

CANDIDA AURIS (*C. auris*)

Also known as, *Candidozyma auris*

Frequently Asked Questions for Patients and Family Members

What is *C. auris*?

- It is a yeast that can survive in healthcare settings for a long time.

What is the risk?

- It can spread quickly in healthcare settings.
- *C. auris* infections are often difficult to treat and can even lead to death in very sick patients.

How should I protect myself?

- Tell your doctor if you have ever been diagnosed with *C. auris* or another drug resistant infection.
- You have a right to be treated with clean hands. All healthcare staff have to wash their hands or use hand sanitizer before they touch you or any tubes attached to your body. If you did not see them wash their hands, it is ok to ask them to.
- Your visitors care about you. It's ok to ask them to wash their hands or use hand sanitizer.
- Staff might come into your room to clean and disinfect. Please follow their instructions on what to do during this process. They do this to help prevent the spread of germs.

What if I have questions?

- Ask your doctor or nurse.
- Visit our website at www.sdhai.org for more information or scan the QR code to the right.
