CLIMATE SOLUTIONS**

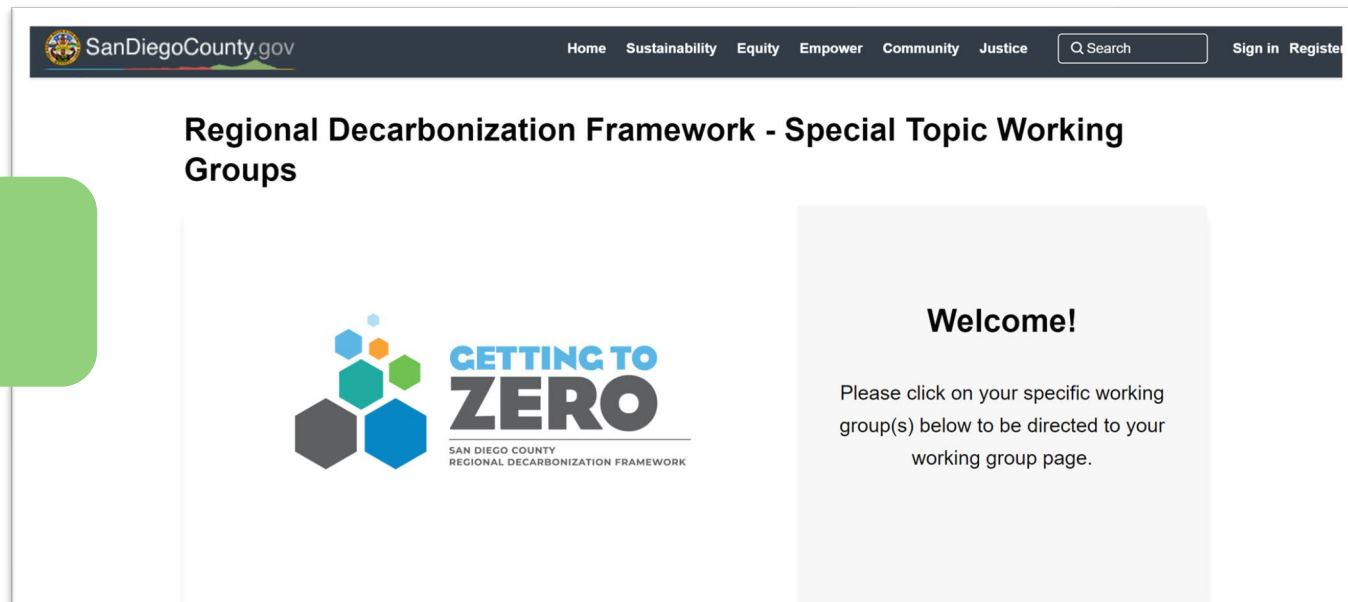

TRANSPORTATION

Engagement Portal

- Special Topic Working Group Engagement Portal:
<https://engage.sandiegocounty.gov/hub-page/working-groups>
 - Central area where all workshop materials, agendas, recordings, notes etc. will be stored.
 - Can also access the working group portal through the RDF engagement site
- Only have access to working groups that you have shown interest in via interest form

Questions/Concerns email us at:
ZeroCarbon@sdcounty.ca.gov

Today's Agenda

- Introduction to the Implementation Playbook (10 minutes)
- Electricity (90 minutes)
 - Emissions and Strategies to Decarbonize Electricity (5 minutes)
 - Grid Supply Introduction (5 minutes) and Discussion (25 minutes)
 - Customer Supply Introduction (5 minutes) and Discussion (25 minutes)
 - Open Discussion on Electricity Topics **Not** Discussed (25 minutes)
- Closing (5 minutes)

Integrated Regional Decarbonization Framework

Technical Report led by
UC San Diego and USD

Completed
August 2022

Workforce Development
Study by Inclusive
Economics

Completed
August 2022

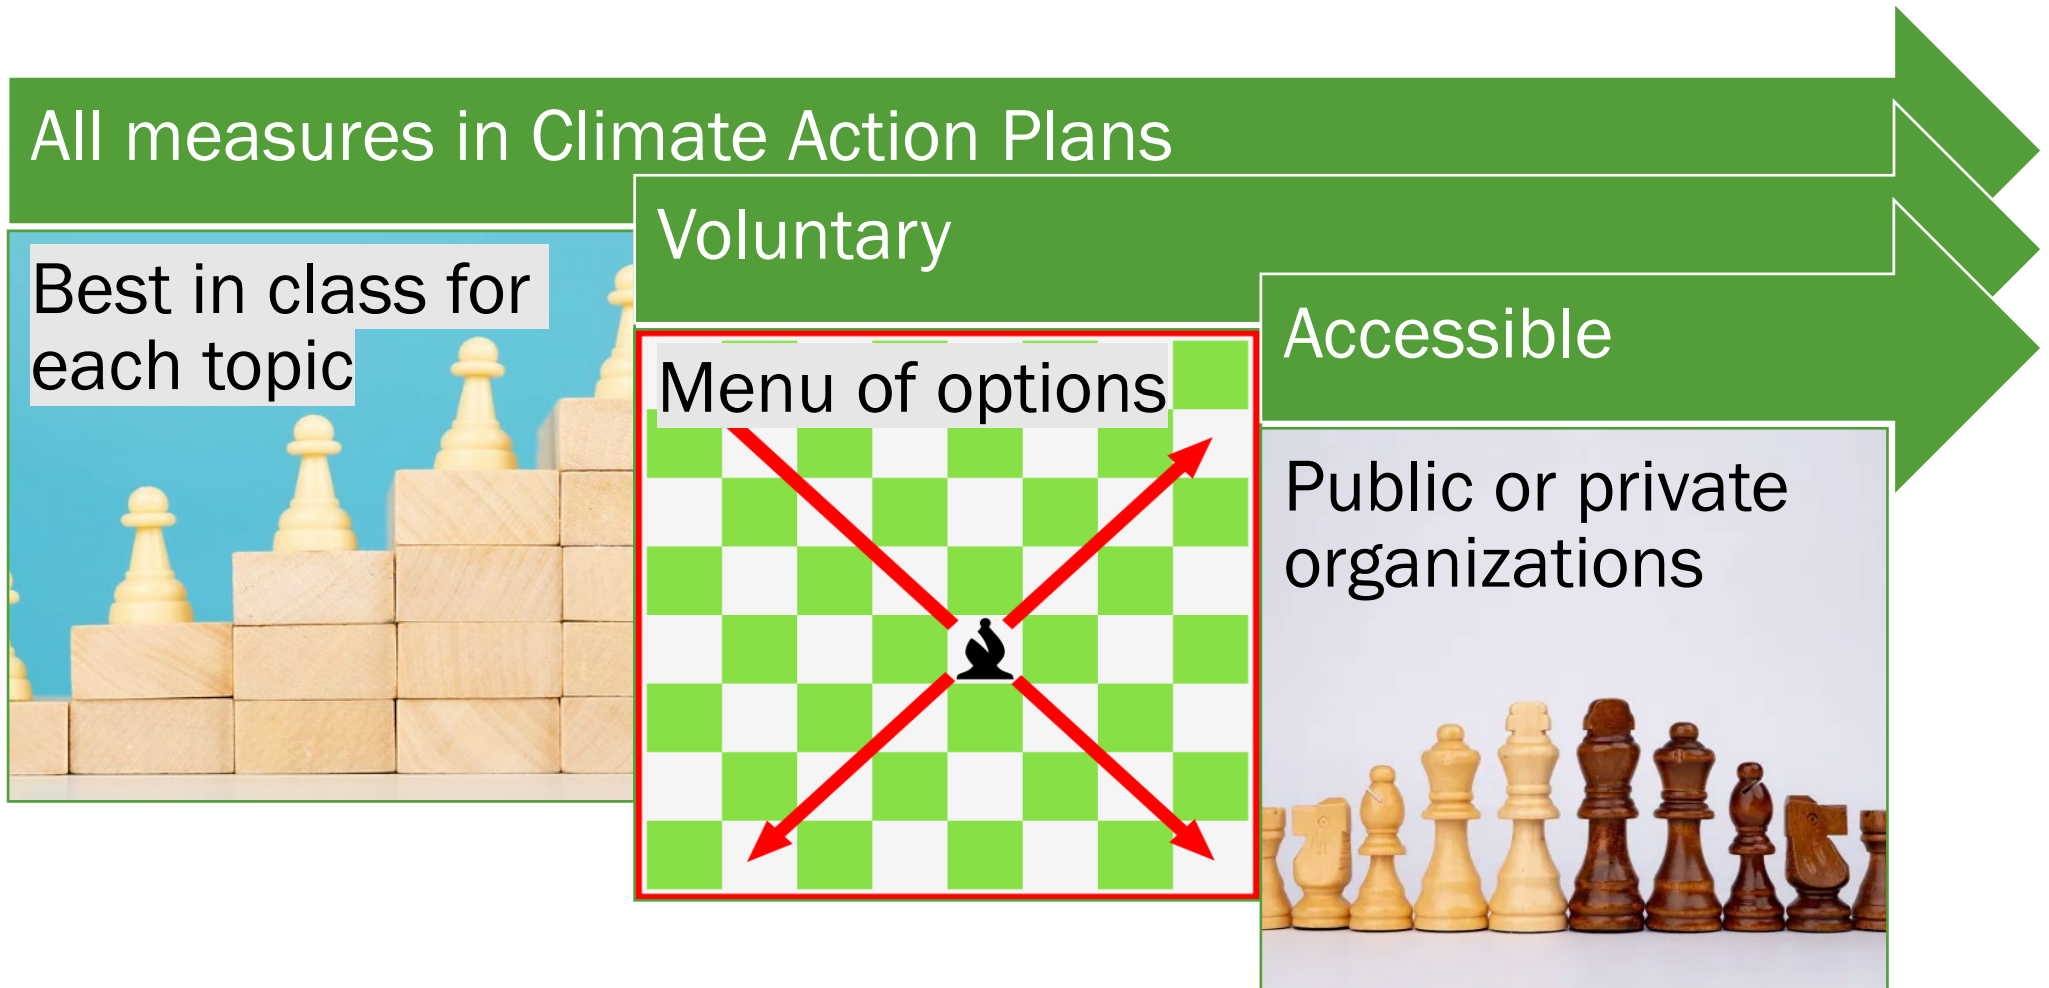

Implementation
Playbook

1st Draft December 2022
2nd Draft February 2023
Final by Spring 2023

Implementation Playbook

Implementation Playbook: Level of Approach

Organizational
Operations

Community

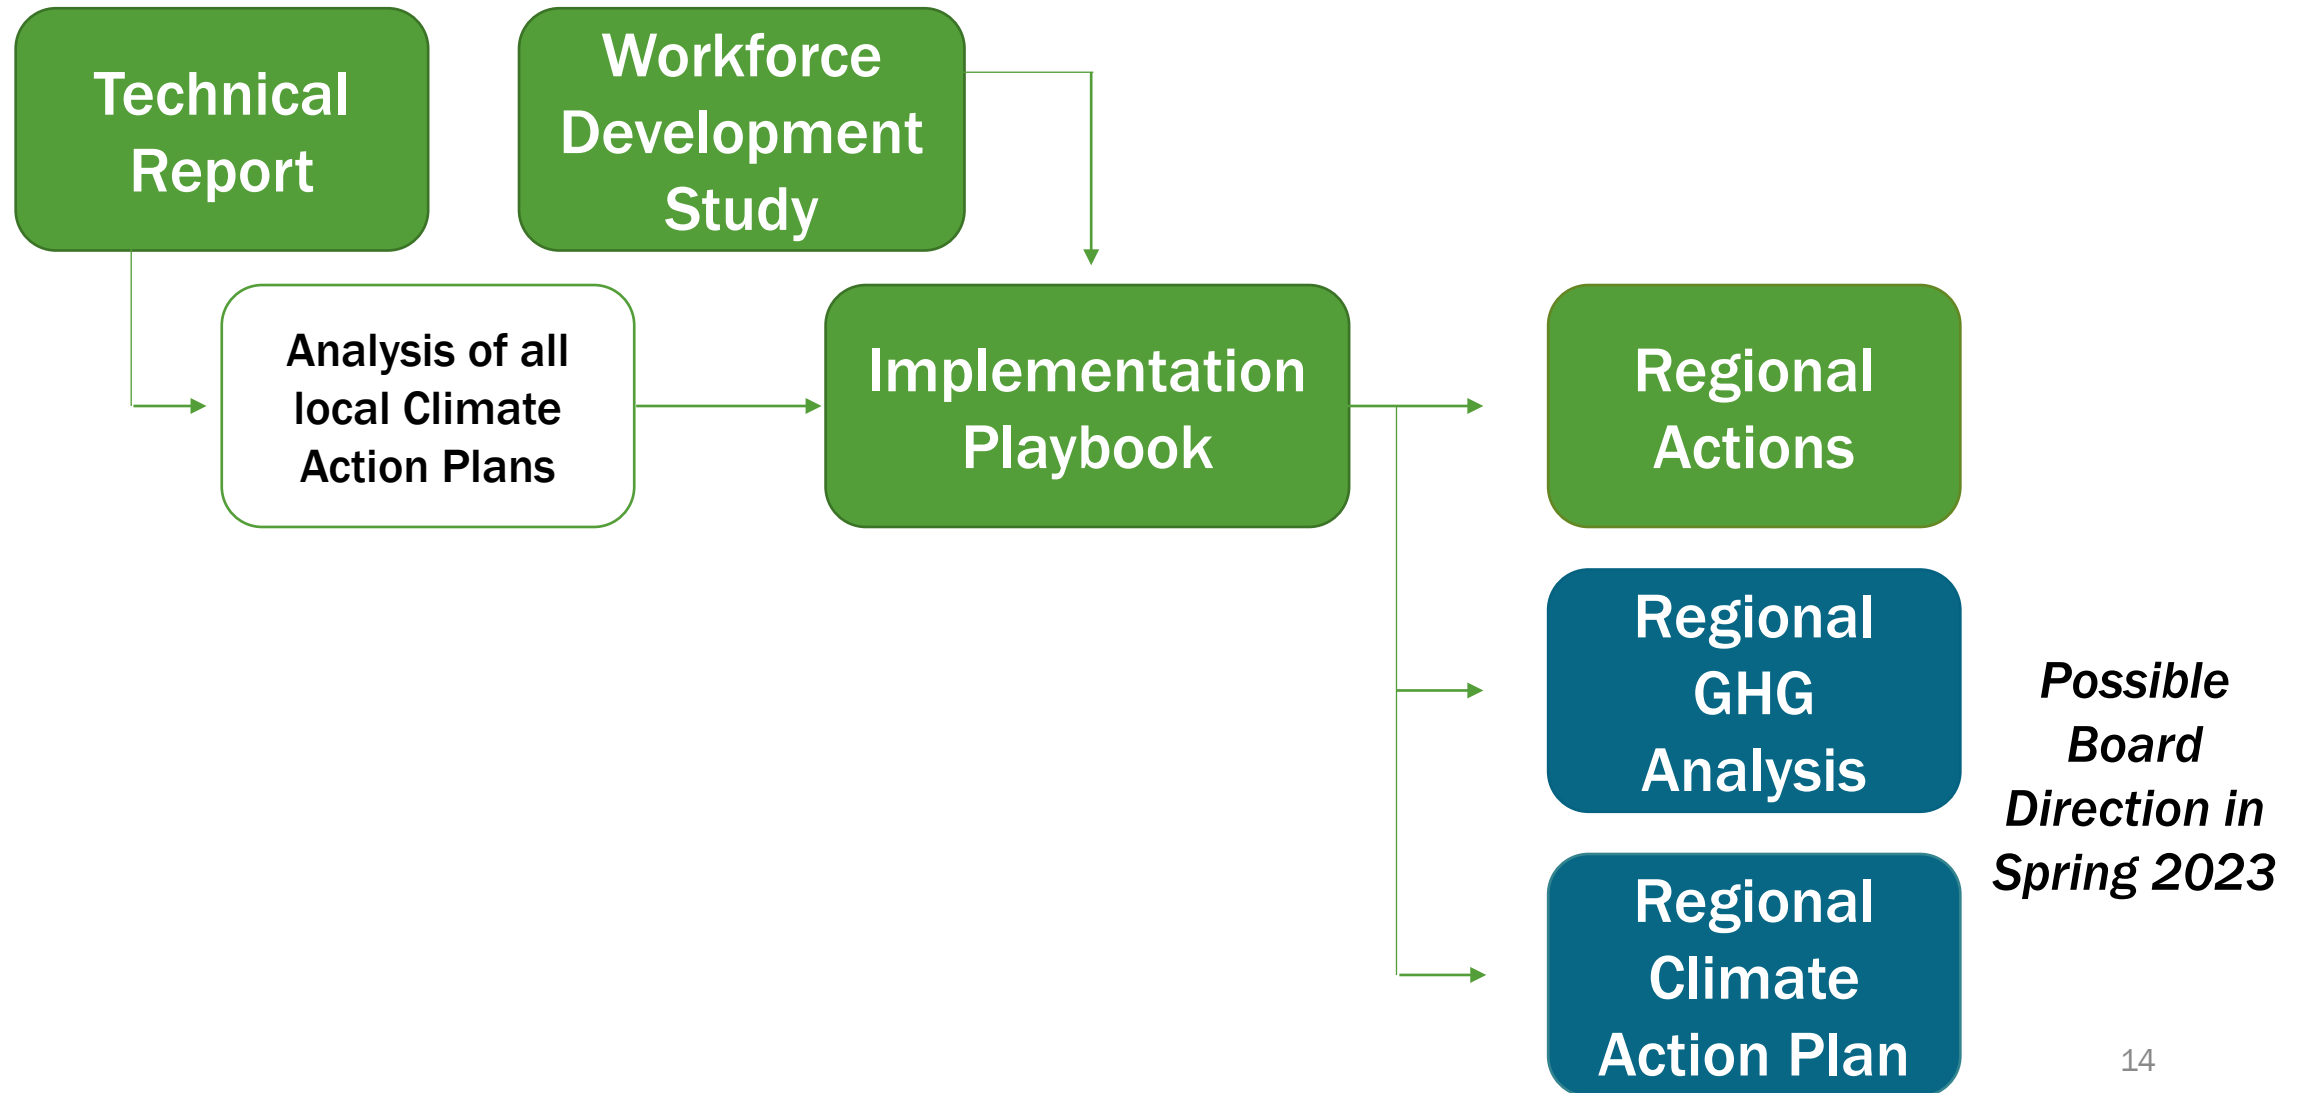

Region

What we need from you....

1. In your experience what has worked or not worked in terms of existing policies?
2. What programs could benefit underserved communities or have adverse impacts?
3. What are solutions that are not in the data base?

What is Next?

Decarbonizing Electricity

Regional GHG Emissions – Main Sources

On-Road
Transportation

48%

Electricity

20%

Natural Gas

12%

80%

of total GHG emissions
in the San Diego region

Regional GHG Emissions – Other Sources

Industrial Gases

8%

Other Fuels
(e.g., wood, propane)

4%

Off-Road
Transportation

4%

Solid Waste

2%

Water, Aviation, Rail, Wastewater,
Agriculture, Marine Vessels, Fertilizers

1% or less each

Decarbonizing the Electric Supply

Grid Supply

- At the utility scale of operations, large power plants
- Example: Solar or wind farm in Imperial Valley
- Involves utilities and other entities that purchase electricity for customers

Customer Supply

- At the scale of a building or campus, where electricity generation is located at the customer's site
- Example: Rooftop or parking lot solar generation projects
- Involves homes, businesses, local governments, etc.

Grid Supply – Laws and Programs

- State Law/Regulation
 - Senate Bill 100
 - 60% renewable by 2030
 - 100% carbon-free by 2045
- Regional Action
 - Community Choice Aggregation (CCA) Programs
 - Purchase Electricity on Behalf of Citizens and Businesses
 - SDG&E still delivers electricity over their power grid
 - Two CCA Programs in the San Diego region
 - San Diego Community Power
 - Clean Energy Alliance

Grid Supply – Other Key Considerations

California's plan to reduce GHG emissions

- Decarbonize electricity
- Electrify transportation
- Electrify buildings

GHG reductions from buildings and transportation hinge on decarbonizing electricity = central role in this process

Changes to grid electricity supply affect all customers

Transmission needed to bring electricity from generation point to customers

Grid Supply – Example Actions

Organizational Operations

- Purchase 100% carbon-free electricity for operations/facilities

Community

- Join a Community Choice Aggregation (CCA) program
- Set default CCA service to 100% carbon-free electricity

Region

- Form and implement a CCA program
- Accelerate 100% carbon-free supply

Grid Supply Discussion

Customer Supply – Laws and Programs

- State Requirements

- Title 24 Building Energy Code
 - 3-year cycle – newest codes take effect 1-1-2023
 - New buildings, and alterations and additions
 - Trend toward electrification, onsite renewable energy generation, and storage

- Financial Incentives

- Federal tax credits
- Single family Affordable Solar Homes Program (SASH)
- Multifamily Affordable Solar Homes Program (MASH)
- Financing

Customer Supply – Other Key Considerations

Buildings

- 1% of buildings built new each year
- 80% of buildings that will be here in 2050 already exist

Equity

- Most solar in neighborhoods with higher incomes and higher homeownership
- Proportion of systems in communities of concern increasing in recent years
 - Due, in part, to focused programs (previous slide)

Customer Supply – Example Actions

Organizational Operations

- Install rooftop solar on own buildings and in parking lots

Community

- Adopt a policy to streamline permitting process for rooftop solar projects
- Require solar on certain buildings

Region

- Conduct an analysis to determine equity implications of distributed renewable electricity programs
- Develop programs to help local governments evaluate policy options on distributed renewable electricity generation

Customer Supply Discussion

Open Discussion – Electricity

Additional Slides for Q + A

Timeline

Public Outreach: Fall 2022 - Spring 2023

Special Topic Working Groups

Sept – Nov 2022

Electricity
Buildings
Transportation
Land Use & Natural
Solutions
Food Systems & Circular
Economy

Regional Social Equity Working Group

Sept 2022 and
Onwards

Social Equity Guidance

Public Workshops

Oct 2022
Dec 2022
Feb 2023

Regional Convenings by Supervisorial District

Jan – Feb 2023

5 supervisorial
districts

Technical Working Group

Ongoing

Experts in relevant
fields as-needed

Implementation Playbook: Examples

Buildings

- Better use of energy in existing buildings

Electricity

- Educate residents & businesses about 100% renewable energy options

Food Systems & Circular Economy

- Bulk purchase of food
- Waste diversion from landfills

Land Use & Natural Climate Solutions

- Green streets

Transportation

- Retire polluting vehicles

Regional Actions: Examples

Solar electricity for
low-income renters

Model building code
for electrification

Regional program for
suitable tree planting
locations
