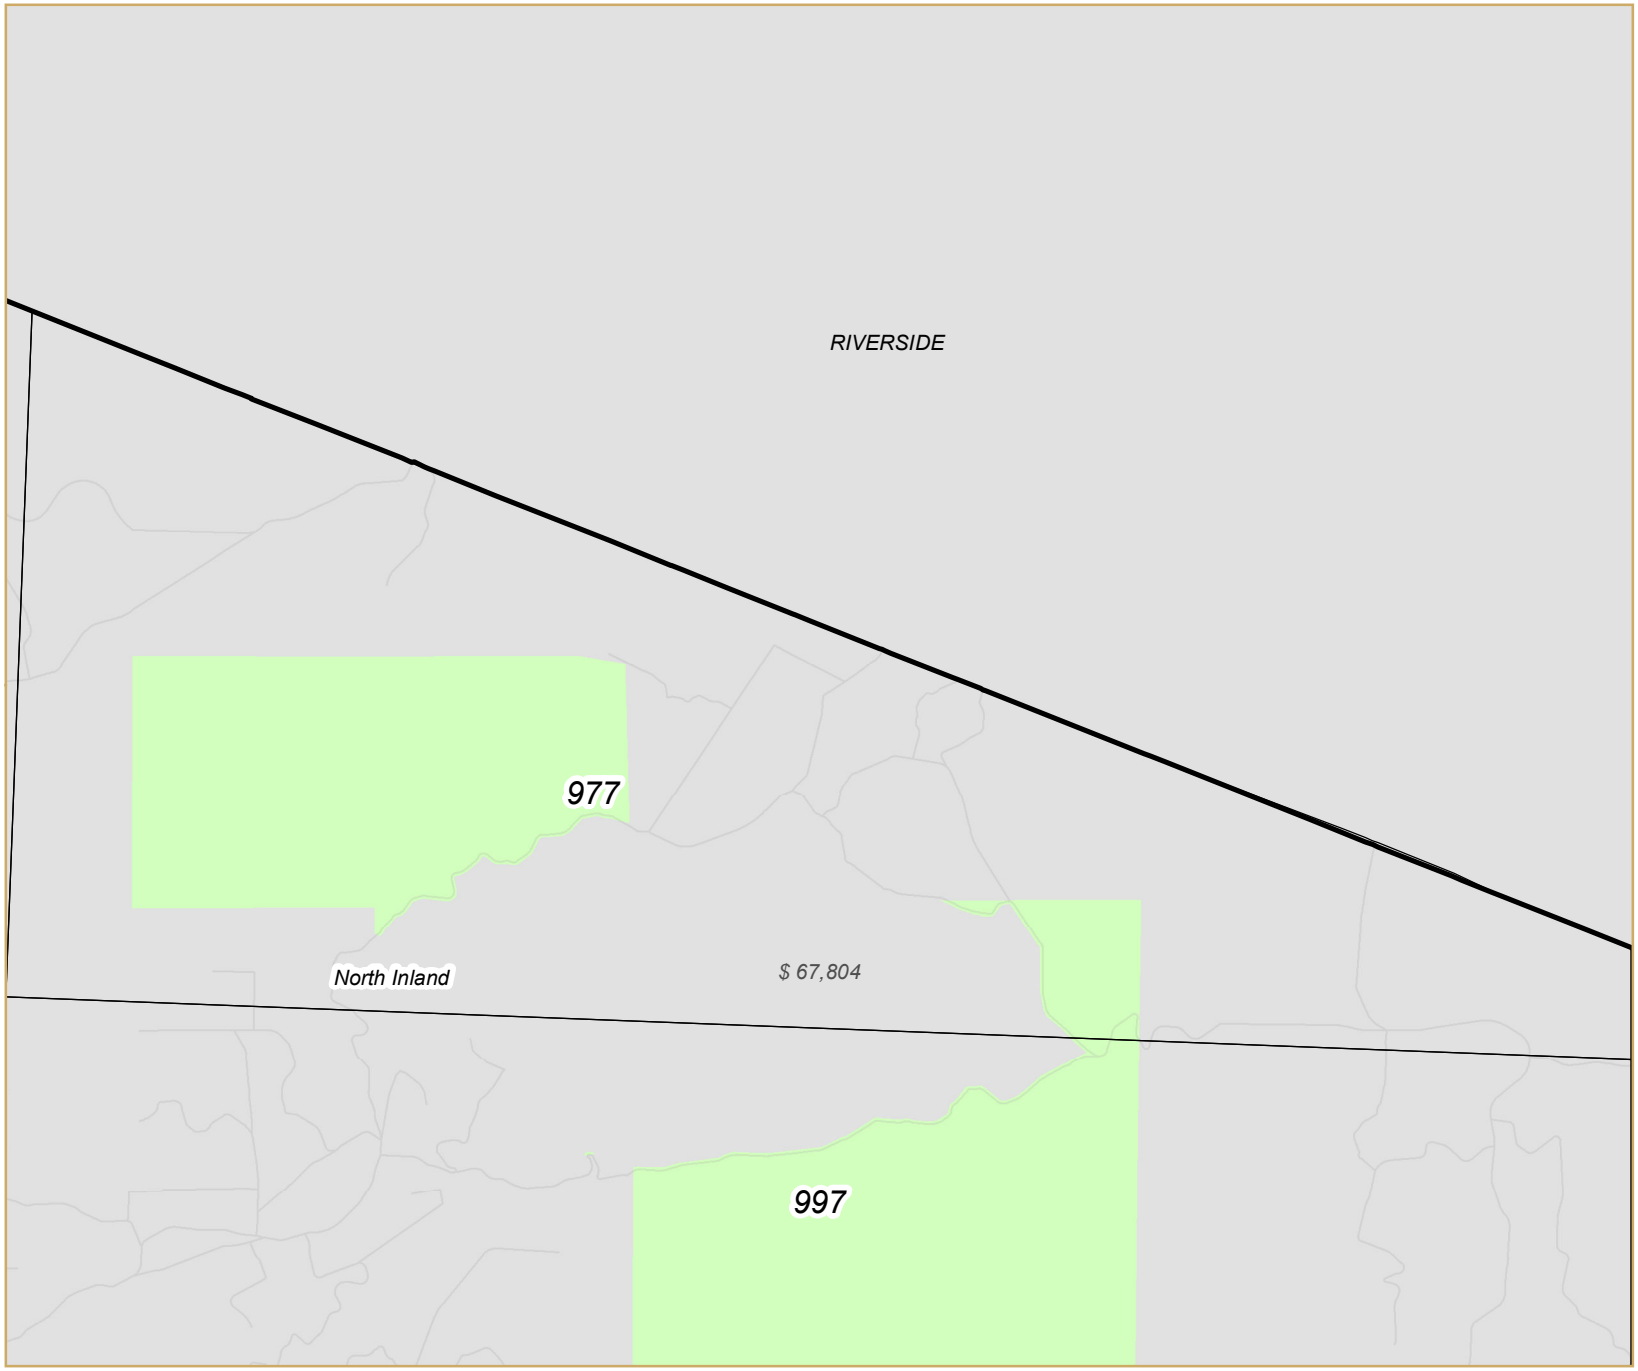

NAD_1983_StatePlane_California_VI_FIPS_0406_Feet, D_North_American_1983, Foot_US

*The *FITNESSGRAM* Physical Fitness Test (PFT) is given annually to all public school students in grades five, seven, and nine. The maps show results for 2 PFT standards administered during the 2009/10 school year: aerobic capacity and body composition. Data are shown by school, % of students not within the Healthy Fitness Zone (HFZ) and by SRA (average % of students not within the HFZ). *Note: students whose performance exceeds the standard, including those of lower than standard body composition, are considered to be within the HFZ.* Data are not shown for schools with fewer than 5 students. From: California Department of Education, http://www.cde.ca.gov/ta/tg/pf/.

*The *FITNESSGRAM* Physical Fitness Test (PFT) is given annually to all public school students in grades five, seven, and nine. The maps show results for 2 PFT standards administered during the 2009/10 school year: aerobic capacity and body composition. Data are shown by school, % of students not within the Healthy Fitness Zone (HFZ) and by SRA (average % of students not within the HFZ). *Note: students whose performance exceeds the standard, including those of lower than standard body composition, are considered to be within the HFZ.* Data are not shown for schools with fewer than 5 students. From: California Department of Education, http://www.cde.ca.gov/ta/tg/pf/.

*The *FITNESSGRAM* Physical Fitness Test (PFT) is given annually to all public school students in grades five, seven, and nine. The maps show results for 2 PFT standards administered during the 2009/10 school year: aerobic capacity and body composition. Data are shown by school, % of students not within the Healthy Fitness Zone (HFZ) and by SRA (average % of students not within the HFZ). *Note: students whose performance exceeds the standard, including those of lower than standard body composition, are considered to be within the HFZ.* Data are not shown for schools with fewer than 5 students. From: California Department of Education, http://www.cde.ca.gov/ta/tg/pf/.

*The *FITNESSGRAM* Physical Fitness Test (PFT) is given annually to all public school students in grades five, seven, and nine. The maps show results for 2 PFT standards administered during the 2009/10 school year: aerobic capacity and body composition. Data are shown by school, % of students not within the Healthy Fitness Zone (HFZ) and by SRA (average % of students not within the HFZ). *Note: students whose performance exceeds the standard, including those of lower than standard body composition, are considered to be within the HFZ.* Data are not shown for schools with fewer than 5 students. *The *FITNESSGRAM* Physical Fitness Test (PFT) is given annually to all public school students in grades five, seven, and nine. The maps show results for 2 PFT standards administered during the 2009/10 school year: aerobic capacity and body composition. Data are shown by school, % of students not within the Healthy Fitness Zone (HFZ) and by SRA (average % of students not within the HFZ). *Note: students whose performance exceeds the standard, including those of lower than standard body composition, are considered to be within the HFZ.* Data are not shown for schools with fewer than 5 students. From: California Department of Education, http://www.cde.ca.gov/ta/tg/pf/.

*The *FITNESSGRAM* Physical Fitness Test (PFT) is given annually to all public school students in grades five, seven, and nine. The maps show results for 2 PFT standards administered during the 2009/10 school year: aerobic capacity and body composition. Data are shown by school, % of students not within the Healthy Fitness Zone (HFZ) and by SRA (average % of students not within the HFZ). *Note: students whose performance exceeds the standard, including those of lower than standard body composition, are considered to be within the HFZ.* Data are not shown for schools with fewer than 5 students. From: California Department of Education, http://www.cde.ca.gov/ta/tg/pf/.

FITNESSGRAM® Physical Fitness Test

By law (California *Education Code* Section 60800), all public school districts in California are required to administer the Physical Fitness Test (PFT) annually to all students in the 5th, 7th and 9th grades. The state-designated PFT is the FITNESSGRAM® developed by The Cooper Institute to evaluate health-related fitness. The FITNESSGRAM® is composed of six fitness areas: aerobic capacity, body composition, abdominal strength/endurance, trunk extensor strength/flexibility, upper body strength/endurance, and flexibility, are assessed using objective fitness tests using criteria that have been shown to offer some protection against diseases associated with a lack of physical activity. These maps show data for two of the six areas, aerobic capacity and body composition.

The aerobic capacity fitness area refers to the maximum rate that oxygen can be taken into and used by the body during exercise. Body composition tests are used to estimate the level of body fat. The desired outcome for each test is that the student achieves the "Healthy Fitness Zone" (HFZ). Those students whose performance exceeds the goals (or fall below the HFZ for scores such as Body Composition) are also classed in the HFZ. A student who does not achieve the HFZ is "Not in the HFZ". Source: California Department of Education at http://www.cde.ca.gov/ta/tg/pf/.

Results for the 2008/9 school year are presented by the percentage of students not within the standard of performance for each school. Data are not shown for schools with fewer than 5 students participating in the FITNESSGRAM®. At the sub-regional (SRA) level, data are presented as the average percent of students not within the HFZ.

Food Retailers

Retail Food Environmental Index (RFEI)

The Retail Food Environment Index (RFEI) is a ratio comparing different types of food retailers in a community; it provides one measure of the access to healthy food choices in an area. A selected list of retail types from the Food Retailers and Farm Market spatial layers described above were used for the RFEI analysis. These selected retailers were chosen as the places most likely to be used regularly by residents to buy food (regardless of nutritional quality), such as markets and restaurants. The RFEI was calculated by dividing the sum of fast food, convenience, and other retailers with limited options for fruit, vegetable and other nutritious foods, by the sum of grocery, market/produce, warehouse stores, and sit-down restaurants likely to have a variety of nutritious food options.

The higher the RFEI, the more likely consumers will find more retailers with limited food options than retailers with abundant nutritious food options. Sources: Community-supported agriculture farms, farm, markets, and farm stand data from San Diego County Farm Bureau (2011), http://www.sdfarmbureau.org/index.php.
