Crime Lab Career Path

SanDiegoCounty.gov

The Sheriff's Crime Laboratory provides forensic expertise and state-of-the-art scientific technology for the analysis of evidence in support of the criminal justice system and more than 30 local, state, and federal agencies. Examiners perform forensic analysis of physical evidence including controlled substances, crime scene investigations, firearms, forensic alcohol, toxicology, forensic biology, latent prints, questioned documents, and trace evidence. Additionally, the Crime Laboratory provides expert scientific testimony to the various courts throughout San Diego County. For more detailed information on each position, you can access the class specifications by selecting the desired role.
