

Campo/Lake Morena Community Trails and Pathways Plan

Trails: The Community Connection

The Community Trails Master Plan will be utilized to develop a system of interconnected regional and community trails and pathways. These trails and pathways are intended to address an established public need for recreation and transportation, but will also provide health and quality of life benefits associated with hiking, biking, and horseback riding throughout the County’s biologically diverse environments.

Community trails serve a different function than regional trails, which are focused on the provision of long linear distances. Instead, community trails are “local public facilities” in close proximity to residents that provide transportation, recreation, access, infrastructure, linkages and safe routes throughout a community.

The Community Trails Master Plan (CTMP) involves both trail development and management on public, semi-public and private lands. The CTMP has established two forms of non-motorized facilities called “Trails” and “Pathways” that provide passive recreational, and alternative modes of transportation.

Pacific Crest National Scenic Trail near Campo

Trails are typically away from vehicular roads that are primarily recreational in nature but can also serve as an alternative mode of transportation. They are soft-surface facilities for single or multiple uses by pedestrians, equestrians, and mountain bicyclists.

Pathways are a non-motorized transportation facility located within a parkway or road right of way. A riding and hiking trail located in the road right of way is considered a pathway. They are soft-surfaced facilities intended to serve both circulation and recreation purposes. Pathways help make critical

connections and are an integral part of a functional trail system.

COMMUNITY TRAIL STATEMENT

It is important to the legacy of the Campo/Lake Morena history to establish a network of riding and hiking trails connecting its different areas. This network should be physically and functionally integrated with other major transportation needs, while preserving the rural heritage of our special place.

The Southern Terminus of the popular “Pacific Crest National Scenic Trail” is located south of Campo near the Mexican border. Zigzagging 2,650 miles north to the Canadian border, this major County Regional Trail provides for current and future trail connections within the Campo/Lake Moreno area.

Known as the last home for the famous Buffalo Soldiers, a World War II Army and Prisoner of War camp, the proposed Camp Lockett State Historic Park will also provide trail connections in and around the park area.

Campo, Cameron Corners, and Lake Morena have many large and small scale horse and cattle ranches that exemplify the rural imagery of the community. Maintaining and enhancing this life style should be an important consideration for those wishing to develop within the community and surrounding areas. Please refer to our Community Character Statement at www.merit-campo.org.

A public trail system is vital to the preservation of our open space and rural heritage. It is therefore the task of this ad hoc committee to prioritize and develop a trail system, to be approved by the Planning Group and incorporated into the existing County trail system.

THE NEED FOR TRAILS

The community trail needs are based on an equation established by the Trails System Assessment (TSA) in 2001, which identified a minimum baseline level of service for each community by population. The Baseline Level of Service or Trail Need is 0.8 miles of trail per 1,000 people.

The “Trail Need” is the minimum length of trail miles (baseline level of service) for each Community and Subregional Plan Area. The TSA calculations for community trail needs are as follows:

- **Trail Need** = (Community Population /1,000 residents x 0.8 miles of trails)
- **2000 Trail Need** = (2000 population /1,000 residents x 0.8 miles of trails)
- **2020 Trail Need** = (2020 population /1,000 residents x 0.8 miles of trails)

Population statistics from the 2000 U.S. Census were used to determine the current trail needs in Campo/Lake Morena. Based on the census, the population of the Campo/Lake Morena Community Plan Area is 3015 and there is a current need for 2 miles of community trails. In the year 2020, the population is projected to

increase to 4970 and there would be a future need for 3 miles of community trails.

For additional information about the baseline level of service and trail needs, please refer to the discussion under “**The Need for Trails**” and **Tables NT-1 and NT-2** in the CTMP.

COUNTYWIDE TRAIL GOALS AND POLICIES

The “**Countywide Goals and Policies**” contained in the Community Trails Master Plan apply to all community and sub-regional plan areas. Community-specific guidelines are intended to accommodate specific community needs and they will be implemented when feasible. Where Community specific goals and policies are not addressed, the “**Countywide Goals and Policies**” contained in the CTMP shall apply.

DESIGN AND CONSTRUCTION GUIDELINES

Countywide trail guidelines in the Community Trails Master Plan apply to all community and sub-regional plan areas. Community-specific guidelines are intended to accommodate specific community needs and they will be implemented when feasible. Where Community specific guidelines are not addressed, the Countywide “**Design and Construction Guidelines**” contained in the CTMP shall apply.

CAMPO/LAKE MORENA COMMUNITY TRAILS MAP SUMMARY

As a result of the community trails outreach process for development of the CTMP, the Campo/Lake Morena Community Planning Group completed several tasks, and prioritized community trails and pathways as well as their special features. Each trail and pathway was labeled and recorded producing a community trails map and index.

Proposed trails shown on trails maps contained in the Community Trail Master Plan depict corridors of general alignments. The term “general alignment” is used to describe the general location of a future trail within a designated corridor so that the specific alignment can be determined during the review and approval process when a discretionary application is submitted for a development permit for land that includes a trail corridor. The designated corridor is approximately one-quarter mile wide. A general alignment is useful because it allows the trail to be located to avoid extreme topographical conditions, sensitive habit or other site-specific constraints.

CAMPO/LAKE MORENA COMMUNITY TRAILS MAP INDEX

The following community trails map index was completed by the Campo/Lake Morena Community Planning Group and will be used as a reference tool. Neighboring communities are italicized and where trail or

COUNTY TRAILS PROGRAM
COMMUNITY TRAILS MASTER PLAN

pathway connections exist, the community trail name and number are included.
