Land Acknowledgement

Public Health Services would like to begin by acknowledging the Indigenous Peoples of all the lands that we are on today. While we are meeting on a virtual platform, I would like to take a moment to acknowledge the importance of the lands, which we each call home. We respectfully acknowledge that we are on the traditional territory of the Kumeyaay. We offer our gratitude to the First Nations for their care for, and teachings about, our earth and our relations. May we honor those teachings.

CAHAN San Diego – Hep A

To: CAHAN San Diego Participants

Date: May 16, 2023

From: Public Health Services

Health Advisory Update #1: Increased Hepatitis A Cases Associated with Homelessness, Drug Use in San Diego County

Key Messages

- Twenty-eight cases of acute hepatitis A virus (HAV) infections have been confirmed in San Diego County residents since the beginning of 2023. The majority were persons experiencing homelessness (PEH) and illicit drug users.
- Early identification of cases, post exposure prophylaxis, and vaccination of at-risk populations are the keys to prevention of hepatitis A.
- Vaccination of PEH is recommended in settings such as emergency departments, federally qualified healthcare centers and any acute care settings.
- Report all suspect and confirmed HAV cases to the Epidemiology Unit by faxing a Confidential Morbidity Report, or by calling 619-692-8499 (Monday-Friday 8 AM-5 PM), or 858-565-5255 (after hours).

CAHAN San Diego - Mpox

To: CAHAN San Diego Participants

Date: May 16, 2023

From: Public Health Services

Health Advisory Update #6: Potential Risk for Mpox Resurgence

Key Messages

- The Chicago Department of Public Health has identified a cluster of 12 confirmed cases and one probable case of mpox (formerly monkeypox) from April 17, 2023, to May 5, 2023.
- Nine (69%) of the 13 cases reported in Chicago had received two doses of the JYNNEOS mpox vaccine.
- Although vaccine-induced immunity is not complete, vaccination of persons who are vulnerable to mpox remains the most important strategy to prevent new infections and may decrease severity of illness in cases of breakthrough infection.
- Providers should be on alert for new cases of mpox and, in addition to encouraging vaccination for people at risk, should ensure availability of mpox evaluation, testing, and/or treatment when clinically indicated.
- The County of San Diego Sexually Transmitted Diseases (STD) clinics accept referrals for mpox vaccination, evaluation, testing, and treatment, which can be arranged by calling (619) 692-5500.

Virtual Train-the-Trainer Workshops

4 Train-the-Trainer Workshops will be offered over 15 weeks.

Participating SNFs should designate and register 2–4 representatives to attend each 90-minute workshop (i.e., IP, DON, DSD, NHA, EVS Manager, CNA Champion, Corporate Leadership). The representatives that attend each of the 4 workshops do not need to be the same for each workshop topic. Following completion of each workshop, trainees will be expected to train SNF staff on the IPC practices taught in each workshop.

Workshop Topics

All times are Pacific Standard Time (PST). Trainings are repeated four times per week for each workshop topic to accommodate schedules. Choose one day/time per workshop topic to attend.
