Public Health Officer's Report

I. Communicable Disease Issues

A. Infectious Disease Issues

1. Meningococcal Disease Outbreak (CAHAN sent on September 28, 2018)

- There were three San Diego State University (SDSU) undergraduate students diagnosed with serogroup B invasive meningococcal disease (IMD) between June and September 2018. The County is collaborating with and supporting SDSU in a response to this outbreak.
- A meningococcal outbreak was declared on campus on 9/28/18 after the third case in just over three months was diagnosed (onset dates: June 9, September 2, and September 25).
- The June case was later determined through testing at the Centers for Disease Control and Prevention to be a different strain of the meningococcal serogroup B bacteria, unrelated to the other two cases.
- The local health officer recommended that all unimmunized SDSU undergraduate students 23 years of age and younger get vaccinated with one of two available meningococcal B vaccines.

- On 4/16/2019, a new case of meningococcal disease was reported to Public Health Services, Epidemiology Program. After investigation and subsequent lab testing, this case was confirmed for serogroup B. The response actions to this case included post-exposure prophylaxis (PEP) for close contacts. In addition, a PEP and vaccine event was held at SDSU on 4/18 and 4/19 resulting in 315 doses of PEP medication and 114 Men B vaccines being administered.
- As of 4/23/2019, those who received any vaccination (either fully or partially vaccinated) was 9,152, which is 34% of the student population 23 years of age and younger.
- There have been six cases so far in 2019, including one additional case associated with SDSU as noted above.
- Point of Dispensing (POD) vaccination clinics were held on April 23, 2019 and May 2, 2019.
- As of 5/28/2019, there have been no additional cases of meningococcal. The most recent vaccination outcomes for this outbreak are from May 9, 2019 and include: those who received any vaccination (either fully or partially vaccinated) for those in the fall student body was 9,237 which is 35% of the student population 23 years of age and younger. For those in the Spring student body, was 8,660 which is 37% of the student population 23 years of age and younger.
- Going forward for the summer, there are no planned events. However, SDSU will continue to offer the Men B vaccine through their student health services clinic.
- **As of 7/25/2019, due to summer break no special activities have been conducted. Meanwhile, ongoing vigilance for additional cases among the SDSU population continues with no new cases being reported since the last update. SDSU will continue to offer the Men B vaccine through their student health services clinic.**

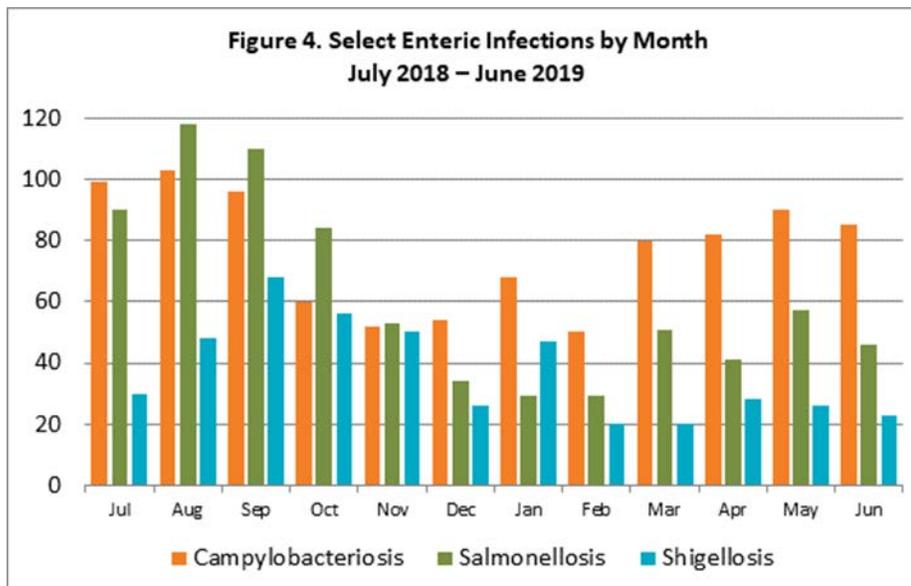

It is anticipated that this outbreak response will be in place at a low level until Winter 2020 while we monitor for new outbreak-related cases for a year (as recommended by CDC).

2. Influenza

- Influenza activity has been steadily decreasing in recent weeks. dsdfs
- The last Influenza Watch weekly surveillance report of this season was released May 8, 2019
 - 9,373 reported influenza cases for the season to date
 - 68 deaths
 - 27 lab confirmed flu outbreaks
- Because, influenza cases are detected each week of the year, ongoing monitoring will continue.
- On May 24, 2019, a San Diego CAHAN was issued to inform the local medical community about an increase of influenza-like-illness (ILI) being seen at a local migrant shelter.
 - The local migrant shelter has reported an increase in the number of ILIs seen in individuals arriving from Texas this week.
 - Several local migrant shelter residents have been confirmed to have either pandemic A/H1 or seasonal A/H3, both of which were matched to the 18/19 influenza vaccine.
 - To date, there is no evidence of transmission occurring at the local migrant shelter, as individuals apparently have been exposed in Texas and then developed symptoms after arrival to San Diego.
 - Likewise, there is currently no evidence of community-wide transmission of influenza associated with these cases.
- **7/25/2019 Update: Surveillance activities continue year round. Epi Program continues to receive a small number of positive influence lab results each week during the summer. This is not unusual for this time of the year. The CDC reports that the flu vaccine production has been slightly delayed this year. This could result in flu vaccine supply being available (via the state) later in the year to San Diego hospitals, healthcare providers and County.**

3. Shigellosis

- San Diego is seeing higher cases of enterics, but no cause for alarm is warranted. Enteric cases tend to peak in the late summer and early fall.
- An increase in reports on **all** enteric diseases has been noted, in part, because of the increased availability of culture independent diagnostic testing (CIDT), since 2016. This allows doctors to identify the general type of bacteria causing illness within hours, without having to culture, or grow the bacteria in a laboratory. So, more diagnoses are being made and reported for illnesses that have always been in the community.
- CDC estimates that 500,000 shigellosis cases occur in the US each year, yet just under 15,000 cases were actually reported to health departments in 2017 (last annual year available). Most people are never seen for care, and those that do, do not get diagnosed. Most shigellosis cases resolve without treatment.
- There is an increasing problem with drug-resistance, and this has been detected locally (the five local health alerts on shigellosis since 2015 that we issued have highlighted this to local providers). In 2019, the California Department of Public Health (CDPH) started a statewide program to investigate this, and San Diego County is part of that increased surveillance. Drug-resistant *Shigella* samples are being sent through our San Diego County Public Health Laboratory to the CDPH Microbial Disease Laboratory to determine the origins of the drug resistance.
- In comparison to other CA counties, **all** are noting increased reporting, again, most likely due to CIDT. San Diego has historically had higher *Shigella* reports than Orange County, but generally lower than SF or LA. San Diego has not had large outbreaks in the gay/bisexual community as seen in prior years those counties, nor has San Diego County had large restaurant based outbreaks, like the Bay area did in 2015.
- **Ongoing Efforts: The Epi Program continues to monitor for increases in reported cases, conducting investigation on all reported cases, and monitoring for shifts in population groups being affected the most fro this disease.**

4. Measles

- **There have been NO CASES of measles in San Diego during 2019, to date.**
- Ongoing measles hot spots around the world continue to require extra vigilance by San Diego County.
- Numerous suspect measles reports have been received and require immediate attention. So far, no local confirmed cases have been reported.
- Three CAHAN alerts have been sent out, January 31, April 25, and **June 7, 2019.**
- A press release was sent out on May 2, 2019.
- An on camera interview with ABC news, Channel 10 was conducted with Dr. Dean Sidelinger on May 2, 2019.
- Weekly Situational Reports (SitReps) are being produced weekly.
- **As of July 24, 2019, there have been 135 reported suspect cases of measles which required evaluation and investigation. There have been 148 lab samples tested in the Public Health Lab. None of these have been confirmed to be a case of measles.**
- **Between January 1, 2019 and July 24, 2019, the cost to the county to respond to increased measles activity has been \$79,121. Of this, \$26,964 has been costs due to increased lab testing of suspect case specimens.**

5. Shiga Toxin-Producing *E. Coli*

- **On June 28, 2019, the County of San Diego Health and Human Services Agency (HHS) reported four confirmed or probable pediatric cases of Shiga toxin-producing *Escherichia coli* (STEC) that may be related to contact with animals at the San Diego County Fair.**
- **As of July 31, 2019, 11 confirmed cases and two probable cases have been reported in this outbreak. Three people were hospitalized and one child has died. The outbreak has been determined to be caused by a specific strain of STEC O157:H7.**
- **San Diego County Department of Environmental Health Food Inspectors conducted investigations of the food booths associated with the reported foods consumed by the ill cases. There were no commonalities between food items and food booths.**
- **All cases in this outbreak did report visiting the animal areas, which included the petting zoo, or had other animal contact at the fair. Animal and environmental testing conducted to date by the County and State has found no STEC O157:H7 bacteria. This investigation included testing of all petting zoo animals, all pony ride horses, and two cattle from the livestock barn that were present throughout the possible timeframe that the cases visited the fair. In addition, 32 environmental samples from the petting zoo and livestock barn showed no signs of STEC bacteria.**

II. Board Actions

- Getting to Zero:** The next annual report via Board Memo will be issued in June 2019, to coincide with National HIV Testing Day.
- Hepatitis A Outbreak :**
 - San Diego County declared a local health emergency, which was signed on Sept 1, 2017. It declares that the “spread of Hepatitis A in San Diego is a threat to public health” and “a local health emergency is declared in San Diego County”.
 - September 6 & 12, 2017: Ratify declaration of local health emergency: Hepatitis A Outbreak.

- September 26, 2017, October 10, 2017, October 24, 2017, November 6, 2017, November 14, 2017, November 27, 2017, December 5, 2017, December 19, 2017, January 2, 2018, and January 9, 2018: Continue local health emergency.
 - San Diego County Board of Supervisors motion to end local health emergency on January 23, 2018.
 - Grand Jury Report issued May 18, 2018 and responses went to Board of Supervisors the morning of Aug 7, 2018. One recommendation was not implemented, with the remaining three completed.
 - Hepatitis outbreak officially declared over on October 19, 2018.
 - State Audit released on December 20, 2018; two of the three recommendations have been completed.
 - The 25 of 29 AAR recommendations are completed or in maintenance, with the remaining 4 in progress.
 - On Feb 26, 2019, BOS voted in support of AB262, authored by Assemblymember Todd Gloria, to give local health officers the authority to issue directives to governmental entities during an outbreak.
- C. Hepatitis C Elimination Initiative:** November 20, 2018. BOS approved the initiative with authority to return in November 2019 with recommendations.
- D. Tuberculosis Elimination Initiative:** July 23, 2019. BOS approved the initiative, with authority for TB Control to return to the BOS with recommendations.
- E. BHS and PHS Opioid Response Plan:** July 23, 2019. BHS strategic plan approved. BOS authorized quarterly updates and an annual report.

III. Public Health Issues

- A. August is Immunization Awareness Month.**
- B. September is National Preparedness Month.** <https://www.ready.gov/september>
- C. Asylum Seeker Shelters Continued:**
- The County of San Diego Health and Human Services Agency’s (HHSA) involvement since 12/20/18 is focused on the primary goal to protect the health of the public, including families seeking asylum, by conducting health screening assessments in the setting of the shelter and referring for outside medical care as appropriate and identifying and preventing the spread of communicable disease.
 - The Asylum Seekers Border Shelter established by The San Diego Rapid Response Network is operated by Jewish Family Services with support from other NGOs at a confidential location in San Diego.
 - The common clinical findings based on screenings at the shelter have included influenza like illness, varicella (chicken pox), lice, and scabies. About 1% of guests have been referred out to the emergency department.
 - As of **6/30/19**, HHSA has conducted a total of **13,630** health screening assessments, **with a daily average of 71**.
 - The shelter has moved locations to the County approved property (92101) in the first week of March and has been operating there since March 6, 2019.
 - **Beginning on 7/1/19, University of California, San Diego (UCSD) transitioned into the role of the single entity for care coordination and medical service delivery at the shelter and is now responsible for all services previously provided by HHSA.**
 - **As of 7/22/19, UCSD has conducted a total of 264 health screening assessments post transition on 7/1/19.**
 - **HHSA (including PHS, MCSD, and BHS departments) continues to perform its routine and customary roles of epidemiologic surveillance, identification and communication of public health trends and emerging conditions, support of behavioral health resources, including Psychiatric Emergency Response Teams (PERT), oversight of emergency medical services systems, and other key functions.**

IV. Grants

A. New Applications

1. **CDC Opioid “Data to Action” Public Health Grant**
 - a. HHSA submitted a grant application titled “Data to Action: A San Diego Model for Opioid Overdose Surveillance and Prevention” on May 2, 2019.
 - b. Award notification will be given by **August 15, 2019**.
 - i. If successful, the project will begin at the beginning of the federal fiscal year on October 1, 2019. The full project term will run from October 1, 2019 to September 30, 2022.
 - ii. The funding amount requested was \$2,185,228 per year for up to three years.
 - iii. The total amount requested over the full project term is \$6,555,684.
2. **Kresge Emerging Leaders in Public Health Grant:**
 - a. PHS was accepted into the third cohort of the Kresge Foundation’s Emerging Leaders in Public Health program. In addition to the \$125,000 in grant funding, PHS’ leadership will receive leadership development trainings and technical assistance to help implement their proposed transformative concept – convening

municipal governments and local stakeholders to tackle public health problems affecting the entire region. Interim Report was submitted on 3/29/19.

- b. This new role – **cross-jurisdictional public health strategist** - builds off of the collaboration between city governments and the County to manage sanitation efforts during the hepatitis A outbreak and on prior work with city planners.
 - c. **Face-to-face meetings were held on 1) August 6-8, 2018 (Chapel Hill, NC); 2) January 9-11, 2019 (Jacksonville, FL); May 13-15, 2019 (Chapel Hill, NC). THE last meeting is planned for October 7-10, 2019 .**
 - d. Drs. Wooten and Hernandez met with the City of San Diego (Fall 2018 and Winter 2019) as the first of the 18 municipalities to plan efforts to address the goals of the Kresge initiative, which also aligns with one of the recommendations of the State Hep A Audit.
 - e. **Meetings are being scheduled with the other 17 municipalities and the unincorporated areas, to introduce the initiative and delve into opportunities for communication, coordination, and collaboration.**
 - f. Training workshops have started at the monthly Public Health Leaders Meetings, from April to October 2019, as part of the leadership development component of the initiative.
 - g. The first training took place on 4/22/19 **and will continue on a monthly basis until October 2019.**
- h. Funding**
1. **Maternal Child and Family Health Services (MCFHS) submitted and were awarded two new grant applications:**
 - **CDC-RFA-DP18-1817:** (\$900,000 per year for 5 years) Diabetes and Heart Disease & Stroke Prevent Programs-Innovative State and Local Public Health Strategies to Prevent and Manage Diabetes and Heart Disease and Stroke: This will provide funding for similar strategies that were in Component 1, Diabetes Prevention Program, and Component 2. The application was submitted on July 9, 2018. Notification of the award will occur on September 29, 2018. The County was awarded funding from the CDC for Category B for Heart Disease and Stroke, which will be effective September 30, 2018. MCFHS sent the final budget and work plan to the CDC for approval on October 31, 2018. The Year 2 Continuing Application was submitted to meet the April 1, 2019 deadline. Single source contract with University of California, San Diego Be There San Diego executed on April 1, 2019. Scope of Work for 2-1-1 San Diego submitted to Eligibility with anticipated start date of July 1, 2019. **The 2-1-1 San Diego contract is executed and took effect 7/1/19.**
 - **CDC-RFA-DP18-1813: REACH Grant:** (\$792,000 per year for 5 years) This will provide funding for similar strategies that were in Component 1, strategies 1-4 of the previous Prevention funding. This also has two additions for a tobacco cessation strategy and community linkages. The application was submitted on July 16, 2018. Notification of the award will occur on September 29, 2018. The County was awarded funding from the CDC, which will be effective September 30, 2018. MCFHS sent the final budget and work plan to the CDC for approval on November 15, 2018. The Year 2 Continuing Application was submitted before the deadline on April 15, 2019. Scope of Work for 2-1-1 San Diego submitted to Eligibility with anticipated start date of July 1, 2019. Short-term Scope of Work for Circulate San Diego was sent to CDC for approval with anticipated start date of June 15, 2019. An RFQ was posted for media services on May 23, 2019, with an anticipated effective date of June 24, 2019. **The 2-1-1 San Diego contract is executed and took effect 7/1/19. Circulate San Diego contract is executed and took effect 6/26/19. Cook + Schmidt was selected for the Media RFQ and the contract is anticipated to take effective 8/7/19.**
 2. **Gonorrhea Surveillance:** The Centers for Disease Control and Prevention (CDC) has released the funding opportunity announcement for continued funding for the Gonococcal Isolate Surveillance Project (GISP) and expanded GISP (e-GISP) for the period of 8/1/19-7/31/19. As in previous years, the California Department of Public Health applied for this funding on behalf of San Diego and Orange Counties. This funding supports surveillance of Neisseria gonorrhoeae antimicrobial susceptibility. **Update July 2019: CDPH received notification that San Diego will be funded for GISP in the next cycle. The funding amount is not clear at this time, although it is anticipated to be lower than in previous years.**
 3. **Local Oral Health Program (LOHP):**
 - Funding from California Department of Public Health (Prop. 56).
 - \$841,390/year for 5 years.
 - Overall funding period is 1/1/18 to 6/30/22. Currently in the second year of funding that started 7/1/18.
 - Four contracts executed in FY 18-19 to implement enhanced oral health activities within medical and dental office settings, school based interventions, outreach to vulnerable populations (e.g., refugees and senior population), and evaluation of oral health efforts. Contractors:
 - California American Academy of Pediatrics – Chapter 3 (health care providers).
 - Rady Children’s Hospital (dental providers).
 - University of California San Diego (refugee and senior populations).

- San Diego State University Research Foundation (evaluation).
- San Diego State University Research Foundation launched four survey tools in December as a part of a County wide needs assessment. A draft needs assessment has been submitted highlighting four areas of focus:
 - Increasing public awareness about the importance of prevention, oral health and hygiene.
 - Leverage the patient – provider relationship with pediatricians.
 - Increase the number of dental providers that care for the very young, older adults, and underserved populations.
 - Create system linkages through collaboration and coordination.
- Needs assessments are complete and in the approval process. Program will share draft results at the HSAB Subcommittee meeting on June 4, 2019 for further discussion and planning.
- The draft Community Oral Health Improvement Plan has been submitted and is being reviewed.
- The evaluation component is being developed by San Diego State University - Institute of Public Health contractor and will be submitted for approval in June 2019.
- Oral Health Forum will be held on June 13, 2019 at Marina Village 8:30 am – 3:30 pm (invitations will be going out soon).
 - Keynote speaker (Matt Savage, Professor of Communication at SDSU) will address oral health messaging.
 - Dr Jayanth Kumar, State Dental Director, will also speak on the progress for the state.
 - Dr. Thomas Olinger will present a historical review of oral health in San Diego County as well as look at present and ongoing programs.
 - Breakout Sessions will focus on, medical/dental integration, seniors, refugees, pregnant women and children ages 0-5, school aged children, and homelessness.
 - *Live Well San Diego* Oral Health Champion nominations were reviewed. Selected nominees will be awarded at the Oral Health Forum on June 13, 2019.
- Aging and Independence Services Oral Health Collaboration – begun brief discussion of how Public Health Services and Medical Care Services Divisions can collaborate. Examples plan a webinar to facilitate care. Plans to develop messaging specific to seniors for wide distribution, and oral health staff to present at the Vital Aging Event in June.
- Public Health Center Collaboration – Beginning discussion on efforts to incorporate oral health instruction and the application of fluoride varnish in the Public Health Centers is underway. County staff will be working in conjunction with the UCSD Dental Health Initiative Share the Care contractor to provide staff training to apply the varnish. In addition, assessing the feasibility to have a continuous loop oral health video playing in the waiting area as well as the application of fluoride varnish in conjunction with vaccinations.
- **The Oral Health Forum held on June 13, 2019 was a resounding success with over 100 participants. The State Dental Officer, Jay Kumar, and the Chief of Medi-Cal Dental Services Division, Alani Jackson, were in attendance. Additionally, four community partners received the LWSD Oral Health Champion Awards: Dr. Irvin Silverstein, Dr. Joseph Boulos, Collaborative Dental Group, and the Gary and Mary West Senior Dental Center. An needs assessment was conducted and the work plan submitted to State in May 2019.**

4. Strategic HIV Prevention Projects:

- Funded by the state: PHS will receive \$1.8 million over the next two years (July 2017 through June 2019). There were only four awards, and San Diego County was the only health department that was funded. The other awardees include two community-based organizations (the LA LGBT Center and the San Francisco AIDS Foundation) and one federally qualified health center (AltaMed in LA/Orange County). Funding ends 6/30/19. California Department of Public Health has announced they will be releasing two new RFA's shortly. One RFA will be a demonstration project focusing on rapid linkage to antiretroviral therapy and the second is a continuation of a demonstration project on pre-exposure prophylaxis (PrEP) navigation. **Update July 2019: Funding ended 6/30/19. HSHB applied for funding for the next demonstration project and was not awarded.**
- Strategic HIV Prevention Project focused on a couple of core activities related to Getting to Zero:
 - PrEP education and navigation.
 - Rapid initiation of anti-retroviral therapy (ART) for individuals newly diagnosed with HIV.
 - Awareness Campaigns. The second phase of the Getting to Zero campaign was launched in November 2018 at the Getting to Zero summit. Campaign can be seen at getting2zerosd.com. **Update July 2019: placements of PrEP components of the Getting to Zero campaign were extended through the**

spring/early summer. Movie theatre placements were being placed in four AMC theatres in San Diego (Mission Valley, Fashion Valley, Chula Vista and Oceanside).

5. Tobacco Control Resource Program (TCRP):

- TCRP was notified on July 19, 2018 that the state will allocate \$2,805,276 in Tobacco funds (Prop 56 and Prop 99) for FY 17/18 and \$1,956,059 for FY 18/19. The County submitted paperwork on July 23, 2018 to the State to receive funding for quarter 1 and 2 of FY 18/19. The County received the quarter 1 and 2 Tobacco funds from the state on 9/25/18.
- Additional Tobacco Funding \$182K one time only; pending funding from recent legislation (Prop 56).
- TCRP staff members are working on the Budget revisions that are due on 10/4/18. Included in the changes will be: 1) revision of the FY 17-18 budget to reflect the actual expenses, 2) carrying over savings from FY 17-18 to FY 18-19, 3) reflecting staff vacancies and staffing at lower than budgeted FTE, and 4) increasing the FTE as directed for TCRP staffing. The revised budget and work plan were resubmitted to the state.
- The County posted a Notice of Intent to Award for four regional contracts to Vista Community Clinic, Social Advocates for Youth (SAY) San Diego, American Lung Association of California and Community, Action, Service & Advocacy (CASA). Staff anticipate these 4 new contracts to be executed by 3/8/19. The program anticipates the releasing of a RFP for Media Services in in late February/March 2019. All contracts were executed effective 3/21/19. The Media Services RFP was posted to BuyNet on 3/21/19.
- Effective 5/27/19, Aaron De Leon will serve as Coalition and Community Engagement Lead for TCRP, fulfilling a CDPH-CTCP requirement for a 1.0 FTE staff allocation to focus on adult engagement activities.
- **Contract amendments for four Regional Tobacco contractors is anticipated to be completed by August 2, 2019. Reporting for the period January 1, 2019 – June 30, 2019 are submitted by: a) Progress Report - 7/31/19, and b) Cost Report – 8/30/19.**

6. STD Funding:

- The CDPH STD Control Branch (STDCB) received a \$5 million one-time increase in funding spendable in FY16-17, FY17-18, and FY18-19. Recently received \$427,649 of that amount.
- San Diego received notice of funding award for STD services in the amount of \$1,045,125 for the period of July 1, 2019-July 30, 2024. This represents an annual decrease of \$228,024 per year. CDPH has directed the majority of the funding to health jurisdictions experiencing high rates of congenital syphilis and syphilis among women of childbearing age.

7. CalFresh Healthy Living (Formerly known as NEOP or Nutrition Education and Obesity Prevention, through the SNAP-ED Program):

- Next 3-year cycle application and work plan due March 15, 2019; activities will continue to focus on policy, systems, and environmental change for nutrition and PA.
- The next three-year grant cycle begins on October 1, 2019 and ends on September 30, 2022. The projected amount for the new three-year term is \$3,704,059 annually/\$11,112,177 cumulative with approximate additional funds of \$555,608 annually/\$1,666,827 cumulative, for a total projected amount of approximately \$12,779,004. MCFHS started the contract procurement process. The County hosted an industry day on November 29, 2018 to gather input for the scope of work.
- NEOP Integrative Work Plan is now due April 2nd and not March 15th.
- Work plan was submitted to meet 4/2/19 deadline.

8. Perinatal Equity Initiative:

- The California Department of Public Health (CDPH) notified MCHFS of the allocation of \$448,047 (base of \$350,000 with an adjustment of \$98,047) for the Perinatal Equity Initiative (PEI) planning grant to expand the scope of interventions to reduce infant mortality among African Americans.
- **CDPH will released a Request for Supplemental Information in July 2019. RSI is due back to State by September 3, 2019. CDPH will fund PEI programs for a three-year cycle FY 19-20 to FY 21-22, annual funding amount is \$484.310.**
- Convened a Community Engagement Event on April 8, 2019 at the Jacobs Center Community Room. Over 50 community partners participated in providing input on what are some factors that impact preterm births and what strategies/interventions should be implemented to improve the health of African-American mothers and babies. A second Community Engagement Event will occur on June 4, 2019, in Oceanside.

9. Childhood Obesity Prevention Services:

- The RFP for Childhood Obesity Prevention Services was posted to BuyNet on 2/22/19. Closing date was 3/22/19.
 - **Notice of Award to fund the University of California, San Diego Center for Community Health to facilitate the Childhood Obesity Initiative was made on 7/22/19; contract negotiations were held on 7/26/19.**
 - **The State of Childhood Obesity Report (data spanning 2016-2017 and 2017-2018 academic years) will tentatively be released in September 2019 that provides updates to obesity trends among school-aged children in San Diego County. There are no significant change in childhood obesity trends.**
10. **Live Well @ Work:**
- **Pending budget approval in June by BOS, one-time funds of \$390,609 allocated to build and implement the LW@W Recognition Program platform.**
11. **Diabetes Prevention Program (DPP):**
- **Pending budget approval in June by BOS, ongoing funding of \$196,000 allocated to staff and sustain DPP program.**
12. **Maternal, Child and Adolescent Health funding sources amounts have remained the same from previous 18/19 fiscal year:**
- **FY 19 -20 Funding Source and Allocation:**
 - **MCAH Title V Funding: \$328,936**
 - **BIH Title V Funding: \$308,785**
 - **BIH State General Fund: \$295,794**
 - **SIDS Funding: \$ 23,324**

3. Public Health Initiatives

B. Major Initiative Updates and Highlights

1. **Getting to Zero** – Medical Advisory Committee: HIV, STD, and Hepatitis Branch (HSHB) has convened a Medical Advisory Committee consisting of healthcare professionals and executives from local healthcare systems and stakeholders to support Getting to Zero. The primary objectives of the committee are to increase routine HIV testing in healthcare settings and to optimize referral mechanisms for HIV linkage to care, pre-exposure prophylaxis, and post-exposure prophylaxis. Met with the Hospital Association of San Diego & Imperial Counties and community clinic networks on March 14, 2018; Met with San Diego County Medical Society on April 10, 2018; Met with Family Health Centers of San Diego on April 11, 2018. The “Getting to Zero” Board Memo went to the Board of Supervisors on June 26th. The Medical Advisory Committee met in June 2018. HSHB is working with the marketing company, MIG/MJE, to develop a “Getting to Zero” campaign to be launched at the end of November 2018. The PrEPSanDiego campaign will be a component of the “Getting to Zero” campaign, which addresses three main pillars: Test, Treat, and Prevent. The development of the expanded Getting to Zero (GTZ) marketing and media campaign has been completed. The press release and campaign launch occurred November 29, 2018, in conjunction with the Getting to Zero Summit. Speakers included Supervisor Roberts, Alberto Cortes (Mama’s Kitchen), Sayone Thihalolipavan, Patrick Loose and John Paul Hernandez (advocate). The GTZ Summit and campaign were covered by KPBS, KUSI and the County News Network. The Medical Advisory Committee last met on January 14, 2019. The Pacific AIDS Education Training Center (PAETC) presented information on how the organization can support the work of the GTZ Medical Advisory Committee. The committee reviewed a draft Dear Colleague letter that outlines the County recommendation for routine HIV testing, regardless of risk factors for everyone aged 13-65 at least one time. The next meeting of the GTZ Medical Advisory Committee was scheduled for March 11, 2019. Update, March 2019: The March 11, 2019 meeting was cancelled due to low availability of committee members to attend. Next meeting took place on April 8, 2019. The CAHAN regarding routine HIV testing and supporting documents was disseminated on March 25, 2019. Partners also have pushed it out to all credentialed providers at Naval Medical Center San Diego and emergency department medical directors. **Update July 2019: The Getting to Zero slide deck was approved by the PHO on 6/21/19 and disseminated to committee members to use in their outreach efforts. The Medical Advisory Committee met on July 8, 2019 and discussed some issues regarding data sharing of HIV test results. Also, the committee members stated that they need the support of hospital executives to implement routine HIV testing at their institutions. Dr. Tilghman reached out to HASDIC to get on the agenda of one of their upcoming meetings. Meeting at the Emergency Medical Oversight Commission of the San Diego County Medical Society is also planned. Also, the suggestion was made for a Board of Supervisors champion to encourage healthcare systems to adopt routine HIV testing.**
2. **Hepatitis C Initiative – Approved by the Board of Supervisors in November of 2018.**
- The initiative is on track and continues to be a collective impact approach with American Liver Foundation providing a coordination role along with the participation and leadership of multiple other stakeholders.

- Meetings for all committees have initiated and on track (Steering; Research and Surveillance; Access, Testing, and Treatment; and Consumer).
- First Advisory Committee Meeting was held on April 30, 2019 at the San Diego County Medical Society. Paul Hegyi and Dr. Wooten co-chaired the meeting. Next meetings are planned for 8/26/19 and 10/15/19.

7. Legislation

- a. AB 262 – Introduction of Assembly Bill 262 is an addition to Health and Safety Code Section 120175.5 related to the authority of the local public health officer. This bill specifies the following:
 - Would require local health officer to notify and update the local governmental entities within the health officer's jurisdiction about communicate disease outbreaks that may affect them, and make relevant information available to those entities, as specified.

- Further, this bill would authorize the local public health officer to issue directives to other governmental entities.
(a), if the local health officer knows or has reason to believe that any case of the diseases made reportable by regulation of the department, or any other contagious, infectious or communicable disease exists, or has recently existed, within the territory under that health officer's jurisdiction, the health officer may issue directives to other governmental entities within that jurisdiction to take any action the health officer deems necessary to control the spread of the communicable disease.
