

WOMEN SHINE

 **iSTRIVE**

UC San Diego Health

The Purpose

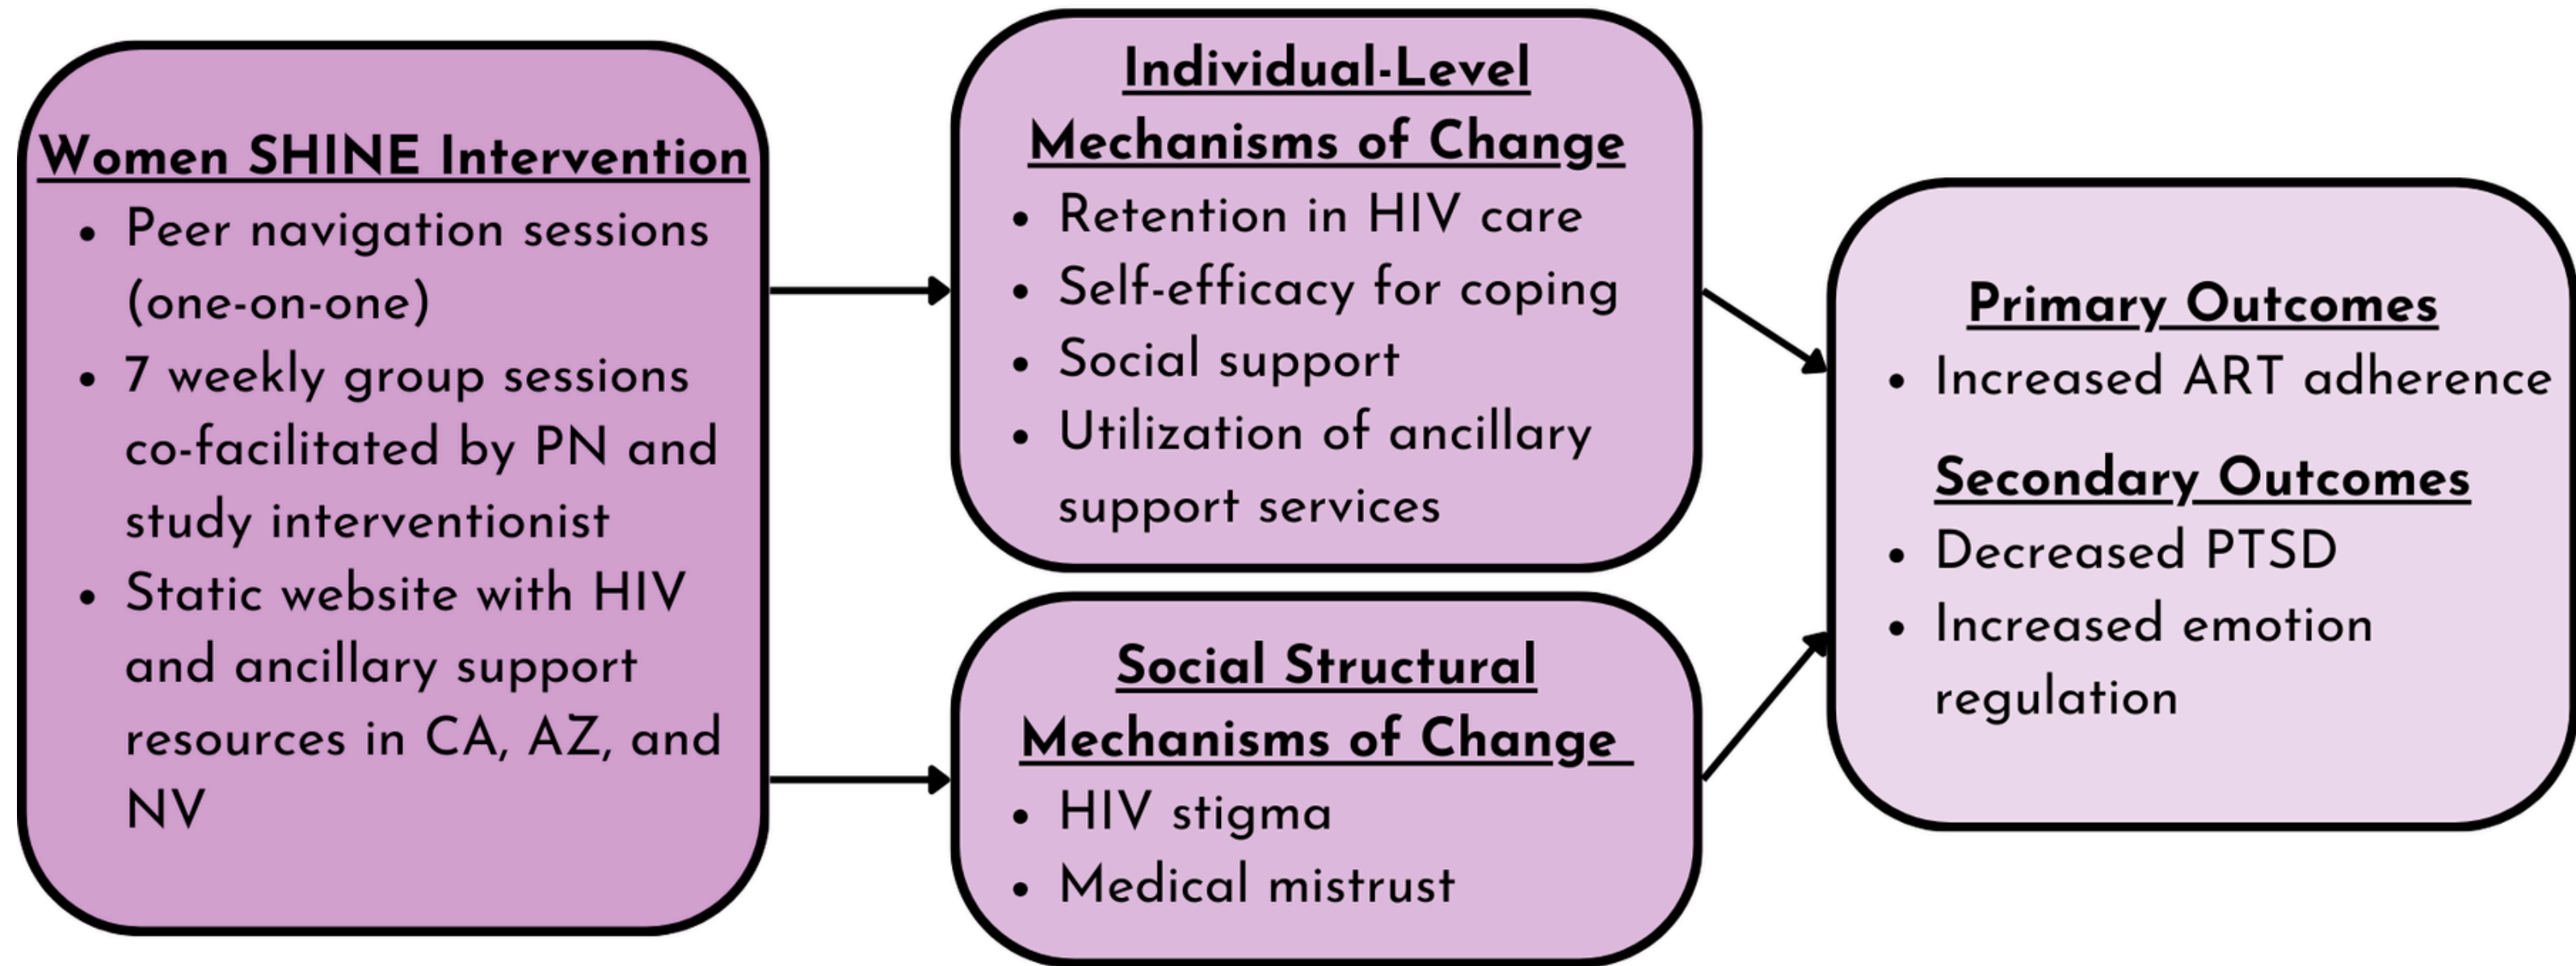

Women SHINE is a research study hosted by the University of California San Diego aimed at helping women living with HIV to access and stay engaged with their HIV care.

Some women living with HIV face challenges engaging in care while experiencing depression or social isolation, stigma, and/or lack of social support. The goal of the Women SHINE program is to provide skills to help women manage these challenges to improve engagement with HIV care through peer support.

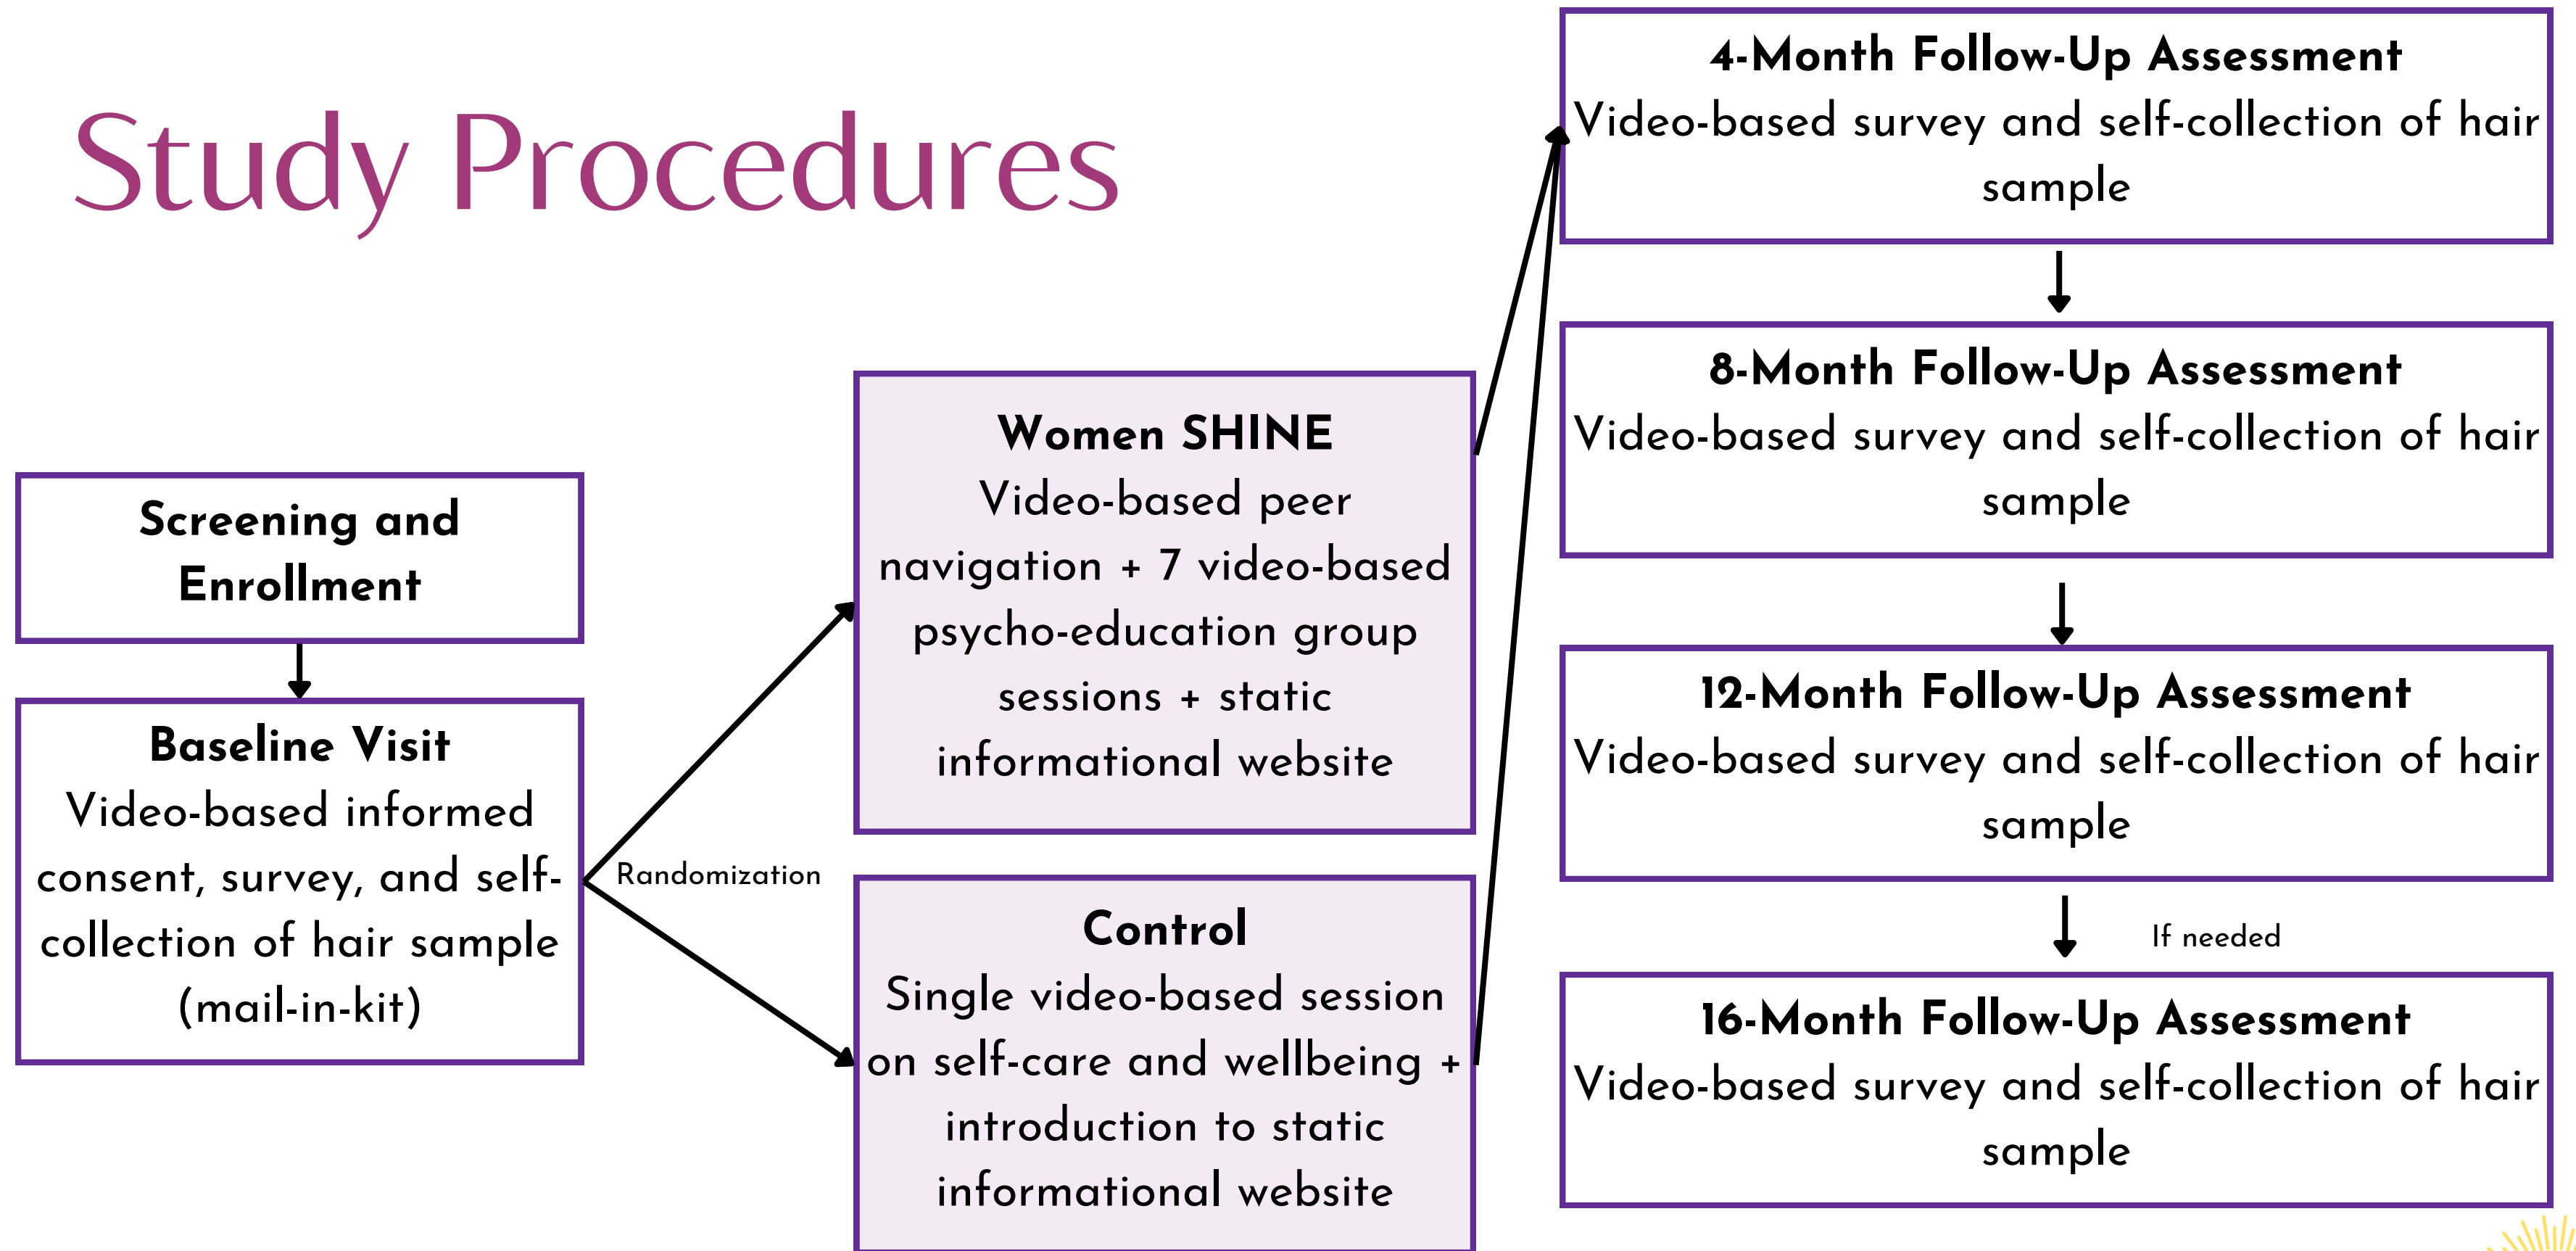

WOMEN SHINE

Conceptual Model

Study Procedures
