

# HIV PREVENTION DEMONSTRATION PROJECT

---

*Lauren Brookshire*

*HIV, STD and Hepatitis Branch*

*October 20, 2016*

## BACKGROUND

CDPH released an FOA for the California HIV Prevention Demonstration Project seeking innovative HIV prevention activities

San Diego was one of three entities in California to be awarded funding

Award was \$1,864,837 to be spent over a 24-month period

### Components of project:

- Integration of risk-based hepatitis C testing into HIV testing programs
- Implementation of HIV testing for couples
- Identifying HIV-negative individuals through HIV testing who were at high risk for HIV infection and linking them to pre-exposure prophylaxis (PrEP)

# HIV PREVENTION DEMONSTRATION PROJECT

## BACKGROUND

Authority to accept the revenue was approved on March 17, 2015 and required contracts with Family Health Centers of San Diego, the San Diego LGBT Community Center, Vista Community Clinic and San Ysidro Health Center.

Original project period was February 1, 2015-January 31, 2017.

Because contracts were executed late, CDPH informed recipients on September 13, 2016 that no-cost extensions would be made to continue the contracts through March 31, 2016.

Current board authority is through January 31, 2017, therefore, an extension of board authority is needed through March 31, 2017.

## CDC FUNDS ADDED

Subsequent to the implementation of the Demonstration Project, CDPH developed and successfully submitted a proposal to the Centers for Disease Control in response to an FOA to provide PrEP navigation services targeted toward transgender individuals and also funding for media activities related to PrEP.

In June 2016, CDPH awarded part of the CDC funding to San Diego and required contracts with Family Health Centers of San Diego and the San Diego LGBT Community Center.

Authority to accept this revenue was approved June 28, 2016.

Board authority is requested to further extend the Demonstration Project contracts with Family Health Centers of San Diego and the LGBT Community Center.

## EXTEND CONTRACTS

## ALIGNMENT WITH GETTING TO ZERO

Goal 1.1: Develop and implement campaign(s) to promote awareness of pre-exposure prophylaxis among high-risk populations

Goal 3.1: Incorporate PEP and PrEP education into County HIV prevention and HIV testing programs.

Goal 3.5: Provide PrEP education to all HIV-negative individuals seeking services at the County's STD Clinics and provide referrals to PrEP navigation assistance for individuals who are seeking PrEP.

Goal 3.6: Work with community partners to promote PEP and PrEP awareness and access

Goal 5.6: Implement transgender-specific HIV education and prevention programming.

## PrEP DATA – JUNE 1, 2015 – AUGUST 14, 2016

357 enrolled in PrEP navigations services

221 completed their appointment with a PrEP medical provider

182 obtained prescription for PrEP

162 filled prescription

153 started taking PrEP
