

A 3D architectural rendering of a two-story house. The main body of the house is finished with white stucco and has a brown tiled roof. The front facade features a central white door with a transom window, flanked by two windows with white frames and dark shutters. Above the door is a large, multi-paned window. To the right, a section of the house is constructed of red brick, featuring two more windows. A small brick chimney is visible on the roofline. The house is set against a plain white background.

Architectural elevation drawing of a two-story house. The exterior features a combination of brick and stucco. The roof is covered in brown tiles. The house includes a two-car garage with a dark wood door, a central arched entrance, and several windows with dark shutters. The drawing includes height dimensions on the left side: ±24'-7" total height, 9'-1" for the upper stucco section, 8'-0" for the upper brick section, 10'-1" for the lower brick section, and 8'-0" for the lower stucco section.

(c)

An architectural elevation drawing of a two-story house. The house features a light-colored stucco exterior and a multi-colored tiled roof. On the left side, there is a gabled section with a small square window in the gable. The second floor of this section has three windows: a small square window, a medium square window, and a large double window. The first floor has a large triple window on the left and a single square window to its right. In the center, there is a recessed entrance area with a large glass door and a small square window above it. To the right, there is another gabled section with a small square window in the gable. The second floor features three arched windows, and the first floor has a large triple window. A small chimney is visible on the far right side of the house.
